It will produce a pleasant warmth and relieve you of all pain. Many severe cases have been cured in this way. The Pain-Balm can be obtained from all druggists.

The most recent successful spectacular play, "The Bottom of the Sea," will be presented at the Grand on Friday, Saturday and Sunday evening next and matinees on Saturday and Sunday, at popular prices. The piece is a decided novelty, and its production in other cities has attracted crowds. It is said to be one of the most marvelous scenic plays of this generation and to savor of the weird imaginativeness of Jules Verne. The scenes are said to be artistic and mechanical triumphs in their way, presented with surprising elaboration of detail. An ocean steamer, the laying of a submarine cable, the wreck of a vessel and the rescue of the passengers are all vividly pictured. The height of this sensational realism is shown in the descent of divers to the "dark, unfathomable caves of ocean," the repairing of a broken cable and an attack on the divers by an enormous octopus. The company presenting the piece is said to be good and a fine production throughout is promised.

WATCHING IT INCREASE.

Hon. Frederick L. Ames of Boston, Looks at His Omaha Property.

Mr. Frederick L. Ames of Boston, arrived in Omaha Monday and spent a short time at the Union Pacific headquarters. He was engaged yesterday in looking after his property interests in Omaha, which are very extensive and will leave for Chicago this afternoon to attend the meeting of the stockholders of the Chicago and Northwestern railway in which he is largely interested.

Mr. Ames stated that his visit here was mainly for the purpose of looking after his real estate interests and had no particular connection with railway business. He expressed himself as entirely satisfied with the manner in which the Union Pacific is being conducted and remarked that the road was in better condition than it had been for years.

Mr. Ames declined to talk upon the famous bridge case, saying the matter was in court and the result would have to be accepted whether it was entirely satisfactory to the Union Pacific or not.

Mr. Ames' property interests in Omaha are as large, or larger, than those of any other one individual who is interested in Omaha realty. All his holdings are corner property, and all are covered with substantial business blocks. They consist of the block occupied by the Morse Dry Goods company, at Sixteenth and Farnam; the block at the northeast corner of Tenth and Farnam, the large building occupied by M. E. Smith & Co., at Eleventh and Howard, and the large building on Jones street between Ninth and Tenth, occupied by the hotel department of the Union Pacific, the Omaha Hardware company and others.

RAILROADS AND PACKING CO'S.

Turner's Storage Receptacle for Cars to Be Exhibited Monday.

The latest invention that should prove most valuable to railroads and packing companies and all corporations, the owners of rolling stock, is Turner's storage receptacle for cars. Its purpose is to do away with the no bill system of holding cars over, and shows the routing of the car in going and returning empty. When the way bill is not ready Turner's forms or m ovement of cars is used in its stead. It is also used for carrying bills of lading and defect cards. The arrangement is such that the operator can reach from either side of the car without crossing.

In all cases the conductor carries no bills in this new billing system, Turner's form being used in storage receptacle, the conductor being supplied with a duplicate of the same. This billing system is the most complete of any in use.

The inventor, G. W. Turner, is one of our most highly esteemed and respected citizens, having been in the employ of the B. & M. railroad company for the past eleven years. He has always been one of the company's tried and trusted employes, and South Omaha citizens welcome his invention, and are justly proud of his genius.

DRAGGED TO DEATH.

Accident Which Befell Dairyman Henry Batdorf.

Henry Batdorf, proprietor of the Spring Garden dairy northwest of Benson place, met with a frightful accident yesterday afternoon which may cost him his life.

He drove home from the city about the middle of the afternoon and while engaged in unhitching his horses from the spring wagon they took fright at something and ran away dragging Mr. Batdorf about twenty rods and running the wheels over him when he was finally released.

He was picked up in an unconscious condition and carried to his home. Physicians were called and the injuries were pronounced very serious and in all probability fatal.

Batdorf died about midnight last night.

The East Omaha Motor.

The difficulty between the Union Pacific and the East Omaha motor company has been adjusted and the work is being completed. By the terms of the agreement the motor company will string its overhead wire at a height of twenty-five feet above the track, thus allowing ample room for the passage of cars beneath it, the wire being about three feet above the head of a man on a box car. The company will also put in a suitable crossing and maintain it in good condition.

Macbeth's "pearl top" and "pearl glass" lamp-chimneys do not break from heat, not one in a hundred; they break from accidents.

They are made of clear glass as well as tough, as clear as crystal. They fit the lamps they are made for. Shape controls the draft; they are shaped right. Draft contributes to proper combustion; that makes light; they improve the light of a lamp.

But they cost a dealer three times as much as common chimneys, and, as they do not break, he is apt to be anxious lest they stop his trade. Diminished sales and less profit are not agreeable to him.

There are two sides to the question. Have a talk with him.
