The National sporting club, in which Lord Lansdowne and other noblemen are interested, opened tonight. The rooms used to be the Evans', but have been refurbished and decorated very handsomely in all appointments.

Already the membership is 500, with applications more numerous. A first rate boxing programme was finished with a command contest between Cookrobin and Guttridge.

The latter's left wrist was sprained in the eighth round, but he would have been beaten anyway. Mitchell and Slavin gave a two-round exhibition. Mitchell was sober, but Slavin was just able to stand. Their exhibition was a success. The new club will greatly hearten the public.

EFFECTS OF HOCUS LAMP.

Interesting Reports Concerning the Results of Its Application.

Copyright 1891 by James Gordon Bennett.

BRUNNEN, March 5.—(New York Herald Cable-Special to The Bee.)—The official reports demanded by Dr. Von Gossler, minister of education, from all Prussian universities and pathological institutes on the efficacy of the hocus lamp have just been published by Prof. Gutschalk. They are fifty-five in number, including the report of the municipal hospital in Moabit, one of the departments which is under Koch himself. The reports extend only to the end of 1889. They comprise about eight weeks of continuous medical results, but the contents are nevertheless of great importance. During the time in question, about 17,500 injections were made on 2,172 patients. The greatest number of injections received by one person was 51. The largest doses were 825 grammes. Most of the reported cures were undoubtedly due to the fact that the patients were under the influence of the hocus lamp, and the references to the long period of time Boyd had resided in Nebraska.

DISBURSING THE REVENUES.

Approximate Estimates of the Same Appropriated by the Fifty-First Congress.

ARGENTINE'S PROPOSED TARIFF LAW.

Encouragement Offered Reed—Opening Public Domain—Mexico Will Be Here—Friend of Justice—Washington Gossip.

WASHINGTON, March 5.—Following is an approximate statement of the appropriations made at each session of the fifty-first congress, prepared by the clerk of the senate committee on appropriations: Amount of regular bills, including deficiencies and miscellaneous appropriations for the first session, \$341,000,000; amount of regular bills, including deficiencies and miscellaneous appropriations for the second session, \$405,000,000; permanent appropriations for first session, about \$101,000,000, and permanent appropriations for 1891, estimated at \$122,000,000. This makes a grand total of \$969,500,000.

Mr. Sayers of Texas, leader of the democratic minority of the house appropriations committee, has prepared a statement of appropriations made during the fifty-first congress, as compared with the appropriations made during the fiftieth congress, which shows the total appropriations made during the congress just closed were \$1,005,370,471, against \$17,063,850 during the preceding annual appropriations.

The total appropriations for the first session of the fiftieth congress were \$122,638,343, and for the second session, \$95,351,519; and for the first session of the fifty-first congress, \$341,043,510; and for its second session, \$341,357,501, which Mr. Sayers estimates of \$80,000,000 should be added for various small items.

Included in the appropriations for the fifty-first congress are \$15,737,000 for the refund of the direct tax and \$10,000,000 for sugar bounties, the latter being included in the permanent appropriations.

Taxes Everything in Sight.

WASHINGTON, March 5.—The bureau of American republics is informed that the president of the Argentine Republic has recommended to the congress several radical revenue laws, which have created bitter enmity against the administration in commercial circles. The president, in his message, holds that such measures are absolutely necessary to maintain the credit of the government, and asks their endorsement by the congress, but the congress has not yet voted to approve the proposals. He proposes to impose an export duty of 5 per cent, ad valorem, upon animal oil, horns, jerked beef, boned, horsehair, hides and skins, bones, wool, tallow and ostrich feathers, which constitute the great bulk of the exports of the Argentine Republic. It is also proposed to materially increase the import tariff, and to place a license on all vessels under foreign flags engaged in the coast trade.

Another decree recommends a license tax of \$100,000 on the importation of foreign machinery and requires a deposit of \$100,000 as a guarantee before they may be allowed to continue business.

Further restrictions are proposed to be placed upon the sale of life insurance companies to persons received from policies issued in Argentine Republic. The law would require that a number of life and fire insurance companies of the United States which have branches in Argentine Republic.

The small decrease in the tax of 2 per cent on the gold and paper deposits of private banks, which will greatly damage the national business, is also proposed. The German and Italian banks now established in Argentine Republic with a capital exceeding \$75,000,000 of gold.

As similar laws control all taxes, customs duties and licenses to be paid in gold.

Encouragement for Reed.

WASHINGTON, March 5.—Ex-Speaker Reed has received the following telegrams: New York, March 5.—"The Old Guards" at the Union League club send you cordial greetings and approval. The support and enthusiasm of your friends is as large as the narrow discourtesy of the enemy is small.

Among the signers to this are: Chandler M. Depey, Cornelius W. Bliss, W. H. Webb, George B. Shield, H. Horace Russell, John St. John and John Jay Knox.

By the same party, the maddest political minority you have been honored with the high compliment of your life. Millions of loyal and true American patriots will now heartily exclaim: "Well done, good, brave and faithful servant, enter thou deeply into our affectionate regards!"

BOSTON CITY, Idaho, March 5.—Recent discoveries made near Boise City, Idaho, have caused no little comment in mining circles. For years these properties have been lying unexploited.
