

WHERE FLOWS THE MOLDAU.

Bohemia's Beautiful Capital in Summer's Shortening Days.

PRAGUE AS AN EDUCATIONAL CENTER.

The Vastness and Completeness of the Centennial Industrial Exposition—Rivalry Between the Germans and the Slavs.

PRAGUE, Aug. 31.—[Editorial Correspondence.]—The capital of Bohemia deserves to rank as one of the handsomest cities in Europe.

The rocky bluffs and high hills that hem the city within the basin of the Moldau, which flows through its center, present a picturesque background and bring into pleasing prominence the lofty castle towers, turreted spires and spires that give Prague almost an oriental appearance.

To the American tourist Prague is intensely interesting by reason of its historical reminiscences. Every foot of ground for many miles around has been contested and fought over in almost every bloody war that has distracted Europe, and pitched battles have been fought by great armies within gun shot of her walls.

Prague was a great center of culture more than 500 years ago and her university, then the foremost seat of learning in Europe, was attended by more than 30,000 students from all parts of the world.

I must necessarily confine myself to personal impressions and observations in and about Prague and endeavor to recall the changes that have taken place since I attended school in this city in 1833.

Within those thirty-eight years Prague has nearly doubled her population, which, by the census of 1880, is computed at 313,130 including suburbs. This growth affords striking proof of marvelous vitality.

Almost the first change noted by me on my return was the disappearance of the great return and broad and deep ditch that formerly surrounded the city. The walls have been leveled, the ditches filled up and the space covered by them converted into grand boulevards and beautiful parks, and large tracts of land formerly outside of the wall are now covered by blocks of magnificent buildings and great factories and mills.

The German Bohemians, who control some very important industries, took umbrage and declined to exhibit, and a majority of the German Bohemians kept away entirely. This course, however, had the effect to spur the Slavic population, who are really the bone and sinew of the land, to greater activity, and hundreds of thousands poured into the city as a matter of patriotism.

Several thousand Americans have come across the sea to join in the celebration and their reception by the Bohemian societies of Prague was an ovation such as had never before been accorded to any class of visitors. The demonstration was in fact so decidedly "Bohemian" that the Austrian authorities took umbrage and almost came to regard it as an outbreak.

It is not surprising that the Bohemians have no disposition to take sides in the local political controversies by which Bohemia in general and Prague in particular are torn to pieces, but cannot refrain from remarking that the contest between the two Bohemian factions as to which policy Bohemia should pursue in her relations to the world, is a contest between the old and the new, between the old narrow, ramshackle streets have been widened and straightened. Magnificent business blocks and great public buildings have taken the place of rookeries and fire-traps that had survived the ravages of war.

Prague has been in progress since the year 1800, and the progress has been rapid. The place of cobblestones on the principal business thoroughfares, Monumental school buildings have been erected to supplement the commodious, but time worn college and university buildings, and great palaces dedicated to art and science have been constructed to meet the demand for art colleges which has been developed to a sufficient degree by the Bohemians within the past quarter of a century.

Last but not least, the grand national Bohemian theater, which Adelini Patti pronounces more perfect in point of acoustics than any opera house or theater in the world, has been erected at an expense of over \$200,000, and will be opened in the near future. It is a superb play house, the German theater, which would do credit to any city on either side of the Atlantic.

Equally notable is the improvement that has taken place in street lighting, street cleaning, drainage, and facilities for transit. With the exception of Paris and Brussels, no city that I have visited, can boast cleaner and better lighted thoroughfares.

As a commercial and industrial center Prague has made big strides to the front within a comparatively recent period. This fact was made patent by the Centennial Industrial Exposition, which has been in progress since the month of May. The first industrial exposition ever attempted in any country was held in Prague in 1791 on the occasion of the crowning of Leopold II. as king of Bohemia.

Although that exposition was comparatively a very insignificant affair it attracted a great deal of attention and emphasized the fact that Bohemia was advanced in the manufacture of linen and textile fabrics, woolen cloth, laces, glassware, mirrors, polished garnets and other precious stones, and toys.

The exposition of 1891, planned and executed on a scale commensurate with the industrial growth of Bohemia, includes within its scope:

1. Agriculture, with all its various branches, namely: The dairy, cattle raising, bee culture, fish culture, fruit culture, forestry, vine culture, products of the farm and garden, and all branches of agricultural and horticultural instruction.

2. Leather and all the products of hide, hoof and horn.

3. Products of the farm, beet sugar, flour, starch, butter, malt, hops, honey, wax and wax products, as well as all utensils and apparatus employed in the conversion of the raw material into marketable wares.

4. Products of wood, straw, cork, bone and gutta serena.

5. Textile fabrics, including linen, silk, woolen, cotton and jute spun goods, carpets and tapestry.

6. Paper industry and paper fabrics.

7. Lithography, printing and electrotyping.

8. Mining and mineral products, including raw material, chemical and mineral wares.

9. Earthenware, glassware and porcelain industry.

10. Chemicals and drugs, including soaps, perfumery, paints and varnishes.

11. Iron and steel industry, including also brassware and bronzes.

12. Gold and silverware.

13. Transportation, including railway apparatus, steamship models, etc.

LIBERTIES OF THE SLAVS.

North Nebraska Methodists Have a Lively Discussion on the Subject.

DR. MAXFIELD FINALLY LOST HIS POINT.

Sacred and Solemn Services Attending the Confirmation of Young Ministers Future Work.

Dr. P. S. Merrill called the order of the day for the confirmation of the memorial, signed by several of the brethren, favoring the establishment of a training school in Cincinnati for the purpose of training laymen for the work of holding religious meetings. The memorial was adopted.

Dr. Maxfield offered a memorial favoring the establishment of a book depository and an official church paper in Omaha. The memorial was unanimously adopted.

Dr. Maxfield then offered a resolution which brought on a lively discussion. The resolution was to change the name of the church in such a way as to make the bishop the presiding officer at the lay electoral conference as well as at the annual ministerial conference. Dr. Maxfield said that the manner in which the lay conference had conducted the business during the past year was worthy of the previous day in the basement of the church, convinced him that the bishop should have been the presiding officer, so that the memorial was adopted.

Dr. Maxfield then offered a resolution which brought on a lively discussion. The resolution was to change the name of the church in such a way as to make the bishop the presiding officer at the lay electoral conference as well as at the annual ministerial conference. Dr. Maxfield said that the manner in which the lay conference had conducted the business during the past year was worthy of the previous day in the basement of the church, convinced him that the bishop should have been the presiding officer, so that the memorial was adopted.

IT IS HAVING GOOD EFFECT.

Agitation of the Home Industry Question and Its Results.

WHAT A REPORTER HAS LEARNED.

All Branches of Business Stimulated Locally—Good Orders at Home Factories—More on a Timely Topic.

The cause of home patronage has been taking long strides forward during the past week and public sentiment is rapidly coming to its support. At the present time it would be a difficult matter to find in the whole city of Omaha an individual who will not admit that vast benefits will accrue from the practice of home patronage on the part of all citizens. The difficulty has not been in the conversion of the people to a belief in these two potent words, but in prevailing upon them to practice what they believe.

However, thousands of people have commenced to practice their belief, and manufacturers are already feeling the effects in the receipt of unsolicited orders from dealers who have not patronized them in the past.

It is a noticeable fact that the improvement has been the greatest in those lines of goods which go into general consumption in the household, such as coffee, tea, soap, flour, etc. This may be in part due to the fact that The Bee has said more regarding these articles but it is an incentive to give the credit to the ladies themselves who when they believe that a certain thing is right do not hesitate to put their own hands to the work.

As a matter of fact a great many enterprising citizens have requested their families to use goods of Omaha manufacture, which has before now been preaching to their wives. While keeping an eye on the purchases of their better halves they have seen in the old way, buying their cigars, their shoes, clothing, etc. in the east, if this is not the case I hope that some cigar manufacturer or shirt maker will correct me. It is not the case, I hope that some cigar manufacturer or shirt maker will correct me.

Dr. Maxfield said that the manner in which the lay conference had conducted the business during the past year was worthy of the previous day in the basement of the church, convinced him that the bishop should have been the presiding officer, so that the memorial was adopted.

Dr. Maxfield then offered a resolution which brought on a lively discussion. The resolution was to change the name of the church in such a way as to make the bishop the presiding officer at the lay electoral conference as well as at the annual ministerial conference. Dr. Maxfield said that the manner in which the lay conference had conducted the business during the past year was worthy of the previous day in the basement of the church, convinced him that the bishop should have been the presiding officer, so that the memorial was adopted.
