

OMAHA, MONDAY MORNING, SEPTEMBER 7, 1891.

ENCOURAGING CROP REPORTS.

From Every Section of the Country the Same Story Comes.

NATURE REWARDS WITH A LAVISH HAND.

In Every State Bountiful Harvests Have or Will Be Reaped—Wealth in Corn and Grain.

WASHINGTON, D. C., Sept. 6.—The weather bureau of the Department of Agriculture tonight issued the following weather crop bulletin:

Temperature.—The week has been cooler than usual in districts east of the Rocky mountains, while to the westward and on the Pacific coast the excess of temperature

has been the normal for the week ranged from principal crop producing states.

Over the northern portion of the cotton region, the average daily temperature for the week was about six degrees below the normal.

Wheat.—The weather was generally favorable for growing crops, the cool weather during the past week has not hastened the ripening of corn, which at present is not safe from injury by frost in many sections.

Frost occurred during the week in Wisconsin southward to Colorado, but have not yet reached the principal crops with sufficient severity to cause any particular damage to the crops.

Rainfall.—More than the usual amount of rainfall occurred in the northern portion of the cotton region east of the Mississippi, in southeast Florida, northeast Michigan and in the Rocky mountains, except in southeast Texas. No rain occurred on the Pacific coast.

The seasonal rainfall continues in excess from the Rocky mountains to New England, and generally on the eastern slope of the Rocky mountains as far east as the Mississippi, except over the greater portion of Louisiana, where the deficiency amounts to about 40 per cent of the normal rainfall; the same deficiency exists in northern Florida.

On the Pacific coast the rainfall was generally in excess, except in central California, where the rainfall for the season has been equal to two inches less than usual, but near Portland and Olympia the deficiency amounts to about five inches.

New England.—Crops ripening slowly; potato rot not spreading seriously; tobacco not doing well; corn in good condition; good condition; picking will begin next week.

New York.—The conditions were generally favorable for growing crops, but the corn is from one to three weeks late; the potato blight is increasing; hops badly damaged by moisture; tobacco harvest is advanced.

Pennsylvania.—Corn is excellent, but needs warm, sunny weather to mature it; buckwheat crop will be unusually large; reported late; potatoes only slightly damaged by rot; very large. Seeding has been delayed in some places.

New Jersey.—The cranberry crop promises an average yield. The weather has been unfavorable for ripening fruit and vegetables, but the conditions are favorable for growing crops. Sunny weather is needed in all sections.

Virginia.—Crops advanced, but tobacco needs warm weather.

North Carolina.—Cotton is opening very slowly; some rust and shedding reported; tobacco curing and progressing rapidly. The weather has been too cool for good results.

South Carolina.—Cotton has been seriously injured by cool, cloudy weather; eye used heavy rains, the damage being estimated at from 20 to 30 per cent; nearly five inches of rain fell yesterday.

Florida.—Cotton without frost and 60 per cent of the corn will be out of danger. Late corn will require a month; fall plowing and seeding is in progress with increased acreage.

Wisconsin.—The conditions were unfavorable to corn, buckwheat and potatoes; frost set in early in the morning and the crop is in the hands of the farmer; corn and buckwheat in the northern counties, and slight damage to tobacco and corn in the southern counties.

Minnesota.—Threshing progressing; frost seriously damaged garden truck in some localities, and also greatly injured corn in north and central counties; the crop is in the hands of the farmer; two weeks of warm weather in the southern portions of the state will mature corn.

North and South Dakota.—The North Dakota harvest is advanced; the crop is in the hands of the farmer; in South Dakota late haying, threshing and grain marketing are in progress; the crop is in the hands of the farmer; in South Dakota late haying and grain marketing are in progress; the crop is in the hands of the farmer.

Nebraska.—The week has been generally dry and sunny; the stalk of the corn crop requires three days to mature in southern Nebraska; and fifteen days in northern Nebraska; wheat and oats are in the hands of the farmer; the crop is in the hands of the farmer.

Missouri.—A splendid week for farm work, but too cool for maturing corn; the crop is in the hands of the farmer; the crop is in the hands of the farmer.

Colorado.—A third crop of alfalfa is being cut; the crop is in the hands of the farmer; the crop is in the hands of the farmer.

Arkansas.—The weather has been favorable to crops; potatoes are plentiful and cool nights are doing good; the crop is in the hands of the farmer; the crop is in the hands of the farmer.

California.—The weather has been favorable to crops; potatoes are plentiful and cool nights are doing good; the crop is in the hands of the farmer; the crop is in the hands of the farmer.

Alabama.—There has been no material change in the condition of the cotton crop; the crop is in the hands of the farmer; the crop is in the hands of the farmer.

Georgia.—The weather has been favorable to crops; potatoes are plentiful and cool nights are doing good; the crop is in the hands of the farmer; the crop is in the hands of the farmer.

Florida.—The weather has been favorable to crops; potatoes are plentiful and cool nights are doing good; the crop is in the hands of the farmer; the crop is in the hands of the farmer.

Mississippi.—A cool, dry, sunny week; cotton is suffering badly from the combined effects of drought, heat, and cold; the crop is in the hands of the farmer; the crop is in the hands of the farmer.

Louisiana.—The weather has been favorable to crops; potatoes are plentiful and cool nights are doing good; the crop is in the hands of the farmer; the crop is in the hands of the farmer.

Texas.—Unless general rains fall within ten days late cotton and the hay crop will be light; cool weather has checked the ravages of the boll worm, cotton picking is progressing rapidly; ground is too dry for plowing.

Tennessee.—The growth of cotton has been checked by cool nights. Late corn and cotton doing well; fall plowing has been retarded by dry weather, crops generally are in promising condition.

Kentucky.—The weather has been generally beneficial to crops, the corn crop promises to be the largest in years, tobacco shows some improvement and hay will average the early crop being late fruits and potatoes abundant, fall plowing progressing.

Ohio.—Corn promises well and will mature in two weeks; buckwheat is the heavy crop; clover is clean and is a good yield; wheat-sowing is in progress and soil is in good condition for plowing and seeding.

Michigan.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Indiana.—Corn, though ripening slowly, continues in excellent condition; plowing for winter crops is well advanced; the crop is in the hands of the farmer; the crop is in the hands of the farmer.

Illinois.—Corn is maturing slowly owing to continued cool weather; the soil is in excellent condition for plowing and seeding; the crop is in the hands of the farmer; the crop is in the hands of the farmer.

Wisconsin.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Minnesota.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

North and South Dakota.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Nebraska.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Missouri.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Colorado.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Arkansas.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

California.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Alabama.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Georgia.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Florida.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Mississippi.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Louisiana.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Texas.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Tennessee.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Kentucky.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Ohio.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Michigan.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Indiana.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Illinois.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Wisconsin.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Minnesota.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

North and South Dakota.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Nebraska.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Missouri.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Colorado.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Arkansas.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

California.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Alabama.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Georgia.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Florida.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Mississippi.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Louisiana.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Texas.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Tennessee.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Kentucky.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Ohio.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Michigan.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Indiana.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

Illinois.—The weather has been too cool for a marked improvement in corn and potatoes; corn will be safe in ten days; fall seeding is progressing.

MANY EVIDENCES OF THIS.

Flattering Display of Nebraska's Products at the State Fair.

NUMEROUS EXHIBITS OF VEGETATION.

Rare Opportunity Offered to Observe the Results of Western Farming—Ingenuous Preparations for the Occasion.

LINCOLN, Neb., Sept. 6.—[Special to THE BEER.]—The annual state fair opens tomorrow and everything is ready for the great crowds that will assemble providing the weather continues propitious.

The exhibits, particularly the cereals and vegetables, will astonish the myriads who throng to see them. All who have thus far gazed upon them declare that they eclipse anything in size and yield to the acreage ever exhibited at the state fair before.

A walk through agricultural hall is sufficient to convince the boldest that Ceres or whoever the deity is that presides over harvests had emptied the entire contents of her cornucopia in Nebraska.

The other displays are also entirely in keeping with this magnificent agricultural exhibit. There are nearly 400 fat porkers, while the 120 sheep pens, 300 cattle pens and 400 horse stalls are nearly all occupied by animals of a superior quality.

There is a bower of beauty, flowers and fruits vying with each other to delight the eye. The exhibit is so great that the building is too small to hold it, and part of it will have to be displayed in a temporary structure adjoining.

There is a perfect wilderness of labor-saving farm implements and machines, windmills and vehicles, while all the special pavilions, representing private enterprises, are filled to overflowing.

The art hall which is adorned with paintings by Nebraska artists, has a display much superior to that of any preceding year. The exhibits are of a high order and are succeeded by genuine works of art, displaying the development of an ideal artistic talent and appreciation in the state in keeping with the other forward steps being taken by Nebraskaans.

But invariably the beholder wanders back to agricultural hall, with its wealth of products, ever thinking of the cornucopia of the state. Gigantic squashes, towering stalks of oats and rye, immense cabbage heads, Brodiaeana beets, extensive cucumbers and ears of corn vying with each other to delight the eye. The exhibit is so great that the building is too small to hold it, and part of it will have to be displayed in a temporary structure adjoining.
