# For the Campaign.

In order to give every reader in this state and Iowa an opportunity to keep posted on the progress of the campaign in both these states we have decided to offer THE WEEKLY BEE for the balance of this year for twenty-five cents. Send in your orders early. Two dollars will be accepted for a club of ten names. THE BEE PUBLISHING CO.,

It has entered upon a "campaign of education" in this matter, and finds its patrons apt and willing pupils. The home manufacturers have been stimulated by our efforts to organize an association, and they look to the future with renewed interest and hope. THE BEE is the only newspaper in Omaha making a campaign on behalf of Omaha industry, but the enthusiasm and patriotism which have thus far resulted from its earnest advocacy of the principle of patronizing home industry is a satisfac-

Let him retire gracefully and not wait for the convention or the

people to kick him out of the way.

HENRY T. OXNARD, the sugar manufacturer who built the establishments at Grand Island and Norfolk, aunounce that his company will build no manufactories in Nebraska until the state bounty is restored. That the legislature did not keep faith with Mr. Oxnard must be admitted, but the fact that Nebraska is the best sugar beet country in America will probably bring other sugar companies into the state and is worth more to legitimate enterprises for making sugar than bonuses or bounties. It would be wise for Nebraska people to negotiate with Spreckels of San Francisco and other sugar men, and take Mr. Oxnard at his word.

THE American Waterworks company has forced the issue between itself and the city of Omaha by refusing to lay mains and make connections on North Twentieth street and the city will perform the work. The opportunity is thus presented for making a test case and it is to be hoped the city authorities will make it solve as many juestions as possible. We are all especially anxious to find out whether the waterworks owns, the city entirely or merely part of its municipal machinery.

IRON booths will last longer than hose made of wood, but they cost too much and will take a good deal of money away from Omaha which is needed here. Wooden election booths at \$137 each would be very serviceable. The irot New York Herald: Jasper-Brown is very prompt in his payments is he not? Jumpuppe-1 should say he is. A WORKING woman's union upon the basis proposed by the ladies who met to erganize Friday evening is capable of doing a great deal of good and deserves success. The platform does justice to incouragement.

The participation of Senator Allison in the Iowa campaign with even more than his accustomed vigor and eloquence is to be regarded as making certain an old-time republican victory in that great republican state.

Working Like a Beaver. Omaha is working like a beaver to capture the republican national convention, and Wyoming endorses her claims. No state in the union is more in need of political rehabilita tion than Nebraska, and the big convention would do much toward restoring her to oldtime assured republican supremacy.

A Treat From Texas. Kansas City Star.

"One hundred thousand Texans protest against the closing of the World's fair on Sunday," is the dispatch which has been received at Chicago from Weatherford, the headquarters of the Texas State Fair association. Texas is going to help along the Columbian exhibition with an appropriation of \$300,000. Colonel Elliott F. Sheppard is pretty handy with this tongue, but money talks, too.

Canada and the United States. Chicago

The Canadian censils just completed is very disappointing to the people. The population of Caaada in 1881 was 4,324,810, having in-

creased 18 per cent during the previous decade. Today it is 4,825,000, an increase of less than 12 per cent during the decade This is one-third less than during the provious decade, less than half that of the United States, and no more rapid than England's, an old country, whence there is large and

continuous emig. ation. The cause of this extraordinary showing is admittedly the United States. The Canafian calculation is that 1,400,000 people have emigrated from Canada to the United States during the last decade, or more than all the immigrants arriving in that country, added to the national increase of population during the same period. This argues strongly for annexation as an event of the near future, a conclusion to which the Canadian press is
