isked the court to decide which is entitled to

the possession of Louisa, their 14-months-old

daughter. The husband and wife do not

agree and consequently are not on intimate

terms. Friday George entered his nome,

stole and carried away the paby. Now the wife has secured a writ of habeas corpus

from Judge Irvine commanding the father to return the little one.
Margaret A. Murphy, Mike Swift and

Elizabeth Kole have secured an injunction from Judge Doane which temporarily stops the paving on Twentieth street from Clark to

Lake. They allege that the street is about to be

paved, which will be a great detriment to abutting property, as the city has failed to order the water and gas connections made, Arguments on the application for a perman-ent injunction will be heard next Saturday.

Judge Irvine was on the bench ust long enough to listen to another chapter in the history of the troubles between

Pete Turkelson and his wife, Anna. The wife asks for an order restraining her hus-

band from disposing of his property, which

she avers includes \$4,000 deposited in one of the banks of the city. The court modified

the order in such a manner as not to inter

fere with the property which the defendant requires to successfully carry on his business

of a saloonist. Arguments upon the applica don for the general restraining order will be

neard next Saturday.

The will of the late Clark Woodman was
probated before Judge Shields and
Sarah A. Woodman appointed administratrix

of the estate. Her bond was fixed at \$30,000. Most of the property, both real and personal, goes to the widow, in accordance with the

The Warm Weather Very Encouraging to Business Men.

BUSINESS GENERALLY LOOKING UP.

The Jobbing Trade of Omaha in a Very Prosperous Condition and Prospects Favor a Still Better Trade.

The warm weather of the past week, so much needed to harden up the corn, has caused a great improvement in the outlook for business all over the state, and the cause for the fear that the value of the crop would be greatly reduced by the quantity of soft corn has disappeared.

Business men declare that the conditions were never more favorable for a large and prosperous business during the coming winter. Already the jobbing trade is reaping a great benefit in the enlarged volume of business. Consumers are certain to buy more freely and the retail dealers are preparing to meet the demands of their customers with large stocks of goods of all kinds.

Another most encouraging feature is the prospect of greatly improved collections. Not only will the retail dealers of the state be enabled to meet promptly all their obligations, but they will be in a position to clear up the old accounts which were contracted during the close times of last year.

Money must ease up very quickly when the new corn commences to move. The whole country from Wall street west is confident of much better times and when such a feeling becomes universal it is very likely to result in a reality.

It seems now evident that the period of

gold imports has come, and nearly every day brings reports of new shipments from abroad. The exhilarating effect of this news is exhibited in the progress of stock quota-tions, which in a market showing diminished transactions are bounding upward. When gold is imported its movement is natural. It comes to extinguish obligations incurred, and, at a time when the exportations grain to Europe are so large, volume of gold coming to our shore is far more likely to increase than to decrease. The few shipments which have occurred are evidently the advance guard of those which are to arrive. That the move ment has begun at so early a day is an indi cation that, before the winter months, many millions will have returned to this country The rate of exchange has given notice of this situation for some time, but the movement of gold in this direction before the summer has fairly closed is an event so surprising as to

have been entirely unthought of. Local dry goods jobbers are commencing to complain of being rushed to fill orders, and they appear to be in a fair way of having all

that they can do for some time.

There has been quite an evident appreciation of tone in the market at New York, says the Bulletin, for staple cottons during the past week obtained without any notable increase in the amount of business do-ing. Buyers still conduct their operations with a commendable degree of conservatism, and it is evident that they are as yet determined to follow rather than anticipate the improved prospects of business during the coming months. There have been a few price changes during the week. all in an upward direction, and, although no general advance is looked for, these show the prevailing tendency is at least to even up to a more regular line of values. Low grade goods are comparatively the strongest, comgoods are comparatively the strongest, com-ing more directly under the influence of the print cloth market. The situation at Full River is being watched with great interest and has, for the time, overshadowed the movements in the market for raw material. So far as can be gathered, the prevailing opinion at Fall River points to the manufacturers enforcing the reduction in wages and the operatives striking. Here it is considered that the ad-vance in the price of cloths has put another complexion on matters, and that it will, after the period of suspense has served the mills will continue on an unchanged basis The demand for fall prints has reached the point when a number of leading lines are practically withdrawn from the market owing to the production being fully covered, owing to the production being fully covered, and in no direction are any but light stocks discernible. Prices are firm, with an occasional small advance reported. Dark ginghams and fall dress goods are well sold up, although some makes have been produced in larger quantities than usual. New spring styles in fine woven goods have been shown in a few quarters with fair results, but the fall treat has ters with fair results, but the fall trade has so fully occupied attention that compared with last year spring business is considerably behind. Local jobbers reported a very active week, and accounts from other large distrib-uting points continue very favorable. The west and northwest are still doing much the best business, but eastern markets are more lively, and an occasional revival of demand from the south encourages the hope that mat-ters are improving there also. Collections show some change for the better, and complaints of irregularity are less frequent than The grocery trade of Omaha is also on the

up grade and the jobbing houses are all doing a large business. At New York there does not appear to be any especially interesting feature in the grocery line. A calm sort of confidence seems to rest upon the holders of pretty much every article free from specula-tive relations and the plans of owners of tive relations and the plans of owners of bulk lots and also among jobbers are based upon the assumption that there are nothing more in stock or expected than will be reto meet the exigencies of natural consumption at all points dependent upon this locality for supplies. The week opened with a pretty good line of distribution, mail orders running up pretty full is some cases liberal. running up pretty full, in some cases liberal, and a larger attendance of buyers showing itself, creating an outlet for a good general assortment of stock. The immediate reflection upon bulk parcels may not be very pro-nounced, but a deficit is making in second hand accumulations which must sooner or later be filled in again, and owners of really desirable parcels and assortments feel no hesitation about carrying to await the advent

What has been said of the local trade in groceries and dry goods would apply quite well to hardware. Jobbers are busy. Con-ditions at New York as a rule are favorable, the tendency of general business being to-ward a gain in volume, and the selection made is of a character to give all seasonable staple goods a place upon the invoices. New territory is coming under the attention of travelers, which broadens the domestic outlet, and there is at times quite a respectable sort of deal on foreign account. Prices develop no new or specially noteworthy irregu-

Nails have been only fairly active in the movement toward regular outlets, and the market as a whole appears somewhat ragged and unsatisfactory. Supplies are kept well enough in hand to prevent them from pressing upon the market, but always prove plenty enough when a call is made. Values remain without noteworthy change.

OMAHA LIVE STOCK MARKETS.

ONAHA, Sept. 19,
CATTLE-Official receipts of cattle, 2,464, as compared with 3,961 yesterday and 1,711
Saturday of last week. The offerings nearly all rangers and the market dull and 1543,900 lower than last week. Butcher stuff in moderate supply and fair demand and about steady at yesterday's decline. Feeders in heavy supply and poor demand, Good steady; others practicably unsaleable.

THE SPECULATIVE MARKETS.

Wheat Ruled Irregular and Developed

Some Very Weak Spots. GENERAL TONE ONE OF STRENGTH.

Heavy Receipts at Minneapolis and Duluth Furnished Additional Ammunition for the Bears-Stocks and Bonds.

CHICAGO, Ill., Sept. 19.-While the wheat market ruled irregular today and developed some very weak spots the general tone was one of strength and most of the day prices were above vesterday, cables were rather firm at the start and domestic markets were steady. December opened at from 98%c to 99%c, holding for a considerable time at 990 Then S. V. Wnite & Co. put a big line on the market and New York and St. Louis sent selling orders and prices began to weaken. The heavy receipts at Minneapolis and Duluth-1,140 car loads-furnished ditional ammunition for the bears and the market soon became demoralized. December selling off to 18c but with only a slight business. A lower Liverpool cable coming in about that time proved a weakening factor. On the break there was a season of active buying. White & Co. taking back most of the property they had sold and other buyers coming. December reacted sharply to 90%c. From this there was another decline to 98%c. This was followed in turn by a slight reaction. During the last hour the market continued nervous. After declining to 98% there was a rally to 90c, a break to 98%c and an advance to 99%c, with the close

Brudstreets reported the clearances of wheat and flour from both coasts at 7,5:0.000 bushess during the week and over 50,000,000 bushels for tweive weeks. The charters of busiels for twelve weeks. The charters of vessel room here, including those made yesterday, were about 600,000 bushels. The most bearish item of news was the decline in the price of farmers' deliveries in England, which showed a drop of about 14e during the week. The explanation cabled was that the quality of wheat offered was very moor, being new and damp, owing to the late wet weather. The final conclusion reached in regard to the Russian wheat export prohibition is that the exportation of wheat over the frontier to Persia has been prohibited. The business today was mostly in the hands of the professionals.

day was mostly in the hands of the professionals.

Corn was decidedly weak and lower, influenced by the fine weather for the crop, which is now believed to be practically safe and a crop of 2,003,003,003,000 bushels assured. Under these circumstances no one was disposed to extend any support and the drop was casy. October started at from 5te to 52c, against 52% at the close yesterday, and sold down to 50% without rallying. Then the market firmed up through the purchase of early sellers, who were willing to take their profits. During the last hour it was steady with October fluctuating between 5te and 51%; but it became weak again at the last and closed at 50%.

Oats were easy but held up better than corn, showing a loss of only from one-fourth of it to three-eighths of ic. Hog products were lower on free selling and the weakness in corn, but railled some during the latter part of the session. Pork closed at from 5c to 7%; lard is unchanged and ribs are at from 2% to 7% to 100 wer.

The lengting futures ranged as follows:

NEW YORK, Sept. 19.-The stock market today was extremely active, although showing a marked decrease at the point from the heavy trading of yesterday, and while displaying considerable irregularity was in the main decidedly strong and the result of the two hours' session today is to leave most of the list fractionally higher than last evening and some are materially so. The importation of gold was the chief item of news with a tendency to affect values, but there was little said about it, and it may be doubted whether it had any material influence in making the gains of the day. The opening was strong and very active, and while most of the list was fractionally higher than last evening, Bur-

It was only natural that after such a gain there should be some reaction in the stock and being joined by Reading affected the rest of the list to a limited extent. Reactions were the chief factor in such declines as were seen, but the demand for stocks was still very urgent and the buyers outnumbered the sellers and the course of prices was soon again turned in the direction of higher figures. In the upward movement the grangers had first place, but there were a few other leading shares which commanded attention on account of their strength, among which Lake Shore and Northern Pacific preferred were most prominent. Among the specialities Distillers was conspicuous because of the sharp loss of 3 per cent in the early trading, but this was afterwards entirely made up, while Buffalo, Rochester and Pittsburg was very strong on light trading. The bank statement showed only a nominal loss in the reserves, while exhibiting a material increase in the deposits and a heavy expansion of loans and was considered good. being joined by Reading affected the rest of

and a heavy expansion of loans and was considered good.

The traders again went into their shorts in the final dealings and the market developed marked strength, finally closing active and strong at the best prices of the day. The final changes of note comprise advances in St. Paul. IX per cent; Pacific preferred, 1½ per cent; Buffalo, Rochester & Pittsburg and Sugar each 1½ per cent; Lake Shore, 1 per cent. Government bonds have been dull and steady to firm. State bonds have been neglected.

Financial Review.

Financial Review.

New York, Sept. 19.—The Post says: Most significant, perhaps, of all the incidents of the week, in its bearing upon prices both here and in Europe is the breaking down of the last obstacle placed by the Bank of England in the way of our export of gold. This morning's cables brought news of heavy engagements of the precious metal in London, the total engagements in that city publicly announced now footing up \$4.20,000, with probably as much more privately contracted for but not yet made public.

According to the fispatches most of this is American coin, the dron in exchange yesterday being sufficient to meet the premium imposed by the Englishbank. It is not conjectured where the movement will stop, for the heavy purchases of our securities by Londoners during the present week have upset most previous calculations. It is interesting to recall now the predictions three months ago that the Englishmen would prevent gold imports from that city, by selling American securities to settle the trade debt.

Chicago Live Stock Market.

Chicago Live Stock Market.

Chicago Live Stock Market.

Chicago Lil. Sept. 19.—[Special Telegram to The Bee.]—It is impossible to adequately describe today's cattle market. It was profoundly duil and was weak to the last degree. The yards contained more cattle than were ever before seen in them on the last day of the week white the demand, having already been satisfied, was nill. A few of the ten or more thousand cattle on sale changed hands, but at shockingly low prices. The bulk of the efferings were unsaleable at any price all outlets being literally choked up. Questations are at from \$1.00 to \$2.00 for inferior to choice cows, helfers and bulls; \$1.75 to \$2.25 for shipping steers; \$1.25 to \$1.15 for Texas and \$1.75 to \$1.25 for westerns. Veal calves were quoted at from \$2.00 to \$5.25.

The receipts of cattle for the six days ending today, aggregate 96,700 head. This is a greater number of cattle than was ever previously unloaded at the Union stock yarisduring any six consecutive days. That, under such enormous receipts, values should have undergone a further and not inconsiderable depreciation, "goes without saying." Traders have to note a deciline for the week of from 15c to 50c per 100 lbs. Certainly this is not a more serious shrinkage than was to be expected, especially when it is remembered that the supply for the previous week was among the largest ever recorded. The demand, though more than ordinarily active, was not equal to the absorption of 16,000 head per day, and there has been a general accumulation of stock, which at the close of today's trading amounted to several thousand head. Of the 96,700 head of cattle received, 44,000 were natives. They sold at prices running from \$1.00 to \$1.25 for ennealated cows to from \$1.00 to \$1.25 for extra steers. Any number of old cows were closed out at from \$1.25 to \$1.40 and the prevailing prices for steers were from \$1.00 to \$2.25. Of western range cattle about \$7.000 arrived and of Texans \$2.50. There was but slight change today in prices for hogs, though

dition.

Buyers did not take hold with much zest, as is evidenced by the fact that the pens were not emptied before the usual time, although the receipts were confined to about 9,000 head. Sales drarged at from \$1.00 to \$5.45 for poor to choice medium and heavy weights and at \$4.50 to 5.25 for common to prime light. Culls, thin pigs and common grass hogs sold anywhere from \$2.00 to \$4.50. The close was quite weak. During the week the general tendency of prices has been slightly downward, today's quotations being from 5c to 10c under the prices current one week ago, though the receipts were 1,000 less than for the previous week and 24,000 less than for the crresponding week last year. In point of quality they were an improvement on the average for any previous week of the present season and were only a little inferior to the average of former years at a like period. The present difference between the market value of heavy and light weights is 15c to 2:e per 100 pounds. At this time last year the latter commanded a premium of from 10c to 15c, while at present the above noted discount.

The Evening Journal reports: Cattle-Re-Buyers did not take hold with much zest, as

ket weak. St. Louis Live Stock Market. Traders' Talk.

Traders' Talk.

Chicago, Ill., Sept. 19.—Counselman & Day to Cockrell Bros.: The leading grain markets were duil and with liberai receipts and slack consumptive demand were inclined to soil lower. Wheat was, however, held like yesterday on bullish items and news, some of which were very old but were dressed in new language and kept the market in a state of uncertainty until it was over. The bulls depend for encouragement upon recapitulation of foreign shortages, political excitement and clearances of wheat soid 3) to 90 days ago. The bears demand fresh news and point to abundant crops, free movement induced by high prices, increasing stocks, absence of new foreign buying and a tendency abroad to follow our markets rapidly on declines and tardily on advances. We think the bears have the best of the argument. Corn closed weaker on free offerings for the current month by receivers and cribbers who in the assurance of another enormous crop are now rushing reserves to market in amounts much exceeding estimates in order to secure the premiums on new deliveries. We expect to see September and October corn together at about 4se within one week. Onts were duli liveries. We expect to see September and October corn together at about 48c within one week. Onts were duli and narrow and we look for a further break in prices before any material change comes. Provisions were quiet, and although cable quotations were lower, the market closed rather firm with lard and meats in better demand for shipments. Estimated receipts of hogs for next week are rather light at 105,000 and should they fail below this, we expect some raily on the covering of the short interest, which seems to be getting rather overgrown.

est, which seems to be getting rather overgrown.

New York, Sept. 19.—Counselman & Day to Cockrell Bros.: The stock market for the week closed with a whoop. A disappointing bank statement has not diminished the buying, the fever is on and the banks are in high feather and the fact that the expectation of an increase in the banks' surplus reserve of \$27,000,000 turned out really as a decrease of neary \$750,000 has only had the effect of making the active men in the market more energetic and more earnest. How long such liveliness can keep on can only be such liveliness can keep on can only be guessed. Such a situation as the present has not been known in Wall street in years. The talk about a repetition of the wild specula-tive boom of 1879 is beginning to have a show of reality in it. New pools to bull various stocks are in operation all over the market. The Keene crowd have gone into the Villand stocks and are called raiking nard Nathard Stocks and are calmly talking parof Northern Pacific preferred. Commack, since he came back, has been talking buil. There is no evi-dence, however, that he has so far done any-thing more than talk. He is credited with being heavily long of North American around present prices.

dence, however, that he has so far done anything more than talk. He is credited with being heavily long of North American around present prices.

Cattogo, Ill., Sept. 19. Kennett, Hopkins & Coto S. A. McWhorter: There was an easier tone to cables, and with receipts of 400 cars here and 1.100 in the northwest. 163 at Kansas City and 167,000 bushels at St. Louis it was generally felt that prices would go lower, but the opening, for some unaccountable reason, was strong, and not until it was known that New Yorkers and sold freely and had given up the name of a house closely identified with the building, then did prices yield. Then they dropped it quickly, but railled immediately to about the opening figures. Several times the market showed marked weakness and seemed on the point of breaking sharply, but the mysterious supporting orders that have been a feature for some days quickly turned the trade the other way. On all good railles there was plenty of wheat for sale, doubtless supplied from the same source. Scalpers have never been so badly rattled and are limiting their operations to an occasional fine where they generally trade. Closing cables were 14d to 24d lower at Liverpool and somewhat higher at both Paris and Antwerp. The average price of English farmers wheat for weeks shows a decline of nearly one-fourth of it per bushel as compared with the previous week. It is supposed this remarkable drop is due to the boor quality of the new crop, and if so it is no locar argument on American wheat. Near the close there was a raily of three-fourths of it on the charter of 746,000 bushels here and 286,000 reported worked at Baitmore. But nost of the advance was lost in the last three minutes. The Chicago market is apparently bailooned on rumors from abroad. A clique with agents scattered over Europe to cable sensational matter for the benefit of our markets are constantly on the watch for a loophole to get in on the speculative basis. In corn and outs the weakness in September and October was quite conspicuous and de

yery heavy selling at the opening for New York account. Receipts at Minneapolis and Duluth 1,100 cars. This brought about a reaction from the opening figures, but it proved only temporary. Bradstreet announced the export clearances for twelve weeks as 50,500,000 bushels. There were those who claimed that engagement had been made for at least National Control of the series of the series were large enough to look very imposing and certainly had a steadying influence. Minneapolis and Duluth will probably have 200 cars of wheat Monday and the spring wheat movement promises to be very large for the next sixty days. The weather through the corn belt was no different from what it has been perfect. Corn receipts of 684 cars were again over expectations. The stock of corn here has increased this work about 1,500,000 bushels. Provisions were a little easier in sympathy with corn. The week about 1,500,000 bushels. Provisions were a little easier in sympathy with corn. The government report for September amounced a reduction in the number of fattening hogs of 3,330,000 head. The figures, however, made no impression. Packers, influenced chiefly by the spiendid corn, prospects, are bearish on next year's deliveries. The present cash demand for meats, however, is astounding. It is predicted that the stock of ribs will have been entirely consumed by the middle of October.

discount.

RECRIPROCITY ENDORSED. Black Hills and Omaha People are

Getting Together. About 9 o'clock yesterday the Black Hills representatives and the members of the Board of Trade assembled at the board rooms, where President Martin formally

welcomed the visitors to the city. He said that the members of the board re tained vivid recollections of their visit to the Black Hills two years ago and he believed the development of the immense resources of that country had but just commenced. He was satisfied from what he had learned during that trip that the supply of minerals was practically inexhaustible. Mr. Martin also remarked that Omaha had

goods which the people of that country needed and was prepared to supply them with everything in return for their ore General Dawson replied on behalf of the visitors thanking the board for their courtesy. He said Omaha was not unknown to the people of the fills, and they were ready and willing to enter into a reciprocity arrangement Everybody was in favor of this kind of reciprocity, democrats, republicans and independents alike. They wanted the merchandise of Omaha and were

ready to give their ores in exchange. The speaker then referred to the recent developments in the way of transportation which enabled the miners to send low grade ore to Omaha. He said they had brought samples from twenty mines but might have brought samples from 200, backed up by hun dreds of thousands of tons in the mines.

In closing General Dawson invited the
board to visit the Hills, and see
the changes which had taken place,

D. H. Wheeler, Captain Paimer and H. S. Clarke then spoke briefly, the two latter re-calling old incidents which had occurred during the years when they also were citizens of the Hills.
Those present were then formed in line,

and headed by a band, marched down Far-nam street to the smelter, where they were received by the superintendent, in the absence of Messrs. Barton and Nash, who were out of the city. The visitors were escorted through the works and inspected the workings of the immense plant after which they saw the ore train switched into the works and the process of unloading com The party then returned to their hotel and

spent the afternoon in looking after business matters.
At 7 o'clock last evening the entire party

and all members of the Board of Trane who could do so meet at the Paxton, where they will mount the tally-no coaches on which the Board of Trade made the tour of the Black Hills and were driven about the City.
The visitors will remain in the city until

Monday, and some will stay several days to attend to business matters.

An Old Timer.

Mr. H. E. Vickers of San Prancisco, is one of the old time traveling men, having been on the road since before the east and west were joined by the great continental railway lines. The following incident was related by him to a fellow traveler as one of the most important in his career. "Last summer I was troubled with cramping pains in the stomach and bowels for about four weeks to such an extent that I was unable to attend to business. I tried three doctors' prescriptions without receiving any relief and had just about come to the conclusion that the when my attention was called to Chamber lain's Colic, Cholera and Diarrheea Remedy. After using the Remedy for four days, I was as sound and well as ever and have not had any return of the complaint since. I believe it saved my life." 25 and 50 cent bottles for sale by druggists.
