OPENING. AUSPICIOUS

Convention Work of the Stationary Engineers Entered Upon Today.

MAYOR CUSHING'S WORDS OF WELCOM

Chats With the Visitors-The Recep ion of Delegates-Work and Pleasure.

The opening session of the tenth annual convention of the National Association of Stationary Engineers was held yesterday in Washington hall, and there were 125 detegates present, representing nearly all the states and almost every city of any note in

J. J. Illingworth, of Utica, N. Y., the venerable president occupied the chair, and all of the other grand officers from Secretary Carley to Doorkeeper Smith were present. briefly map and discuss the pians for the day's campaign, and then took possession of the seats set apart for visitors on the convention floor.

Without exception, the delegates who had attended any of the previous conventions of the association congratulated the local committee on securing quarters so well suited to the occasion. It was characterized as the best hall in every way that the convention had ever occupied. Removed from the noise of the business streets, yet conveniently lo-cated, and not so large that the echoes disturbed the deliberations, it pleased the delegations immensely.

The spacious, well lighted, well ventilated hall presented a pleasing appearance at the opening hour. Pendant from the lower edge of the gallery was a neatly arranged strip of fag-printed bunting, and above were artistically draped ropes of braided red, white and blue. Flags were floating from each chan-delier, and on the floor were placed 100 tables, around which were seated the dele-

gates.

The stage, however, was the center of attraction. In the central foreground was a handsomely finished, nickel plated Rice auto-matic engine, the property of Omaha associa-tion No. 1. Directly behind it was placed the desk of the president, and at the right the tables of the secretary and reading clerk of the convention. Overhead were draped two large American flags, drawn back to either side in graceful folds. Sheaves of rye, oats and wheat, overtopped by towering stalks of corn completed the decoration. It was the work of Messrs, Austin, Bailey, Stark, Collins, and of the local committee.

Formally Wetcomed.

It was 10 o'clock when the convention was finally called to order by Mr. James Bailey, of Omaha. He stated that Mayor Cushing had been unexpectedly called out of the city, and the address of welcome prepared by him would therefore be delivered by Councilman Ed. Morearty, who spoke in substance as

As chief executive of the city of Omaha also on behalf of the local association of stationary engineers. I bid you welcome, and take pleasure in tendering to you the hospitality of our city. Our citizens feel specially grateful that your association, being one of the most important and intelligent organizations on this continent, has honored Omaha with the holding of your tenth annual convention. An honor of which we hope to manifest our appreciation during your sojourn fest our appreciation during your sojourn

fest our appreciation during your sojourn here.

I understand the principal alms of your association to be the elevation of your profession and the better protection of life and property in use and management of steam boilers and steam engines. To secure these most praiseworthy objects, you very properly commence at the foundation and insist that steam engineers shall be men learned in their profession; not merely mechanics who can go into the machine shop, it upthe engine ready for service and run it, but you aim at a higher intellectual standard, and justly so. The varied appliances of steam today in church and school house, in national, state and city buildings and elemosynary institutions, in hotels and places of public amusement, and in our workshops and factories where millions of human lives are daily at the mercy of stationary engineers, all attest the soundness and necessity of your position.

Next to the physician, the engineer is the

tion.

Next to the physician, the engineer is the most important factor to the people of all na-Next to the physician, the engineer is the most important factor to the people of all nations against loss of life and limb. The physician is not permitted in any country to prescribe for the sick or dying without first having spent years in the study of medicine, and then stand the test of a medical examination and received from learned professors a certificate announcing to the world that the holder thereof is a fit and competent man to go to the bedside and relieve human suffering and save human life. And so it is with the pharmacist. The life of the citizen is too precious and necessary to the state to permit the apothecary to put up a prescription without first having based an examination as to his competency. Surely the engineer on whose intelligence, ability and sobriety depend hundreds of human lives daily should be as well skilled in his profession as the physician and druggist are in theirs, and should stand the same relative test as to fitness. In the interest of a broad humanity and the honor of your profession your association asks no more, and should zealously labor to that ead, until every state in the union pass appropriate laws, on the subject of such vital importance, growing in magnitude and fraught with momentous consequences as our manufacturing, mining and commercial interests increase.

The literary and scientific character of your association cannot fall to prove a great educator to your members. Your library, lectures and scientific papers composed and read by your members, and the discussion thereon, develop the mind and enable you to obtain a scientific knowledge of the power and beneficial uses of steam and the steam engine, when under give our citizens a practical illustration at your meeting on Wednesday.

May the deliberations of your convention be characteristic of your past efforts, in diffusing a practical and scientific knowledge of the power and beneficial uses of steam and the steam engine, when under proper management, and their destructive tendency to life and property whe

by reckless, ignorant and incompetent persons.

We trust your visit may be a pleasant one, and prolonged to the extent your business engagements will permit, so that you may have an opportunity of driving through our city, talking with our merchants and manufacturers, and examining the substantial character of their business blocks, the result of home industry and built with home capital.

We also hope you will not leave us without testing the high pressure of our people for genuine hospitality. Again I bid you welcome and trust you will make yourselves at home while you honor us with your presence.

The reading of the mayor's address was frequently interrupted by hearty applause.

President Februmbatch Responds.

President Febrenbatch Responds.

requently interrupted by hearty applainse,

President Febrenbatch Responds.

The response to the welcoming address was delivered by Hon. John Febrenbatch of Cincinnati, past president of the association, who spoke as follows:

Mr. Chairman: The National Association of Stationary Engineers accept with sincere and heartfeit thanks the royal welcome so generously tendered its representatives by the chief executive of this beautiful western metropolis. We would be callous hearted indeed if we did not to the fullest extent appreciate the unbounded hospitality so freely and liberally extended by him and the people whose homored representative he is. I amsure that when the work of this convention is done and the delegates return to their homes each will carry with him the kindliest and happlest remembrances of Omaha and her generous hearted citizens. If the treatment we have thus far received is an indication of what there is in attree for us. I would not be surprised if some of the delegates to this convention, like that eminent Roman who was conquered by the charms of that hauchty, proud and becautiful Expitan queen. Cleopatra, would surrouder to the biandishments of the good people of Omaha and fall to return to their constituents. [Applause and laughter.]

There is no room for doubt as to the ability of the people of this city to do that very thing when we view their wonderful and grand achievements. For surely the public spirit, the enterprise and intelligence that ersected this beautiful monument of modern civilization can do greater things than the enrolling of some of the delegates to this convention among the permanent inhabitants of this city. The people of Omaha have done many wonderful things in the past, as is plainly evidenced by the existence of this magnificent city, by its obenomenal marvelous and unprecedented growth; and they are capable of donn even more wonderful things in the future.

But, Mr. Chairman, we as steam engineers claim at least a little share of credit in having made it possible to er

and handsomest women, who together make up the most intelligent people on the face of the earth. [Applause.] But. Mr. Chairman, permit me to "sk what would all this territory be today had it not been for the steam engineer with his steam engine? [Applause.] It requires no straign of the imagination to paint the picture. The wast territory would still be unexplored. Omain would be unknown and in place of her lofty spires and towering edifices you would find the ungainly wigwams of savane tries. Therefore, to the steam engine, the greatest civilizer of modern times, we are indebted more than we are to any other agency for this wonderful and mighty transformation. Do away with your steam engine and Omaha, now this proud and beautiful city of the great west, like Arsino of old, would fail into speedy decay and crumble in the dust. But fortunately there is no danger of that. The steam engine is here and it has come to stay, and while it does stay retrogression is impossible.

The steam engine is here and it has come to stay, and while it does stay retrogression is impossible.

The steam engineer is here also, and so is this great convention. And it may not be smiss in this connect on to tell you who we are, as well as to acquaint you more fully with the ends and objects of our association.

Formit me them. Mr. Chairman, by way of preface, to say in order to quiet any fears that may exist among the people of Omaha on account of our having captured this city, that we are in nowise dangerous; on the contrary, that we are peaceable and law notding citizens. The men you see before you are the representatives of a grand army of skillful, intelligent and practical engineers, scattered nil over the United States, who have formed this grand association for the purpose of preventing the constant and utterly inexcussible destruction of life and property through steam boller explosions. [Applause.] Among the means we have selected for the accomplishment of this object are education and the literal constant of this object are education and the literal capture of our order, we have transformed the meeting rooms of our subordinate associations into school rooms and made the associations into school rooms and made the association in a great national university for the education of engineers in the art, science and practice of steam engineering, so as to enable them to foliow their profession with the utmost security to life and property and to manage steam plants with the greatest possible economy.

As to engineers' licenses, we are making ef-

As to engineers' licenses, we are making of

most security to life and property and to manage stoam plants with the greatest possible economy.

As to engineers' licenses, we are making efforts in every state in the union to secure the enactment of stringent and efficient laws prohibiting all persons from taking charge of steam plants unless they have been licensed by a competent board of examiners created by law, in order to guard against the employment of incompetent, careless and intemperate engineers in the management of steam machinery. And to the accomplishment of this end, Mr. Chairman, we ask your distinguished fellow citizen who represents his honor the mayor, as well as the people of the state of Nebraska, to give us their hearty co-operation, assuring them that co-operation will go far towards preventing the destruction of human life hereafter in this state, besides serving as an example worthy of emulation by other states.

As to our membership, it is composed of the very best leading, practical and scientific engineers in the United States. Besides, it embraces a very large constituency of homorary as well as active members, composed of professors of golieces and universities, prominent and leading manufacturers, publishers and editors of engineering, mechanical and other scientific papers, and many other distinguished and influential citizens, most of whom have been elected or admitted to homorary membership for valuable and meritorious services rendered the association. So far this grand army of intelligent men, banded together for the accomplishment of such a noble purpose as that for which this association was formed, it seems to me, Mr. Chairman, there ought to be no such thing as fall.

And now permit me again, on benalf of the great National Association of Stationary Engineers, to return my sincere and heartfelt thanks for the warm, cordial and generous greeting the chief executive of this city has extended to its representatives. I know I but echo the sentiments of every member of our association from the broad Atlantic ocean in the ea

At the conclusion of Mr. Febrenbatch's reply, the president appointed the following committee on credentials: R. J. Smith. California; Jas. Duncan, Massachusetts; W. W. Nugent, Wisconsin; Fred A. Dillie, Georgia; David McGarry, Pennsylvania. The committee received the credentials of the delegates, and when they retired, President Illingworth read his annual address.

Mr. Lee Bailey announced the election of

Mr. Joe Bailey announced the election of Mayor Cushing as an honorary member of Omaha No. 1, and presented the hand-painted rtificate, heretofore referred to, to the mayor's representative, Mr. Morearty, who accepted it for the executive with appropriate remarks.

The reading of the minutes of the last neeting was dispensed with, and the convention then adjourned until 2 o'clock to ac-cept the invitation of President Barton to aspect the plant of the smelting works com-

The visitors saw much at the smelter to The visitors saw much at the sineter to interest them. They arrived too late to see the silver drawn off, but witnessed the entire operation at the blast furnaces and roasters. They examined the entire plant, from the blue shop to the cupolas, and spent an hour and a half inside the largest smelt-

ing and refining plant in the world.

Much interest was manifested in the machinery exhibit on the lower floor. It, is by no means complete as yet, but many of the smaller articles are in place, and the em-ployes of the Thomson-Houston company are finishing the wiring and connecting the electric motors that are to run the machin-

IN THE ANTERNOON.

Engineers Open Her Up and Start Off in Good Shape.

The afternoou session was a stem-winder in its way, chiefly because a protest was entered against the seating of Mr. Pratt of Cincinnati. The report of the committee on credentials engendered a rively fight. The struggle with parliamentary rules was some thing surprising to behold, and the president was tickled half to death when he found himself alive after the adjournment of the session. He was coached during the pelce by Hon. John Fehrenhatch, who has been a member of the legislatures of three states. Mr. Pratt, too, came out with hair on his head, for although he was a long while being born into the convention, he finally emerged there on both feet, clothed in all the rights of a delegate.

At the opening of the session the com

mittee on credentials reported, its finding being that up to date unety-four delegates and two alternates were entitled to seats in the convention. The only question that arose before the committee was with reference to Judson Pratt, who appeared as the accredited delegate of association No. 15 of Cincinnati, when in fact he was a member of No. 5 of Cleveland. The delegate was summoned to appear before the committee.

The treasurer submitted his annual report. A lengthy debate followed the report of the committee, to whom was referred a year ago the question of changing the nature of the association from national to international, so as to include Canada. The committee re-ported in favor of it, but after an hour's de-bate the matter was laid on the table. The secretary reported that the change would incur an expense of \$3,175 for the 200 or more subordinate associations in the way of re cords and seals, and that was the clincher that settled the question.

The introduction of resolutions was next declared in order, and among them were the following: Baltimore No. 1 favored granting the suspended members of that association a charter to organize association No. 3; referred to the

ommittee on appeals and grievances. Golden Gate No. 3 of California wanted the country divided into districts; favored an international association and wanted no oney paid direct to any organizer; referred to the committee on constitution.

Missouri No. 4 favored taxing members \$1
per year for the benefit of the national asso-

ciation; referred to the committee on consti-The resolution that is presented without fall every year—to strike out from the con-stitution the clause providing that the asso-ciation shall not be used for religious or po-

ciation shan not be used for religious or po-litical purposes—was handed up; referred to the committee on constitution.

A meeting of the Lifel and Accident associ-ation was announced for 7 o'clock in the evening, and every delegate requested to be

Present.

The committee on credentials reported against allowing Delegate Pratt of Ohio No. against anowing Delegate Fract of Onlo No. 15 a seat in the convention, as he had admitted that he had never taken a withdrawal card from No. 5. Mr. Pratt then addressed the convention, stating that he had not affiliated with No. 5 for six years, and had been elected to No. 15 as an active life member. ciared the committee attempted to upseat him on a technicality when sent here in good faith by his association. He intimated that a corporation scheme to get possession of the national association was behind the move

to unseat him. Chairman Smith of the credential com-mittee raised the point of order that the convention was not on corporative business. The point was not sustained and Mr. Pratt was allowed to have his say.

Mr. Topmiller of the committee declared that Mr. Pratt had informed the committee that he was merely a proxy, and the proxy question was knocked out years ago.

There were a dozen bursts of eloquence.

and finally the previous question as to whether or not the main question should be put was moved and carried on a call of yeas and nays by a vote of 71 to 37, several mem-bers refusing to vote. Insertuch as the committee report made no recommendation it was voted to recommit. Amendments, substitutes and motions to reconsider followed in rapid succession. The committee finally reported the case back without recommendation, and a motion to seat Mr. Pratt followed. A call of ayes and nays resulted in seating Mr. Pratt by a vote of 65 to 43. The seated delegate expressed his thanks to the convention.

pressed his thanks to the convention.

Mr. Balley submitted a resolution that nenceforth delegates be allowed to hold a membership in but one association. It was referred to the committee on constitution, and the convention adjourned until 10 o'clock this morning.

Simply Notes.

James H. Harris, national secretary of the Marine Engineers' association, telegraphed last evening from Chicago that he would be

ere this morning The report of the secretary today will show that last year the association had 5,161 mem-bers and this year there are 7,604, exclusive of Canada, a net gain of 2,503.

About seventy-five of the engineers attended the meeting at Washington hall last evening, where they were enlightened as to the workings of the insurance branch of the Life and Accident association as pertaining to them. The matter was elucidated by Mr. Harry Knowlton, secretary and treasurer of the association, and Messrs. John Trix and John Beckerler of Chicago. The meeting was a lengthy one, and the delegates were made the pressure of much valuable in made the possessors of much valuable in-formation that they will impart to their respective associations when they retern

The ladies had a very enjoyable trip to Lake Manawa in the afternoon. There were twenty-seven of them in the party, and they twenty-seven of them in the party, and they boarded a Council Bluffs motor at the Murray at 2 o'clock. The trip was without accident or especial incident. A half dozen of the young ladies, chaperoned by Mrs. Illengworth, took one of the steamers and crossed the lake, and dissipated to the extent of several glasses of red lemonade with natural straws. The visitors were much pleased with the trip, from which they returned about 6 o'clock. In the evening they attended the theater.

or burned to death with liquid stove polish, paints or enamels in bottles. The "Rising Sun Stove Polish" is safe, odorless, brilliant, the cheapest and best stove polish made, and the consumer pays for no expensive tin or glasspackage with every purchase.

GENERAL ALGER. Brief Interview with the Well Known

Michigan Man. General Russell A. Alger passed through Omaha yesterday afternoon on his way to the Grand Army of the Republic encampment at Grand Island. He was met at the depot by Senator Manderson, Major Paddock, General Dennis and Colonel John Peters, who accompanied him on his journey.

General Alger was looking well and greeted his friends in a very genial manner. While the train haited at the Union depot he chatted very cordially with a reporter for

THE BEE. "The republican party in our state and throughout the east is all in good shape," said General Alger. "I have not been down through Obio since the campaign opened, but I am told that Mujor McKinley has the battle pretty much his own way and I have no doubt that he will win by a handsome macity. I shall go down there and assist a

little before the close of the campaign."
"Is the independent or alliance party making any stir in Michigan!" "Very little. The independent party cuts no figure there at all. The republican party is now in excellent shape there and I think we shall more than regain what we lost last time by an unfortunate combination of cir

"Do you think the silver question is going to come to the front as a leading issue all over the country!"
"I am of the opinion that it will not. There

is so much difference of opinion upon that subject in both parties that I should not be suprised to see it held in the background, for a time at least. "Who will be the next republican nomined for the presidency "

"Now you are asking me a difficult question. I am only an integral part of a great nation of people and how should I be able to foretell the action of a great national convention. Mr. Harrison and Mr. Blaine both have a great many enthusiastic friends. I pre-sume we shall have to wait and see what happens. Mr. Harrison has been making some very happy hits recently in the shor' speeches he has been making." General Alger will go east this evening after making an address at Grand Island.

ASYLUM OFFICIALS RESIGN. IN IT ON ART.

Omaha is to Have an Academy of Fine Arts at Once. The beard of directors of the Western Art

association held a meeting at Lininger's art gallery last night. At this meeting a deal was finally consumated by which Omaha takes a long step in the direction of progress in the flue arts. This city is to have an Accademy of Fine Arts under the management of the Western Art association, which is of itself a guarantee that the venture will be successful, as the association has, through the indomitable energy of its members, made the indomitable energy of its members, made a success of everything it has undertaken.

The Omaha Academy of Fine Arts, as it is to be called, will be opened in the building at the northeast corner of Fifteenth and Dodge streets. Mr. J. Laurie Wallace, the art director of the Western Art association will have charge of the school. The course of study will embrace classes in life, still life, water color, drawing, perspective, architecture.

color, drawing, perspective, architecture, modeling, sculpture general decoration and The academy will be opened in about a The academy will be opened in about a week. Pupils may enter the elementary classes at any time. The aim of the academy will be to teach the fundamental principles of drawing, painting, designing, modeling and architecture. Proficiency in any sub-

and architecture. Proficiency in any subject will be recognized by certificates of
attainment upon examination.

Full details of the arrangement were decided upon last night. The association will
utilize the school as a place for the display
of the 200 or more pictures which the association owns and which have been stored
away for want of a place to hang them.

dressed a communication, partially defending Test and Liveringhouse. It bears the date of yesterday.

The following are copies of the resignations as sent in by Test and Liveringhouse:

ASYLUM FORTHE CHRONIC INSANE, HASTINGS, Neb. Aug. 22.—Governor John M. Thayer, Lincoin, Neb.: Dear Sir—I wish to thank you for the kindness you have shown me and at the same time tender you my resignation as superintendent of the Hastings asylum. My reasons for this step are these:

1. The Board of Public Lands and Buildings has shown tuemselves to be so unfair and unjust that I would not under any circumstances hold any position where I would be compelled to be under their direction in any manner whatever: then I would not have the board neelect the state's interests and the institution. In the future as they have in the past. Eight months have rolled by since the board was elected to look after these institutions. The board has been on these grounds once only, and then for about thirty minutes. They only came then after I had hired a carriage to bring them and Insisted on their coming. There was an appropriation of \$55,000 for new buildings and equipping the same at this asylum. When you consider that the Board of Public Lands and Buildings adopted plans and let the contract for the construction of these buildings without ever being on the grounds or consulting anybody that knew the needs of the institution, you will not be surprised to learn that they have been compelled to allow for \$6,00 m worth of extras, and the buildings have hardly been begun. If I have been in any manner the cause of this neglect I wish to ret out of the way.

I wish, therefore, governor, to tender my resignation. Your obedient servant.

F. G. Test.

Asylum for the Chronic Insane, hast-tings, Neb. Aug. 28, 1821.—To His Exceliency In 1885 I had an eraption come out on my skin, and while at first it did not amount to maich, it grew to be very negravating and at times unbearable. The skin would get hard, inflamed, and poel off, leaving an entire new skin, acting some way for works at a time, always worse at nights. Have tried all manner of medicines and had doctors prescribe to no effect. I bought a box of CUTICUGA RESIGNESS and nised CUTICUGA RESIGNESS and fused CUTICUGA RESIGNESS and fused courterers, absolutely for my blood. I am fully cores, and in less than a month. It was a most negravating skin disease, and now I am enjoying ease and comfort. I have had annoted benefits. Anyone trying CUTICUGA RESIGNESS cannot help but derive benefit. Anyone writing me will receive an answer and my advice to give your RESIGNESS a trial.

F. G. Test.

Asylum for the Chronic Insane, BastINGS, Neb., Aug. 28, 1821.—To His Excellency
John M. Thayer, Governor of the State of Nebraska—Dear Sir. From developments in the
recent investigation I am convinced that the
present Board of Public Lands and Buildings
would continue their persecution against the
management of this institution so long as I
should remain. Mr. Allen, secretary of state,
said before the investigation began, "Liveringhouse must go," and from recent developments I believe ne would resort to any method
to accomplish his purpose, even to refusing to
addit bills for necessary expenditures for the
institution. While I am aware that I have
made mistakes, and will probably continue to
do so as long as I live, conscious that I am innocent of the wrongs the board are attempting
to fasten upon me and confident of your vindication of any intentional wrong and a just
verdict at your hands, in order to relieve you
from the embarrassment occasioned by the
protracted fight, I have the honor to tender
you my resignation as steward of the asylum
for the chronic linane. Grateful to you for

Doctor Uses Cuticura We have opened a drug store at this place and are having a splendid sale on CUTICURA REMEDIES, which we keep a full stock of. I would not be without your CUTICURA REMEDIES, the cura Soap for Koo. Just for the benefit it did my little boy. When he was six months old, his face was covered with eaz-ma, and CUTICURA REMEDIES enred it. He is now three years old. We still use the CUTICURA SOAP, and was him occasionally with it, to prevent his skin from getting rough. We have handled your medicines for five years, and never heard a complaint against them, but abundant praise. We sold our drug store in Kunsas, and will continue in the drug business here.

CHARLES CARROLL CLUB A meeting of Irishmen was held last night to organize a Charles Carroll social club. J. H. McDonald presided and James J. Condon acted as secretary. At least seventy-five persons were present and were enthusias-tically for the club. It was decided to celebrate the birthuay anniversaries of George Washington, Charles Carroll and the day of American independence.

ODDS AND ENDS. Hon, W. S. Summers, assistant attorney eneral of Nebraska, has been chosen as lead of the arch chapter of the Delta Tau Delta college fraternity of the United States t the national convention held at Cleveland to the convention.

you my resignation as stoward of the asylum for the chronic insane. Grateful to you for past favors and with a sincere wish for your success. I am respectfully your obedient ser-vant. J. W. LIVERINGHOUSE.

All the members of the Board of Public Lands and Buildings express their satisfac-tion with the resignation of Test and Liver-inghouse. They declare that their intention

was not to persecute these fellows, but to

ealed by the investigation they declare that

THIRP'S REMARKABLE ESCAPE.

LABOR DAY,

The law partnership, composed of Captain L. W. Billingstey and Captain W. H. Wood-ward, has been this day by mutual consent dissolved. The first carload of tea ever entered through the Lincoln custom house arrived yesterday morning over the Burlington route, consigned to Hargreaves Bros. of this city. The shipment left Japan July 29.

Thing that has created the biggest stir in the minds of many, is bordering on a

SENSATION

Because of the values offered, being so unreasonably low that men go around and invite the attention of their friends to the hit

Saying, "Look at me; I have bought the greatest bargain on earth." "What is it?" It is the coat I have on my back, and guess what I paid for it?" "O, about \$8 or \$10." "No,

Is the Three Dollar

Coat that you see samples of in Hellman's window. It don't seem to me as if \$3 would pay for the lining in this coat. It is indeed an

And had I the money to spare, I think I would lay in stuff enough to do me for several years; for if they ever kept faith with their advertising they have done so this year. They said the prices were no object. The stock must be reduced, as from now on they want nothing but new goods, from one season to the other.

And if you go in today and look at their stock you don't have to be very well posted to see that they mean just what they say. It would be unreasonable for any one to ask for goods at bigger bargains than they are offering today. Take my advice if you have any money to spend for clothing or furnishing goods.

> Go and see Hellman, And you will Carry out a Bigger bundle For the money Than you ever Expected to.

They are on the corner of 13th and Farnam Sts., where they have been for the last 37 years, and no doubt will be for 37 years to
