THE RECORD OF A VERY BUSY WEEK

Interesting Chat Regarding the Men and Women Who Lead the Social Lifeof Omaha-Card Parties, Balls, Receptions, Etc.

There is a growing feeling among th leaders of the "400" in Omaha, that the pres ent season will be avery quiet one in comparison to the rush and bustle of last year. There will be fewer large estertainments, the general desire of hostsses being to limit the number of their guests and have "evenings" rather than big receptions balls and parties, which require so much labor and very often do not come up to expectation.

Card parties will prevail toa large exten and there is no pleasanter mode of entertain ment. But there will be innovations introduced even at "card evenings" and already there is talk of introducing a little music at these different events, to give variety. A song by a leading soprane, tenor or baritone, a piano sole by one of the guests, a violin solo, could not nelp but prove entertaining, at the same time be the means o adding to one's musical education.

Then the English custom of tea drinking promises to occupy the attention of th devotees of the social world more than eve before. It is such a pretty and hospitable fashion that one wonders it has not been more univesally invogue even in the west There is nothing that proves such an attractive feature of one's winter afternoon as the hissing kettle and steaming cup of the amber beverage. Nor is there any great exng tea to the men and women who drop in for a half hour's gossip,

Charming willow and cane tables with liberal round tops and little stands below can a had at prices varying from \$6 \$0, according to the enamentation. And make no mistake, such as receiving and tealing one's friends in any place less sociable than the library or sitting pance less sociable than the library or silling room. Near by is the crane with its alcohol lamp burning, the ketile being keptat a brisk bubble. Half a dozen pretty cups and saucers, of various makes, no two alike re-member, a dainty dish of sliced lemon, a tray of fresh leaves for replenishing the pot, a tiny jug of cream, with a sliver bowl full of growshi cubes of super will confordable full stal cubes of sugar, will comfortably fill top shelf.

On the rounds below is a deconted porcelain bash for the dress, a plate of wafers and the kettle nestled in its big, jolly cosey. Thus provided the hostess can receive any number of guests without ever permitting this pretty duty to conflict with conversation. Indeed until one has tried it one could never guess how adminably tea drinking assists in setting guests at their e and keeping every one at his or her
