Disappearance from Home of a Wealthy Farmer of Mis ouri Valley. FRIENDS THINK THAT HE IS INSANE.

Charles Gilmore Leaves Home Under Circumstances That Arouse Grave Fears for His Safety-His Description.

Charles Gilmore, one of the wealthiest farmers living in the vicinity of Missouri Val'ey' has disappeared and his friends are ne-third fare very much troubled about him. His son, Joseph Gilmore of Loveland was in the city looking for him, but without success. Last Wednesday the missing man left his home and went to Missouri Valley, after which he went to his son's home. Wednesday afternoon he left Loveland, saying he was going to visit a brother, Pat Gilmore, who lives near Honey Creek. He boarded the train, but

It is feared that he has become insane. He has talked strangely of late. For some time past he has talked of going to Washington. Wednesday morning he discharged all the men that had been working on his farm. Mr. Gilmore is quite wealthy and is well known in this city, as well as in the neighborhood where has been residing. According to his description, as furnished by his son, he is about fifty-five years of age, weights 120 pounds, is 5 feet 7 inches tall and wore a pair of huse as all. of blue overalls, dark coat and vest, black slouch hat and gray chin whiskers. His son has offered a reward of \$50 for any information that will lead to his discovery today.

Nearing the End. The Jones murder case still continues to hold its own against all new comers in district court. The taking of testimony in rebuttal was continued yesterday. A witness was put on the stand to tertify as to his opinion of Jones' sanity. Attorney Scott began his questioning with the utmost gool grace, but he had not been at it long before he was called down by Attorney Organ, who claimed that the testimony which he was trying to get out of the witness should have been introduced in the examination in chief, instead of waiting until after the state had rested its case. Mr. Scott seemed to be very much surprised that anyone should think that he had made a that anyone should think that he had made a mistake upon that point and he argued his side of the question at some length, the court, however, not seeming to be completely open to conviction. At last the question was taken under advisement by the court and his decision will be given this morning. If the evidence is admitted the case will not be completed until tomorrow: but if it is ruled out, it is probable that it will go to the jury

With the approach of warm weather the uestion of open air concerts is beginning to be agitated. Heretofore the expease of the oncerts has been shared by the park commissioners and the motor company, and it is probable that a similar arrangement will be entered into this summer. A. C. Graham, park commissioner, tried to have a consulta-tion with President Stewart of the company

yesterday afternoon, but the latter was out of the city for a few days. It is the desire of the park commissioners to nave free con-certs every Sunday afternoon for twelve Sundays, which will cover most of the warm weather. School. The board of education has struck a snag in the erection of the new Kellom school. The snag is the opinion of Superintendent Whitlock who will refuse to issue a permit

His reasons are that the walls of the first story of the building are not of sufficient thickness, being but twelve inches. Mr. Whitlock insists that these walls must be

sixteen inches. Several members of the board have come to the conclusion that the only thing to do will be to allow the contractor an extra charge for making the wall sixteen inches wide. Superintendent Hamilton was figuring on the proposed change a little yes-terday afternoon, and he thought that about \$500 extra would pay for the sixteen inch wall and the matter will probably be brought up at the next meeting of the board. Speaking of the matter yesterday, Morris Morrison said: "If the building committee had paid attention to business there would have been no need for a change of the plans. The members of that committee should have either examined the ordinances governing the crection of buildings or have

submitted the plans to the building inspector before the contractors were asked to send in bids. It was a bit of stupidity, but it can

#### Omaha's Light and an Expert Electrician's Private Opinion

"I believe that \$10 per month would be fair price for arc lights in Omaha," saida n expert electrician yesterday to a reporter.

"I admit that coal costs a good deal in Omaha, but the difference in the price of coal is not great enough to account for the wide difference between that which other cities pay and that which is paid by the city of Omaha. I think the arc light now fur-nished in Omaha is about two thousand candle power, but of course it cannot be determined for certain without a test, and even then there is a good deal of guess work about it. To determine absolutely the power of an arc light requires a most thorough and careful test with the finest instruments for the purpose that are made. It requires a current of forty-five volts and nine and a half amperes to create

1 2,000 candle power arc light. Then the a 2,000 cannot power are near. Then the lamps must be of the proper size and capac-ity or the light will not be as bright as it should be. I think the light in Omaha is pretty good, but the price is too high."

### Economical Refrigerators.

Economical Refrigerators. It is the amount that people save, not so much what they earn, that eventually makes them rich. In buying a household necessity like a refrigerator it is well to consider some-thing else than the first cost in determining its economy. The Guernsey Household Refrig-erator is as handsome as a piece of parlor furniture and costs less than any other first-class article, and stands at the head as ap economizer of ice, giving the lowest cold air temperature. All the packing is mineral wool, the best non-conductor of heat and moisture known. All parts can be taken out and cleaned. Investigate the Guernsey Household before buying. Liwn Mowers. Lawn Mowers.
