# DUN'S REVIEW OF THE WEEK.

Collections Fairly Good and Holiday Business Very Active.

SEASONABLE TRADE UNUSUALLY LARGE.

### With the Exception of a Few Southern Citics Favorable Reports Come from All the Budness Centers-On Wall Street.

NEW YORR, Dec. 24. -R. G. Dun & Co.'s weekly review of trade says: Holiday trade Is not always a just measure of the prosperity of the people, but it is satisfactory to know that at most points it is unusually large this year, though some localities report that it is less than last year. General trade this season is usually light, merchants being engaged in taking stock, but at many points it is reported larger than usual, and even larger than last year. Reports show less complaint as to collections and a large trade is in progress.

At Pittsburg trade is unusually good in all lines, with iron and steel manufactur ers more hopeful and the glass trade fairly good.

At Cleveland the wholesale trade is good, though the shoe trade is dull, but the holiday business is brisk, exceeding last year's work At Chicago sales and collections of mer-chandise exceed last year's in spite of soft country roads, and the holiday trade is phenomenal. Receipts of wheat, corn and rye are double last year's, of dressed beef three times last year's, the increase in flour is a third, in cured meats a quarter, and in oats, barley and cattle large, notwithstanding the complaints of the car famine throughout the west. Money is easy and demand good.

At Milwaukee open weather and bad roads retard trade, but the holiday business ex-seeds last year's though the traders in country towns are suffering. At St. Louis mild weather also checks

trade, but holiday business is very large and trade, out honnay business is very intro and trade in clothing, shoes and other seasonable goods above the average, and money is easier. At Kansas City holiday trade is brisk; though the blockade affects the receipts of

cattle and grain, trade is fairly healthy. At St. Paul in spite of unseasonable weather, the jobbing trade is good and retail

trade is active, and at Minneapolis the cut of lumber for the year is 450,000,000 feet, the output of flour for the week, 201,000 barrels against 139,000 for the corresponding week of last year, and the general feeling is one of confidence

At Omata trade is good though money is close.

Southern cities report less cheerfully, the low price of cotton causing duliness at Memphis and Galveston and also at Savannah, But at New Orleans business is more active and larger in volume, though cotton receipts are heavy and sugar is fairly active,

with money in strong demand, The great industries close the year with more than usual activity, even the woolen mills having orders enough to keep them fairly employed, and a number have recently

started, but none shut down. Cotton manufacturers find a good demand and numerous enlargements of plants are re-ported. Shoe factorias complain that usual orders are lacking, and yet they are fairly active. Paper mills are busy and making many additions of machinery and buildings. The iron manufacturers have been turning out more pig than ever before, though some works stop for the holidays, and the tone of the market is stronger, with rather more demand for finished products. Speculation continues moderate, wheat

having risen 12 cent with sales of 13,000,000 bushels, corn having declided 1 cent and oats a fraction. Coffee is unchanged, oil 1/2 to 1 cent higher and pork unchanged. Cotton has dropped a sixteenth below 8 cents, with receipts from plantations exceeding last year's to date by 556,000 bales. The very large out-put of coal leads operators to expect lower

The business failures occurring through-out the country during the last six days number 292 as compared with 335 last week. For the corresponding week of last year the

tured, it would have been fatal. Dr. Waiker called Drs. McBurney and Weir into consultation. Dr. McBurney in-sisted that an immediate operation was necessary, and to this his two colleagues McBurney performed the operation,' said Dr. Walker last evening. "An incision six inches long was made. The operation was highly successful. I have rarely seen a patient undergo a capital operation with as much fortitude as Mr. Gage manifested. It was really remarkable when one remembers that all three of the attenuing physicians were total strangers to him, and he gnew that his life was in their bands. "Yes, Mr. Gage's life would have been

come general, which was only a matter of a few hours, or had the appendix become rup-

worth little had the operation been delayed twelve hours. The whole vermiform appen dix would have been gangrenous and septic peritonitis would have resulted."

## COOLEY'S OFFICE.

Colonel Paxton Wants a Court to Oust the Jedge.

The attraction in the county court yesterday afternoon was the case of W. A. Paxton against Jedge Julius S. Cooley, which was brought to dispossess the latter of his office n the Paxton block.

It seems that Cooley induced one Aisch to case the rooms for a year, and then he subleased them from Aisch. The latter remained about three weeks and then disappeared, leaving the histrionic lawyer in full possession. When the agent tried to collect the second month's rent he was confronted by looley with a receipt from Aisch statung that the amateur tragedian had paid him a year's

cont Of course Cooley insisted that he had paid he rent for a full twelvemonth, and that he was entitled to a year's possession without any further contribution, whether Alsch showed up again or not. He could give no information as to Aisch's whereabouts, nor as to his future movements. This was not satisfactory to Mr. Paxton, hence the suit. The story with all its variations was poured nto the ears of a jury.

SUBSCRIBERS MUST PAY UP. World's Fair Managers Take Some Very Decided Steps.

# SERVING WRITS OF ATTACHMENT.

### Vigorous Policy Made Necessary by Lurge Demands of Contractors at Jackson Park-Interesting Garden City Gossip.

# CHICAGO BURRAU OF THE BER.

CHICAGO, III., Dec. 24. It will be a sorry Christmas for many deinquent subscripers to the World's fair stock. Nearly 200 executions have been put in the hands of constables with instructions to levy on the property of those who have not paid up. The constables were told to serve writs of attachment at once and accept no explanations or promises from the deliuquents. This vigorous policy is made necessary by the large demands on Treasurer Seeberger by the contractors at Jackson park. The funds of the World's fair are lower now than they have been at any time since the first assessment was ordered Treasurer Seeberger has less than \$700,000 to the credit of the exposition in the banks of Chicago, and funds are pour-

### Change in the Program.

The ceremonies committee has made an im portant change in the program for the dedi-cation of the world's fair buildings in Octo per, 1892. It has decided that the entire program should be given in three days instead of four.

"The meaning of this," said Colonel Dickinson, "is that the exercises will be made more attractive than they could possibly more attractive than they could possibly have been made had we adhered to the four-day program. None of the great features will be omitted, and we will simply crowd into three days what we expected to do in four."

# Lots of Electric Lights.

Within a few weeks Chief Burnham wil call for bids for all the electric lighting plants at Jackson park. Specifications are now being prepared for the system. "When he plant is complete at Jackson park," said Electrical Engineer Sargent, "we will have nore than twice as many electric lights on the ground as are now used in the city of Chicago for all purposes. It will be by all olds the largest plant in the world. We will have 7,000 electric horse power for arc lights, 12,000 horse power for incandescent lights, and 3,000 horse power for all kinds of motors that exhibitors expect to install.

### Railway Building of the Year.

The forthcoming issue of the Railway Age and Northwestern Railroader will contain a statistical review of the railway construction during 1891. According to the figures given, new track has been laid in forty-three states and territories on 249 lines and branches to an aggregate of 4,163 miles. This increases the railway system of the United States to 171,000 miles. The only portion of the coun-try in which no new track was laid this year are the states of Delaware, Connecticut, Nevada and Mississippi, the last named snow ing in strong contrast to the other southern states. The activity has been notable. The states which added the greatest average are Pennsylvania, Georgia, Washington, South Carolina, New York, Montana, Virginia and West Virginia.

### Repulsed His Advances.

Ida Rutzen, the pretty 17-year-old daughter of a farmer at Libertyville, north of this city, was fatally shot yesterday by Tom Dawson, who immediately after killed himself. Dawson was a deserter from the army and was employed by the girl's father as a farm hand The tragedy occurred in a barn where Ida had gone to look after a sick dog. Dawson attempted to turn her caresses to himself and meeting with poor success, drew a revolver, fired three buildts into the girl's head and breast and then killed himself.

### WALL STREET REVIEW.

Speculation Has Received an Impetus -The Market Active and Stronger.

NEW YORK, Dec. 24 .- Bradstreet's weekly Wall street review says: The past week has witnessed a further progress toward the realization of that broad and active speculation which for some time past Wall street has confidently expected, and it may still be said that the buying is targely professional and that the public has scarcely begun to take an active interest. At the same time the, steady advance of bond quotations and the remarkably neavy trading in that quar-ter could scarcely have developed without the assistance of the investing public, while in the strong upward movement of stocks and the greatly augmented vol-ume and well distributed character of the transactions, there is ample evidence that outside participation is already growing npace. It is noticeable that foreign interests, though not inclined to take an active part until after the holidays, have been favorably impressed by the conditions which prevail here, and have bought moderately, but stead ily. At the same time, the general condi-tions on which the bullish inclinations are based continue to exert a sustaining influ ence. The exceptional traffic movement, the phenomenal character of current railroad earnings and the ease of the money market are all powerful levers for speculative im-provement. Moreover, one of the important developments of the week was a rapid decline of exchange rates to an extent which renders it probable that gold imports from Europe will again set in on a large scale. Not were signs wanting that the speculative forces which are actively engaged on the bull side are constantly receiving reinforcements. The most significant event in this connection was the marked advance in the Gould stocks, headed by Missouri Pacific, which could only be interpreted as meaning that the interest be interpreted as meaning that the interest which controls that property is no longer even passively opposed to the general specu-lative inclination. At the same time, some stocks, notably Northern Pacific preferred, which have been under pressure recovered ground, while Richmond Terminal had a sharp recovery and many of the generation sharp recovery and many of the grangers and other leading speculatives attained the highest figures they have seen in 1891. So strong is the current that on Wednesday and Thursday the prospect of the market being closed until Monday produced comparatively few realizing sales, and the market was strong and ading sales, and the market was strong and ad-vancing up to the close. One of the princi-pal happenings of the week did not, how-ever, coincide with bullish predictions. When the Lake Shore only maintained its 6 per cent rate for the year and Michigan Cen-tral and Canada Southern increased their dividends by only one-half of 1 per cent each, something of a chill was given to the market more emechalizes the colon was recach, something of a carbon was grided to the to market, more especially as the action was re-garded as fatal to any exaggerated increase in the dividend on New York Central. At the same time the decline in Vanderbilt shares was slight, Canada Southera being the only one to show a decided slump.
