

THE CONDITION OF TRADE.

Not Much Change in the Condition of the Markets. LOCAL COLLECTIONS NONE TOO GOOD.

The Jobbing Business of Omaha in a Most Satisfactory Condition, With Good Prospects for Spring and Winter Trade.

Conditions prevailing in local trade circles have shown little or no change the past week. The retail trade in some lines is quite good, as noted a week ago, while in others which are not so much affected by the near approach of winter remain about stationary.

Complaints of slow collections are still heard in the city. Consumers do not appear inclined to buy very freely, but only as their immediate requirements demand.

The jobbing trade is first class in most every line. In a good many lines houses are rushed to fill orders. This is a most gratifying condition of affairs for the jobbers and is of no small moment to the city.

The prospects in this branch of business are certainly very flattering and give promise of things being a better trade all through the winter and spring.

While some sections of the country have been buying quite freely they will all require more goods as the farmers dispose of their corn and lay in their winter supplies of food.

The damp weather of the past week was not all beneficial to the farmers who are trying to get their corn dried out sufficiently to put it on the market. Cold and freezing weather would have been a decided advantage to stimulate the movement of corn and likewise help business.

The Omaha grain market has been fairly active during the week, although there were no special features of interest. Sales on some days were very large, and the daily transactions averaged well for a new market.

In New York, says the Bulletin, there does not appear to be much, if any, change in the situation in hardware, according to current reports. From some sources it is said that the demand for hardware is increasing, and that it may be a little better than it has been for some time.

In dry goods, says the same authority, the market has undergone a change for the better. There has been remarked more and more an increased interest extended by purchasers than in any radical demand for merchandise or changes in prices.

Receipts and Disposition of Stock. Official receipts and disposition of stock as shown by the books of the Union Stock Yards company, for the twenty-four hours, ending at 6 o'clock p. m., November 28, 1901.

THE SPECULATIVE MARKETS.

Limited Operations in Wheat With a Weakening Tendency. SLIGHT REACTION OF THE RECESSION.

Squeeze for November Corn Gradually Subsiding, Stocks Having Generally Covered—Activity in Stocks and Bonds.

Chicago, Ill., Nov. 28.—The wheat market made a little show of strength early in the week, but it was quickly checked by the short interest, and the market has since been in the northwest and threatening weather in the winter wheat region.

At the same time, the market has been heavily bought by speculators, who have been buying to unload their purchases in the market. Partridge and Cudahy, who had been good buyers early in the week, were particularly conspicuous.

PAKING HOME INDUSTRY. What the Cracker Factory Are Doing for Omaha. SELLING ON HA YEAST IN THE EAST.

The Manufacturers and Consumers Association Prepare a Most Interesting Program for Wednesday Evening at the Grand.

The members of the Manufacturers and Consumers association are making great preparations for their entertainment to be given at the Grand opera house on Wednesday evening of this week.

The cracker factories of Omaha constitute one of the most important industries of the city. There are two of them. The National Cracker Company, 713-717 South Ninth street, and the American Biscuit and Manufacturing company, at Twelfth and Jackson streets, with a bread bakery at Thirteenth and Mason streets.

These two factories employ 180 people, a good many of them girls and boys, and pay out in wages \$75,000 per year.

This is not all that the cracker factories are doing for Omaha. They are contributing to the support of the box factories, tin factories, printing houses, etc.

Omaha Reaching Eastward. A brief mention was made in these columns a few days ago of the fact that the cracker factories in Omaha, that is, the manufacturer of compressed yeast by the Omaha Compressed Yeast company.

It is not all that the cracker factories are doing for Omaha. They are contributing to the support of the box factories, tin factories, printing houses, etc.
