make a news item. The teller who lifted \$5,000 from the bank vault was reputed the quickest in the city. He was a devoted husband and father, and his motive is quite inexplicable.

Oregon. People who live along the Nisqually river are compelled to pay 50 cents per acre for crossing the river.

The Rain Makers. The successful tests in Texas in producing rain by means of explosions has excited widespread interest.

Irrigation in Wyoming. The census reports show that Wyoming is making excellent progress in farming by irrigation.

Wyoming. A commodious high school building has been completed in Cheyenne.

South Dakota. Black Hills papers have concluded not to move the Omaha smelter.

Idaho. A cheese factory has been started at Sand Creek, about forty miles north of Rexford.

Local capitalists at Idaho Falls have organized a company to build a railroad from the town to the Yellowstone Park.

Boise City recently disposed of bonds to the amount of \$90,000, being 6 per cent, at a premium.

State bonds to the amount of \$50,000, bearing 6 per cent, and known as teas and securities, providing for the refundment of the territorial indebtedness, were recently issued.

Boise City celebrated the opening of her new electric rapid transit road in grand style last Sunday.

The Equitable Life Insurance Company propose to erect a \$500,000 office building in Salt Lake City.

James C. Metcalf, son of a Utah banker, was binocular out of \$250 while viewing the east end of the Salt Lake mountains.

Seventy acres of land have been secured near the mouth of Provo canyon on which it is proposed to locate the leaching mills.

Suit has been commenced in Ogden to foreclose the mortgage of \$11,000 on the ground on which the foundation of the Methodist university stands.

Footings of the vote cast at the late territorial election shows 2,170 votes cast, divided as follows: Democrats, 1,159; Republicans, 637; Liberals, 741, scattering 3.

A rich discovery of chloride ore is reported from the Provo river. A claim was located on the ground formerly worked as the Call and Stuart claim some 100 feet from the shaft.

Another and richer ore body has been opened in the Petro mine at Bingham. The ore is much like a decomposed quartz and it assays 50 to 70 ounces in silver, \$2 in gold and 30 per cent in lead.

A valuable deposit of mineral is reported near Great Falls. The Helena and Frisco has paid another dividend for August, of \$10,000, making \$20,000 for the month.

DO YOU LIVE IN A BOARDING HOUSE? If so, you know what it means To come to Dinner Early, Or get left. The clothing campaign for the fall has opened and we have been in training for it all summer. We need not ask pardon of any one, when we say we intend to beat all comers. Our tables are groaning under the weight of an enormous fall stock (possibly the largest west of the windy city by the lakes), to start the ball rolling we will jump in with a matchless \$10 \$10 \$10 \$10 SUIT SALE \$10 \$10 \$10 \$10 IN FOUR PATTERNS, FROCKS AS WELL AS SACKS, THE MOST DURABLE AND DESIRABLE SUITS, EVER OFFERED TO THE PUBLIC. To those who last year bought our celebrated natural wool shirts and drawers at \$1.00 a garment. Be it known that we have secured the sale of the same garment this year, and expect to sell thousands of suits. There may be garments with a veneered face, made to look well, that can be sold for less, but there is no garment in the country sold for \$1 that has more wool in it, or will stand the desired wear and tear, better than this one. This is our opening speech; our intentions are to shove prices in so thick and fast as the season progresses, that if by the end the laurels don't fall to us, it will be through no fault of ours. AS EVER, HELLMAN'S, Corner 13th and Farnam St., Omaha, Neb.

MILLIONS IN IT.

A Suit Involving the Famous Emma Mine and Senator Stewart. James E. Lyon has entered suit in the New York supreme court against Senator William M. Stewart of Nevada, claiming \$1,000,000 damages.

The action involves the famous Emma mine, located in Little Cottonwood canyon, Utah, the sale of which nearly twenty years ago, created an international scandal and caused the recall of Minister Schenck from London.

Senator Stewart was then practicing law in San Francisco and was retained by Lyon. After the Emma Mining company was incorporated Stewart represented that it would pay Lyon \$500,000 in settlement of his claims.

Lyon agreed to the proposition August 14, 1871, but telegraphed to Stewart not to proceed in the matter until he heard again from him.

Notwithstanding this, Lyon says, Stewart made the contract in his behalf for the \$500,000. The payment of the money was put off repeatedly and at last Lyon became a party to a scheme by which, with Stewart and Park, they were to form a company in London and put the mine on the market.

It was represented to Lyon that his interest would be materially increased if he would wait for the money until the stock was put on the London market.

Lyon declares that thereupon Stewart and Park to enter into negotiations with English capitalists to put the scheme on the market. The Emma Silver Mining company was organized with a capital of \$1,000,000.

Upon receipt of a cable from Stewart, Lyon went to London and was informed that the negotiations were in a bad way and that the expenses in unloading the stock on the market were enormous.

Lyon says that when the agreement August 15, 1871, was made Stewart had a private contract with Park by which the latter gave Mr. Stewart \$100,000 out of the Emma mine scheme.

He alleges that Park, Baxter, and Stewart conspired together to delay the payment of the \$500,000 and to deprive him of his rights in the Monitor and St. Louis ledge.

Lyon asks for \$1,000,000 damages, with interest from April 15, 1872, and seeks an accounting of the sale of the Emma mine in London.

He wants the contract of April 17, 1871, declared void, and seeks an accounting against Stewart and Park upon which he received \$50,000 set aside and an accounting of the sales of all stock.

Senator Stewart in his answer denies all charges of fraud and insinuates that blackmail is the foundation of the suit. He asserts that the transactions by which Lyon discovered his claims were regular and that the original claim to the property was considered pure blackmail by the Utah courts.

FOREST FIRES.

Immense Quantities of Fine Timber. The forest fires now destroying immense quantities of valuable timber in northwestern Washington are a melancholy sight.

In the last days of July the atmosphere was beautifully clear, and for many miles the grand pyramids of Mount Baker and Mount Tacoma could be seen, rearing their splendid spires above all the surrounding mountains and showing their great sides covered with the snow that never seems to melt.

Three days later a traveler was within ten miles of Mount Baker, and he could not distinguish the grand mountain, for the air was oppressively heavy with smoke. It did not take long to find out what started these fires. There were three in the timber, the first of which the train sped across Washington were little clearings, and farmers and their men could be seen felling trees and setting fire to the trunks.

It is the only way they have of removing timber, so that they may plough the land. They have no means of getting the timber to market, and the only thing they can do is to reduce the enormous growth to ashes and then pull out the stumps, and thus add a little to their tillable area.

WYOMING OIL.

But Little Development Going on in the Fields. Development of the vast oil fields of Wyoming is apparently at a standstill.

But little work is being done in the oil fields, and it is only the public works that are being carried on. The oil fields are so far from the market that it is not worth the cost of transportation to bring the oil to the coast.

The future of the new camp is very bright just at present; new mining strikes are being made every day, which hold great promise of being productive in the future.

What is believed to be the largest musketeer in the world is being exhibited at Fresno. Its circumference is 100 feet and its length is 100 feet.

Three gold bricks from Cedros Island mine were received at a San Diego bank a few days ago. They weigh 3,175 ounces and are worth \$2,000,000.

The Chinese are getting hold of large quantities of silver in the mountains, and are becoming quite a factor in the shipping of fruit to market.

Colonel John P. Irish is traveling throughout the state addressing the people on various subjects. He is a member of the National Republican Union.

Thomas A. Sutherland, a Portland (Ore.) editor, who was 'drowned' recently while running to catch a ferry boat, was the first child of white parents to be born in California.

A floating dry dock is to be built at Tacoma. According to reports the amount of smuggling in the neighborhood of Sumas, on the Canadian boundary, has been stupendous and smuggling is a leading industry there.

Kittitas county has sold 25,000 head of sheep for \$7,500 this year. There are 40,000 head still in the county, and the wool clip is 2,000,000 pounds.

The run of salmon has begun in dead earnest and large catches are reported all over the coast. The Myrtle canyon at Mazilia is receiving between five and six thousand fish per day, and is now canning them as fast as received.

Port Townsend, according to official returns, cleared 117 more vessels during the first three months of this year than New York did. The tonnage of the ships cleared was a third more than that of those from New York.

The Menatans mineral district near Ellensburg, is uncommonly rich. Ore taken at a depth of 100 feet assays 100 per cent silver, 100 per cent gold, and 100 per cent copper.

Well, I know where there are tons of it," replied the Coloradoan, as he jumped from the train, and started for the leading car to engage passage with the next or train for

A Banquet for the Dead. The celestial colony in Salt Lake is making zealous preparations to banquet their dead who are sleeping in the cemetery

ROMANCE OF A PROSPECTOR.

How the Owner of Caribou Discovered Its Value. The recent strike of a three-inch vein of native silver in the mines at Caribou, says the Denver News, recalls the old story of the discovery of the mines, as told by Sam Cushman, an old-time resident of Clinch county and at one time superintendent of the Caribou property.

Some twenty-five years ago there lived at Black Hawk a prospector who never seemed capable of getting ahead in the world. He prospected on "grub stakes" in the summer, sawed wood and did chores in the winter, but was at all times a happy-go-lucky sort of a fellow, well liked by all who knew him.

When the Union Pacific was completed to Cheyenne he was soled with a desire to go east and see the old folks. By one means or another he managed to scrape money enough together and started for Cheyenne. Arriving there he wandered down to the depot, and not having seen an engine or a railroad for many years, he was greatly interested in the movement, and the train yards. At last something particular attracted his attention. He climbed on the car, and critically examined its contents, putting a specimen or two in his pocket.

"Stop that," yelled a trackman. "Why, it's not good for much, is it?" replied the astonished prospector. "That's Nevada ore, and its worth \$1,000 a ton."

"Well, I know where there are tons of it," replied the Coloradoan, as he jumped from the train, and started for the leading car to engage passage with the next or train for
