## THE CITY.

De Witt O. Anderson, brother of County Commissioner Anderson, died at his residence in South Omaha yesterday morning, aged thirty-eight years. The remains will be interred in Forest Lawn

cemetery this afternoon. A small blaze in the linen room at the Esmond hotel called the fire department to the corner of Sixteenth and 'Webster

streets last night. The loss was trifling. Luther Benson, the temperance orator, spoke Sunday afternoon at the old People's theater to a crowded house. Mr. Benson will deliver an oration at the same place this evening at 8 o'clock.

Sam Roth's Funeral.

The funeral of Sam Roth, the boy who was drowned in the natatorium Thursday night, was held from Heafey & Heafey's at 10 o'clock yesterday morning. The remains were taken in charge by the members of the Jewish society and buried in Forest Lawn, they paying all the expenses. Seven carriages followed the remains to the grave.

## A Delightful Soprano.

Mme. G. A. Weber, a very accomplished soprano, sang at the First Presbyterian church yesterday morning, and delighted all who were in attendance. She has a magnificent voice, delightfully pure, and of marked strength and under perfect control. Mme. Weber is a sister of Mr. Thomas Cook, state supervisor of the census, and he is justly very proud of his gifted sister.

## Knocked Down a Woman.

Barney Haley was jailed yesterday afternoon for knocking down and beating his cousin, Kate Fox. Barney objected to Kate keeping company with a certain young man, and upon Kate informing him that it was none of his business who she went with, he proceeded to do the damage. The trouble took place at Tenth and Leavenworth streets.

Another Fireman Injured. At 5 o'clock yesterday morning, while working about the ruins of the Carter white lead works, Mike Groggins, a pipeman of hose company No. 5, was struck by a falling timber and quite severely bruised about the head. The man continued on duty until the fire was struck out, after which he returned

ne and was placed under the care of a

Wants the Vassar Prize. Miss Elizabeth C. Morrell, 1914 Farnam street, is endeavoring to secure a list of subscribers for the Ladies' Home Journal, published by the Curtis publishing company, Philadelphia, which will be large enough to win the Vassar prize offered by the publishers to the young lady sending in the largest number of subscriptions before Janu-1, 1891. Anyone wishing to subscribe for "Journal" is requested to drop a postal with his name and address to the ab ber. Miss Morrell will gladly call for the

## THE MARKET BASKET.

What Omaha Housekeepers Find in it This Week.

The housekeepers of Omaha have reason to congratulate themselves on the abundance presented in the markets of this city.

Of fish there are many varieties, from fresh and salt water, and trout, croppie, perch, pike, cat and white fish are quoted at 123gc; bass and lobsters 15c, Columbia river salmon 20c, chicken halibut 20c, shrimp 25c, flounders 10c, scallaps 40c, soft shell crabs \$1.50(a2.00) per dozen, Spanish mackerel and pompano

The poultry market has been liberally stocked with spring chickens during the Rates are lower and pound can be had for 35c to while the older cluckers whose nativity dates back in the '80's can be bought

for 1250 to 15c per pound.

Spring lamb is more plentiful and a good many Marys are disconsolate today, juding from the appearance of the butchers' stalls Saturday night. Forequarters are quotable at 50c to 75c, while the loin and hindquarters bring 75c to \$1.25. Mutton is worth 10c to 12) c for stewing pieces, and 12) c to 15c for chops and roasts. Choice steaks from the sirloin are held at 121 c to 18c, depending on the meat. Kump and round steak, very good with fried onions, can be had for 10c to 12%c per pound. Veal cutlets, which, when well breaded, are good breakfast eating, but should be eschewed at supper by dyspepties, are cut and sold for 15@18c per pound. Pork loins are held at 12%c, tenderloins at 15c, chops 12c, and sweetbreads are worth 20c per pound, while brains, which some people like scrambled, are sold at 15c, but there is no great demand for scrambled brains just now. Vegetarians are in their glory about this time of the year. Receipts are almost entirely from home gardens and are fresh and far rom home gardens and are fresh and far superior to the stuff shipped from a distance. Prices are nominal, but everything in the green grocer's line is plentiful and cheap, with asparagus at 6c per bunch, cucumbers be each, lettuce 3c per head, peas 5c per quart, green and wax beans three quarts for 10c. Summer squash and new cabbage are 5c apiece. Tomatoes are more plentiful and sell at 10c. 12c per pound for choice.

at 10@12c per pound for choice.
Fruits are in ample supply. The straw-berry season wanes, and red and black raspberries at 12c per pint and blackberries at 15c per quart take their place. Watermelous are arriving freely and sell for 60c each, while canteloupe bring 75c to \$1 for fine. Gooseberries are larger and riper than last week and from this list a very enjoyable bill of fare can be selected.

## AT HANSCOM PARK.

The First of a Series of Sunday Afternoon Concerts,

The band concert in Hanscom park yester day afternoon delighted four or five thousand people. It was just such an occasion as everybody enjoys. Men, women and children strolled leisurely about, sat on the benches. lounged restfully on the grass and enjoyed the very excellent music furnished by twenty-five picked men from the Musical union. They were under the directorship of Harry Irvine, whose ability in that position ranks him as one of the best leaders in the country.

This was the first of a series of concerts to be given every Saturday and Sunday at that cool, shady and pleasant resort. The park commission has determined to be with other cities in matters of this kind, and it hopes to

be sustained by the people, out of whose tax money the expense must come.

They say that Minneapolis, St. Paul, Chi-cago, St. Louis, Kansas City, and even Coun-cil Bluffs appropriate several hundred dollars every summer for amusement of this kind, which all classes appreciate; therefore they fail to find any good reason why Omaha should not be in line. It is contended that the amount of money expended in this way produces more benefits and gives better satis-

faction than any other.

Manager Julius Meyer of the union went before the commissioners, presented to them a statement of what other cities are doing, and they at once decided to adopt the cus-

tom here.
Yesterday's event as an inaugural was certainly a great and gratifying success. The concert began at 2:30 o'clock rather early, but there were at least 1,000 people in the grove even then. By 5 o'clock this number had been reinforced, until the lowest estimate placed the crowd at 5,000. Every motor train was loaded to its fullest capacity, hundreds drove out in carriages, and hundreds more found it convenient to walk.

An excellent programme, composed of many

An excellent programme, composed of many such selections as "The Belle of the Village," such selections as "The Belle of the Village,"
Bouillon's composition; "Heaven's Chorister," by Pinsati; Fletow's "Martha," "A
Soldier's Life," solo and chorus from "Aida,"
"Around the World," in which the national
airs of all civilized countries were played, and
many other equally beautifut pieces,
was rendered. A stronger, finer
body of players could not be
gotten together anywhere outside of New
York, and their work elicited a great deal of
applaines from the assembled throng.

The Saturday concerts will be devoted principally to comic opera music, while for Sunday the grander music of symphonics and
grand operas will be more appropriate.

day the grander music of symphonics and grand operas will be more appropriate.

For want of a platform where the players can be seen and their playing heard to better advantage, the band was somewhat handl-capped yesterday. By next Saturday a plat-form will be provided.

Dr. Birney, practice limited to catarrhal diseases of nose and throat. Bee bldg.

DR. RUFUS GIBBONS WELLS.

The Aeronat Will Probably Make an

Ascension July 4. Dr. Rufus Gibbon Wells, who desires to make an ascent with a large aerostat on July 4 in this city if sufficient subscription can be obtained for a free ascension, has made more than five hundred balloon ascensions in all parts of the world. He was employed by the French government to build an aerial machine 175 feet in length to be propelled by a powerful engine and screw for the extraordinary and novel purpose of going over the German army into Metz and carrying General Bazaine and many of his officers out of

that fort to the south of France.

Among many of the descriptions in foreign journals of Dr. Wells' remarkable aerial voyages the following is taken from Galigani's dessenger of Paris, Saturday, November 15,

Reference has been made to the balloon ascent for scientific experiments made by Mr. W. J. Hammer, Mr. Edison's representative at Paris, and Mr. A. L. Rotch, director of the Blue Hill meteorological observatory, who were accompanied by the well known aeronaut, Dr. Rufus G. Wells, in charge of the balloon. The party left the La Villette gas works at 12:35 in a new silk balloon of 900 cubic metres capacity. The balloon rose immedi-ately to the height of about half a mile and was then dropped nearer the earth to enable some experiments in sound to be made and allow of the taking of several interesting photographs of Paris and the surrounding country. Some experiments in flashing signals from the sunlight upon mirrors were also made and observed by the party assembled below. Experiments were also conducted when the balloon was rising and falling rapidly, and showed a slight static charge upon the surface of the balloon; and some interest-ing tests were made with the dipping needle respecting the influence of magnets at various altitudes as compared with the same tests made at the earth's surface, which would have been still more interesting at higher altitudes. Singing, shouting and whistling were echoed back from the earth's surface with great distinctness, and Mr. Hammer states that even the whistling of quite a long strain at an altitude of about three-quarters of a mile, through the fifteen-feet horn, held afterwards to the ear, was heard from beginning to end, and avers that had he had a stop watch with him he could have calculated the various heights by the period of time between the originals and the choes, for comparison with the barometric readings. Owing to the delay that occurred in filling the balloon, the clouds which hung over the city during the morning had for the most part dissolved, so that with the excep-tion of some photographs of distant cloud effects, no experiments with the clouds could be made. There was no mirage observable of the balloon upon the clouds, nor were the aureole effects noticed by Dr. Wells in his former ascents above the city observable. Although the balloon ascended higher than the lowest stratum of clouds the character of

the gas and the size of the balloon prevented the party rising higher than about a mile However, the three hours and a half of the trip were filled with interesting incidents and experiments. Mr. Hammer despatched four parachutes, each carrying a small "phono gram," or colinder for the phonograph, in or der to test an interesting method devised by him of sending down dispatches from war balloons by way of parachute in lieu of car-rier pigeons. He found that by proportioning the weights and sizes of the parachutes they could be dropped with considerable exact tude for local work and possessed other advantages. One of the cylinders, addressed to Mr. Hammer at the Continental hotel, arrived from a distance of over eighty miles from Paris. A long melon stick twisted into a spiral, which was dropped from the balloon at the heighth of a mile, presented a beautiful appearance as it descended rapidly through the air with the sunlight striking upon it, but when it reached the surface it became invisible. The experiment suggested methods of guiding parachutes in their de-

While passing over the many villages with which the country round Paris is so thickly studded the huge speaking trumpet was brought into requisition to ask the names of brought into requisition to ask the names of the places, etc. In passing over one town Mr. Hammer shouted "Vive la France! Vive la Republique! Vive Carnot!" when a voice was heard shouting plainly, "Mais non! Vive Boulanger!" It was remarable how clear the voices and other sounds could be heard three-quarters of a mile to a mile; even the corwing of the cocks and quacking of ducks could be distinguished. It was noted between that distinguished. It was noted, however, that the birds and animals that caught sight of the balloon and its shadow were much fright-ened, appearing to take it for some huge hawk or evil monster. Several photos of the shadow of the balloon on the earth were

The meteorological instruments used by Mr. Rotch comprised the portable registers of Richard Crothus, which gave a continuous Richard Crothus, which gave a continuous record of barometric pressure and altitude, air temperature and humidity. They were controlled by direct readings of aneroid barometers, thermometers and a hygrometer. Upon leaving the earth the temperature was 54.5° Fahrenheit, and the relative humidity 68 per cent. The nominal decrease of temperature with clevation is 1° Fahrenheit for each 30 feet, of meent but in this case the each 300 feet of ascent, but in this case the decrease was much slower. Marked fluctuations of the temperature and relative humidity occurred, and at the highest point reached-5,500 feet—a little over one mile. At 3:30 p. m. the thermometer read 43.7 □ Fahrenheit and the relative humidity fell to 20 per cent of sat-

uration. On reaching the earth at 4 p. m. the The sky was almost entirely clear through-out the voyage, with the exception of some fine currus, or "mare's-tail," clouds, far above the balloon and a few stratus, or fog clouds, near the ground. All around the horizon was a dark circle of haze, with a thickness of about three thousand feet. The wind's direction, which was southwest at starting, was not appreciably different in the upper air, judging by the balloon's course. Its velocity thus determined was nineteen miles per hour, considerably greater than

that on the surface.

Just at sunset the balloon descended at Ercheu, in the department of the Somme, where a concourse of the country folk and laborers from the sugar refinery at this place turned out in full force to lend a helping hand and permit of the aeronauts paying for a field of grain they had ruined. A balloon in their locality was a wonder, and when they saw the American flug and it was explained, a considerable number thought the balloon had come from across the sea. As the machine was nearing the earth, trailing her anchor, an old woman at work in the field, seeing the anchor making a bee-line for her, started to run three ways at once, and, not succeeding ran around in a circle, screaming. The bal-loon landed in the field along-side the road loon landed in the field along-side the road, bounded up again, just cleared the telegraph line, running along the highway, whence it again rebounded, skipping the "electric jumping-rope," and landing back in the field. Here it was secured by the country people, and the voyagers dismounted none the worse for their delightful voyage. Messrs, Paul Lelanne and Henry Cranney, civil engineers of the sugar factory, took charge of the party, showed them over the works and entertained them most hospitably at dinner afterwards. them most hospitably at dinner afterwards. The balloon was packed up by many willing hands, and the party, with their instruments and paraphernalia, were driven to the sta-tion—about an hour's ride—reaching Paris in

## HE JUMPED FROM THE CAR.

the small hours of the morning.

And Now Ah Quang is Nursing a Badly Crushed Leg. Motor train No. 14, on the Hanseom park

line, in charge of Conductor Benbow and Motorman Pierce, got a celestial at the intersection of Howard and Sixteenth streets at 9 o'clock last night. Ah Quang and a number of his Chinese

friends had been out to the north end of the line, and returning, they were all standing on the rear end of the motor car. Upon reaching Howard street Quang remarked to Sang Lee that he never waited for the train to stop, and saying this wated for the train to stop, and saying this he leaped out into space, but not far enough, for, in jumping, the front platform of the coach struck him, turned him around and threw him on the track, so that the tracks under the rear out of the car passed over his right leg just below the knee, breaking both homes and tearing the flesh in a shocking parameter.

The man was picked up and placed on the sidewalk, where he remained until a cab was called, after which he was taken to a physician's office, where his wounds were dissaid.

Parties who were eye-witnesses to the accident state that it was due to Quang's own carciessness, as he jumped from the car before

A MASS OF RUINS.

The Carter Lead Plant Presents a Desolate Spectacle.

A blackened pile of ruins marks the site of the Carter white lead works. Over the entire space occupied by the familiar white painted buildings with their shuttered ventilators is a tangled mass of metallic serpents. Iron bands, pipes, wheels, huge tanks and long iron rods are twisted and tangled in an inextricable snarl. The long iron smoke stack is broken into half a dozen pieces and lies across a bent and twisted pile of iron drying tanks. Above the blackened mass of rulns tower up three or four ragged looking rem-nants of brick walls keeping watch over the

urrounding desolation.

The officials of the institution estimate the es at \$150,000 compating the value of the nachinery at \$100,000. Rebuilding operations will be commenced at once.

The buildings and plant were insured for \$80,000, distributed as follows: \$80,000, distributed as follows:

## CLAMPITT BROUGHT BACK.

Total.....\$80,000

The Slayer of Young Fred Soule Arrested in Baitimore.

Yesterday afternoon Detective Vaughn reurned from Baltimore and with him he brought J. H. Clampitt, the man who last October shot a boy, Fred Soule, near Elk-

It will be remembered that Clampitt was arrested on the charge of shooting with intent to murder, was arraigned on this charge and after giving bail in the sum of \$1,500. suddenly left for parts unknown. A few weeks later Clampitt's clothes were

found on the shore of Lake Michigan, and it was reported that he was drowned.

Last evening in his cell at the central station he told his story, stating that he had shot the boy, but added that he and two friends were out in the woods near Elkhorn, and one of them, see-ing a squirrel on a tree, fired. The little animal jumped, and as he did so, all of the men fired at him, and as the boys were in range, the shot struck one of them. range, the shot struck one of them.

Clampitt tells a terrible tale of suffering dur-ing his wanderings. He states that an Omaha lawyer advised him to leave the Country, and following this advice he went to Kansas City, but while there he met an Omaha man, and fearing that his where-abouts would be known, he tramped to Michigan, and while sitting on the shore of the lake, he changed his clothes, leaving the dis-carded suit in a c condition so that it would appear as though he had been in the lake and was given out that a man had been drowned and from papers found in the pockets of the coat the party was supposed to have been J. H. Clampitt of Omaha.

Clampitt read his obituary notice with greedy satisfaction, and then made his vay to Baltimore, where he lived in seclusion until he was located by the police.

He now says he is ready to stand trial and fears no difficulty in establishing his inno

## Save Your Hair

BY a timely use of Ayer's Hair Vigor. This preparation has no equal as a dressing. It keeps the scalp clean, cool, and healthy, and preserves the color,

fullness, and beauty of the hair. "I was rapidly becoming bald and gray; but after using two or three bottles of Ayer's Hair Vigor my hair grew thick and glossy and the original color was restored."—Melvin Aldrich, Canaan Centre, N. H.

"Some time ago I lost all my hair in consequence of measles. After due waiting, no new growth appeared. I then used Ayer's Hair Vigor and my hair gray."

## Thick and Strong.

It has apparently come to stay. The Vigor is evidently a great aid to nature."

— J. B. Williams, Floresville, Texas. "I have used Ayer's Hair Vigor for "I have used Ayer's mair vigor for the past four or five years and find it a most satisfactory dressing for the hair. It is all I could desire, being harmless, causing the hair to retain its natural color, and requiring but a small quantity to render the hair easy to arrange."— My M A Balley 9 Charles street.

Mrs. M. A. Bailey, 9 Charles street, Haverhill, Mass. "I have been using Ayer's Hair Vigor for several years, and believe that it has caused my hair to retain its natural color."—Mrs. H. J. King, Dealer in Dry Goods, &c., Bishopville, Md.

Dr. J. C. Ayer & Co., Lowell, Mass. Bold by Druggists and Perfumers.

. Kabo is for women who break their corsets. Kabo can't be broken. The store guarantees it not to break for a year; and the maker behind the store.

And Kabo doesn't kink. To kink is almost as bad as to break. The store guarantees it not to kink for a year; and the maker behind the store.

If a single "bone" (we call it "bone," it isn't bone) of Kabo breaks or kinks in a year, take your corset back to the store and get your money. And, if the corset don't suit you after wearing a week or two or three, go back for your money.

'There is a primer on Corsets for you at the store.

# NERVE AND BRAIN TREATMENT.

GOFDMAN DRUG CO.,

Is slow but its coming sure. We are prepared for it, we have made last week the heaviest purchase of summer clothing ever made by any retail clothing house. Owing to the backward season manufacturers are overstocked, and we have closed a deal for a very large stock at prices far below the cost of manufacturing. We mean to sell the goods without any profit, just for the sake of making a big advertisement with them, as we find this the most effective way of advertising. Our customers will remember how we monopolized in former seasons the trade in summer clothing. We mean to do the same this year, and if it is possible to give greater values we will do so. We have prepared for a greater rush -- more than half of our second floor is filled with summer coats and vests .-- If you will look at our stock you will think we have enough of them to supply every man in this state, and such a variety has never been seen in any retail clothing house in this country. The season will be short and we intend to make short work with the goods. We predict that this will be the most sensational sale in this city.

## SUMMER NECKWEAR.

In connection with this coat and vest sale we commence to-day our annual sale of Summer Neckwear. Our patrons need not be told what this means. Thousands of dozens will be distributed at mere nominal prices. We say "dozens" purposely because the most of our Summer Ties are sold by the dozen for the same price as other houses charge you for one or two single ties of same quality. For instance, the Pique Tecks, which you see in our window marked 25c a dozen, can not be bought elsewhere for less than 12½c or 15c apiece. They come in handsome new patterns and latest shapes. Other Summer Ties and Scarfs in proportion. We keep them in the finest grades. One of the prettiest novelties in summer neckwear this season is the new Ring Scarf, made of Washable material. This is the very latest. We have a large variety in handsome shades and patterns, guaranteed to stand washing. Our price for these is 35c each—other houses charge 75c for them.

## SUMMER SHOES.

Our assortment of men's low shoes is the largest in the city. What you can't find in our stock is not worth looking for, and our prices are by far the lowest. We sell you a good Oxford tie shoe with solid leather sole and counter, made neat and shapely, for \$1.15. You could not buy the same shoe elsewhere for less than \$1.75. Russet low shoes, of a good quality which will stand service at \$1.40, worth \$2; and excellent Dongola southern ties, honest stock and well made, at \$1.90, worth fully \$2.50. Very fine calf Oxford and southern ties, very flexible and easy shoes, at \$2.15 and \$2.25. Shoe stores would charge at least \$3 for such qualities. We can save you considerable money on your footwear.

Corner Douglas and Fourteenth Streets.

A choice assortment of light coats and vests may be found upon our counters, with all requsite articles of comfort and good taste, pertaining to Men's Furnishings. No gentlemen's wardrobe complete or safe without one of our elegant Umbrellas,

DR. HAINES' GOLDEN SPECIFIC. It can be given in a cap of coffee or ten, or in articles of food, without the anowinedge of the patient in necessary. It is absolutely harmless and will effect a permanent and speedy cure, whether the patient is a moderate drinker or an alcondito week. If N.F.V.E.R. FAILS. It operates so quintly and with such certainty that the patient undergoes no inconvenience, and ore he is aware, his complete reformation is effected. 48 page book of particulars free To be had of KUIN & CO., 16th & Douglass, & 18th & Cuming Sta. C. Trade woiplied by BLARE, BRUCE & UO., and BLOHARDSON DRUG CO., Omaha.
