WITH HARRISON.

STORY OF BALLARD SMITH'S FAILURE.

Went to Interview Mr. Harrison but Mr. Harrison Interviewed Him-Situation in Iowa-Lady Aberdeen's Work in Ireland.

CHICAGO, III., Nov. 4 .- Special to THE BEE.]-Democratic talk about the significance of the recent local election in Indianapolis is all humbug, according to Charles S. Millard, a prominent manufacturer of that city. Mr. Millard, who is stopping at the Auditorium, said: "Indianapolis is democratic by a small majority, and that is all there is to it. The fact that the democratic ticket was elected by a majority of about 2,000 is of no significance whatever, although I see some of the democratic papers are GEM. construing it as an expression of disapproval of President Harrison by his own city. The truth is that Mr. Harrison, as a city. The truth is that Mr. Harrison, as a private citizen, was a very popular man in Indianapolis, and his popularity has increased since he became president. In the first place, there is a natural local pride in the man who occupies such an exalted position, and then his administration has been eminently suited to the lideas of the best element of the city. He has been con-servative and able in his treatment of public affairs—a style of administration calculated to please business men irrespective of party

affairs—a style of administration calculated to please business men irrespective of party affiliations, and Indianapolis is a city of business men. If Mr. Harrison is renomin-ated Indiana may be counted upon to give bim hearty support." On the democratic situation in Indiana, Mr. Millard said: "The democrats of Indiana, as usual, want to furnish a candidate on the presidential ticket. At present the only man talked of is ex-Governor Gray. The death of McDonaid has practically left him the field. Bynum is a coming man, and if he lives will probably be put forward for the position some day, but he is several years younger than Gray, and it is felt that he can wait. Besides, Bynum has his eye on the wait. Besides, Bynum has his eye on the speakership of the house and proposes to try conclusions with Mills and other aspirants for the position.'

In the course of his conversation Mr. Miliard told how Mr. Harrison skillfully eluded an interview with Ballard Smith, now managing editor of the New York World, During the presidential campaign he came down to Indianapolis with the correspondents from all quarters of the compass who were flock-ing there, and sought to obtain Mr. Harrison's views upon subjects on which he didn't care to talk. Mr. Harrison received him yery cordially, and before he could uncork his interrogations began asking him about his people in the southern part of the state— for Mr. Smith is a Hoosier—and continued this line of conversation with such adroit-ness that the newspaper man finally gave up In despair and withdrew, while Mr. Harrison resumed the serious occupation of hand-shaking with a multitude of callers.

Mr. Millard, whose residence is opposite that of Mr. Harrison, saw Mr. Smith as he came out of the gate and asked him how he succeeded. "Not at all," replied the jour-nalist with a smile, "he was too many for

Dangerous to Meddle With.

Neither the republicans nor the democrats of Missouri are likely to fool with prohibition very soon again, according to Morrison Munford, editor of the Kansas City Times. "The republicans," he said, "have found it very dangerous. Soveral years ago there was a good deal of prohibition talk in Mis-souri. Rev. Sam Jones and several other ardent prohibitionists were imported for the purpose of spreading the gospel according to St. John of Kansas, and finally the republi-cans took it up but after the election they found it had made such a large sized hole in their ranks that they dropped it like a red hot iron and haven't shown any disposition to take it up since.'

CLIMAX.....Contains Ammonia (Climax Baking Powder Co., Indianapolis.) Ammonia and alum are the most common adulterants used in the manufacture of bak-ing powder. The government report shows

that a large percentage of the baking pow-ders on the market contain either one or the other, or both these permicious drugs. What woman would use an ammonia or alum

baking powder if she knew it powders not only undermine the health, but ammonia gives to the complexion a sallow or blotched appearance. The presence of ammonia or alum in a baking powder, however, can easily be detected. To Detect Ammonia-Mix one heaping teaspoonful of baking powder with one tea-spoonful of baking powder with one tea-spoonful of water in a tin cup; boil thor-oughly for a few mments, stir to prevent burning, and if ammonia is present you can well it in the relieve steam. On place can smell it in the rising steam. Or, place a can of the suspected powder top down on a hot stove for a minute or two, then take off the cover and smell. To Detect Alum.—Alum powder can be tested by putting a couple of teaspoonfuls of the powder in a glass of cold water. If no effervescence, that is bubbling or simmering, takes place condemn the powder and return it Some alum powders, however, like the "Calumet," "Bon Bon," "Chicago Yeast," etc., contain phosphates in combination with alum, and with these brands the following test is simple and sure: Take one-half tenspoonful of baking powder in lid of say half pound can; char thor-oughly over a strong alchohol flame, a gas jet, or red hot coals. After charring (that is, burning until the whole mass is black) add a teaspoonful of water and place a bright nan piece of silver coin in the solution. Stir for one minute, then take out the silver. If the powder prove a cream of tartar powder the coin will be oright; if an alum powder it will

The council committee appointed some weeks ago to look into the question of whether or not boodle was used in awarding the city hall furniture contract to the Ketcham Furniture company of Toledo, O.,

held or attempted to hold another meeting last night. The attempt was a glaring failure as only four members and one councilman attended. This fact was viewed with disgust and the committee adjourned to meet two weeks from tonight, at which all councilmen will be requested to be present and give in their testimony relative to having been approached. The committee was not anxious to work last night. The members were desirious of getting away to rest up from their labors of Tuesday, Mr. Osthoff insisted that he wanted to get at the bottom of all of the facts. Both lawyers informed Mr. Osthoff and the other members of the committee that they had prepared many depositions and when they returned the investigation could then go to a finish without a break.

DRAWING HOOSIER CROWDS. Nebraska's Train a Great Attraction

in Indiana. XENIA, Ind., Nov. 4.- [Special Telegram t THE BEE.]-Despite the fact that the Ne braska train is new traversing the great natural gas belt of Indiana, and a fine agricultural country as well, the exhibit of our products has not failed in a single instance to draw large crowds. At Converse, where an hour's stop was made, at least seven or eight hundred people were received as vis-itors. The display of fruits of Nebraska is acknowledged to be far superior to those of this locality, and the yield of the small grains here are hardly more than half of those of Nebraska. One of the farmers in this neighborhood who is a subscriber to The BEE, and has read the reports of the train's progress, arose at 3 o'clock, pringing his wife and family to town that they might be certain of seeing the train.

eertain of seeing the train. LOGANSFORT, Ind., Nov. 4.—[Special Tele-gram to Tus Bee.]—The Nebraska train arrived at Logansport at 11 o'clock, making a stop of five hours here. Disagreeably cold weather has been the means of keeping many within doors who would otherwise doubtless have been visitors to the exhibit, but the execute have been them down and interested crowds have been large and interested. Probably not less than 3,500 persons have passed through both cers during this stop. A stop of half a day or more could have been made here with advantage. Nebraska apples have attracted close attention among the shippers and commission men of the city, and as a result a ready market could be found here for any surplusage of fruit in that state. As the final dissolution of the party will As the man dissolution of the perfy will occur in a day or two the members took ad-vantage of the stop to have a large photo-graph taken of the group. The train leaves for Chicago at 4 this afternoon, remaining there until 1 o'clock tomorrow. The departure from Logansport completes the work in Indiana and the results can hardly be overestimated. Instead of decreasing the enthusiasm of the party is on the increase and the delegates would willingly work another month for similar gain.

ANNOUNCEMENTS.

"The Hustler," one of the chief financial and articlic farce comedy successors of the season, comes to Boyd's opera house next Sunday evening, direct from the Tabor opera house, Denver, where it has been nightly testing the capacity of this immense temple of antisement. Since its production here last season the merry farce has undergone many changes for the better. Manager Charlie Davis, having paid Frank Beaumont of Phil-adelphia filone \$10,000 for rewriting the comedy. Mr. Beaumont is considered, by com-petent judges, one of the most able farcical writers in the country; he considers the new edition of "The Hystler" his greatest achievement.

In organizing the Mendelssohn Quintette Club Concert company of Boston for the sea-son of 1891-92 two changes have been made in its personnel, and it is with perfect confi dence that the management announce the en-gagement of Mr. Eugene Boegner as concert gagement of Mr. Edgene Boegher as concert master. He is a spiendid violin player, whose training from boyhoed up, in the routhe of a true school of playing (being one of the most gifted pupils of the celebrated Joachim), evables him now, with the energy of a young man, to display most brilliant qualities, and earn for himself and the other new laurely.

The balance of the Fechheimer, Goodkind & Co. stock, which our buyer recently purchased in New York, has arrived, been assorted, marked and placed on sale in our Men's Clothing Department, where the whole immense stock is now ready for your inspection in all its entirety. This is without doubt the finest assortment of Strictly Fine Suits. every shown by any one firm in the west, comprising as it does all the popular fabrics in almost every conceivable shade, color and pattern. Particular attention is directed to the cut, style, shape and fit of these garments, which no Tailor in the land can excel, and which gained for the manufacturers a reputation for making fine clot1 ng which extended from one end of the United States to the other. We have selected from this grand assortment an immense quantity of the very Finest Suits which we have assorted into two separate and distinct lots, which represent more style, tone, service and actual value than any clothing concern in this country ever gave before.

AT \$14.

We give you your choice of several hundred very fine Suits in both Sacks and Cutaways, in all the popular fabrics, in all sorts of shades and colors, in about thirty choice styles. These suits are worth fully twenty dollars of any man's money, and are sold for that price all over the country (occasionally you'll see a \$22 card on them).

AT \$18. We give you your choice of several hundred as fine suits as any Tailor in this country can make. They've got the materials in them. They're made right. They're correct in style and coloring, and unless you're a "freak" no "suit to order" can be gotten up that will fit you any better. The "ready made" price is usually twenty eight dol-

lars and the "custom" price forty.

In order that our Furnishing Goods men may not get "lost in the shuffle," we will offer until they're gone 100 dozen ELEGANT SILK SUSPENDERS, actual value \$1.00, at.....

DIDN'T CARE MUCH TO WORK.

"And the democrats!" Editor Munford smued an old-fashioned Jacksonian smile as he replied: "Down in Missourl the democrats stick pretty closely to the party. We're what you call 'mossto the party. We're what you call 'moss-backs.' We didn't chase after new parties and new theories very much."

The farmers alliance is also fighting shy of the coldwater fad," suid Editor Munford. "They are confining themselves to the light for the legislation in the interest of the farm ing class and are avoiding all entangling alliances. At present, however, there is a serious split among them, one faction favor-ing a separate party organization and the other opposing it. In Kansas they were well organized and had nominees in the field at all the county elections."

Lady Aberdeen's Work in Ireland.

Horace Plunkett, member of the Congested District's board recently appointed by Lord Salisbury, is entirely wrapped up in the work of assisting the Irish people. He is also a member of the Cottage Industries as-sociation of which Lady Aberdeen is president, and while at the Richelieu on his way home, and while at the Richelled on his way home, spoke of the work that she is doing. Lady Aberdeen is now in Canada but ex-pects to visit Chicago shortly in the interest of the Irish exhibit, which her association intends to make during the World's fair.

Intends to make during the World's fair. "The Cottage Industries association," said Mr. Plunket, "has been in existence for six years, but it was reorganized a couple of years ago and its work is now being carried on with new vigor. Its purpose is to find a market for the woolen and lace goods made by the Irish and systematize their labors. There has always been a good deal of lace made by the nonew classes in Iraland but made by the poorer classes in Ireland, but this is the first organized effort to secure cooperation. We are finding a permanent market and obtaining uniform prices for the operation. goods. We have representatives who make personal visits to the cottages, enlist the nterest of the people in the movement and instruct them as to the best methods of manufacture and when necessary supply them with the raw material. They make lace, woolen underwear, neck scarfs and things of that sort. The interest and symthings of that sort. The interest and sym-pathy of many prominent people has been se-cured, and articles of Irish make, particu-larly lace goods, are becoming quite fash-ionable. Lady Zetland, wife of the lord lieutenant of Ireland, wore a dress of Irish lace at a recent ball at Dublin castle. We hape by our exhibit at the World's fair to attract much attention to Irish industries and find an extensive market for the goods and find an extensive market for the goods in the United States." DEAD IN THE BOTTOM OF A WELL.

Father and Son Overcome by Gas Lose Their Lives.

BLOOMINGTON, III., Nov. 4.-William Cox and son William, aged 50 and 23 years, of Wapella, eighteen miles south of here, yesterday attempted to make deeper an old well. The son went down into the well, but finding a large quantity of gas which oppressed his lungs, he started for the top, climbing a rope. When ten feet from the bottom he jost sensi-blity and fell back into four feet of water. His father went down into the well, being let down in a bucket. When near the bottom Mr. Cox fell out of the bucket unconscious and both he and his son lay dead at the bot-tom of the well. Their bodies are still in the well, no one having yet dared to go down after them.

BRAZILIAN REVOLUTIONS.

Rio de Janeiro Placed Under Martial Law.

LONDON, Nov. 4 .- A dispatch received here from Rio Janeiro, Brazil, brings the news of what seems to be another revolution. Congress, the dispatch says, has been dis-solved and martial law proclaimed at Rio Janiero and throughout the province, The cablegram also announced that a dic-tatorship has been established in Brazil.

WASHINGTON, Nov. 4.—The reported revo-intionary movement in Brazil, accompanied by a declaration of martial law and the establishment of a dictatorship, is likely to cause another demand upon the already strained resources of the navy, for it is re-garded as necessary for the protection of American interests that a United States naval force be at hand there in case of a

formidable outbreak. The only vessels regularly attached to the South Atlantic station now in the vicinity of Rio Janeiro are the Essex and the Tallepoosa. The first is an old wooden cruiser and the second is worn out, unserviceable and offered for sale. The Boston is somewhere off the Brazilian coast enroute to the Pacific but it is not probable that she will be detained. The Yorktown, however, was at Bahia, Brazil. Saturday, and she will probably be ordered by cable to remain there or return to Santos, notwithstanding the fact that she is also on her way to the Pacific station. Meanwhile the work of repair on the Newark at Boston

Admiral Gherardi'a flag ship, the Philadel-phia, now on her way to the West Indies from New York, could be ordered by cable to proceed to Rio De Janeiro.
