

GOES TO MINNEAPOLIS

Next President of the United States Will Be Named in Minnesota.

ONLY SEVEN BALLOTS WERE NEEDED.

Flour City Led the Procession From Start to Finish Easily.

OMAHA'S FRIENDS STOOD BY HER.

Opposition Which Could Not Be Overcome Defeated This City.

HOW THE QUESTION WAS SETTLED.

Eloquent Orators Discuss the Peculiar Advantages of the Several Aspiring Cities—Colonel Scott's Defense of Omaha

WASHINGTON, D. C., Nov. 23.—The first formal ballot resulted: New York, 9; Chicago, 4; Omaha, 5; Minneapolis, 13; Cincinnati, 8; San Francisco, 5; Detroit, 1; Pittsburgh, 2; St. Louis, 1; Chattanooga, 4.

First formal ballot—New York, 10; Chicago, 9; Omaha, 3; Minneapolis, 14; Cincinnati, 8; San Francisco, 5; Detroit, 1; Pittsburgh, 1; Chattanooga, 4.

Second formal ballot—New York, 11; Omaha, 4; Minneapolis, 13; Cincinnati, 12; San Francisco, 2.

Fifth ballot—Omaha, 3; Detroit, 9; Minneapolis, 17; Cincinnati, 15; New York, 7; Chicago, 9; St. Louis, 6; San Francisco, 5; Chattanooga, 6; Pittsburgh, 6.

Sixth ballot—Omaha, 4; Minneapolis, 20; Cincinnati, 15; New York, 5; San Francisco, 3.

Seventh ballot—Minneapolis, 20; Cincinnati, 15; New York, 3.

The date for the convention is June 7.

Called to Order.

The national committee was called together by Acting Chairman Clarkson and the roll was called. It appeared that every state and territory was represented, either directly or indirectly, excepting the Mexican possessions.

Mr. Ryerson, was detained on the railway. The first business after roll call was the acceptance of the resignation of Chairman Quay and Treasurer Dudley.

The resolutions of commendation, which were adopted by the executive committee last summer, when no resolutions were presented, were laid before the committee and unanimously adopted.

Mr. Flyn, of Oklahoma, presented his nomination. These were approved and Mr. Flyn assumed, thus increasing the membership of the committee to 12.

Harmony Prevailed.

For calm and fair discussion the addresses made in behalf of Minneapolis compared favorably with those of Mr. Fassett's address in behalf of New York.

Mr. Garrison A. Hottel of New Jersey was elected vice chairman of the committee, and after deciding to allow an hour to representatives of each city contending for the honor of the meeting place of the republican national convention, the doors were opened at 12:40 and the representatives of the press were admitted.

Presenting Their Claims.

The first business done in the open session was to call the states in alphabetical order, and ask for the presentation of the claims of cities aspiring to the honor of entertaining the republican national convention.

The first state to answer was California. Mr. DeYoung introduced as the spokesman of San Francisco Congressman McKenna, who addressed the committee.

"The city of San Francisco," he said, "will be found to have claims worthy of consideration, regarding not only the commercial resources of the nation, but regarding the interests of the republican party." He could review the advantages of San Francisco by reviewing the objections urged or entertained against them. It was said that the city of San Francisco was too far away. The distance was objectionable.

"That argument had not much foundation and led to some strange suggestions. The splendid size of the country seemed to be getting inconvenient to the politicians. To be away from home had not heretofore been considered one of their conspicuous characteristics."

"If occurrence of such a disaster were to prevail, other places besides San Francisco were objectionable. Six days would be the extreme amount of time that would be consumed in travel between San Francisco and any other city. Was that consumption of time a consideration? Yes, if the days be wasteful days; no, if they be workaday days."

"The travel would be the means of exciting, arousing and instructing the country. It would be a splendid opportunity, because he sincerely believed that the political party which broke away from the dry ash dust of conservatism, of doing a thing because it

DESTRUCTION'S REIGN

Japan Visited by One of the Most Terrible Earthquakes in Its History.

FEARFUL RESULTS OF THE AWFUL SHOCKS.

Death Beneath the Falling Walls of Ruined Buildings.

FIRE'S TERROR ADDED TO THE SCENE.

Pinned Down by Fallen Timbers: the People Become a Prey to the Flames.

THOUSANDS OF PEOPLE ARE HOMELESS.

Whole Towns Destroyed and Their Buildings Piled in Ruined Heaps—Monument to the Earthquake's Power—Details of Disaster.

YOKOHAMA, Japan, Nov. 23.—A severe and prolonged shock of earthquake occurred on the morning of October 28. The greatest damage to buildings and loss of life occurred in the prefectures of Aichi and Gifu, in which nearly 4,000 people were killed outright and the same number seriously wounded. In those two prefectures 42,000 houses were totally destroyed.

The number of provinces throughout which the disturbances were felt is thirty-one. Two hundred thousand people were rendered homeless. Up to November 5, the earthquakes still continued to be felt, but the intervals between them gradually increased and the intensity of the shocks diminished. From the commencement of the disturbances until up to that date it is estimated that 6,000 shocks occurred.

Where the Greatest Damage was Done

The town of Gifu, on the Tokaido railway, with a population of 15,000, was almost entirely destroyed. Thirty-five hundred out of a total of 4,000 houses in the town were overturned or burned and 747 people were killed.

In the town of Okazaki 3,500 houses were overturned, 2,000 houses burned and 700 people crushed to death and 1,300 injured.

In the town of Tokonama nearly 600 houses were overturned and a like number burned and 100 people killed.

In the town of Kitayama nearly 800 people were killed.

The entire village of Entakomai was destroyed and eighty people killed.

These towns are all in the provinces of Aichi and Gifu, and are situated in the center of the country. In some parts of the town boiling mud spouted out of fissures to a height of ten feet. A majority of these fissures continued opening for over two hours.

At Osaka, which also suffered greatly, the earthquake caused the Denko tower to be reported as having collapsed and over twenty-five were killed and wounded.

The total sum of money distributed for the relief of sufferers up to November 4 was \$1,000,000. The emperor and empress made a donation of about \$25,000 from their private purse.

The condition of the devastated sections is such that a large number of inhabitants have left their homes to obtain work elsewhere. Further, the condition of the roads is such that the movement of goods is almost impossible.

The inhabitants of ruined towns described the shocks as conveying an impression that the houses were directly struck by a hammer. The shock was felt for two to three feet. The fact that there was a marked subsidence of the earth's surface for a considerable area about Gifu, and that the latter town was the center of the disturbance.

Shortly after the shock had leveled thousands of houses in the town, and hundreds of people were lying buried in the debris, flames burst from the ruins of a silk factory in Gifu, and in a short time the fire had spread to such an extent that the citizens were compelled to desert in their work of digging out the bodies and trying to save what remained. In some cases the fire had already broken out in one direction, but three others immediately broke out, and joining later on, swept over the streets, fanned by a strong west wind, and in a few minutes the town of Gifu was wrapped in fire.

The inhabitants of the town, who were staying the night, saved what few articles they were able to and fled to the town, taking refuge in the woods. The police, aided by the national guard, were prisoners from the jail, fought the fire throughout the night, but it was not subdued until the morning of the 29th.

Over 100,000 people were killed, and almost the whole town had been burned over.

IN THE STORM'S PATH.

Death and Wricks Mark Its Course Through the Country.

HIGH WINDS AND CYCLONES PREVAIL.

Damage to the White House by the Furious Winds.

DREADFUL DEEDS OF DESTRUCTION.

Tales from Cities and Towns Visited by the Storm.

TELEGRAPH WIRES IN AN AWFUL TANGLE.

Every Moveable Object Made Playthings by the Gleeeful Gales—Washington, D. C., Damaged by the Storm.

New York, Nov. 23.—The storm of today, which has been so remarkable in its varied characteristics, so disastrous in its effects and far reaching in the area of its sweep, will be recorded, especially in the log books of the telegraph and telephone companies, as at once having equaled if not exceeded the utter paralysis wrought by the great blizzard of 1888. In truth, this has been a storm king's carnival and, as the sequel may prove, in many instances, the carnival of death.

Already from numerous points come reports of damage, destruction and death, and when a cessation of the warring elements permits of a restoration of telegraphic communication with points at present inaccessible by the prostration of the wires, the extent to which the seemingly wild rumors will be borne out by actual facts is wholly conjecture.

Originating near southern Georgia or northern Florida this resistless wave of devastation swept northward and eastward, bearing down in its path the wires, snapping off like rods and telegraph poles, toppling over chimneys, tearing off roofs and crushing like playhouses of cardboard apparently substantial buildings. Bounding over the Alleghenies it fell upon Baltimore, Richmond, Washington and Philadelphia in turn, scattering through highway and byway memorials of its tremendous power. In this city early in the day wires south and southwest failed, often several at a time, until at last all communication outside of a comparatively small territory was cut off from us. Struggle as they would the most expert electricians could not, with all their ingenuity, devise means of getting over and around the trouble, even the routes via Montreal and Toronto having been rendered useless.

The storm seemed to divide itself into two tremendous arms, branching from a center in North Carolina, one arm bearing down on the coast, the other sweeping northward and westward, bearing down on the interior, describing a tremendous circle. Bearing down northward it passed successively over Lakes Ontario and Erie, and finally passed over the north, disappearing in Buffalo's bay.

Meager reports continue to be received of cyclones to the south and southwest. At Lawrence, Kansas, a cyclone passed over the same route some several years ago, which destroyed the towns of Beauclair and Weston. One person was killed and several wounded besides much damage. From eastern Ohio and western Pennsylvania reports are meager. Destruction of every description is reported, accounts of which can be obtained only from the storm subsidia. Sufficient to say, all is chaos. The damage will reach many thousands of dollars in all sections of the country visited by the storm.

The Associated press has made strenuous efforts to secure the distribution of dispatches, every wire to the west and southwest which seemed to promise an outlet being eagerly seized upon. Cable dispatches, news from Baltimore, New York and Washington were handled south through Baltimore, reaching Chicago by way of Atlanta, Chattanooga, Memphis and St. Louis, thence being distributed from Chicago to such points west of Pittsburg as happened to be fortunate enough to possess workable wires. The copper wires of their leased circuits were spliced in every direction with pony circuits and railroad wires; quadrupled circuits hobbled with single wires through repeaters, and the small caliber railroad operator at improvised relaying stations contrived his route in ingenuity in facilitating the transmission of dispatches, that our great morning dailies and the public might not go unversed.

PITTSBURG SUFFERS.

PITTSBURG, Pa., Nov. 23.—A storm of great violence swept over this city this morning, doing great damage and injuring several persons, one of them thought fatally. From all parts of Pittsburg and Allegheny come reports of damage by the storm. Houses were blown down and telegraph poles torn up and wires broken.

In the west end a building in course of erection was blown down, crushing a small dwelling and killing the occupant. The occupant, Mrs. Peobles, who was preparing dinner in the kitchen. She is probably fatally injured.

Numerous accidents from falling signs and flying bricks occurred, but as far as reported there were not any of a serious nature. The telephone and telegraph wires are prostrated all over the city and communication is cut off from all points. For three hours the streets were flooded by heavy rains.

The Allegheny river the Star Sand company's hoisting boat and engine, and Clark's hoisting boat and engine, were capsized and sunk. The crews escaped injury.

On account of the crippled condition of the telegraph service, the news from surrounding districts concerning the storm is meager. It is, however, that it was sovereignly all points east and west of us, and a great deal of damage was done, particularly along the railroads.

An official on the West Pennsylvania railroad the station house was lifted by the wind and carried quite a distance along the track. There were sixteen men in the station, who were all frightened, but not hurt.

Damage is reported along the line of the Baltimore & Ohio west of Conowingo. Trees and outbuildings are reported to have been blown down.

The coal tipple at Alsville is almost a complete wreck.

At New Brighton, Pa., on the Erie & Pittsburg railroad, a large tree was blown down at the intersection of Main and Harmon streets, where the telephone wires crossed the trolley wire of the Beaver Valley traction company. The tree fell upon the telephone wires and forced them down upon the electric light wire, which was carrying 600 volts. The result was startling. Harry Kwing, a farmer of Indio, townships,

remarkably well. Good temple, belonging to the Shin sect of Buddhists, was crowded with worshippers, it being the anniversary of the death of Shilin, founder of the sect. The rains took fire and the shrieking victims were consumed by the flames before the eyes of the horrified onlookers.

The town of Nagoya escaped lightly, in comparison with the region west of there, embracing Gifu, Ozaki and Kito. Slight damage was felt at Nagoya on the night of Saturday, October 23. On Wednesday morning forty Christians were in one of the buildings in the prefecture of Aichi and Gifu, when the sound of distant rumbling arose and the building began to totter the worshippers fled out doors. One Christian was killed and two others were seriously injured that they have since died. Of eight foreigners the husband of Mrs. Vaidyke, missionary, conducting the meeting, together with one other person, were dangerously hurt.

Terrible Thunder From Angry Earth.

Out of doors the city was in an uproar; the embankments of the river and the hills of the city, while every few moments came the terrible thunder from the angry earth. Many streets were blocked with fallen houses, and other objects were crushed with people rushing to and fro.

The chimney of the normal school was blown down, and the roof of the building presented the appearance of having been bombed. The upper story of the postoffice was ruined and the railway station was destroyed. The heavy three-story factory's large brick buildings crashed in, killing hundreds of people. The castle stood firm, but the galleys, the arsenal, the court and the court house of the military was wrecked. Fires started in several portions of the city, but were subdued. The loss of life in the city, which got make up the city of Nagoya is variously estimated at from 750 to 1,000.

Up to the morning of Friday, October 30, 38 distinct shocks were recorded as following the one of Wednesday.

As the wounded are brought into the city from the surrounding districts, reports continue to come from damaged cities.

Fissures opened two feet wide and several feet deep, railroad rails were twisted, iron bridges broken, rivers and streams swelled and crumpled and fields flooded.

A lake 600 yards long and 60 yards wide opened up, and the water poured into the Gifu prefecture; big rocks beside the Gengen hill, Inaba hill and several other hills in Gifu gave way and water sprang from cracks in the ground. The water was changed to a brownish color and rendered unfit for drinking.

The embankments of the Nagara, Kiso, Shouai, Goto and Niki rivers were broken, and it is expected that one-half of 300 miles of embankments surrounding Gifu will have to be repaired.

Terrible Power of the Earthquake.

The general appearance of the Mitsuha division of the Motosu district underwent a complete transformation, and at Nozo, in one district, a marked subsidence of the earth's surface was observed through an area of two and one-half miles in diameter.

The bed of the river Nozo, in the vicinity of Mitsuha, was raised about 30 feet. The rumbling from mountains in that vicinity was heard at frequent intervals.

Over 100,000 people were killed, and almost the whole town had been burned over.

Over 100,000 people were killed, and almost the whole town had been burned over.

Over 100,000 people were killed, and almost the whole town had been burned over.

REVENUE MARINE

Annual Report of Captain Shepard of the Service.

WASHINGTON, D. C., Nov. 23.—Captain Shepard, chief of the revenue marine division, in his annual report to the secretary of treasury, says that the thirty-six vessels in command during the year ended August 31, 1900, were 31,000 miles and boarded 35,992 vessels, of which 1,642 were found violating the law. The fines incurred by these violators amounted to \$254,000.

One hundred and twenty-three distressed vessels were assisted, their values, with cargoes, aggregating \$1,800,000. The revenue cutters were also found to have rendered service to the life saving service during the year and rescued from drowning twenty-six persons.

Captain Shepard says that during the past year the work of the service embraced operations of more than ordinary importance in several instances, many of which have been of great interest to the public and require special mention. At such duty has been special in character and distinct from the routine of the service, and the prompt and effective manner in which it was performed reflect credit to the credit of both the officers and crews.

Captain Shepard detailed the work of the various cutters during the year, and especially those working in Bering sea.

He recommends that the proclamation prohibiting the sale to the public of arms and breech loading arms and fixed ammunition be rescinded, as the very lives of those people are endangered by the possession of such arms and their present unreliable weapons are becoming of little use now that the war has become not only very shy, but are becoming obsolete.

The present condition of the service, which is so generally discredited, is due to the fact that the revenue cutters are not being properly maintained. The rapid increase in the number of the service, owing to the additional service demanded from the revenue cutter fleet in protecting government interests in Alaska, demand new and more efficient vessels. The present condition of the service is little short of stagnation. Owing to the grades being blocked by so many old officers promotion comes only through occasional vacancies in the service. The present duty performed by officers of the revenue marine is the most arduous, perhaps, of any service attached under the government.

AGAINST THE HOWELLS.

Heavy Judgment in Favor of the Delect Company's Creditors.

ATCHISON, Kan., Nov. 23.—[Special Telegram to The Bee.]—In the Atchison county district court today there were rendered judgments for amounts aggregating \$95,000 in the case against Howell, Jewett & Co., the lumber dealers who failed here last summer. The firm is now trying to settle for 25 cents on the dollar.

REPUBLICANISM AGAIN TRIUMPHANT.

Imperialism Repudiated the Second Time by the Sturdy South Americans.

GREAT EXCITEMENT IN THE CITY.

Rio Very Much Worked Up Over the Turn Affairs Have Taken—No Bad Outbreaks Have Occurred.

LOSDON, Nov. 23.—Intelligence was received here this morning that a revolution broke out in Rio de Janeiro today, the object being the overthrow of Fonseca.

A later dispatch from Rio de Janeiro says that Fonseca resigned in favor of Floriano Peixoto.

LOSDON, Nov. 23.—Dispatches from Rio Janeiro this afternoon bring the intelligence that the opposition to Dictator Fonseca has gathered sufficient force to break through the barriers erected by the government to hold it in check, and to make itself master of the situation. No details have yet been received as to the precise methods adopted. All that is known is that the uprising was so formidable that Fonseca decided that it was impossible to longer maintain his ascendancy and surrender his authority. In resigning, he declared that he did so in favor of Floriano Peixoto, the vice president or chief of the provisional government. The exchangers are closed and everybody is so interested in watching political developments that no thought is given to commercial pursuits or business elements. The news that Fonseca had resigned spread through the city like wildfire. Everybody was in a state of great excitement, but no reports have come as yet indicating much of a riot or disturbance. The uprising, however, had the effect of putting a stop, for the time being, to all kinds of business. The uprising, however, had the effect of putting a stop, for the time being, to all kinds of business. The exchangers are closed and everybody is so interested in watching political developments that no thought is given to commercial pursuits or business elements. The news that Fonseca had resigned spread through the city like wildfire. Everybody was in a state of great excitement, but no reports have come as yet indicating much of a riot or disturbance.
