THE CONDITION OF TRADE,

Collections Pair and Money Comparatively Easy in All Quarters.

THE JOBBING TRADE GENERALLY GOOD,

A Review of the Markets for the Past Week-Prices on Produce High -A Large Crop of Fruits in Prospect.

Collections for the week just closed are generally reported as fair, and money is comparstively easy. A call for a statement of the condition of the national banks has been made, which will be published in a few days, and which may throw some light on the actual financial situation. THE JORDING TRADE

of Omaha during the past week has, as a general thing, been very satisfactory. A good many houses report a slight increase in the volume of trade as compared with a year a go, and still other houses report a larger increase, amounting in some cases to a gain of 20 per cent. On the other hand a few houses claim that there has been a slight decrease in the amount of goods sold by them, but this is more than made up by the gains of other firms, so that it is safe to say that the

other firms, so that it is safe to say that the
wholesale trade of Omaha is fully as good as
it was during the early part of May, 1890.

The feeling among the Jobbers generally is
one of confidence in the business situation
and they are prepared to push trade for all
there is in in it. The reports of the country
merchants are most encouraging and indicate
a better condition throughout the state at
large than might be generally supposed to large than might be generally supposed to exist. The unusually high prices at which all kinds of farm products are selling places money in the farmers' hands, cambling them to keep up their store accounts in fairly good shape. In some sections of the state the fact that the farmers are all at work in the fields produces a slight decrease in the movement

As to prices of standard goods in a wholesale way a decline of 5c per keg is reported on nails. The coffee market is firm and sirings higher. The sugar market is easier with a decline of 5c on granulated. Some kinds of dried fruits are easier. COUNTRY PRODUCE.

In country produce the changes in prices have been slight on most articles, as in the case of eggs which sold largely at 19%c. It is a noticeable fact that the egg market this spring has been very high as compared with previous years. A year ago a good many eggs were selling in this market under loc and plenty of them were placed in cold storage at 800 c. Taking into account the num-ber of eggs produced in Nebraska, this advance has been of great advantage to the

farmers and merchants
The long looked-for increase in the receipts of butter has at last put in an appearance. At the same time there was an improvement in the quality due to new feed. At the close of the week an easier feeling was noticeable in the market and a decline must come before many days. When it does come dealers expect to see the market drop very rapidly and shippers should beware of allowing stocks purchased at the present high prices to

accumulate on their hands.

The receipts of poultry have not been large, but at the same time no very active demand has been developed and prices re-main about steady. These prices, bowever, are already high, and that is undoubtedly one reason why the receipts do not move with more freedom.

The hay market has experienced a decided break in prices during the week, owing to the large receipts and the accumulation of stocks. The best upland hav has sold on track at \$11 per ton, a pretty good price, but low to what it was a week ago.

THE PRUIT MARKET. Strawberries have received the most at-

tention from dealers during the past week.

The arrivals have been fair, but the
quality has not averaged any too good.

The quantity of inferior stock received
has depressed the market even on good fruit and prices have been low for the season of the year. In fact they have been selling most too low to encourage shipments. W. J. Shaw, one of the largest dealers in small fruits in St. Louis, was recently in this city and threw some light on the berry question. He remarked that the prospects for all kinds He remarked that the prospects for all kinds of small fruits in Missouri and Arkansas are the best in five years. Especially in St. Louis county the prospects are very flattering, strawberries being unusually large for the time of year and they will probably be on the market by the 25th of this month. The recent frost is said by growers to nave use some damage. This county has a reputation all over the country for producing the finest berries grown. The peach trees are most too heavily loaded to peach trees are most too heavily loaded to make good fruit. The cherry crop promises the largest grown in eight years. The small fruits in Vermont, Massachusetts and portions of New York have been injured by frosts, but to what extent has not yet been

The market has been well supplied with all kinds of vegetables and no difficulty has been experienced in filling shipping orders. Both California and the south are making consignments to this market so that the offerings here include a large variety. Potatoes have been selling lower this week owing to the more liberal offerings. SPECULATIVE MARKETS,

The past week has seen enormous scalping trades on each side of the wheat market at Chicago. The general drift has been in favor of our magnificent crop prospects and the beautiful weather. The market closed lower but not very weak.

Corn receipts have been large and the mar-

or lowest price of the week.
Outs have been dull and the main trading in them has been in sympathy with corn and Provisions comparatively steady with great

ket has given away under them, closing at

liquidating of long stuff by outsiders and lower markets in consequence. IN WALL STREET the exports of gold are attracting more attention every week, as is natural. The street calculates that these exports will do no harm so long as the quantity sent abroad is not greater than the production of American mines, but there must also be an allowance for consumption in the arts, and some addi

sary from time to time, as population and the volume of business increases. continue good in Nebraska, although it is getting rather dry in some sections for small grain. The farmers are busy putting in their corn and the acreage will be large.

BELFERS.

Chicago Live stock Market.

CHICAGO, May 9 .- [Special Telegram to THE BEE. |-Only about 500 cattle arrived at the yards today, making a total for the week of 46,519, or 21,700 head less than for the corresponding week last year. There was fair inquiry for different grades and the tone of the market was firm, though scarcely enough was accomplished in the way of sales to establish trustworthy quotations. Few hundred head in the yards were taken on a basis of \$2.000 4.75 for inferior to choice cows, heifers and buils; \$2.540.15 for stockers and feeders and \$4.550.50 for very common to extra shipping steers. Calves were stable at \$2.000.500. There has been but little change in prices within the last week. Neither has quantity nor quality of supply varied in any important particular. Arrivals have continued light and were of rather an ordinary class of steek, not a drove that was strictly first class having been offered. The demand though at times displaying considerable strength, incked the "snap" that characterized operations during the previous week and apparently it would have taken only a moderate herease in receipts to have turned prices downward. However, values have been well sustained all along the line and there is no loss of confidence regarding the future. During the first nine days of this month there has been a decrease in receipts as compared with the corresponding time last year of 35,000 head and since April I the loss of more than 174.000 head has been experienced. That loss during the next six vecess will also be very considerable is the opinion of those best qualified to judge, but as to whether there will be any further marked advance in prices is a question upon which all are agreed, though the situation certainly looks very strong so far as fat cattle are concerned. There are good reasons for doubting that common grades are to go much higher, as the Texas grass cattle season is now open and the time when native grassers will make their appearance in the market is not far away. Within a week over 5,000 Texas cattle have been received here. The bulk of them had been fatted on cotton seed or eror and were salable at \$4.2565.10. Grass cattle from that state are quoted at \$5.500.15, according to qu ponding week last year. There was fair inquiry for different grades and the tone of the quality
The prices for hogs were not quotably different from those current on yesterday. The

The prices for hogs were not quotably different from those current on yesterday. The wants of shippers alone about equalled the number in the pens and there was a quick clearance at full prices. From \$5.05.5.10 for choice medium and heavy weights sales ran down to \$2.00.25.00 for calls. There was not much trading below \$4.53 and a still smaller number at better than \$5.00, \$4.8565.00 taking most of the offerings. Much more than ordinary steadlness has marked the course of the hog market during the last six days. Prices were weak and strong by turns, but the range of values was not at any time more than \$5.20 away from the closing quotations of last week. The general tendency was slightly in the direction of improvement, prices showing a gain for the week of \$5.00 for common and mixed lots. The fact that this advance has been made in the face of considerably augmented arrivals has had the effect to strengthen confidence in the stability of prices, as the near future is not likely to see any very marked addition to our supplies. In point of quality there is improvement as compared with the previous few weeks, the receipts of pigs having decreased, while the pertion of good heavy and medium weights has grown more prominent. The character of the demand has not changed. It still runs almost exclusively to an average of from 150 to 30 pounds to the atter neglect of bogs of heavier weights, Eastern buyers took a larger percentare of offerings than for any previous week of the season, securing nearly five-eighths.

DeWitt's Little Early Risers, best pill.

Commodious Facilities.

The completion of the Reading Terminal will enormously increase the suburban travelers to and from Philadelphia every day, says the Press. The number of people on the lines of the Pennsylvania railroad who come to town every day for business has multiplied ten fold within less than ten years. New York railroads have had the same experience. On the New York, New Haven & Hartford railroad from Stamford to New York a club of daily travelers has been formed. The members pay for and enjoy the luxury of a special car, for which each member pays the company \$50 a year in addition to the regular fare. This car is attached to the train which leaves Stamford at 7:45 o'clock each morning, arriving at the Grand Central station at 8:50 o'clock, and returns at 5.02 o'clock in the afternoon. It is completely furnished with tables, seats, cards, wash stands, towels, soap, etc., thus giving every requisite desired. And no person other than the members of this whist club, except upon invitation of one of the members, is permitted to ride in this car, no matter how many passengers there may be on the train. It is, for the time being, the personal property of the players.

THE SPECULATIVE MARKETS.

Chicago Grain Trade Rather Bearish with Heavy Business.

INCREASE IN VISIBLE WHEAT SUPPLY.

Range of Leading Futures-New York Grain and Provision Trade-Stocks and Bonds-The World's Markets.

CHICAGO, May 9 .- There was a very heavy trade in wheat today within an irregular range, prices ruling both above and below the closing figures of yesterday. July opened at 99c against 994c at the close yesterday. The trade seemed to be hearish. In fact there was altogether too much unanimity in the early dealings to permit of the transaction of much business. The crowd was trying to get rid of the grain but very few were successful. The bear leaders who had anticipated selling large quantities of grain were disgusted and started in to engineer a rise. The result was the early sellers soon found themselves scrambling to get the grain back again. July in the first minute touched 99% and sold off in the early dealings to 97%, when the bears took on horns and began to buy, the price shot up to \$1.00. Having made a hard spot the bears again turned sellers and on their offerlings a rection to 95% followed, than came a rally to 95% but bear offerings were too heavy and a decline succeeded, the market closing at usize. May was rather a fancy deal and closed about 100 were indicative of weaker markets, the weather was fine and favorable to the grow-ing crops and the government report was ex-pected to be heartsh.

On the other hand, there was large export

buying at the scaboard, liberal clearances from here and a rapid reduction in stock in store, together with some bad crop reports, including damage by insects and hot winds in Michigan. Later in the day fine rains were reported in the Red river valley and on the lower Jin river.

reported in the Red river valley and on the lower Jim river.
Bradstreet's reports and estimates indicated a stock of only 75,000,000 bushels visible and invisible in the United States on May I. Bradstreet's and Beerboum's totals for the United States and Canada, affoat for Europe and available in Europe, show that the sopules have fallen off from January I to May I only 16,05,000 bushels, against 38,000,000 bushels for the corresponding period last year. Bradstreet's reports available stocks of grain on May I compared with last year as follows: Wheat, 1801, 23,062,000 bushels; 1850, 33,328,000 bushels.

Corn was fairly active. The feeling at the opening was fairly steady, but the local crowd was bearish and sold enough to cause a break in prices. The market then grew strong in sympathy with the raily in wheat, but weakened near the close. July opened at 50,000 by she, checked of the core of the carry selling was caused by line weather and indications of large receipts.

Onto were fairly active, but unsettled.

by line weather and indications of large elepts.

Oats were fairly active, but unsettled. There was talk of dry weather at one time and rain at another which kept prices moving up and down within a liberal range.

Provisions started out weak with grains, declined still further, advanced sharply on large buying by Kennett, Hopkins, and other commission firms and then weakened. July perk started out at \$12.00, sold to \$11.80, improved to \$12.124, and reacted to \$10.00.

The leading figures ranged as follows:

Government Cr.p Report Washington, May 9.—[Special Telegram to The Bre.]—The condition of whiter grain on May 1 is reported by the statistician of the department of agriculture as follows: Wheat, 67.9, rpc. 95.7; barley, 96.7. This is an advance in wheat of i point during April and quite as much in ryc. A gain in wheat is reported in New York, in some of the southern states, in Michigan, and a slight improvement in Hillingia, and a slight improvement in Hillingia, and as shight improvement in Hillingia, and as a state of the other states. The uniformity of condition is somewhat remarkable, no state average being lower than 98. The condition of mowing inness is also logh, averaging 97, ranging from 90 to 100. The average for spring pastures is 98, ranging from 92 to 100, except a drop in Utah to 89 and in New Mexico to 8k. On the eastern slope of the keeky mountains corn is within 4 or 5 points of a built condition, and the Pacific coast is near the mexhour.

condition, and the Pacific coast is near the nexthour.

The progress of spring plowing has been greatly retarded by an excess of moisture. In the central and southern beits the proportion is seen as per cent. The average of several previous years has been 7, per cent. The eastern states report a favorable condition for spring wheat and rair progress to date in all the southern states. It has been delayed by heavy rains and later by grouth which has rendered plowing difficult and imperfect. In the Ohio valley an excess of moisture delayed plowing through March and interfered with its progress in some piness during the first two weeks in April. The work has progressed rapidly since and germination has generally been prompt. The senson has been favorable and spring work is well advanced and grain is coming up and growing finely. The frosts on May 5 and 6 caused some damage to fruit and early vegetables

STOCKS AND BONDS.

NEW YORK, May 9.- The stock market was nctive for the short session today and the weaknes which has been the feature of the week culminated in a sharp decline in the last hour to the lowest prices of the week in all the leading shares. The prime movement in the market is now the expected large exportation of gold, and while the weakness in rates for foreign exchange is regarded as indicating an early end of the gold shipments, the heavy decline on their purchase of the banks of and operators find themselves unable to carry the stocks with which they are loaded in many cases. In some of these the shipments. however, are searcely justified by the rates which have prevailed for the last two months. said to have been brought about by the parties who succeeded in locking m mey last fall in order to lower the market and for the same purpose. There is no other explanaat the low rates of exchange prevailing. The market started off today with some pressure to sell, apparently the remains of yesterday's movement, but there were indications of in side buying in Missouri Pacific and of buying

Financial Review.

Financial Review.

New York. May 9.—The Post says: The heavy gold exports were the controlling factors on the exchange and the general expectation was that the \$\frac{1}{2}\$. 20,00 sent out this week would be reflected by a decrease from \$\frac{1}{2}\$. 20,00 to \$\frac{1}{2}\$. 20,00 in the surplus reserve of the banks in their statement today. The hast loan of money yesterday was at 1 per cent and the highest rate had been 6 per cent early in the day, and as far as these rates were any index there was no positive lightness on the money market since last week. The average rate of 4 per cent in the last two weeks is considerably higher than the average of May, 1888 and 1880, though not so high as 1887 and 180. Nevertheless, as it was the expectation of very easy money, together with the prospect of good crops that started the rise in stocks the present prospect of decreasing bank reserves as the result of gold exports is the one thing that has caused the downward reaction in stocks. There has been no lightness in the money market and the probabilities are there will be none this summer, and as for the autumn there is every prospect that we shall have heavy imports of gold to pay for the wheat which furupe has bought. Even now commercial demand bills againt July exports of wheat are being offered for delivery in July at \$4.85, which is believe the gold importing price. But for the time being the gold exports neutralize not only the crop prospects, but all the good results of the harmonious meeting of the advisory board of the Western Traffic association, and the progress made toward economy in the business of the western roads. The decline from the highest since the beginning of the year is about 5 points.

The Money Market. NEW YORK, May 2.—Money on Call.—Easy, oans at 3 per cent; closing offered at 3 per PRIME MERCANTILE PAPER-5636 per cent.

STERLING EXCHANGE-Quiet and stendy at

loads sold for export and some marvelous stories were told of heavy sales for both present and future shipment at Baitimore. The result of this was a sharp opturn on buying by shorts, and although the market reacted somewhat before the close a portion of the advance was maintained and the market closes fairly firm. New York cleared 22,000 packages of flour and 34,000 bushels of wheat, Reccipts at cloven principal points were \$15,000, shipments 702,000. In corn the impression prevailed early that the buil clique who have been working in corn were weakening in their faith and would sell out if an opportunity were offered them. The result of this was a very weak market at the opening and although a reaction occurred on covering of shorts when wheat advanced so rapidly, the undertone of the market is decidedly weak and indications favor lower prices. Oats—in spite of, the fact that some strength was imparied to the early market by stories of drouth and by Prime's report that the condition of the crop was very irregular, the close of this market is very weak and indications point to lower prices next week. Provisions opened weak and there was considerable short setting on the break. A reaction took place on some buying of pork for New York account, but the strength was soon loss and the market closed almost at bottom prices and, weak. The temper of our traders is becoming decidedly weak on provisions and scalpers sell thom short whenever encouraged by weakness in grain. We do not, however, expect any serious break and prefer the buying side on soft spots. \$4.840; for sixty-day bills and \$4.88% for deloads sold for export and some marvelous stonand. The following were the closing prices on Bink Clearances. BALTIMORE, Md., May 9.—Bank clearings to-day, \$1.501,019; balances, \$190,408, Money at 6 per cent. PHILADELPHIA, May 0.—Bank clearings to-day, \$14,400,602; balances, \$1,408,154. For the week clearings were \$60,700,702; balances, \$0,-202,012, Money at 4455 per cent.

How much money have I got in my bank! so you see-five cents! Thank you,

This Italian question reminds me of the "foreign subject" imposture, as it was practised in this country during the war, says a writer in Open Court, When the draft was ordered, regiments of patriots who for years had been con-spicuous as hustlers and knockdowners at the polls, marched gallantly up to the office of the provest marshal, and claimed exemption on the ground that they were "foreign subjects" of all sorts of emperors, kings, and queens. They owed allegiance to every flag under the sun, excepting the American flag, and they "demanded" that their names be stricken from the lists. Public spirited fellows long eminent for skill in that branch of civil engineering which directs ancus machinery swarmed at the consulates clamoring for safety. In combe paradox appeared Hungarians invoking the aid of Austria, Poles appealing to Russia, and fierce Fenians demanding the protection of the British flag. What is more wonderful still, they got it. consul knew that the United States could not afford to quarrel with other nations then, and with an air of Imperions dictation they required that those "foreign subjects" be released from liability to service in the army. Some of these very same non-combat-ants went back to the old country, and when arrested for political offenses there, declared themselves to be citizens of the United States, claiming the pro-

tection of the American flag; and what

An interesting incident in connection with into the city.

LONDON, May 9,-Closing quotations:

Trader's Talk.

New York May 9.—Kennett, Hopkins & Co. to S. A. McWhorter: The stock market has been more than ordinarily active for a Saturday and prices suffered all along the line. There are indications that recent purchasers of stocks are unwilling to heur larger losses, and that a good many shares have been thrown over today on stop loss orders. The bright prospects for crops in this country have encouraged, and continue to encourage, the public to believe that railway shares will advance, but the stern logic of the falling bank reserve and large shipments of gold to Europe where financial troubles exist in all important countries is undoubtedly making an impression. The bank statement showed a loss of \$2.675,530 in surplus reserve and a loss in eash of \$3.500,000. The loss in reserve would have been greater but for a material decrease in deposits, and there is no doubt that the banks are worse off than the statements show because of the large shipments of gold today, all of which comes out of banks, but does not appear in the weekly averages. Stocks closed but a few fractions above the lowest prices and sensitive to foreign advices. Total sales, 167.721.

and sensitive to foreign advices. Total sales, 107.722.

Chicago, May 9.—Kennett, Honkins & Co. to S. A. McWhorter—There was steady pressure from bears in wheat early in the session by which the price was forced down I cent. Int in buying these sales the market was advanced 2 cents. Holders were made timid by the decided weakness in corn and local longs generally sold out near the close. The price reacting finally about where it did yesterday. The export move continues active. New York reporting about 2,000 bushels taken today, tash wheat was quoted 3c higher it Minneapolis and has been very strong here. The move for the week shows another large decrease in the visible supply, and we believe this will be a weekly occurrence until reserves swindle to a point where the wost inveterate bear will find complete satisfaction. Much nigher prices are in our opinion not far away. Corn and oats do not look like a flattering short sale at current prices. They have had about enough of a breas for the present and ought to be bought for a turn. Longs have been pretty well shaken out and no buyers will appear on a further decime. The market is in shape to go considerably higher with but moderate buying. Provisions show a decime for the day of 25c on pork, for the week \$1.00 on pork, 77-5c on lard and 32-5c on ribs. The depressing influences aside from heavy stocks have been the lower grain markets, light each bushness and the operations of bear traders. On the other side is to be taken into account the enhanced prices of beef and multon and the fact that a large proportion of the hozs received here are reshipped to eastern states where the supply is small.

Chicago, May 8.—W. G. McCormiek & Co. to F. C. Swariz & Co.—Today winds up a week

shipped to eastern states where the supply is small.

Chicago, May 9.—W. G. McCormick & Co. to F. C. Swartz & Co.—Today winds up a week of a very active scaiping market in wheat in which the fluctuations have been frequent and sharp. The feeling at the opening was very weak in consequence of lower cables and of Prime's report showing the winter wheat in almost perfect condition and that spring wheat had g me into the ground as favorably as possible. Added to this bearish influence was a cable published in the Chicago Triane stating that the English government report of imports had been discovered to be 280,000 quarters iess than it should have been, which supposedly added 4,000,000 business to English stocks. There was heavy selling for both long and short account, and our local scalping crowd were in a bad flx to receive the builtsh news which came late. One of the erop experts sent in some reports of damage to wheat in Kansas. About the same time New York reported forty or lifty

Chicago, May 3.—Bank clearings were \$15,-152,000. New York exchange was 60c premium. Rates on money 3 446 per cent. Sterling exchange steady and unchanged. Bostos, May 9.—Clearings, \$14,471,976; balances, \$11,25,474, Money, 5 per cent. Exchange on New York, 55254c discount. Clearings for the week, \$28,172,964; balances, \$4,483,23. For the corresponding week last year: Clearings, \$109,077,288; balances, \$10,4,9,295. All for Sister. Forty-five cents, stranger—only want five cents more. What will I do then, stranger? Why, you see, sister has such a terrible cough, and people say it will be bad on her if she don't get better soon, and the folks tell me Haller's suce cough syrup will cure it right.

 Money, I per cent. Rate of discount quiet in the open market for both short and six-month bills, 4 per cent. stranger. The "Foreign Subject." BEHLIN, May 9.—The statement of the Imperial Bank of Germany shows an increase of specie of 380,000 marks. Loxbox, May 9.-The amount of bullion gone into the Bank of England on balances today is £85,000. Pauls, May 9.-Three per cent rentes, 94f Denver Col., May 9.—The mining market closed dull, very dull, today, there being but little demand for any stock outside of Dia-mond B., Emmons and Puzzler. Prices were several points lower. Total sales, 34,600.

> is most wonderful of all, got it. Dr. Birney cures catarrn. Bee bld'g. At the Battle of Tippecanoe.

President Harrison's visit to Atlanta was his meeting with Mr. George Cook, a courtly, elderly gentleman. The grandfather of Mr. Cook was the Captain Cook who saved the life of General William Henry Harrison from the Ladians at the battle of Tippecanoe. Mr. Cook and Mrs. Cook had been spending a few days with Governor Bullock and on invitation of Mayor Hemphil went up the road to meet the president. The meeting of the two gray baired grandsons was very cordial and enjoyed a pleasant chat during the ride

incurable have been treated with success. Every farmer should keep a bottle of this justly celebrated remedy; ready for instant
