

BRISCOE OUT OF THE RACE.

He Declines to Run as the Prohibition Candidate for Mayor of Lincoln.

RESIGNATION OF INDEPENDENT NOMINEES.

A Family of Squatters Causing Considerable Trouble. A Small Assignment—District Court—Capital City News.

Lincoln, Neb., March 27.—[Special to The Bee.]—Last evening J. Z. Briscoe, the nominee of the prohibition party for mayor of Lincoln, handed in his resignation of the office to City Clerk Van Dusen, in accordance with the provisions of the Australian ballot system. Considerable pressure has been brought to bear upon Mr. Briscoe to withdraw from the fight in favor of Mr. Weir, the nominee of the independents, and also the head of the citizens' elect. It is now generally conceded in political circles that the fight lies between Mr. Alexander and Mr. Weir. Both gentlemen stand high in business circles, and the issue drawn between them will likely be one of general policy. It is believed that Mr. Weir will endeavor to conduct the affairs of the city on a very conservative basis, that the saloons and houses of prostitution will be held to the same strict accountability that Mr. Alexander attempted; while it is believed that Mr. Alexander will regulate these apparently necessary evils as Mayor Graham has successfully practiced.

The following declarations were also received yesterday by the city clerk from nominees of the independent convention: Thomas E. Stevens, water commissioner; M. Grace, chairman of the board of public works; M. L. Easterday, city clerk; W. G. Houston, excise board; and A. J. Sawyer, city attorney. None of these vacancies have been filled.

WHO WILL BE CHOSEN JUDGES? The passage of the bill making Lancaster county a judicial district has been increasing the judges to four stirring things among the lawyers in the city. One of the new judges to be appointed will be a republican and one will be a democrat and the third is as to who shall be the lucky men. It is stated today that Governor Boyd has decided to appoint all the judges, and has consented to him and leave it entirely to the bar association to select whom they prefer to appoint the association's selections. For these three selections the bar association will be held, and as all the lawyers in the city are in politics it will be a lively gathering. A. J. Sawyer is prominently mentioned for the democratic selections, while W. H. Woodward, A. K. Thibault, Robert Ryan and C. C. H. are mentioned for the republican candidates, and Mr. W. S. Hamilton has today announced himself in the field. A prominent attorney states that the present appearance of things would be at least a dozen candidates for the republican selection before tomorrow noon.

SAM D. LELAND, wholesale cigar dealer at 808 P street, made a voluntary assignment for the benefit of his creditors, to Sheriff McWay this morning. The matter will come up in county court shortly, and a receiver will be appointed. No statement of assets and liabilities has yet been filed, as the stock has not been inventoried. The assignment was made necessary because of poor collections, and the fact that he was doing too much business on his capital. Mr. Leland is very popular in Lincoln, and has a large number of his many friends hope he will come out all right in the end.

A GOOD PROSECUTOR. Greenwald, who bears the reputation of being rather shiftless, concluded to move, and with wife and two little children started to leave the city. He was going to the city to see what they were, and while going along 24th street they discovered the door of 245, which house is owned by Mrs. J. A. Grossbeck, was open, and without waiting for an invitation walked in, and asked to be allowed to stay over night. The Grossbecks were not in the house, and a person in human kindness, and gave the visitors shelter. When the next day came the Grossbecks made no objection, and the matter of fact is still there. All attempts to induce them to go peacefully have so far failed, and the man won't go out of the house at all for fear the wife will be arrested. Mrs. Grossbeck called at police headquarters and the mayor's office yesterday afternoon, and in getting the matter burdened upon them. She says Mr. Grossbeck is a consumptive, and too weak physically to throw Greenwald out. She appeals to the court to place the man in the matter. Mayor Graham instructed Marshal Melick to have the man arrested for vagrancy, and then get rid of the balance of the family by sending them to the city jail, and one that has puzzled the authorities.

DISTRICT COURT DOINGS. Judge Field is engaged today in hearing the case of W. M. McCall vs. the Union Savings bank, C. H. Gould and several other parties. This is an injunction case to prevent the Union Savings bank of this city from turning over to the K. K. C. a company some \$20,000 it now holds. The case is an old one, or rather the outgrowth of an old one between the possession of the Union Savings bank over debts due from the latter to the former. It was fought out in the courts several times, but keeps bubbling up occasionally. E. M. McCall is an attorney of a lot of cattle, but the sale was stopped by an attachment gotten out by the K. K. C. company. Finally it was agreed to allow the sale to proceed, the proceeds to be deposited in the Union Savings bank pending the litigation. Before the attachment came in, W. J. McCall, who claims to have an interest in the proceeds, secured the injunction, and C. H. Gould had a mortgage on the cattle, comes in as an interested party. In the replevin case of McCall vs. Mrs. Hardt tried yesterday, the jury returned a verdict giving the possession of the animal and loading him up with a cent damages.

Judge Chapman will be down Monday and render decisions in all cases he now has under advisement and close up his connection with the Lancaster county district court.

The action decided will be called tomorrow morning at 9:30 o'clock. The jury has been discharged until Monday.

In the injunction brought by Mrs. M. J. Bond to restrain Paul F. Clark from ejecting her from the hotel that bears her name, the defendant filed an affidavit today in which he denies Mrs. Bond's statement that she had never been notified that the property was to be sold under an execution. On the contrary, Mr. Clark asserts that she frequently notified, and came to his office several times about the matter. The first time she agreed to settle the claim, but the next time told defendant she could not give anything from her nor could he find any bidders on the hotel property. He denies that there was any fraud or collusion in the matter, and avers that the hotel is not worth a dollar above collections, and nothing could be collected otherwise.

A YOUNG DIAMOND THEIF. Clyde Newell, a youth who has been in the hands of the police a half dozen times in the past year for various misdemeanors, was brought to the court this morning by Paul Swift, who charges the boy with the larceny of a diamond ring valued at \$125. The ring was lost in a card game at the Casino, and Mr. Swift took off the ring while he was performing his duties as a waiter. When the ring was found, the waiter who had been dismissed walked off without thinking of his partner. A few minutes afterwards he returned with the ring, but after it was not there. No trace of the ring could be found and Paul had about made up his mind to give it up for lost when he learned that young Newell had confided to a companion that he had the ring. This morning he ran across the boy and brought him to the station. The defendant says he knows where the ring and it was not found on him. The police believe, however, that he knows where it is and will try to find out. Among his effects were three skeleton keys and a pocket watch.

COL. HINTON TELLS HIS PLAN.

How the Artesian Inquiry Will Be Carried on Next Summer.

INTERESTS THE ENTIRE NORTHWEST. Hunting the Waters of the Missouri Lost in the Earth and Bringing It to the Surface for Irrigation.

TRAVERSING THEIR MUSCLES. Hon. Philip Andrew, for years president and instructor of the Omaha grammar school, one of the best classes of grammar schools in the country, has been making endeavors since his state position has brought him permanently to the state house to introduce legislation for the Lincoln schools. Mr. Andrew in the moments he could spare from his duties as a state official, has been drilling about thirty school children in his club swinging, wading exercises, calisthenics and marching. He has also been giving instruction in these same matters to about twenty-two teachers, among which are a majority of the principals. Mr. Andrew has done this work free of cost and for his love of gymnastics, many wish to have the American as well as the German children have the advantage of physical culture. He hopes that by drilling the teachers they will follow the example of the teachers in nearly every large city by giving instructions in calisthenics. The teachers are drilled Mondays and Wednesdays and the children Tuesdays and Fridays. These drills occur at 5 p. m. at Harmon hall. On Monday evening a public exhibition will be held at 5 p. m. by the children who have been under Mr. Andrew's instruction.

ODDS AND ENDS. The evils of the present system of appointing members of the board of registration by the council were demonstrated last morning when the boards organized. In one instance one of the men appointed was a candidate on the ticket, while several others in the ward for which they were appointed, Mayor Graham had to straighten out the tangle at the expense of loss of time and money. Fred Binger, who is charged with assault with intent to kill Peter Benson, will have a trial before Judge Houston at 10 o'clock today.

NO DANGER AHEAD.

Opinions of Army Officers on the Situation at Pine Ridge.

"There is but little new about the situation at Pine Ridge," said Colonel Guy V. Henry. "Everything is quiet and will remain so unless some needless and unnecessary people take it into their heads to create a disturbance. The Indians will not fight and do not want to fight so long as they are properly treated. "There are people up in that country, however, who like to see a disturbance and like to have several companies of soldiers stationed at Pine Ridge, and they are creating a disturbance by word and deed and a demand for food and hay and corn and the government foots the bill. "There are some reports in the country that have been obliged to ask for aid last winter had it not been for the work they got through last winter. It is a question whether such a method will be resorted to for the purpose of creating another disturbance. "Speaking of the situation at Pine Ridge, Colonel Henry said: "The situation is quiet in many places, and when it begins to melt the whole country will be like a bog. There will be no danger of a disturbance any more before in ten years as there is right now."

A group of officers, ranging in rank from a colonel of cavalry down to a lieutenant of infantry, were seated in the rotunda of the Paxton discussing the probabilities of another outbreak. A major of cavalry, in response to a query, said: "Some reports have come to us about the danger of the friendly Indians joining the hostile Sioux in the spring. Many things may happen between now and spring in the Indian question that it is hard to form any definite opinion on. It is a question of the future. A lieutenant recently returned from Pine Ridge said: "Considerable of this agitation comes from civilians who would be benefited financially by another war. The reports of the reports from the agency originate and are sent out to the country at large. The reports are not true, and they have a large body of troops in the vicinity. No, I do not think there will be a fresh outbreak."

All of the officers spoken to in regard to the matter are in favor of military action instead of civilians. "The situation is quiet, but a hard fight with the authorities at Washington to get a few army officers appointed as supervisors of the reservations after the affair at Wounded Knee. The appointments are only temporary as the orders stand now and civilians are liable to be appointed at almost any time. The military officers are in charge of the agencies is to see that ration and clothing are properly issued. "The situation is quiet, but a hard fight with the authorities at Washington to get a few army officers appointed as supervisors of the reservations after the affair at Wounded Knee. The appointments are only temporary as the orders stand now and civilians are liable to be appointed at almost any time. The military officers are in charge of the agencies is to see that ration and clothing are properly issued. "The situation is quiet, but a hard fight with the authorities at Washington to get a few army officers appointed as supervisors of the reservations after the affair at Wounded Knee. The appointments are only temporary as the orders stand now and civilians are liable to be appointed at almost any time. The military officers are in charge of the agencies is to see that ration and clothing are properly issued."

ON FORT CROOK.

Work Will Soon Be Commenced and Pushed.

"It is quite probable," said Colonel Hughes, chief quartermaster of the department of the Platte, to a Bee reporter last night at the Paxton, "that work upon Fort Crook will be commenced in the near future. It is a question of the future. The indications are that considerable work will be done upon the new fort coming summer. The topographical maps, giving the location of the military agency, are in the hands of the committee saw it to recommend, have been forwarded to Washington for approval. "How far we will be in the appropriation of \$500,000 probably carry the work of building the fort."

A Thieving Cyprine.

Minnie Hayes, a resident of the burnt district, was arrested on last yesterday by Detective Hayes and charged with grand larceny. Some weeks ago Minnie stole a clover leaf scarf pin set with diamonds from one of her visitors. She gave the pin to her lover, a man named Moose Banks, who lives in Council Bluffs. The detectives recovered the pin from Banks.

To Recommend for Judges.

There will be a mass meeting of the members of the bar of the Third judicial district at the court house at 3 o'clock this afternoon for the purpose of recommending to the governor suitable members of the legal profession for appointment to the bench of the Third judicial district. There are a great many candidates and an interesting time is anticipated.

Held for Trial.

Carl Jacobson and John Sundval of the Swedish Post, who were arrested on complaint of Charles A. Lundin and charged with criminal libel, were up before Judge Hayes yesterday. Bond was not required on bond to await their hearing, which is set for next Friday, April 3.

Rittmaster Dismissed.

Gustave Rittmaster, who was arrested at the instance of Denver parties on charge of being a fugitive from justice, was arraigned for trial in Justice Hart's court yesterday and discharged. No one appeared to prosecute, so there was nothing left but to dismiss the case.

COL. HINTON TELLS HIS PLAN.

How the Artesian Inquiry Will Be Carried on Next Summer.

INTERESTS THE ENTIRE NORTHWEST. Hunting the Waters of the Missouri Lost in the Earth and Bringing It to the Surface for Irrigation.

Colonel Richard J. Hinton of Washington and Prof. Robert Hay of Kansas were guests at the Paxton yesterday, where they were found by a representative of the Bee. In answer to questions concerning the scope of the work in which they are engaged, and the extent of their preparation for the summer campaign, Colonel Hinton said: "I am in charge of the special irrigation inquiry now under way, and came here to confer with the staff engaged in the artesian investigation. The public will recall that, under the demand of the Dakota senators at the last session of the legislature, and after discussion with Major Powell of the geological survey, congress appropriated \$20,000 for an inquiry into the artesian basin with a view to its use for irrigation. Under that provision field work was to begin April 30 and be concluded July 1, 1891. The scope of the investigation was extended, however, and included an investigation of the underflow, or earth waters held in the porous strata within convenient distance of the surface. The investigation for a general inquiry into the utilization of the soil by irrigation. Messrs. Nettleton and Hay were accompanied by field chiefs and I was again given charge of the work in the office, under the supervision of Mr. Willott, assistant secretary of agriculture. In the course of the investigation congress extended the time of the inquiry to January 1, 1892, and also added an appropriation of \$20,000 for the purpose of continuing the inquiry. This is available for the fiscal year beginning June 1, and is the first of an annual appropriation for this purpose. "I am presenting my preliminary report to Dakota and Nebraska first, with a view to fulfilling engagements to address agricultural colleges and meet the farmers of those states. Mr. Nettleton and Hay are to follow me. I have held a two days' session at Lincoln with these gentlemen and Prof. Hicks of the Nebraska university, and also added an appropriation of \$20,000 for the purpose of continuing the inquiry. This is available for the fiscal year beginning June 1, and is the first of an annual appropriation for this purpose. "I am presenting my preliminary report to Dakota and Nebraska first, with a view to fulfilling engagements to address agricultural colleges and meet the farmers of those states. Mr. Nettleton and Hay are to follow me. I have held a two days' session at Lincoln with these gentlemen and Prof. Hicks of the Nebraska university, and also added an appropriation of \$20,000 for the purpose of continuing the inquiry. This is available for the fiscal year beginning June 1, and is the first of an annual appropriation for this purpose."

"In the northwestern part of Nebraska and states to the north of it there are several very interesting problems to be solved. Without attempting to state the details, the officers of the inquiry are led to believe that the principal work to be done is to discover and restore the water lost by seepage by the artesian strata, which Prof. Hay will have in charge. Colonel Nettleton will make a survey of the James river and Devils lake similar to those made in the valleys of the North Platte and Grand. The purpose of finding the water level from which the artesian flow is derived. Nettleton will also make a study of local features. In Dakota the first effort will be to locate the artesian strata, and then to determine the character and value of the water. The work will be principally by Prof. Culver. Examination will also be made to determine the eastern rim of this formation and its location in the northwestern part of Nebraska. There will also be an examination to determine the character and value of the water. The work will be principally by Prof. Culver.
