LODGE ROOMS AND THE CHURCH The One Warmly Commended by Ministers of the Other. PRESIDENT OF DAUGHTERS OF REBEKAH. Templars Allowed to Wear Only Templar Insignia When Parading as Members of the Order. "I think secret societies are a good thing..."

at Goodrich hall last Monday night. The attendance was all that could be desired both in point of numbers and in character. The supper was delicious... I. O. O. F. Mrs. Mary E. Rea, of St. Louis, who was visiting friends in this city last week, has a position in the order of Oddfellows... The sovereign grand lodge at its recent session adopted a resolution to the effect that it will not recognize any lodge in the jurisdiction of the Daughters of Rebekah, and that body was dissolved.

EDUCATIONAL. The University of South Dakota has opened with a large attendance... The French Academie des Beaux Arts has accepted the bequest of M. Eugene Plot, amounting to about \$80,000 a year, to be devoted to founding a scholarship to be completed for by lady sculptors and painters... Prof. Woodrow Wilson, recently of Wesleyan, takes the chair at Princeton college of political economy.

METAL VERSUS WOOD TIES. Startling Statistics Showing the Decrease in the Acreage of Timber. A PROBLEM CONFRONTS THE ECONOMIST. Railroads Placed in the Position of Either Chemically Preparing Their Wooden Ties or Adopting Metal Ones. The forestry division of the department of agriculture, of which E. E. Fernow is chief, has issued its fourth bulletin.

From that where Providence has been most bountiful in gifts to man, he has been most reckless in his use. Economy in the use of nature's gifts is seldom if ever thought of... The enormous consumption of our plieries in Wisconsin and Michigan, as well as the great destruction often carelessly caused by fire, is a matter of serious concern.

Dr. Birney cures catarrh, Bee Bldg. Stanley's Philosophical Black Box. When people are not looking at Stanley they watch his black box, said. This youth is exceedingly sharp, says the London Truth.

From the whole statement of the case it appears that so far the use of metal for ties has been dictated by necessity, or the policy of fostering the iron interests rather than by a purpose to retard the rapidly diminishing forest growth of the world, and yet the results have everywhere been satisfactory.
