An Epidemic of Kensingtons Distinguishes the Week-Receptions

at Low Ebb-Coming Events

in the Smart World.

However much the tendency to crowd the season into a few weeks may be regretted, there appears to be no escaping it, and in deed it grows stronger year by year. Nearly everybody, as the word goes, remains out of should take their fancy work or await the town until the last of October, and society remains in a comatose condition until the first of November. Then the round of entertainments begin and by the middle of November the social world is on le grande tour, repaying the thousand and one obligations which every leader of the smart world incurs during the season.

The early coming of Lent this year, how ever, has started the round of entertainments earlier than usual, and the Christmas tide will reveal many tired souls who will ask themselves, "Is it worth the candle" But there is no letting up in the game; it must be played out, even if hearts grow weary and ennuiced bodies long for some quiet spot far away from vanity fair.

The theater was everybedy's rendezvous during the latter part of the past week, "The Cb rity Ball," reminiscent of many delight. ful nights agone, attracting the four hundred as no other play of the season. The effect of the play was so immediately remarked and already a number of the leaders are planning a charity ball on a scale of magnificence that has not been equalled in the west.

For two years society has been content with the balls given by the Assembly and the Cotillion, but this year neither of the clubs will be reorganized, if their patrons of former years are to be believed, and per consequence the old beaux, the dowagers, the young swells and the buds hope for something of a public character which will be upon an ex-tended scale, and a charity ball seems to be the only thing in sight.

They are bril-liant in color, and contribute a pleasing and feature of the afternoon being the presence of two bright little girls who carried trays filled decorative effect to a woman's costume The yellow ones, which are very yellow indeed, are the most highly prized. Some of the large ones are priced as high as \$1.50 each. The florists say, however, that the largest chrysanthemums in this country are very small compared with the chrysanthemums in Japan, which oftentimes attain the size of an American sunflower. The chief objection to the use of chrysanthenums heretofore has been that the odor of them is not at all pleasant. Yankee ingenuity, however, has been at work on the problem suggested by this obtection, and some flower dealers have been able, through the use of chemicals appl *d* directly to the growing plant, to achieve a nower which is odorless, or almost so. It has been not unusual in the flower trade, it is said, to add perfume to flowers occasionally by dipping them in some fragrant essence, but the chrysanthemum case is the first case Miss Ponsford.

Daughters," says: "One of the greatest foes to happy marriages is the existence of the mercenary spirit on the part of the parents and daughters." We protest (says the Commercial-Advertiser) against the use of the word "mercenary" in this connec-tion. Man is by nature the bread-winner, while woman is equally by nature the home-maker. By a sort of poetic justice, at any rate, a man to win her living for her is every woman's right, as a woman to make a home for him is the right of every man. It is not fair to woman, therefore, to apply the term "mercenary" to that feminine instinct that impels her to accept a bread-winner as a partner for life, even though she may lack that intensity of emotion that a proposal of mar-riage arouses in the breasts of the heroines of romance. There is an irresistable tendency, or what amounts to the same thing, a tendency rarely resisted, that impels lovers to marry just as soon as not to say before the man sees his way to supporting a wife. And in the vast majority of cases the estimates of he sighing couple are totally untrustworthy Even as the matter now stands, imprudent marriages are the rule. The man, blinded by his wishes, overestimates his future income, underestimates his coming expenses,

There has been an epidemic of Kensing tons this week, every day during the past six having had one or more of these affairs, which should ever be "the meeting ground of friends and all agreeable people," as Dr. Johnson characterized the afternoon tea.

They admit of endless possibilities, and if the hostess be ingenius they can be made like the oasis in the desert, bright resting places where the unexpected is always upper most. The introduction of a reader, a capita story teller, a clever planist, a capable singer all tend to break the monotony of the after noon and people go away refreshed, satisfied with the world and themselves, delighted with the rare tact of the hostess whose praises is over after sung.
