The Union Pacific People Inquiring

Into His Express Consignments. Comptroller Mink, Acting Parchasing Agent Anderson, and three or four expert accountants are hard at work on the McKibbin matter. Last week one man went through all the express offices and took from their books a carefully prepared list of the packages received by the ex-purchasing agent during his administration. What such packages contained, however, or whether they were accounted for to the company is not and probably will not be known until another batch of petitions shall have been filed with the courts. It is understood, however, that many of these packages contained money sent by supply men to McKibbin, this means of sending it being adopted to divert suspicion.

The investigators are more charvin giving information regarding this matter than for-merly. One of them, said that the number merly. One of them said that the number of express packages was considerably larger than any other purchasing agent ever had occasion to receive. Supplies of every description are generally bought in such large quantities as to require their shipment by freight. This, therefore, leads the officials to conclude that most of the express matter consigned to McKibbin on account of the Union Pacific railway was for him personally.

Judge Davis, one of McKibbin's attorneys, was asked what action had been taken to-

He replied, "Nothing. It is not time yet for us to make a showing. Why do you ask! Do you want a sensation!"
"It has been rumored that you propose to make some very sensational developments in your answer to the company's charges against McKibbin."
"I think was well and they may implicate."

grainst McKibbin."

"I think we will and they may implicate officials higher up than Mac was. If we could get a chance to examine the books and accounts I am sure that some very interesting facts could be secured that will probably never be brought out."

The express people decline to say much. When questioned, they prefend to know nothing more than that a man from the Union Pacific headquarters had made an examination of their books, as far back as the time when McKibbin became purchasing agent.

The Coal Mine Troubles.

Officials of the Union Pacific have stated repeatedly that the trouble among their coal niners at Rock Springs was virtually settled and that work had been resumed.

This statement is only partially correct. About one week ago, General Manager Tebbetts of the coal department gave notice to the miners that they could continue work until August 1 under the old rule. At that time, he assured them, prices under the screening system would be agreed upon; also that in no case shall the prices xed be such as to either reduce or increase

On the strength of this assurance, all the English-speaking miners and the Chinamen returned to work, but the Finn's, Austrians and Italians remained out.

and Italians remained out.

Another, and what may prove a serious difficulty has been encountered. It is now charged that the company is having its big engines on the Wyoming division supplied with fire boxes which will burn coal screenings. Inasmuch therefore as the miners, under the screen system will receive no pay for mining, screening or steam coal, they naturally protest against the company making such use of it. They claim that this is a scheme on the part of the company to get as much fuel as possible for nothing or almost nothing because the cost of this material is estimated at not more than 10 cents per ton. not more than 10 cents per ton.

Rates Will Go Up.

The committee of presidents and general managers has sent out notice to all the western roads that an agreement was finally reached to advance rates between Missouri river points and Chicago. This, however, will not affect Omahaso much as Kansas City. The cattle rate down there is, and for several months has been 121/4 cents. It will now be put back to 25 cents a hundred. The corn rate, however, is to be reduced in accordance with the recommendations of the Interstate commerce commission, from 30 to 17 cents.

The adjustment of traffic divisions has been left to a committee composed of the chairman of the various associations.

GRATUITOUS ADVICE. This species of advice is not always acceptable, but in many instances much benefit would be derived were it acted upon. No section of the country is exempt from disease. To know the best means of combatting this common enemy, with the least injury to our pockets and tastes, is certainly a great advantage. We must expect Torpid Liver, Congested Spicen, Vitiated Bile and Inactive Bowels, and all pradent persons will supply themselves with Tatt's Pills, which stimulate the Liver, relieve the engorged Spicen, determine a healthy flow of Bile, thus regulating the bowels and causing all unhealthy secretions to pass off in a natural manner.
