ILER'S NEW ANTI-WHISKY TRUST SCHEME.

He Unfolds it Before Capitalists and Captures Them-The New Party Leepares to Swoop Down on Ohio.

CHICAGO OFFICE OF THE BEE, CINCAGO, May 22. The democrats of Chicago are making ex-Governor James E. Boyd's case their own. Great interest is manifested in his suit to recover possession of the gubernatorial chair. Bince his arrival in the city on Wednesday last he has been royally entertained by the leaders of his party in Chicago, and at 1:30 this afternoon an informal reception was given to him at the rooms of the Iroquois club. Prominent politicians and business men were present. The Iroquois is the leading democratic club of the city.

Short addresses were delivered at Short addresses were delivered at the banquet table by Judge Lambert Tree, Congressman Newberry and W. G. Ewing United States district at-torney. There were about fifty guests, including, besides those mentioned, Joseph R. Dunlap, editor of the Times, Judges Tulley, McConnell, Clifford, and Con-gressman McGann. The speakers congrata-lated the ex-governor on being the first man elected to his high office by the democrats of Nebraska, and expressing belief that he would soon be restored to his position. ONE OF ILER'S ENTERPRISES.

J. D. Her, formerly of Omaha and now of Kansas City, has been here several days in consultation with capitalists interested in the distillery business in relation to the establishment of a big plant. The Chi-cago men are enthusiastic for the project, but on the advice of lier project, but on the advice of lier no immediate action will probably be taken. Speaking about the enterprise, Mr. Iler

"It is no use to start a big distillery now, for corn is too nigh and it is going up higher than a kite. When corn finally locates on a fair price the new distillery may be formed. As matters are now it is assured of success. Within a week or so a plant will be started in St. Loois which will use 5,000 bushels of corn a cay. This, with the other non-trust distilleries, bring up the total to within 10,-000 bushels a day of what the trust uses. Our plant would make up this balance. Then there would be a crash somewhere. Certain ly the trust could not control all the whisky if a rival concern turned out an equal amount of goods. If the new enterprise is started the big trust will soon be gasping for breath." Mr. Her doesn't talk quite as enthusiasti-celly about Kanas (We as ha did other has

cally about Kansas City as he did when he went there from Omaha a couple of years ago. "We are experiencing the effects of the boom we had several years ago. People 'overreached' themselves, so to speak, and ago. are now undergoing the convalescing pro-cess. The corn fields which were thrown on the market during the excitement are corn fields still and inside property has been affected by the depression in these inside lots, but on the latter, for the most part, the prices are firm. I have no doubt that in a few years we shall begin to move forward at as although not in just the same way. The days of wild cat land speculation are over."

#### TO MOVE ON OHIO.

It is said the new people's party has de-cided to concentrate all its power of organ-ization this year in Ohio and Kentucky. The fight in Ohio promises to be the most inter-esting one. The first real struggle will take esting one. The first real struggle will take place at the state convention of the farmers' union at Columbus next Tuesday, when an effort will be made to commit the union to the third party. It has beretofore been a strong republican organization, but many of its leaders are now training with the new party. The republicans are aware of the danger and some of the best politicians in the danger and some of the best politicians in the state will go there to try and prevent any endorsement of the people's party. It is understood that McKinley himself has been urged to attend. If the union should declare for the third party the defeat of McKinley for governor would be a foregone conclusion, as the new party, with the endorsement of the union, could poli at least seventy-five thousand votes in the country districts. country districts.

San Jose de Guatemala and the steamers will take coffee, mahagany and other products in exchange for lumber, flour and manufacured articles shipped from Seattle. Mr. Baker is a son of President Baker of the board of di-rectors of the world's fair and will remain in the city a few days to visit his parents. THE IOWA CONSPIRACY. Postoffice Inspector Stewart received a detailed report from Inspector Christian, Ia., today regarding the arrest and indictment of today regarding the arrest and indictment of John C. Newton, president of the Des Momes & Kansas City rallway for endeavor-ing to defraud the government in sending bogus mail matter over his line in order to get extra compensationfrom the government on mail contracts. "It's one of the biggest schemes to defraud the government ever we uncarthed," said Captain Stewart today, "and it is all the more surprising because "and it is all the more surprising because Newton is very wealthy and president of a New ton is very wealthy and president of a road down east as well as the head of the Des Momes line. I've had Inspector Christ-ian out there for forty days and received daily reports from him and it was dis-covered that the mail being sent over the line consisted of packages of New York papers over a year old. Newton's scheme was to write to some of his friends along the road that large amounts of newspace and road that large amounts of newspaper mail would be received by them, and he asked that they be held. This extra mail of course showed an increase in the amount sent over his line, and as the government was about to his line, and as the government was about to weigh mails to strike an average for the par-pose of making contracts for the next four years, it is easy to see how the government would have been cheated had the scheme got through. Newton had a friend at Carnesville, Mo., to whom these papers were sent, and when he received them he redi-rected them over the line. If the plan had gone through the government would have been compelled to pay out about \$40,000 extra in the four years of the contract.

#### HE MISTOOK HIS PATE.

LE MISTOOR HIS FATE, Carter Harrison's love story, "The Secret of the Big Rock," will be out in a few days. It is not surprising to find that divorce cuts an important figure in the story. The novel advances the theory that a man cannot be happy until he has found his "fate," and that for every man there is a faile somewhere that for every man there is a fate somewhere in the world. The hero is a rich southerner named Felden, who marries a beautiful neice to fulfill his father's dying request, but lives unhappily with her and they separate. In the meantime he meets his fate at a flower show in London, and after a divorce from his wife finds a woman whom he mistakes for his "fate," but who proves to be the "fate's" younger sister. They are married and come to Chicago. While spending the summer near the straits of Mackinaw he is accident-ally drowned, and with the assistance of **a** negro servant his wife commits suicide, and is buried beside bim at Big Rock. Later the negro dies and also reposes near the same monument. Big Rock, with its double tragedy, it situated near the route of steam-ers on their way from the "Soo" to Mack-

IRON MARKET WEAK AT PITTSBURG.

**DUN'S REVIEW OF THE WEEK** 

#### Trade at Western Cities Quiet But Very Hopeful-Satisfactory Reports from the South-Increase in Failures.

NEW YORK, May 22.-R. G. Dun & Co.'s

Weekly Review of Trade says : The continued outgo of gold has a depressing influence. The fail in the prices of all

commodities has been about 3.8 per cent in two weeks. The local money market is fairly supplied at moderate rates, as are other eastern and western markets almost without exception, but at a few southern points money is close or tight and much caution in extending credits prevails. The treasury has paid out during the week but \$600,000 more than it has taken in of ordinary

currency, but has also put out \$200,000 more fractional silver. At most places trade seems healthy and there is not more than the usual complaint about collections. The iron business is rather weakened at Pittsburg by the prospect of increased sup-

plies and is very duil at Cleveland, but somewhat more demand is seen at New York and Philadelphia for various forms of manufactured iron. Steel rails do not share the improvement and are flat, nor is structural iron active, nor, in fact, the rest of building materials, but there is more demand for and bar, which has been sold at \$1.65, now commands \$1.734. The coal business is still threatened by pro-duction far beyond agreements and the price

does not seem to warrant the advance proposed for June 1. The woolen industry is waiting without

any improvement in coods to justify the de-mand for higher prices on new wool, though there is cheering activity in flannels.

At Boston trade in leather was improving until the Davis failure was announced, but was then checked, though it is not believed that prices or credit will be affected beyond a few days.

Hides are dull with some concessions, and the boot and shoe trade is generally dull. At Philadelphia collections are very bad in

Pittsburg notes that railroad orders are held back waiting for crop results, and, while window glass does well, flint glass has slack

usiness. At Cleveland dry goods, groceries, hardware and shoes improve fairly, but machin-ery, lumber, iron ore and clothing are cull. At Cincinnati the tobacco trade is brisk,

but the carringe trade is not quite up to last ear's Detroit notes good prospects, though mar-

gins are close. At Chicago dry goods sales exceed last year considerably, as do sales of clothing, and there are very fair country orders for shoes; wool receipts gain over last year 50 per cent; dressed beef, cheese, butter and hides gain but in cured meats there is a decline of 50

per cent and in lard, flour and barley of 33 per cent. Corn gains 33 per cent. Corn reports at Chicago are very satisfactory, and the same is true at St. Paul, Omaha

and many other points where the recont rains have made wonderful improvements. Indeed the rain of Saturday was probably worth some hundreds of millions to the coun-try for an extended with the source of the counry, for an extended drouth seemed near.

Trade at western deta drouth seemed hear. Trade at western cities is quiet, but very hopeful. At the south also crop reports are highly satisfactory, and trade, although only fair or even sluggish now, and at Memphis generally descended to the set of th generally depressed, is expected to be excel lent hereafter. No material injury has been sustained from drouth in the region tributary

to New Orleans by cotton, sugar or rice, but the heavy rains have done great good. In general it may be said that the crop outlook has rarely been brighter than it is now, and this gives the strongest reason for hope that any present depression in trade will be tem-

Mayor Cushing, in speaking upon the sub-ject, said: "It is not my custom to talk of things that may happen, but I have no besi-tancy in speaking of this. It is only by hearsay that I know anything about a movement being on foot to repeal the midnight closing ordinance. However, if such an ordinance should pass I would most certainly veto it, even if I knew that eighteen councilmen would ride it over my objections. "I not only think such an ordinance would even

Superintendent Wooley and to select an attorney to fill the vacancy caused by the resignation of Judge Estelle.

There were four candidates for the position of board's attorney. F. L. McCoy of McCoy & Oimsted was elected on the sixth ballot. The other applicants were Thomas D. Crane, F. T. Ransom and Irving Baxter. The names of twenty-eight applicants for the half so it works eight applicants for superintendent of buildings were read and the balloting commenced. Mr. Morrison en-deavored to have the election of a superin-tendent postponed until the first meeting in July, but his motion was lost.

On the tenth ballot Ed O. Hamilton of Hamilton Brothers was elected. Mr. Hamilton has been in business in the city for the pasteix years. After the election both Attorney McCoy.

and Mr. Hamilton passed around the cigars. Ex-Superintendent Wooley received one vote in both the sixth and seventh ballots. Dr. Spalding wanted the time for which bids could be received for the Keiton school extended from June 5 to 8. The board deided to grant the extension.

The high school committee was directed to bring in a report at the next meeting stating what work is necessary to complete the high school grounds. Major Clarkson has donated a large flag to the Pacific school, and the board decided to

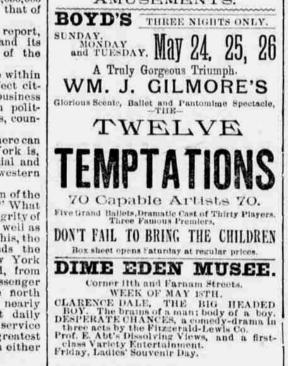

purchase a pole for the flag.

These figures are conclusive; there can no longer be a doubt that New York is, and must ever remain, the financial and commercial metropolis of the western world.

What an evidence of the wisdom of the ounders of "The Great Republic!" What a monument to the energy and integrity of its sons! In the geographical as well as the practical business centers of this, the second city of the world, stands the Grand Central station of the New York Central & Hudson River railroad, from which eleven great through passenger trains depart every day for the north and west; this in addition to nearly three hundred other trains that daily eave this great station, giving a service to the patrons of "America's greatest railroad" that is not surpassed on either side of the Atlantic.
