WASHINGTON'S LAST. WASHINGTON, D. C., Oct. 5.—The game to-day between Washington and Baltimore was the greatest farce ever seen on a ball ground. It was dark when Washington went in at the beginning of the seventh muing, and after taking the lead over Baltimore and three runs purposely tried to get out so that the visitors might have a chance to finish the luning. Harnie refused to finish, so the game went to Washington by a score of 2 to 0. It was so dark while the burleaque was going on that the players could not be seen from the grand stand, Score:

He said that Reading left Omaha, went to De-troit and Buffalo and was jobbed out of a race or two, and gave up the path forever, returned to Omaha and re-enlisted in the regular army for five years. If he had remained in the business Jack says he would have eclipsed the achievements of all the cracks on both sides of the pond, as his advancement was something beyond compre

Prince leaves this evening for New York and will enter the great race at Madison Square garden.

Shannon Fired by Washington. As predicted weeks ago in these columns Dan Shannon did not last the season out as manager of the Washington American association base ball club. The prediction was based on the man's egregious lack of managerial ability, and his disinclination to do the right thing if it were within his power His Omaha reputation followed him in his new position at the capital, and his incom-petency cropped out before he had held the reins one month. This culminated on Monday last in his being unconditionally fired. Griffin had charge of the team during the last week. Next year the New England league will be pienty big enough for Mr. Shannon's peculiar talents.

Oct, 5 .- By Mexican Cable to the Herald-Special to THE BEE. |- The supreme court at Montevideo has reversed the decision of the lower court which decided that the sale of the steamer Acquilla by its Italian owners was legal. The Acquilla was bought with part of the money which Balmaceda sent from Valparaiso on the British steamer Espigile to Montevideo, The lower court's decision was based on the ground that the junta's representative had no status. The court claimed that the sale was only completed after the fall of Balmaceda. A new hearing is allowed by the supreme court with a view of obtaining the refund of the money paid for the vessel.

Orrawa, Ont., Oct. 5 .- Word has been received here by the department of marine and fisheries from Victoria, B. C., that H. M. S. Pleasant has brought news from Behring sea of the movements of Sir George Baden Powell and Dr. Dawson, British commissioners wno are investigating the seal fisheries question. They are at present on board of the steamer Daniels and have been visiting Commander islands, which are in Russian waters to the west of the Hehring sea investigating the movements of the seals, and to discover what truth there is in the theory that in seasons when seals are always that the seasons of the seals are always that the seasons when seasons are always as a season of the seasons when seals are plentiful on St. George, St Paul and other islands on the east-ern side of Bebring sea they are scarce on Commander islands, and vice versa. This season seals are plentiful at the breeding island. There are millions of them. At St. Paul island full half a million seals were in sight. At St. George's island, however, the number was not so great. It has been found by fastening ten clips to the tails of young seals that they do not remain in the

vicinity of their native place, but cross from side to side of Behring sea.

The Pheasant brings a report that several female seals were killed during sucking season by the commissioners and their stomachs were found to coptain nothing but a little seaweed and some peobles. This is an important point and one on which the commissioners have received special instructions. During the last con-ference at Washington Secretary Blaine held as the most serious reason for stringent restrictions on taking of scals in Behring sea was that mother seals, which during sucking season, swam lifty miles every day to feeding grounds, would be taken in great numbers, and the young seals, which they left on the shores of the island, would perish unless the mother seals were protected. Sir Charles Tupper argued this, that as a matter of fact, mother seals never left their young in the suckling season, which only lasted twelve days, during which time the mother took no a store of food on which it could well subsist for a long time. The report that stomachs of mother scals were found empty bears out Sir
