CORN HELPED BY RECENT RAINS.

The Harvest of Wheat and Oats About Completed and a Good Yield Assured-Potatoes a

Poor Crop.

Reports have been received from the special correspondents of THE BEE in almost every county of the state giving reliable estimates of the crop prospects obtainable at the present time. A summary of these reports show that the recent rains in almost all parts of the state have greatly improved the condition of corn, which had previously been suf-

fering from drouth. With favorable weather an almost full crop will be harvested. Wheat has been harvested in most sections of the state and has given about an average

yield. The acreage of oats has decreased and the crop will probably be slightly short. Early rains and the subsequent dry weather

had a disastrons effect on pocatoes and the yield will be very short. In the eastern part of the state the floods in

the early spring compelled a resowing of many fields and as a consequence the crops are late. Present prospects now are for a very good yield. In the Republican valley the condition of corn and wheat is good, while outs have been greatly damaged by the

Along the Elkhorn all the crops are in excellent condition, except in one or two coun-

In the central and northern parts of the state corn promises a heavy yield, owing to the heavy rains, while wheat and oats are only fair.

In the extreme western and southern part of the state the acreage of corn has been greatly increased and other crops are in excess of last year. In some sections the dry weather has damaged the crops, but the general reports show a favorable prespect.

South Dakota Crops.

Sr. Paur., Minn., July 27.- Special Tele gram to THE BEE, |-Captain C. W. Hall of Minneapolis brings information that throughout a large portion of South Dakota the crops are in almost as poor a condition as they were last year. In some counties, indeed, they are absolutely a failure. He predicts that many of the residents of Dakota will need help fully as much as they did last year. Large numbers of settlers, he says, are leaving that country, while others do not go because the do not possess the means. "Riding on the do not possess the means. "Riding on the train I could see along the whole line of the Milwaukee road that there will be but a short crop. The grain is burned, blistered, withered to the yery root. In Brown, Dickey, Sargent and Ransom counties the grain is almost ruined, particularly in Ransom and Sargent. The condition is nearly as bad in Day, Thurston, McIntosh and McPherson counties. In fact, through the whole Jim river valley, the harvest will amount to but little. The weather has been intolerably hot up there and we have had those blistering winds which burn and wither herbage as if a fire had passed over it. While I was at Ellensdale the temperature was 38 degrees in the shade. That degree of heat, with no rain to relieve it, is death to crops. About the condition of North Dakots I cannot say much from personal observation but I have heard that the crops are nearly as poor there. Why, the farmers are now plow-ing up their wheat fields. I know one farmer who has turned under 400 acres of wheat to summer fallow it. There is no money in that country and the people up there are going to have an awfully hard time this winter.'

Moran supported him superbly.

Mains pitched for Sy Paul, with Urquahart behind him. Willis was wild and erratic and the Black Sox hit him at will, but Urquahart was a stone wall behind the plate. Of the other members of the two teams Canavan, Walsh, Andrews, Moran, O'Brien and Shepard distinguished themselves. Omaha scored twice in the opening inning on a base on balls to Walsh and Kearns' homer; once in the second on Andrews' thresacker and Moran's sacrifice; twice in the third on an error by Sweeney and hits by Walsh and Kearns; four in the sixth on hits by Willis, Moran, Canavan and Walsh, Cana-van's hits being for four cushions and Moran's for three. the troubles are liable to return. Certainly

it cannot be questioned that the great advan-

He Had Previously Told His Wife That He Intended to Kill Himself -Creighton Business Blocks Destroyed by Fire.

Geneva, Neb., July 27,-[Special Telegram to THE BEE. |- The citizens of Geneva were startled by the distressing report that Henry Paxson, a promiaent cattle buyer and member of the firm of Paxson & Dempster, had been found in a poud in the northern limits of the city with a bullet hole in his right car. The revolver was found on the bank with three empty chambers. On Thursday morning he told his wife that on Saturday or Sunday night he would come home and that he would place under a board in the cellar \$1,000. money borrowed of her, and that he would then kill himself. He has been laboring under temporary spells of insanity and his wife took the words as coming from an insane person and did not give them much thought. He went to Lushton on Thursday to buy cattle. He then wired an Omaha commission house to send him money. They complied with his request and notified the firm here at Geneva that they had sent the money. Mr. Dempster, his partner, knowing that Paxson was not just right, wired the Lushton bank not to pay the draft. Dempster then filed a complaint of Insanity in the district court. The deputy sheriff went to Lushton, but was unable to find him. Search was then made for him this morning, the finding of a revolver on the bank of the pend leading them to search in the water, where they found the body. There was a built hole in the right car and one is the left breast, and it is supposed that after inflicting these wounds he then jumped into the poind to make doubly sure of death. He leaves a wife and two children. The coroner was immediately notified and empannelled a jury, who gave a verdict of suicide.
