

THE COUNTRY SEAT OF MANANCE.

Some Advantages Possessed by the Thriving City of Fullerton.

ITS EXCELLENT WATER POWER.

Fullerton, Neb., May 22.—[Special to The Bee.]—Nance county, which is situated in the county seat, was organized from the reservation occupied by the Pawnee Indians from 1854 to 1870, at which time they were driven to the Indian territory. It is fifteen by thirty miles in extent, and the Loup river, which runs through its whole length, receives numerous tributaries from the north, the chief of them being the Cedar, on which Fullerton is situated. This is one of the most beautiful streams in Nebraska. It has a constant body of water, fed by springs and running over a continuous bed of rock. The water is really magnificent. The river three hundred feet below is seen curving continually in the most beautiful manner. Its banks are covered with green trees, and along its shores thousands of cattle are feeding.

The party of Omaha gentlemen who visited Fullerton on Wednesday was a representative body of the city, consisting of Messrs. J. H. Millard, Max Meyer, John Swobe, C. E. Yost, C. H. Gulou, C. N. Dietz, G. A. Hoagland, W. V. Morse, and Messrs. Kilpatrick, Kilpatrick, Koch & Co., Johnson of Sloan, Johnson & Co., Weller of the Richardson Drug company, Geyer of Dewey & Stone, W. H. McGuire, P. J. Nichols, M. J. Barlow, W. H. McQuinn, J. H. Lichtenberg, S. B. Cook, J. W. Griffith, Sherman Canfield, Richard Berlin Benson, Williams and Phillips, together with Messrs. Dickinson, Tibbitts and Barr of the Union Pacific road, Messrs. Peters and Slaughter of the United States service, D. C. Brooks, representing the Union Pacific, who joined the party at Columbus. There were also Superintendent George B. Lane of Lincoln, Mr. J. P. Stocking of Kearney, and Joseph Simpson of Sioux City, Ia.; J. L. Means of Grand Island, A. L. Bixby, W. S. Becker and J. M. Heater of Columbus, and A. E. Cady of St. Paul, together with Mrs. C. A. Canfield and Brady, the citizens' committee of Fullerton.

The party on reaching Fullerton was taken through the new mill, which has just been completed at a cost of \$47,000, \$7,000 of which was contributed by citizens of Fullerton. The mill is four stories high, and contains all the latest machinery found in the mills of Minnesota. It has a capacity of 100 barrels of flour, and 300 barrels of meal per day. The water power of the stream was first improved in 1888, when a two-run mill was built. In 1884 this was sold, and the mill which was destroyed by fire in 1885 was built. The Cedar river, within two miles distance above Fullerton, presents four other water powers fully equal to that which has been improved. The water power of the stream was first improved in 1888, when a two-run mill was built. In 1884 this was sold, and the mill which was destroyed by fire in 1885 was built. The Cedar river, within two miles distance above Fullerton, presents four other water powers fully equal to that which has been improved. The water power of the stream was first improved in 1888, when a two-run mill was built. In 1884 this was sold, and the mill which was destroyed by fire in 1885 was built. The Cedar river, within two miles distance above Fullerton, presents four other water powers fully equal to that which has been improved.

After a highly enjoyable afternoon spent in visiting the mill and in a drive along the banks of the river, the party returned to Fullerton. A large ball, which was beautifully decorated for the occasion. Besides the visiting delegates, some sixty citizens of Fullerton participated in the banquet, which was most enjoyable throughout.

Hon. George W. McKeljohn, on behalf of the citizens of Fullerton, invited the visitors not only socially but as business men representing the great interests of trade and manufactures. The full and just consideration of the report, which was certainly a most elegant as well as edible one, the toastmaster announced the regular toasts. Hon. H. Benson, responding to the toast "The Growth of Nebraska," said that no man ever blushed with shame when he said, "I hail from the state of Nebraska. Where we stand tonight we stand on the ruins of the great American desert, which has retreated as does the mirage of the traveler. The frontier has advanced, and the waving fields of grain are now seen on every hand. Mr. Brad Slaughter, in responding to "The Settlement of Nance County," after giving a full and correct account and removal of the Indians, said that the chief reason why Nance county was noted for the character, intelligence and thrift of its citizens was that under the principal, Prof. L. W. Eike. In the evening the commencement exercises were held at the opera house, which was well filled. Each department gave a satisfactory performance and at the close diplomas were awarded to the two graduates. The exercises were very interesting and very fine charts for the study of the sciences.

A Blue Rock Shoot. BEATRICE, Neb., May 22.—[Special Telegram to The Bee.]—A \$25 shooting match at blue rocks will take place here tomorrow afternoon at 1 o'clock between a picked team from Virginia and Liberty and the local team. The prize is a fine watch. The match will be held on the grounds of the Blue Rock club. The issue will be for the best individual score out of a possible twenty-five.

Brutally Beaten. BEATRICE, Neb., May 22.—[Special Telegram to The Bee.]—A west Beatrice man by the name of McCall was called out of his house midnight last night and brutally beaten by a party of five men. The assault was the outgrowth of an old feud. The assaulting parties are known as Indian creek toughs.

Beatrice Paving. BEATRICE, Neb., May 22.—[Special Telegram to The Bee.]—The city council met last night and accepted the bid of J. S. Ford of Beatrice for paving the newly created fourth and fifth paving districts, south sixth and east Court streets at \$1.44 per square yard. The contract contemplates two layers of broken granite and concrete. All respects to the paving now laid in the city.

Norfolk's Occupation Tax. NORFOLK, Neb., May 22.—[Special Telegram to The Bee.]—The council having failed to pass the amendatory occupation ordinance over the mayor's veto, the measure is dead and the occupation tax remains at \$500 in addition to the regular tax. Eleven petitions have already complied.

Norfolk Was a Gas Plant. NORFOLK, Neb., May 22.—[Special Telegram to The Bee.]—The city council at noon today passed an ordinance authorizing a sufficient number of lights to insure the building in this city of a gas works plant. The cost of the plant is estimated at \$100,000. It will be selected and work commenced immediately.

The Case of Frank Clark. YONK, Neb., May 21.—To the Editor of The Bee: In your Lincoln letter last Sunday you printed a reference to the downfall of Frank Clark of this city, charging his ruin to the saloons and his loss of property to the drink habit which had been his. In this place he had burglarized of liquor. This story evidently emanated from the lawyer who has been charged with the case to the supreme court. He has been charged with the case to the supreme court. He has been charged with the case to the supreme court. He has been charged with the case to the supreme court.

THE REVISION OVERTURE.

It is Presented to the Presbyterian Assembly by the Committee.

TROUBLE AHEAD FOR BAPTISTS.

African Brethren Accuse the Publication Society of Humiliating Three Colored Preachers Because of Race Prejudice.

SARATOGA, N. Y., May 22.—At this morning's session of the Presbyterian general assembly, after the transaction of routine business, Dr. Edwards, president of the college of the Western Presbyterians, was invited to deliver an address. The special committee on the publication board was continued another year and instructed to consult with the commission appointed yesterday.

SEEKING PROTECTION.

Nebraska Business Men Want to Out-Legislate Dead-Beats.

It was after 10 o'clock when President Webster called the business men's convention to order yesterday morning. Several new delegates put in an appearance. Among them were H. H. Smith of Tokamah, Harrington of Wayne, and Geo. Pagan of Aurora, and E. A. Lambert relieved Mr. Webster and presided during the session.

The committee on credits made a report to the effect that every merchant should have a commercial directory and become a member of the association. The directory company's system of rating is not satisfactory that could be recommended. Merchants were advised to let their customers know that there was such a system of rating in existence.

As an aid to this company in making collections, it was suggested that each branch endorse to it a man capable of attending to that part of the business.

Mr. Clark of Madison said that when he was leaving home to attend this convention, an Albin editor warned him to be careful, as he thought the movement would be an alliance scheme. A prohibitionist had also advised him to be careful, as it was nothing more than a scheme to get the law out of the hands of the people.

The committee on trade interests recommended that all branches be urged to work through their towns and city authorities to make use of the present laws in abating such nuisances.

The committee also recommended that when it came to the knowledge of any member of a local branch that any wholesale firm was selling to a consumer, he should report the fact to the general secretary. It should then be his duty to investigate and, if the facts warranted, to notify all branch secretaries.

The report adopted and referred to the legislative committee. A resolution also from the trade committee, recommending that the association petition for a law to regulate quality, price and terms being the same, was adopted.

The legislative committee, through its chairman, Louis Helms, reported that it would prepare a bill to be prepared, such bills as would give the association members a better law for collecting wages to the amount of \$200, and that the clause providing that not more than five executions shall be levied at one time against a debtor be changed to read, "three executions."

The argument advanced in favor of changing the sixty-day feature of the law was based on the ground that men receiving large wages could not then take advantage of an exemption that worked a hardship probably on the men whose money was to be collected. In other words, the plan most desired was one that would give the merchants power to collect 10 per cent of a man's wages on necessary expenses.

J. S. Bishop asserted that the association had two things before it which should be considered. One was a bill already introduced which he said "is the repeal of that damnable garnishment law of '89, which makes criminals out of good men, and the other is the enactment of a law which will do away with the next report was from the committee on resolutions, through its chairman, D. P. Tolle, and was as follows:

Resolved, That we are especially indebted to the president of the Commercial directory company and the members generally, especially to the president, G. H. Kelly, for the interest and energy which they have shown in organizing this association, the result of which has been the publication of this directory, which has been prepared for our enlightenment.

Resolved, That we are sensible of our obligations to his excellency, Governor Thayer, for his prompt presence at this assembly, and the encouragement he has carefully given to the objects of our convention.

The Bishop Clarkson memorial hospital, Omaha, has besides a few free beds for children, a pay ward for women and private rooms for either sex. Patients whose means will only allow of the payment of the hospital bill can receive the services of the attending surgeon free. For particulars address the matron.

THE DENTISTS.

An Interesting Session Devoted to Demonstrations and Clinics. The morning session of the state dental association was given over entirely to clinics. The attendance was large and the various operations were watched with interest.

F. O. Hetrick of Red Oak, Ia., demonstrated a method of obtunding sensitive dentine by electricity. In ordinary language this was a method of relieving pain in sensitive teeth.

The Angle system of regulating irregular teeth was demonstrated by Edward H. Angle of Minneapolis, Minn. His views are that it consisted of a series of bands and screws which were placed on irregular teeth, whereby they were gradually brought into their normal position.

Theodore Stanley of Kansas City exhibited microscopic views of the early formation of teeth, showing the germ from which teeth are developed.

Dr. Whitney of Omaha demonstrated a method of lining plates with gold.

Dr. Werts of Omaha exhibited a case of gold filling done with an electric mallet.
