FREMONT, Nob., May 31.-[Special Telegrain to THE BEE. ]-The second game between the Garneau Snowflakes of Omaha chance. and the Fremonts was played here this afternoon. To prevent another shut-out, such as they received yesterday, the Snowflakes were reinforced by three new men, one of them being Sayder, who went in the box. The battle today, therefore, was not so one-sided. The visitors scored three runs in the fourth inning by lucky bunching of hits and errors on the part of Finch and Roberts. At the beginning of the eighth the score stood 3 to 3. In the eighth the Fremonts pulled out three runs, and the Snowliakes two. It is possible, but not probable, that the mmigration question will be taken hold of in a partisan way. The problem has become so serious that even the democrats may by force of circumstances be compelled to act upon it Another thing suggests that this is to be a lo-nothing majority in the house. Senator

Gorman is the master mind of the democrats in congress. He not only handles them in the senate but in the house. He regards himself as in the direct line of presidential promotion. To advance in either body will e for him risky. To stand still will be safe. Fo enter upon an era of the defensive has already been his orders. CIVIL SERVICE REQUIREMENTS. The requirements of the civil service com-aission for a position worth \$1,500 a year in

the war department, the selection to be made by competitive examination on June 16, has attracted attention to the fact that it does not any longer pay to hold elected or expert positions under the federal government. In order to pass a successful examination for this \$1,800 place the man must, according to the written specifications in this instance, as set forth by the commission, "be able to de-sign and construct buildings in all their deails, must be able to estimate their cost, and nust possess a thorough knowledge of buildng material and modern appliances." The work this office holder will have to do

will not in any degree elevate his qualifica-tions for holding a remunerative position. He will design buildings for army posts, barwhit design boltomics for army posts, are racks, etc., and a knowledge of this work would be of no possible advantage in private life or in any other position. Besides, he goes to the top of promotion at the first step, and there will be no higher reward in the ervice.

Washington architects say that a man itted to pass this examination could comnand a business in private life worth twice or three times \$1,800 a year, anywhere. Be-sides, it costs more to live in Washington than almost any other place. This instance of requirements for places under the civil

service law is not remote; it is universal wherever the duties require anything like technical knowledge. Men in congress say the rules will have to be modified, so that a less degree of knowledge is required, or the result will be a necessity of higher salaries or vacant offices. A DEMORALIZING SYSTEM.

Attorney General Stone in answer held that the statuto was constitutional inasmuch as it was merely an exercise of the police power of regulating the method in which certain classes of rail-road business should be done; that the railroads as common carriers had impliedly assumed to subject themselves to legislative action and must do as the legislature required; that the right they had to receive a reasonable compensation was secured to them under the statute and they were not compelled to do business without profit as a remedy was provided. To the claim that the

joint rates might compell railway companies to enter into contractual relation with insolvent companies, Mr. Stone replied that by fair implication such was not the meaning or intention of the statute, and the courts would afford the proper relief. Dr. Arthur Greaves of Boston, who for the last ten years has been an active member of eastern societies formed in aid of the rel men, arrived in this yesterday after one year's active missionary work among the Indians. In an interview last evening Dr. Greaves said: "I've worked like an apostle of olden times with the Indians and have retired from missionary work for good. Western Indiaus know more than most people of Boston and are as crafty as veteran detectives. For yours I pitied them, for I though t they had been treated shamefully and were innocent and ignorant. They know con-il-crable, I would tell them blole stories at Resolud agency and they would listen atten-tively. When I had finished they would get together and guy me unmercifully. When I was with the Sioux chief, Ked Cloud, he said I cculd make a hundred In-dians happy by getting our society to send out lifty plevs and other farming im-plements. I got people at home interested in the matter and they shipped me two car loads of tools. These were distributed to ha-dians, who appeared overloyed with the prospect of having the means of tilling the soil. Shortly after this I went further west for a month, and when I returned I could be find any of the implements sent out. After Resolud agency and they would listen attenfind any of the implements sent out. After utiligent search it was discovered that the Indians had pitched, them all into White riv  $\pi$ and made a bridge of them. The costly tools sent out for farming purposes were used as you would stones, and the bridge has d as you would stones, and the ornigo across the little river was all the good that these implements accomplished. This is one instance, and there are many similar. At this time 1 began to lose full in the sincerity displayed by the Indians, and subsequent events proved to me that an Indian could only be an Indian "

"The best way to solve the Indian problem," add Dr. Graves in conclusion, "Is not to nother with It at all.
