The impending session of the legislature will be of vital concern to the people of this state. It is of the utmost importance that the members of the legislature shall understand the wants of their constituents and be prepared to grapple intelligently and advisedly with the issues that must come before them.

MR. GOULD'S alliance is bound to become an active political factor in the country's affairs. Now that Dave Butler comes out squarely for an honest count, the political future of Nebraska is secure.

AMONG the varied products of Oklahoma, broken banks and flying cashiers now take a prominent if not a profitable place. OMAHA business men and working men owe it to themselves and the city to repudiate the councilmen who conspire to deprive them of public work and give it to foreign hands.

THE gigantic syndicate of western corporations, which promises to soon become a thing of life, suggests the necessity of the people getting together to devise measures of self-defense.

Why should Mr. Wylie go out of his way to mollify a business man whom Davis deprived of work? Does the fat electric light contract depend on the re-election of boodlers to the council?

TWO hundred dollars was offered as a bribe to Plumber Rowe to withdraw his bid on city hall work so that the favorites of the combine could get the job without rousing public indignation.

THE decision of the Denver convention to transform the Knights of Labor into a political party will expedite the dismemberment of this once powerful organization.

THE fifth annual report of the United States commissioner of labor devotes a volume to the subject of railroad labor. From this it appears that not all the railroad corporations are soulless.

IT is an interesting fact that the salaries of United States district judges have never been changed since the original organization of the federal courts, nearly one hundred years ago.

THE REAPPORTMENT QUESTION.

It has been given out with sufficient distinctness to leave no doubt of the intent, that the democrats will vigorously and persistently oppose any reapportionment bill proposed in the present congress. No matter how fair and just a measure for this purpose may be, the democrats will antagonize it. It is well understood that not only with respect to this but most other measures that will come up it is the purpose of the democrats to frustrate the republicans in all efforts except those directed to the passage of appropriation bills and measures which cannot be alleged to have a partisan character, and at the same time they will be guided by a purpose to make an extra session necessary, provided this purpose can be marked and successfully carried out by fixing the responsibility for such an emergency on the republicans.

So far as the house is concerned this opposition may be overcome. If the republicans will maintain the presence of a quorum, and this they ought to be able to do for the brief time of the session, the democratic opposition and obstruction may retard, but cannot defeat the passage of measures desired by the majority. But the case will be different in the senate, where the unchecked freedom of debate affords the minority an opportunity to talk to death a measure they do not want.

It is important that the new apportionment be made by the present congress. It is a duty that properly belongs to it and there is no valid reason why it should not perform it and thus avoid any necessity for calling an extra session of the Fifty-second congress, which the democrats appear to desire.

THE Farmers' Alliance in the west will fall far short of its opportunity for usefulness if it limits its activities to the field of politics. In other sections of the country, notably in the south, it is striking out into other fields where results may be more immediate and profitable.

There have been and still are a great many trade organizations in the United States which have conferred large benefits upon their membership. They have done it by studying the best methods of economizing time, money and labor in the prosecution of their business, by selling their products to the market, and by generally bringing their combined intelligences to bear upon the problems involved in their field of work.

Apparently this wide and hopeful field for usefulness is pretty much neglected in western states, where the alliance has tens of thousands of members.

OTHER LANDS THAN OURS.

Mr. Parnell has issued his manifesto appealing to the people of Ireland to sustain him. He will not voluntarily retire from the leadership of the Irish party, and the indications are that the pressure to drive him into retirement will not be strong enough to accomplish that purpose.

THE first effect of the succession to the throne of Holland will be the separation of the Duchy of Luxembourg from the crown of the Netherlands. This comprises an area of 1,228 square miles and a population of 200,000.

THE need for the alert blue pencil of the late Daniel Manning in editing Mr. Cleveland's correspondence is apparently as urgent as ever. The question which the unscientific mind wants to ask Dr. Koch is this: Which was first, the bacillus or the consumption? Which is cause and which effect?

THE fish commissioners evidently see that the next congress is going to need "brain food." They have just turned loose in the Potomac river "a million young shad."

THE army officers, post-masters and contractors have no doubt exaggerated the reported Sioux Indian uprising in order to induce congress to take the usual big appropriations for the maintenance of useless military posts in the west.

THE ruling of the supreme court settles two important points, namely: That capital square cannot be used for other than high school purposes, and that jurisdiction over the premises is vested in the board of education.

POSTMASTER General Wanamaker appears to be sincerely ambitious to make his term in office memorable by giving the people new and permanent benefits. Among the various progressive reforms he has suggested, perhaps none is more capable of doing great good than the establishment of postal savings banks.

Such is the man whom the eyes of the world are turned today, and from whose lips his ears are eager to catch a word, while in perplexity of mind and uneasiness of soul it wonders what he will say or do next as the product of the times, the marvel of the age and the prodigy of the century.

THE land purchase which the British government expects to pass offers a sum of \$150,000,000 to \$165,000,000, to be created by a special land stock and guaranteed by imperial credit, which is to be expended in the sale and transfer of land from landlord to tenant.

THE AFTERNOON TEA.

Agoo for age, girls are tallest in Sweden, and heaviest as well. An ill-favored woman is usually well-favored by the women of her acquaintance. He-Darling, I just want you kiss. She-(with a sigh)-If that's all you want, why shouldn't I kiss you?

THE time has almost passed when the death of a sovereign of Europe, even of ancient lineage, will create a profound political disturbance. The case of Victoria, Emperor Alexander, Alfonso of Spain, William and Frederick of Germany all have been called to another world and yet Europe has scarcely felt the shock.

THE ghost dancing Sioux have felt willing to fight the United States army, but hunger is an antagonist they cared not to encounter. It looks very much as if the question of rations would prove decisive in peaceful settlement of the threatened troubles in the north.

THE friends of Cleveland flout the idea that "Governor Hill is more popular in New York than Cleveland." They do not, however, pretend to explain why Governor Hill was elected by 140 majority, and Cleveland defeated at the same time in New York by 17,000.

THE question of closing the world's fair on Sunday was discussed at the meeting of the lady managers in Chicago the other day, but who twelve ladies arose to speak first to the resolution and none would yield the floor, the presiding officer, with great presence of mind, declared that the resolution would not be in order for several weeks.

THE CONSUMPTIVE LYMPH.

ITS composition still remains a secret with Prof. Koch. Bremen, Nov. 28.-(Special Cablegram to The Bee.)-Dr. Bergmann in a lecture last night, declared that the secret of the composition of Prof. Koch's curative lymph was the exclusive property of Prof. Koch. Dr. Bergmann illustrated the degree of fever after each injection, and explained the quantity of lymph required in the various cases.

THE number of physicians coming to Berlin to study the Koch method has not lessened. There were 132 arrivals yesterday. The government of Prussia will shortly introduce a bill in the diet providing for the establishment of a Central Pacific telegraph company at which Prof. Koch may pursue his studies. Connected with the institute will be five libraries containing 150 books. After allowing Prof. Koch a salary of \$10,000 a year, the recovery the government will undertake the work of producing the lymph.

TO CANCEL THE LEASES. Important Suit Begun in the Federal Court at San Francisco. SAN FRANCISCO, Nov. 28.-(The Call states that a complaint has been filed in the United States district court by the government of the United States against the Southern Pacific and Central Pacific railroad companies and the Western Union telegraph company. The object of the complaint is to secure the cancellation of the lease of the Central Pacific to the Southern Pacific and also to secure the cancellation of the lease of the Central Pacific telegraph company to the Western Union telegraph company.

IN addition to the cancellation of the lease the complaint demands that the lines referred to be operated and maintained separate and independent, in accordance with the original agreement between the corporations and the government.

THANKSGIVING DAY IN BERLIN. BERLIN, Nov. 28.-(Special Cablegram to The Bee.)-Thanksgiving day was celebrated here yesterday by a grand banquet at which Prof. Koch was the guest of honor. Prof. Koch was seated at the head of the table. The banquet was given at Kaiserhof. Mr. Chapman Coleman, secretary of the American legation and chargé d'affaires during the visit of Minister Phelps to the United States gave a toast to Emperor William, who, he said, had referred to the avowal made at the time of his accession to the throne that he regarded himself as the first servant of the state. Mr. Sherman responded to the toast by Rev. Mr. Sherwood of New York.
