THE OMAHA DAILY BEER MONDAY, DECEMBER 29, 1890.

THE CITY.

Assistant Manager R. L. Buchanan of the Moline, Milburn & Stoddard company was not forgotten on Christmas The members and employes of the Omaha house presented him with an elegant upholstered chair.

The post-mortem over the remains of John Goldon, the old rag-picker, was held yesterday. According to the testi-mony of the physician who made the examination heart failure was the immediate cause of the death.

the skip and the kidneys. Regulate their ac-tion with the best purifying tonic, Burdock Blood Bitters. Dr. Birney, nose and throat. Bee bldg.

The three outlets of disease are the bowels,

A Charming Memory. No improvement have been so marked,

so signally perfect in attainment, in the last few years, as the numerous luxuries which have been introduced in transcontinental travel. Instead of harrowing recollections the tourist now has left to him when his journey is completed, a charming memory of perfect train ser-vice and palace dining cars. The ar-rangements this winter for dining cars on the Union and Southern Pacific roads is something far in advance of anything in that hitherto attempted.

Pin This in Your Hat.

And you will then know that the largest auction sale of city lotsever held in the southwest, and the great opportunity for investments takes place at Aransas Harbor, Texas, January 7 and 8,

At the Y. M. C. A.

Yesterday at 4 p. m. 175 young men gathered in concert hall to engage in a praise service, each one giving a reason why he was happy at the return of Christmas, view ing the day as the anniversary of the birth of Christ. Short addresses were made by Mr. Hollander, who had charge of the service, Dr. Henry, C. A. Mitchell, S. P. Bostwick, F. G. Davies, Dr. Aikin and several others. The Owl club, an organization of male voices in the north part of the city, under direction of Prof. Lee G. Kratz, assisted in the music which was a special feature of the meeting, by rendering three fine selections, all of which were well sung and greatly appre

ciated. At the close of the service the secretary in vited all present to attend the reception on New Years'day. A cordial invitation is ex-tended to all young men, and their friends in the city to call between 5 and 6.30 p. m. on New Years' day. The reception will last until 10 p. m. An interesting programme has been arranged and will be announced to-

Remarked by R. C. Joiner of Allen P. O., Hillsdale Co., Mich.: "Nothing gave my pheumatism such quick relief as Dr. Thomas" Electric Oil-believe it infallible for rheumatic

The American Idea

is that "nothing is too good for me when I travel," and in consequence we have become noted as the most luxurious trav-elers in the world. That which the people demand, the roads must supply, and thus we have also the most perfectly appointed railway service in the world. The traveler now dines in a Pullman palace dining car clear through in his journey, from Council Bluffs and Omaha to San Francisco, on the Union and Southern Pacific roads.

Will Make a Great City.

All the different forces and interests essential to the building of the largest city on the gulf coast, after months of negotiations have combined to make Aransas Harbor, Tex., the largest city in the whole southwest. Great auction sale of lots January 7 and 8.

DISEASES MADE TO ORDER. A Choice Collection of Horrible Com-

plaints Bottled in Tubes. In the army medical museum there is at present a bottled stock most admirably complete of nearly all the diseases which are apt to be fatal to human life. says the Washington Star. If one cares

to indulge in any of these luxuries there are on hand in qunantities to suit, consumption, pneumonia, typhold fever, diphtheria, Asiatic cholera, blood poi-soning, erysipelas, carbuncle, and nu-merous other similarly cheerful complaints. The army medical museum keeps these morbid affections in tubes so constantly ready for immediate communication to the healthy individual that the

curator in charge of the laboratory was kind enough to say jesterday that if de-sired he could give them all to the writer in a few moments. The curator added that he really would be able to do this at no serious loss or expense, inasmuch as there was enough consumption in the consumption bottle to communicate the complaint to many thousands of people, and it was the same way with all the other diseases he had on hand. In administering pneu-monia to a patient, so he said, he would elect by preference the method of putting a solution of the germs in water in a spraying vessel and have the victim breathe the spray. The subject operat-ed upon would contract the affection

with absolute certainty every time. Pneumonia, by the way, is contracted not from a cold or inflammation of the lungs, as people ordinarily suppose, but from the breathing in of pneumonia germs, which are given encouragement in growing and multiplying by an un-healthy condition, such as a cold may give rise to. The mouths of altogether

healthy people very commonly have lots of pneumonia bacteria in them. The disease signifies simply that the air cells in the lungs are ruptured and blood flows into them, thus rendering them

useless for breathing. As for that interesting and commonly fatal complaint, carbuncle, the curator said he could produce it at any time in the most healthy individual by a simple inoculation with a solution of the germs. Once so inoculated, you have about an even chance with death. This is very commonly called "wool-sorters' disease," secause men who sort wool are very ap to contract it. Sheep are frequently afflicted with carboncie, and the slight est abrasion on the hand of one who touches the fleece of an animal so distouches the fleece of an animal so dis-eased is likely to communicate it. Spraying the throat with a solution of the proper germs is the proper method also for conveying diphtheria, which can be given in this way with absolute certainty. Then it is a question of pre-venting the patient by artificial means from being strangled by the false mem-brane that rapidly grows and tries to

brane that rapidly grows and tries to fill up the breathing passage, There is no great difficulty in contract ing Asiatic choiera if you want it. Take a few of the germs from the appropriate

bottle at the museum and drink them in water or beef tea. If your stomach is in a particularly healthy condition you may not take the disease, but otherwise you are pretty sure to have it. An as-sistant in the laboratory of the famous Prof. Koch once swallowed by accident a lot of germs of Asiatic cholera, with which experiments were being made, and developed what the professor de-lightedly called a typical case. He recovered by a narrow scrape.

The diseases which the government keeps thus bottled in convenient form are all obtained-the germs, that is to say-from actual diseased tissues of pa-tients afflicted with the complaints. To propagate the germ in any quantity from these tissues is easy enough. Vegetable gelatine, from a Japanese plant called "agar-agar," is boiled and mixed with beef tea, so as to form a soft, trans-

T'll

Our Great Holiday Sale of Furnishing Goods --- nearly double that of any previous season in our business career --has left us with a great many broken lines. Some lines are broken in sizes, some things we have only a few of at each price, some other things may be all sold but one color and again some lines are all sold but the higher priced goods. None of these lines will be filled in, and in order to close them all out "this year", we have made special prices on them all.

From Now Till New Years Neckwear

We shall put in our 25 cent line a pile of 35 cent ties. We shall add a lot of 50 cent ties to our 35 cent line and add lots of 65 cent and 75 cent ties to our 50 cent line. We shall take out all the fine goods left in the windows and put them on sale at REDUCED PRICES, and will sell a lot of dark Four-in-Hands at a quarter.

treating with d for Catarrh, o, and all dis-to and fat-

65 dozen fancy bordered Handkerchiefs at 5 cents each. 46 dozen fancy bordered Hand-kerchiefs at 10 cents each. 46 dozen fancy bordered Handkerchiefs at 15 cents each. 37 dozen pure China Silk Hankerchiefs in white, at 25 cents each. 39 dozen beautifully embroidered China Silk Handkerchiefs, with woven borders, at 60 cents.

COLLARS and CUFFS

Handkerchiefs If there's a lady in Omaha who wants to "collar" her husband and "cuff" him into the bargain, we'll furnish the bar

gain. 200 dozen pure linen collars, standing or turn down, 5c each. 200 dozen pure linen collars, five styles, at 10c each, 500 dozen best all linen collars, 8 styles, at 15c each, or a quarter for two. 100 dozen linen cuffs at 10c pair, we'd ought to charge 20c. 100 dozen very best pure linen cuffs at 25c. They're most always 40c a pair.

15c buys all wool socks, fast black or fast colored fancy cotton socks, worth 25c. 20c buys natural wool socks. 25c buys fine camel's hair socks, fine merino socks, or heavy knit wool socks. 30c buys excellent camel's hair socks. 35c buys fifty cent cashmere socks or fifty cent heavy wool socks.

That's one thing you can give to anybody for a New Year's Present, and be sure of it being acceptable. We've got quite a number of them left yet, in cashmere and silk, from 15c for a quarter one, up to \$2.50 for a pure jersey silk one. We've got a few fine dark ones left yet and you'll find them very scarce, such ones range from 70c to \$2.50 each

In our Underwear Department there's quite a number of broken lines which take up more room than they're worth. We don't want 'em. Do you? All Wool Scarlet Shirts and Drawers at 35c. All Wool Scarlet Shirts, [no drawers left] at 50c each. One lot of heavy camel's hair Shirts and Drawers [shirts double breasted] at 65c each. One lot Fancy Mixed Shirts [no drawers] at 40c. One lot very heavy brown Merino Shirts and Drawers at 45c. One lot random mixed Shirts and Drawers at 60c. One lot fancy striped Shirts and Drawers at 65c. These are all broken lines—by that we mean, that there may be lots of large sizes in one lot and nearly all small sizes in the next, and so on. The prices we've made on them are low enough to tempt a man to buy for next year, if he's got enough for this.

Alexander Oberg's Funeral.

The funeral of Alexander Oberg, the carpenter who was killed by falling from a scaffold at Swift's packing house in South Omaha on Friday last, took place at 2 o'clock yesterday afternoon from his late residence, Nineteenth and Paul streets. The deceased Nincteenth and Paul streets. The deceased was a member of Harlan lodge, No. 16, A. F. & A. M., of Alma, this state, and the funeral was in charge of Nebraska lodge, No. 1, of this city, Joseph A. Stafford, master. The pail bearers were John Westberg, Gustave Anderson, R. B. Chapman, C. W. Prentiss, W. L. Ritter and J. W. Wise. The remains were laid to rest in Forest Lawn.

Dr.Birney, nose and throat. Bee bldg.

Backed by Powerful Influences.

The City of Aransas Harbor, Tex., is backed by the railroad influences, also the company to whom the congress of the United States granted the exclusive right of obtaining deep water over the bar at Aransas Pass.

Holiday Excursions.

On December 24, 25 and 31, 1890, and January 1, 1891, the Union Pacific will sell tickets to all points in Kansas and Nebraska at one and one-third fare for the round trip, good returning until Jan-uary 5, 1891. Remember the dates.

Mortuary.

George Garneau, aged twenty-four years. died at the home of his father, Joseph Garneau, sr., in St. Louis Saturday night. The brothers, Joseph and Pierre Garneau of this city, were at the young man's bedside when he passed away.

Confirmed.

The favorable impression produced on the first appearance of the agreeable liquid fruit remedy Syrup of Figs a few years ago has been more than confirmed by the bleasant ex-perience of all who have used it, and the suc-cess of the proprietors and manufacturers the California Fig Syrup company.

Old Folks at Home.

They will be there and expecting a visit from you at Christmas time, and the Union Pacific will sell tickets on De-cember 24, 25 and 31, 1890, and January 1. 1891, to all Kansas and Mebraska points at one and one-third fare for the round trip, good returning until Janu ary 5, 1891.

Thinks Women Should Rule. The duchess of Marlborough has some ery excellent ideas on the subject of girl culture, says the New York Sun. She believes thoroughly in the sweet tyranny of woman; believes that it is her tyranny of woman; believes that it is her prerogative to reign queen of the world, the home and the hearts of men. She would have a girl know only one thing thoroughly and publicly-dependence. Arithmetic, the sciences, the arts, are all subordinate to the vast remunerative force that comes from knowing just how to be helpcomes from knowing just how to be help-less, how to appeal and how to bear on the strong right arms of the warriors of the world. To the woman who fights single-handed the struggle must over be an unequal one. "Had I a daughter or a little sister," she says, "I should teach her adaptability, and that learned I should have no further anxiety for her future. Succeed? My dear girl she future. Succeed? My dear girl, she could not fail; it would be impossible not to please, not men alone, but people, and the race is hers." It would be per-fectly amazing to "the sweet lazy Lizto see this woman walk, not after zies' the seminary style or the psychic culture fashion, but in accordance with Blake, four miles an hour and two hours

parent solid. A small quantity of this is put into a tube that is tightly corked with cotton at the open end. The tube is then placed in an oven and heated unis then paced in a break and the action of the sort, are killed. Next the tube is briefly un-corked and a long steel wire, that has been heated also to sterilize it, is dipped in the germs of the disease which it is desired to cultivate, and scraped across the surface of the getting. The take is the surface of the gelatine. The tube is now recorked and permitted to stand for a few hours, at the end of which the bacteria of the disease, having found the gelatine to their taste for feeding upon, will have multiplied enormously, so as to fairly cover the surface of the gela-tine. Each kind of bacteria or germs that has its own form of growing in col-onies, so that one disease can be readily distinguished from each or in the table distinguished from another in the tubes without a microscope. All diseases, you see, are caused by poisonous bac-teria, but most bacteria are of the most important usefulness in the world, per-forming an essential part in the operations whereby human tissues are re newed and kept healthy. The mouth and throat are always full of bacteria, and the skin is covered with them; they

Change Cars? No.

Among the many exigencies of modern travel there is one requirement which is always popular and always in demand, and that is "a through service." Life is too short to "change cars" every few hundred miles, and the travelling public have very properly rebelled against all such old-fashioned railroading. The through equipment of the Union Pacific, "the original overland route," provides for a through car service for all points west from the Missouri river.

There was a meeting of the Union Veter ans' union in Green's hall yesterday afternoon. Several new members were enrolled. The attendance was so small that a perman-
