

## BUSIED WITH EXPERIENCES.

Homopathic Doctors Pass the Day Discussing Methods and Results.

PRATTE ON "OFFICIAL SURGERY."

What the Learned Gentleman Hopes for—Officers Chosen—Drive About Town—A Banquet Last Night.

The attendance at the morning session of the second day was considerably larger than at the opening session.

The bureau of surgery was first taken up, and Dr. Andrews read a paper, presenting a number of cases which he had treated, and showing a boy who was poisoned by eating matches.

A case of phosphorus had lodged in a tooth, and after extracting the molar the surgeon had taken out a large section of the jawbone. The bone had gradually been replaced, and was well ossified. The shape of that side of the jaw was a little different from the other, and a slight paralysis, due to cutting the facial nerves, was noticeable. He favored the use of veratrum viride in surgical work to cause cardiac depression, and thought that after supuration was established everything went along well.

The paper provoked considerable discussion, and several of the doctors felt called upon to disagree with Dr. Andrews, who was formerly a disciple of the old school. He referred to the allopaths as the regulars, and Prof. Cowperthwaite of Iowa City, took him to task for it, reminding him that the homopaths were the regulars, and that Dr. Andrews was an irregular until he joined them, but Andrews could not see it that way.

Dr. Hanchett announced that Dr. Yates Pratt of Chicago, would be in on a morning train and would lecture at 2 o'clock on "Official Surgery."

He said that several members of the old school had expressed a desire to hear Dr. Pratt and requested the managers to invite their allopathic brethren whom they chanced to meet at the noon intermission.

The bureau of materia medica was taken up and Dr. Cowperthwaite read a paper on new medicine, epiphagus, otherwise heech drops or cancer root, to be used in treatment of headsores.

He said the allopaths seemed to have an advantage in the treatment of headsores, in that they could give an anodyne that stopped the pain, and that frequently the cause that brought on the pain had disappeared by the time the effects of the drug had worn off, and the drug was given the credit for effecting a cure, whereas homopaths did not aim at merely relieving pain, but at the root of it all and to remove the cause. He thought the new drug very important and in discussing the paper several of the members said they had used it with good effect.

Dr. Hingston also read a paper on materia medica.

Dr. Hingston presented a clinical case, that of Mr. Thompson of this city, who is afflicted with an aneurismal sacculated tumor, covering one side of his face and which has been growing for fourteen years. The members were much interested in the case, and a short recess was taken to allow them to examine it.

The question of amending the by-laws and constitution then came up and the report of the committee was called for.

The important changes were the creation of the office of recorder, secretary, the insertion of a clause providing for the expulsion of members who are in arrears for two years' dues, who may, however, be readmitted on payment of dues if no charges have been preferred against them; a provision that the by-laws shall not be changed except on a year's notice and an announcement of the proposed change on the first day of the session. This is to guard against any hasty amendments, as they seemed to be a feeling that some such thing might be attempted by a few ambitious members. The proposition to amend the code of ethics of the American institute of homopathy, raised a howl from Dr. Hingston, who said that it debased the profession of a card and a lot of other ridiculous things that would not be lived up to by the members even if adopted. Several others felt the same way and the idea was dropped.

Another new provision will preclude the admission of any new member who does not practice strictly according to homopathic laws.

One of the doctors present wanted a little more information regarding this matter, as he said that there were some members of the society who did not practice strict homopathy, and he wanted to know what was to be done with them.

He was assured that they would not be affected, as the rule would not be retroactive, and only the new members would be held strictly to the rule. One of the members said that some such thing might be attempted by a few ambitious members. The proposition to amend the code of ethics of the American institute of homopathy, raised a howl from Dr. Hingston, who said that it debased the profession of a card and a lot of other ridiculous things that would not be lived up to by the members even if adopted. abdominal walls, and the ligaments merely gave against an extended displacement.

It was necessary for Dr. Pratt to take the 5 o'clock train for Chicago, and the society passed a vote of thanks for his visit and address.

The bureau of surgery was opened, and papers were presented by Dr. Forstall, Dr. Davis and Dr. Humphrey. The latter gave the history of a gun shot case, and advised very little probing.

In the matter of honorary members it was decided that they should be proposed by the board of censors and elected by a majority vote, but should have no vote.

The question of a code of ethics then came up and Dr. Hingston made another kick on the advertising phase and wanted an code adopted that would not be enforced. It was found necessary to allow the subject to go over until morning, as the society had to adjourn for an early supper in order to take a drive about the city and a committee consisting of Drs. Davis, Andrews and Stuart was appointed by the chair to report this morning on a code of ethics.

The election of officers was taken up, and resulted as follows: President, Dr. W. A. Humphrey, Plattsmouth; first vice president, Dr. D. E. Forstall, York; second vice president, Dr. J. W. Hingston, North Platte; corresponding secretary, Dr. Buck, recording secretary, Dr. P. Wells, McCook; treasurer, Dr. O. S. Wood, member of the board of censors for three years, Dr. B. B. Andrews, Nebraska City; two members of legislative committee, Dr. B. L. Pate, York, and Dr. J. W. Streeter, of Chicago on "The Ideal Doctor."

The parlor was filled and many were there who are not identified with the practice of medicine. The speaker said that the theory of medicine is a noble science, and the practice of medicine is a grand art. The physician is only a man seeking to alleviate pain and postpone the inevitable.

The ideal doctor must be learned, wise, amiable, charitable, diligent, courageous, dauntless and cheerful, with the sincerest honesty of purpose. Cheerfulness is a great essential, and the man who can give the most hope needs to give the least medicine.

Shortly after 10 o'clock the members of the society complied with the president's request to adjourn to the dining room and sat down to a little spread that had been prepared for them.

After the viands had been disposed of, Dr. B. F. Bailey of Lincoln, who presided as toastmaster, in turn announced the following toasts and respondents:

"The Fellowship of the Clergy to the Medical Profession," Rev. Dr. Wilcox of Omaha.

"The World's Fair," Prof. J. W. Streeter of Chicago.

"The Nebraska State Homopathic Medical Society," Dr. P. B. Righter of Lincoln.

"The Hahnemann Society of Iowa," Dr. P. J. Montgomery of Council Bluffs.

"Bovine," Dr. W. H. Parsons of Omaha.

"The Ladies," Dr. Charles E. Spahr of Lincoln.

"The Gentlemen," Dr. Amelia Burroughs of Omaha.

"A Woman," Dr. B. Bell Andrews of Stella.

"Omaha and the Next World's Fair," Dr. W. H. Hanchett of Omaha.

The doctors who were present this morning to close up the business of the convention, which is the most largely attended of any ever held by the society.

HARRIGAN TOOK A HAND.

Coroner Holds the Second Session on the Body of Gielow.

Coroner Harrigan was on duty yesterday and assumed charge of affairs, although some of the jury protested against proceeding, claiming that Sheriff Boyd had the body in charge and that the sheriff had no right to commence the inquest, and stated that he proposed to finish what the sheriff had commenced.

The investigation proceeded, the first witness called being Gustav Sesemann, who testified that Gielow had been at his "family summer resort" at the east end of Florence lake on Friday afternoon from 4 until 7 o'clock. County Treasurer Gielow was there at the same time. Gielow asked the witness for an advance of a few dollars on a ticket to the beach, but the witness refused to do so, and the latter refused. Gielow went away about 7 o'clock, going in the direction of Hill's saloon. The witness did not know where Gielow went, but Monday afternoon some one told him a body had been found floating in the lake and he went to see it, but did not recognize it.

The witness went to Gielow's store Tuesday morning and the body was taken to the morgue. There since the Tuesday before. In the afternoon he went to the store again and found Gielow's body had been found in Florence lake.

Henry Sargent, the Sixteenth street shoe man and a neighbor of Gielow, testified that the report published in the daily papers described his appearance and said he had seen the body found in the lake. The witness was positive the body was that of Gielow. The article in the evening paper, which was identified as belonging to Gielow, particularly the knife, which was a very peculiar one.

Mrs. Gielow was next examined. She stated that her husband left home Friday morning at 9 o'clock. He ordered a piece of pie, which she wanted to take to work, and she then proceeded to Caldwell to collect some bills. The witness fully identified the articles found on the body and declared the mark on the chest. One of the keys found on the body she stated would unlock a small trunk in which her husband kept all his private papers. Mrs. Gielow also stated that her husband was not usually despondent, but had brooded somewhat Thursday night over the fact that she had been refused credit at the grocery. She said, further, that her husband had a gold tooth.

The jury desired the small trunk referred to by Mrs. Gielow, which she stated was the thing to throw light on Gielow's death, if he contemplated suicide. Other witnesses were also desired, and the inquiry was adjourned until this afternoon.

The testimony in the afternoon developed nothing of importance except the still further identification of the body, and the direction by private citizens who have been watching the proper secretory channels, by the use of Ayer's Sarsaparilla.

Reached Iquique and Surrendered.

Iquique, Chili, (via Galveston) June 4.—The steamer Toropilla arrived here this morning from Toropilla and has been delivered over to the American warship now here. The Charleston is expected to arrive here today from Africa. The Iquique has handed over all the arms she took from San Diego, consisting of 5,000 rifles.

Boils, carbuncles and eruptions of all kinds are nature's efforts to throw off poison from the blood. This result may be accomplished much more effectively by a cleansing action, through the proper secretory channels, by the use of Ayer's Sarsaparilla.

Western Pensioners.

WASHINGTON, June 4.—[Special Telegram to THE BEH.]—Pensioners have been granted as follows: Nebraska: Original—Jacob Miller, John Eggleston, George A. Hannan, William T. C. Johnson, Levi Chapman, Thomas Dordick, Henry P. Deane, Seth Lewis, Leander Garner, Benjamin J. Haght, Thomas W. Haisfield, Philip Jenkins. Additional—James Doyle, James H. Brayton. Increase—Israel A. Carraker, Robert Gilmore, James E. Gillespie, William Morrison, Samuel Neyhart, Joseph W. Lafferty, John Dearing, John H. Pender, George W. Samuel, Robert Original widows, etc.—Sarah E. widow of Fleming Carter.

South Dakota: Original—James Garvin, Harvey Henderson, Marcus R. Decamp, Increase—William L. Horr, Original widow—Francis P. widow of John W. Hopkins.

Iowa: Original—Thomas B. Boer, Frank

Gossler's Magic Headache Wafers. Cures all headaches in 30 minutes. At all druggists.

RAUM IN ALL RIGHT.

Charges Against Him Prove to Be Groundless and Malicious.

WASHINGTON, June 4.—[Special Telegram to THE BEH.]—It is not at all likely that Pension Commissioner Raum will be asked to resign or that he will tender his resignation voluntarily. Enough inquiry has been made by the secretary of the interior and other officials to ascertain the direction of the pension office to ascertain that Commissioner Raum was in no way responsible for any of the shortcomings of his son, and that he made no effort whatever to shield him when he was finally charged with pecuniary in office. No one has found anything to include Raum in the way of charges which have been made against any employee of the pension office. It has not been found that a single penny has been carelessly or fraudulently expended by Commissioner Raum or that anything done or left undone by him can be distorted into a connection with the shortcomings of his son.

He has been diligent, honest and capable. The highest possible confidence has been placed in Commissioner Raum's integrity and the recent vicious and ferocious outcry made upon the commissioner is regarded in official circles as well as by private citizens who have been watching the management of the office here from the outside as due directly to a growing prejudice in demagog and misgiving quavering against pensions.

## SHE ELUDED THE CHARLESTON.

Safe Arrival of the Itata at the Chilean In-surgent Port.

TURNED OVER TO THE UNITED STATES.

The Commander's Sagacity—Details of the Transport from Seizure—Details of the Famous Run Not Yet Made Known.

New York, June 4.—The Herald prints the following special dated yesterday:

Iquique, Chili, June 3.—The excitement and rejoicing recently caused here by the news that the United States cruiser Charleston had arrived at Callao, Peru, without having so much as caught sight of the insurgent transport Itata, were no laughing matter to the consular and naval authorities created today when word was received that the Itata had arrived at Iquique. Immediately upon hearing this welcome intelligence the insurgent authorities sent back orders to the commander of the Itata to lose no time in coming on to this port. It is therefore believed that the Itata will arrive here tomorrow.

The dispatch of the Itata's commander was very brief. We shall have to await her arrival here to learn the details of her famous run, but she will not receive any information, however, that the commander of the Itata reports that he did not see any trace of his pursuer. It is generally believed here that the Itata made her escape by means of a small boat, and that she has already discharged her cargo at Iquique.

At any rate, if she will not receive any information, however, that the commander of the Itata reports that he did not see any trace of his pursuer. It is generally believed here that the Itata made her escape by means of a small boat, and that she has already discharged her cargo at Iquique.

At any rate, if she will not receive any information, however, that the commander of the Itata reports that he did not see any trace of his pursuer. It is generally believed here that the Itata made her escape by means of a small boat, and that she has already discharged her cargo at Iquique.
