## THE OMAHA BEE THE NEWS IN THE BLUFFS.

The Revolution the New Gas Company Will Work with Its Cheap Fuel Gas,

SHE IS FREED PROM A BIGAMIST.

Mrs. Carpenter's Unhappy Married Life-A Rise in the Price of Cont-Calls to Worship-Minor Mention.

It is safe to say that the city council has ot taken official action upon any subject that s of more general public interest than the natter that was brought to their attention at the special meeting held Friday night. It is equally safe to say that no action they have evertaken has given more general satisfaction than their prompt compliance with the request of the new gas company for a charter to build and maintain works in the city. The application for the charter came a surprise to even some of

the members of the council, but the charter was so fair on its face, and it was introduced and partially vouched for by men who have a stainless record and have never been connected in the remotest manner with any sind of joboery that the aldermen who ad not the opportunity of going beneath the surface and investigating the motives of the ompany who asked the privilege, felt no reactance in agreeing to suspend the rules and pass the ordinance at one sitting. There was not the least reason to question the assurance of Finley Barke given the council when he intro-duced the ordinance that it was the fairest that had ever been presented. The inquiries and investigations that were made yesterday fully justify the prompt action of the council.

and give the assurance that a new erahas dawned for Council Bluffs. As briefly stated in Titt Bir yesterday, the ew company has assumed the name of the over fuel and power company, and agree by the terms of their charter to erect and main tain works for the manufacture and distribu ion of water gas for domestic, heating and nanufacturing purposes, and fixes the highest price to be paid by any private consumer, re-

gardless of the quantity consumed, at 25 cmts per 1,000 cubic feet. Usless people have the means of comparison and stop to consider they will not realize what is meant when they are told that fuel ras is to be furnished at a cost to the con numer of 25 cents per 1,000 cubic feet. Prof owe of Pennsylvania, who is considered the best authority in such matters, says that the best results to be obtained from the compustion of a top of authracite coal in the apquivalent of 10,000 cubic feet of hydrogen At the present price of in Council Bluffs, \$9 on this would give us the equivalent of 10,000 feet of gas for \$9, or 90 cents a thou-sand. At the price of 25 cents a thousand for gas we would get 35,000 feet for \$9, equalig the cost of hard coul at \$2.50 a ton. asserted that the water gas has only about one-half the heat-producing qualities of coal gas, and if this is admitted (and it is positively demod by experts) the new gas com-pany will furnish us a much clearer, better and is every way more desirable feel which the cost of hard coal at Another fact that will make this point clearer is that the price fixed by this new company is only 4 cents higher than the lowest price natural gas has been furnished to the people of Pittsburg at any time during the past five years. Natural gas has cost the consumers in the heart of the gas regions 21 cents per thousand feet, and if this company can fulfil its self-imposed con-ditions it will confer a greater blessing upon the people of Council Bluffs than if they had

Buylis park. It will be more desirable than natural gas for the reason that the source of apply is always under control, and the liability of explosions is reduced to a minimum by the fact that only a low pressure is main-Upon the face of things this new company teserves the fair and open-handed treatment accorded by the council. Every provision of the charter is in favor of the city, and if there is any failure to com-ply with its conditions it can be speedily forfeited and no public interests put in jeopardy. Another feature that will also be pleasing to many citizens of the city is the fact that the new plant will not in any

anner interfere with the plans of the ent gas company, as the water gas is unfit and will not be used at all for illuminating ourposes. The vast amount of capital pur ato the present gas plant will not be made a productive and the Council Bluffs citizens sho own it will not be harmed. As stated in Tur Bur yesterday the new company is composed of Boston and Chicago capitalists, who own the new process for con-

rting water into gas. They selected Counil Bluff's for the initial point for their west ern enterprise on account of the network of railways that center here. Their plan at first was to put in a small plant here for advertising purposes, just sufficient to run two enormous jets, which they would locate in some conspicuous point, but they finally concluded to put in an homense plant and heat the city and operate all its manufacturing enterprises. They propose to creet two standpipes near the transfer and them each night. They wil light them appear like two natural gas wells and by including up the country with their flames will attract the attention of the thousands of cople who pass through the city on the great

ranscontinental rallways.
The company has not yet selected the location for its plant, but a proposition has been made by ex-Mayor Robert to locate the new works on the vacant tract just west of the Northwestern city depot, between Broadway

and First avenue.

By the terms of its charter the new com pany must have its works partially completed within sixty days sufficient to supply a lim ited number of consumers, and have the work finally completed and the network of mains aid over the city by November 10, 1891,

Free from a Bigamist. About eight years ago there was quite a sensation furnished Council Bluffs by the marriage of a young man pamed H. J. Carpenter to a little maiden of so tender years as to cause general comment. Following soon upon this came a letter of inquiry from a woman in Illinois claiming to be Mrs. Carpenter No. 1. The revelation that Carpenter

was a doubly married man caused much of a

turry, as the deluded Council Bluffs bride

was well known here. Carpenter was tried for bigamy at the next term of the district court and sentenced to eighteen months in ne penitentiary. Yesterday fresh attention was called to the ase by the petition of Mrs. Ruchel Carpenter or a divorce. Judge Carson granted the esired decree and gave her the custody of heir little girl, aged about seven years.

The whereabouts of Carpenter are unmown. He has not been heard from here ince his career of bigamy was given such

publicity. Owing to my loss by fire on October 27, I im compelled to ask all parties indebted to ne to pay up at once.

Up Goes Coal. The Council Bluffs fuel dealers held a meting last night and ununmously agreed to raise the price of hard coal 50 cents a ton. The new rates go into effect on Monday

morning and hereafter consumers of hard coal will be obliged to pay \$9.50 a ton for it. This action has seen contemplated by the dealers for some time, but all of them could not be induced to sign the agreement. In Omaha and all other western cities the price has been \$9.50 for a long time, and Council Bluffs dealers have been simply un-derselling all other competitors. While the people of Council Bluffs have been getting the henefit of this rate the dealers have been constantly selling on decreased margins until their profits scarcely paid for the cost of handling the roal.

Soft coal was advanced more than a month ago, but it is selling for less than the dealers in other cities are getting for it.

The advance all around has been occu-

sioned by the increase in wholesale prices if the east. The advance took effect in Septem berand October, but Council Binfs dealers should have the credit of maintaining the summer prices two months longer than other dealers. Whether or not there will be any further advances will depend upon the cast ern wholesalers. The possibility is that the will serew up the prices another notch before we cat our Christmas turkery.

CHICAGO, Nov. 8 .- It developed today that the man giving his name as Patrick Ford and who with another man was locked up for breaking into the office of a brewing company is one of the most notorious crooks in the country. He has been turned over to Sheriff Noel of Pontiac county, who has been wanting him badly for three years. His right name is William Idom. He was arrested in Peoria three years ago for safe keeping, but managed to make his escape He was discovered a month later in St. Louis, but again made a during escape by jumping into the Mississippi river and awim-ming away. He came here some time ago and entered into the employ of the North western read as switchman. Since then car robberies in the yards have been frequent and Idom was finally connected with tempt to blow the brewery safe. Det say he has organized and trained a gang of thieves in every place they have found traces of him. He was an all round crook in London before coming to this country.

### MAJOR M'RINLEY INTERVIEWED He is Satisfied With the Result in His District.

CLEVELAND, O., Nov. S .- Congressman

William McKinley, who was in the city this evening, said to a reporter, referring to the election: "I am well satisfied with the results in my own district. I gained 2,600 votes during the campaign, which lasted but three weeks. It is very ratifying to me. The republican victory on the state ticket was splendid. The unfairness of the gerrymande was manifested most clearly by the recent election The republicans carries the state by a popular majority of over 12,000, while the demosceured two-thirds of the representatives in congress. Protection is stronger today than it ever was, and it will continue to grow in favor. The tariff bill was misunderstood and was shamefully misrepresented. The latter was done by the importers, many of whom are not citizens of the United States and are free traders. I am sure it will win in the end. The same issuwill come forth in 1892, and it will then be better understood. The republicans have little to fear the future if they have a free ballot and a fair count," Major McKinley feels confident that the senate will pass the Lodge federal elections bill before the close of the

next session.

Ward Defends Barttelot. LONDON, Nov. 8 .- The Sunday Times prints an interview with Herbert Ward, who declares that he never saw Barttelot commit any acts reflecting on his honor, or that he himself had not committed. He was shocked that such personalities had been published and sorry to think that Stanley should seek to embroil him (Ward) in a quarrel lacking every sentiment of chivalry for the dead and consideration for the living. Speaking from his knowledge, Barttelot ever used excessive cruelty. He says that Stanley, in his opinion, fails to attribute the blame for the disaster to the rear guard, where laid, namely, upon Jameson, administrator of the Congo state, who neglected to send a steamer up to the camp. Had this been done everything would have been saved.

Snow in the Northwest.

St. Paul, Minn., Nov. 8 .- A snowstorm set in this afternoon in the southern part of his state and has kept up ever since, from three to five inches having fallen in different localities.
