Another information was filed against him charging him with resisting an officer, but the charge was not sustained, and he was released.

Joseph Anton and John Echan, a couple of peddlers from Hannasburg, were taken before Judge McGee to explain why they had not secured a license. The disbarment case against Colonel D. B. Daley in the federal court came to naught, and has been dropped. The plaintiff, Mrs. Eliza Shack, claimed that the defendant failed to turn over money he had collected for her, which she claimed belonged to her. The case was compromised on the outside, and there was nothing left for the court to do in the matter.

The second floor of the city jail is being out in first class order and fitted up for the use of the police department. Private offices are being partitioned off, and everything is being cleaned up and repaired. At best, these quarters are really needed for other purposes. For this reason a move is on foot to have another story added to the patrol house, to be fitted up for police headquarters, as several of the aldermen favor. The idea is very probable for the work it will be done.

THE NEWS IN THE BLUFFS.

Aldermen Say Reform Is Necessary in the Fire Department.

PUSHING THE CREAMERY SCHEME.

The Second Annual Art Exhibit—A Series of Runaways—A Very Healthy Showing—The Plumbers' Ball.

Charles Nicholson, the belligerent assistant fire chief, gave himself up at police headquarters yesterday morning. The case against him for assault and battery was called, but he was not ready for trial and the case was continued until today. The indications are that Nicholson has "put his foot in it" to a very considerable depth. He is laid off yesterday for ten days by Chief Walters—at least the chief made an unsuccessful attempt to lay him off, but Nicholson stated that his job went to him first-rate, and he would hang on to it for a while longer. There is a probability, however, that he will find his pay about ten days short at the end of the month. Whether any other action will be taken is not yet decided.

It was reported yesterday that the fire committee would investigate the case this morning. Chairman Casper of that committee was seen and asked about the matter. He denied that he had any action to be taken. "In the first place," said he, "I want to understand that I am not pledged to Nicholson or anybody else. As far as that matter is concerned, I have no say. Several of them stated that I did not think it advisable to make a sweeping change in the department all at once, and I will hold the belief. As the committee has assumed the duty of doing something that the fire committee has nothing to do with. The chief of the department appointed me, and I should be more than willing to discharge Nicholson if he wants to. Of course if Nicholson should then demand an investigation the fire committee would have to investigate the fire committee. But at present it is outside of our jurisdiction. In this connection I may state that I don't think that the rules governing the department are quite what they should be, and I shall introduce an ordinance touching upon this matter at our next meeting. The new chief will be appointed, and I shall be as well for him to begin under the new rules. The start things have not been running just as they should and the department needs a general bracing up. Nicholson is a good fellow, but he has made more trouble in the department in the last two years than all the rest of the men put together. This is his first offense by a good deal, for he has been mixed up in five or six fights that I know of. How long will he be in the city, and how long will he be in the city? Every little while he gets drunk and makes the devil, and it has been overlooked altogether too long. It is spoiling the department and out of the way. I am getting tired of hearing some of these fellows kick. They couldn't earn \$1.50 a day anywhere else, but they get into the department and out of it, and then they come back and kick a general fuss. We all know that a fireman's life is dangerous and all that, but these men don't have to take the place of the police. The Orpheus quartet, the poor poor grace to have them trying all the time to break up the department. We must have better discipline and that is all there is to it."

A Death of Sickness.

"I see by some of the papers that we are having a great deal of sickness just at present," said Dr. C. H. Pinney yesterday, "but I can't see it in that light. I know that I had fewer cases in the city last week than during any week since I have been practicing here. I had several cases in the country, and some of them were quite severe, but the city is very free from sickness just now. It has been so all winter. The records at both the hospitals show that they have not had half as many patients as they had during the winter of 1888-89, and the county physician tells me that he has not prescribed for half the cases this winter that he did a year ago. I tell you this has been a very healthy winter here. I don't think we have had the influenza, or grip, but the fact is there hasn't been a case in the city. The county physician tells me that he has not seen as many cases of influenza, and he is as weak, and it also takes hold of horses in the form of epizootic as it did in 1872, but we haven't had any of it this year. We had a pleasant, open winter, and I think it is because of that.
