

FOR THE PUBLIC LIBRARY.

Steps Taken to Secure the Gift of the Late Byron Reed.

WILL ERECT A MAGNIFICENT BUILDING.

More Ground Purchased for the Site—Bonds Will Be Asked to Pay for the Structure Proposed.

It seems altogether probable that the magnificent library and wonderful collection of coins recently bequeathed to the city of Omaha by the late Byron Reed will within the next eighteen months be residing in a splendid new library building on the ground recently purchased by Mr. Reed at the corner of Harney and Nineteenth streets, in accordance with the provisions of the will of the generous donor.

The lot bequeathed by the late Mr. Reed is 85 1/2 x 8-10 feet and the provisions of the bequest state that within one year from the date of the instrument the city shall have begun to erect a four-story, fireproof building to cover the entire site.

The Public Library association decided some time ago that such a building as that described in the will should have more ground, and three of the gentlemen, Mr. A. J. Poppleton, Mr. William Wallace and Mr. Lewis Reed, purchased for the city an additional lot of ground, making the ground 92-8-10 1/2 feet and leaving room for an area about the building. This additional lot was purchased for \$15,000 and the three gentlemen have agreed to pay for it in such time as the city shall vote bonds to pay for it and to erect the library building.

The library association has already secured a council to take prompt action with regard to this matter in the following urgent suggestions:

It is believed by the board that \$150,000 will amply and substantially comply with the terms of the will, and also purchase said fifty feet lot, and also the \$15,000 for a building that at the most November election a proposition be submitted to the voters to issue bonds to pay for it.

The lot donated is of an estimated value of about \$100,000, and the collection bequeathed to the city is valued at \$100,000.

The board respectfully urge the necessary action on the part of the city council without delay, so that they may have the necessary time in the submission at the next election of the proposition for the issue of bonds sufficient to purchase the lot and erect the building in compliance with the terms of the bequest.

With prompt and energetic action and a heavy outlay of money, it is believed that the city government, your board believes that the lands can be secured, and also that the work of construction proceeding with so rapidly that the library building can be completed for occupancy before the first of December with the issue of the amount stated.

Mr. Poppleton said: "The people in general do not understand the great importance of good public libraries. I consider our public library one of the most important features of our educational system, one of the very best institutions that any city or people can encourage and sustain."

Mr. Lewis Reed spoke in a similar strain, although he thought the city council should hesitate to provide for the \$15,000 for a prompt and cheerful compliance with the terms of this generous bequest would encourage other wealthy men to remember the city in the distribution of their wealth.

was issued Saturday. Under the act, they receive pay only for the actual time they are on their cars, the men employed on the horse cars are paid a certain amount an hour. They are supposed to sweep out and take proper care of their cars, make up their daily reports of cars, fares and transfers, and check up the day's business. Under the new order the men, while they will perform the work for the company and put in the hours, receive no compensation for it.

"We will bring this matter to the notice of our assembly," said one of the conductors, "at Saturday's meeting, and a committee will be appointed to wait on President Wheeler and show him the injustice of the order. If he should fail to do the proper thing, why something else would have to be done."

The cable and horse car men have an understanding in this matter and will work in harmony.

Some Facts About this Growing New Industry at St. Louis.

UNION OPERATIVES MAKE TROUBLE.

President Neldringhaus Takes Issue with the Secretary of the Treasury on the Imported Labor Question.

St. Louis, Mo., Aug. 10.—President Neldringhaus, in reply to the letter of the secretary of the treasury in regard to skilled laborers for the tin plate industry, says: "I do not find anything in the letter of Commissioner Owen which the St. Louis Stamping company will not accept. The proposed regulation laws would be enforced by the department but as to the importation of skilled labor from England, I do not think it is wise to do so. I am a native born citizen and I am proud to see the power of the treasury department. That the tin plate industry is a new industry in the United States no one disputes. It is, however, to be decided the question whether skilled labor can be found for the manufacture of tin plates in this country. We have announced in the principal cities of the United States, and herewith forward the offer, that we will employ any American tin plate worker who may be able to do the work at a price not to exceed 10 percent advance per box over what is paid for the same work in England. The average duty on tin plates is about 10 percent. We are perfectly willing to give the workmen all of that and add 30 percent thereon. We are not going to put any tin plate mills out on a committee to our office stating that they will employ any American tin plate worker who may be able to do the work at a price not to exceed 10 percent advance per box over what is paid for the same work in England.
