

TALMACE SPEAKS AT CRETE.

An Eloquent and Instructive Lecture on "Big Blunders."

HE WILL BE AT THE BLUFFS TODAY.

The Attendance at the Various Assemblies Increases Rather Than Diminishes—Gossip Among the Chautauquans.

Crete, Neb., July 9.—[Special to The Bee.]—The subject of the morning bible reading was "The Ten Lepers." Luke 17:11-19.

Dr. Duryea's bible students' class devoted its time to a study of the gospels of John and Luke.

Mrs. Kennedy's children and young people's classes took up some of the principal events in the life of Jesus.

The woman's Christian temperance training class met as usual at 10 o'clock.

The forenoon normal class considered the subject, "The Week of Passion."

At 11 o'clock Prof. Freeman lectured on "Life in the Fourteenth Century." Below a brief summary of his address.

Chaucer's writing was good and his metre correct, although Dryden denies the fact.

Though a description of fourteenth century life, the information being derived principally from "Cantorbury Tales."

The gentlemanly young men could dance, fence and make use of various manly accomplishments.

Chaucer was the first English poet who looked to nature as a source of pleasurable emotion.

The three things loved most by him were woods, birds and flowers.

May and his favorite flower, the daisy, Chaucer paid as much attention to literary form as to literary matter.

His work was cast in such excellent form that no improvement upon it is possible.

Chaucer had such artistic proclivities that it was impossible for him to be a reformer.

His poetry has an earthy and sky of its own. He possesses that rare power of revealing a man's character in the flash of a single line.

Chaucer has exercised himself in all forms of poetry, but his lowest humor, his wit, his freshness and youthfulness of feeling even Shakespeare has not surpassed him.

The assembly grounds have seldom contained a larger crowd of people.

Dr. T. De Witt Talmage this afternoon, since early morning each incoming train had been loaded down with assembly visitors.

Excursions had been run from various points in the state, and the railroad companies found great difficulty in handling the multitude of passengers which thronged the aisles and clung to the platforms of every train.

Long before 2 o'clock the tabernacle was filled and running over. A crowd of anxious Nebraskaans surged around the pavilion seeking in vain for unoccupied seats.

At 2 o'clock the service was commenced, by way of varying the monotony, arose, and for a short time the rafters rang with good sized songs.

Then the busy hum of conversation began and continued until the lecturer stepped upon the platform.

Amid a profound silence Dr. Talmage began, "Big Blunders," of which the following is a short synopsis: "If we let the evolutionary guess work we came from, and the theological probability of going to hell, we have still left the fact that we are here."

He came to the very acme of history. Come to my house when you visit Brooklyn, but don't all come at once. A Chautauquian, such as you are now gathered at, is curious to know a mixture of various faiths which will kill a bigoted dog as a dog man. A blunder, to attract attention, must be a big blunder.

Dr. Talmage then told his audience of an announcement of one of his lectures had been changed into a laughable mixture of announcement and sporting advertisement.

He advised his audience not to expect a sermon, but a lecture should be general, helpful and full of good cheer. His religion is sunshine.

"The difference between earth and heaven is that the sunshine of the former is sometimes bedewed, while that of the latter is eternal. The more religion a man has the happier he is. Life is an old fashioned pilgrimage; a man who tries to go through it still is sure to get tripped up. If some of the people that are going to heaven by steam don't look out they'll find their bodies in the world."

CONGRESSIONAL PROCEEDINGS.

Senator Cockrell Thinks That the Upper House Has No Backbone.

HE OBJECTS TO THE NEW SILVER BILL.

Senator Daniels Calls It a Makeshift and Wants a Collision with the Executive—The Vote Tomorrow.

WASHINGTON, July 9.—In the senate today President Morgan announced his signature to a bill for the admission of Wyoming as a state. The bill now goes to the president for his signature.

On motion of Mr. Blair the senate proceeded to executive business. The doors were reopened at 1 o'clock.

The sundry civil appropriation bill was reported and Mr. Allison stated he would ask for its consideration tomorrow.

The consideration of the conference report on the silver bill was resumed and Mr. Cockrell continued his argument against the report.

Mr. Cockrell criticized the last clause of the second section of the conference bill and said in language which indicated a preference for a single gold standard.

The secretary of the treasury would so interpret it. Until a party between the metals was established, gold would be given the preference, and legal tender notes would be redeemed in gold.

Mr. Teller controverted this assertion. Mr. Jones (Arkansas) read an extract from an article in yesterday's New York Evening Post—a paper opposed, he said, to silver legislation.

SPOTTING.

Standing of the Clubs.

Table with 4 columns: Played, Won, Lost, Per Ct. Rows include Minnesota, Kansas City, etc.

Omaha 12, Minneapolis 2. MINNEAPOLIS, Minn., July 9.—[Special Telegram to The Bee.]—One Reddy Haarahra, who used to wear a Flour City uniform during the games and cut the ears of reporters who spoke unkindly of him at other periods, had the merriest kind of a time this afternoon.

He came on the field with a large red rose pinned on his manly breast. He cracked jokes at the reporters, smote the ball over the fence and into various corners, and then

twisted Mr. Dole's paragon, Cleveland, and the crowd gave him an ovation. It would have given him money also had he been in the very much of a picnic.

The Nebraska aggregation, and the way they pulled up runs was astonishing to the natives of this city. In the past few days have been puffed up with the notion that the pennant was already won by Minneapolis.

The hits made by the visitors were numerous, but they were nicely mixed with errors and wild pitching, and the result was twelve runs. On the other hand, Martin pitched a superb game and he backed up

the regulars with a vengeance. Cleveland, Haarahra and Walsh gathered in ground balls from every section of the territory and slammed them in to first, regardless of expense.

THE RACE BY FAIRNESS.

An Oarsman Beaten After Rusing to Take Advantage of an Accident.

LOXON, July 9.—[New York Herald Cable—Special to The Bee.]—Fine weather favored the Royal regatta at Henley yesterday.

Great interest was centered in the first heat for the diamond sculls, in which an incident not on the card happened. The competitors were C. G. Spotta, of the Schuykill navy athletic club of Philadelphia, and G. E. B. Kennedy of Kingston. It will be remembered that Spotta was the victor in the diamond sculls race at Henley last year.

Spotta was taken aboard the umpire's boat. He was at all injured, but he was very much disgraced, for of course he had lost his head. Spotta rowed back to the launch and asked what was the matter. When the matter was explained to him he refused to accept the result and said: "I give him another chance." For this he was metaphorically patted on the back by everybody who heard his decision.

By everybody, too, he was declared to be a fine sportsman. Kennedy's boat was taken ashore and the swivel was shot. He pulled off his shoes and stockings and threw them into the water for the purpose of settling Samoa matters actually had gone to the extent of overriding the will of the people of Samoa and setting up as king a scoundrel who had been expelled from the island. Moreover this American administration had undertaken to pay part of the expenses of his kingdom. It was a disgrace to the American people and the administration responsible for the negotiations.

Mr. McCree of Kentucky, who was chairman of the committee on foreign affairs during the last congress, had believed he had done the best that could be done and Mr. McMillin was putting it too strongly. If he was not satisfied with the negotiation he had introduced a bill to carry out his views or he could call for correspondence with foreign nations. There was not a word about Samoa in the present bill.

Mr. McMillin is the gentleman admitting the taking up of a detached king and placing him on the throne was not in the other agreement that a just justice should be appointed and the governments of the United States and Great Britain and Germany should jointly guarantee the throne.

Mr. McCree's gentleman states it too strongly. The Samoa question has nothing to do with this appropriation bill.
