Furniture Dept.

If you want to see the finest line of Baby Carriages in this city or any other just come up to our furniture department and you will see we are warranted in calling it the finest line. Never before, and hardly ever again, will such a fine assortment of carriages come to any retailer as these came to us. A manufacturer brought a carload of carriages and fine rattan chairs and rockers to this city; he had to dispose of them owing to being recalled by other members of his firm, and he sold the whole lot to us at a price that can never be duplicated. We had no freight to pay. Other retailers know what this means; and we know that we are offering the public carriages at prices that are paid for such carriages by all retailers. Peerless Refrigerators

The Peerless Refrigerators are made of oak, antique finish, mineral fibre filling. They are made open to allow a perfect circulation of dry cold air. The construction of the upper horizontal flue is such that it can be opened or closed at any time. This is an important new device not employed in any other refrigerator, and is patented. The space between the outer and inner cases is filled closely with a mineral fibre which is superior for this purpose to anything ever before used. Other makers use saw-dust or charcoal as a filling or leave the space empty. The saw-dust will rot and decay, the charcoal will settle and leave black spaces here and there. The mineral fibre in the Peerless will never settle or shake out; it is colorless, odorless and indestructible by heat or even fire; vermin or germ cannot exist in it; as a non-conductor of heat it is double that of charcoal and greater than that of any known substance. The Peerless is the only refrigerator using mineral fibre filling, giving you the best refrigerator made in the world for the least money. Our No. 1—\$8.50; all other makes of the same size sell from \$12 to \$14. Our No. 2—\$10; all other makes of the same size sell from \$15 to \$18.
