FOLLOWING AFTER TENNYSON. Rev. T. E. Cramblet Preaches That it is Only Noble to Be Good.

ON "CASH K" AND HIS OUIET CHARITY.

Rev. Dr. Harsha Dwells on the Unostentatious Giving of Alms-Rev. S. E. Wilcox on Infant Baptism-Dr. Mackay on Masonry.

At the First Christian church last night Rev. T. E. Cramblet took his text from Matthew iii, 9: "Think not to say within your selves, We have Abraham to our father," and spoke in substance as follows:

Descended as the Jews were from Abraham, they thought themselves safe from Messianic wrath and in little need of repent ance. They were confident that, being chil dren of Abraham, they were sure of citizenship in the coming kingdem. One rabit taught, "In the age to come Abraham sits beside the gates of heil, and suffers no circumcised Israelito to go down." No principle was more fully established in the popular conviction than that all Israel had part in the world to come, and this specifically because of their connection with Abraham. Our text is suggestive of our line of thought for the evening.

America has many ideals of aristocracy and these have become veritable gods in the land. Things have come to that state where it may be said that every man has his ideal aristocrat, and that with more or less persistence he is striving to work out its realing ation. This ideal is his ided. He worships it with genuine devotion. Upon this altar he pours out his choicest oblactons.

Proud of Their Lineage,

First. There is the aristocracy of blood; hose who think to say within themselves, those who think to say within themselves, "We have a count, or a lord, or a governor for our father." By virtue of this descent rights are claimed and often graoted, which have never been carned, and which in no way are deserved. I have no fault to find with the man who has the comfort of knowing that his ancestors were honorable, in church and state, but, on the other nand, I feel rather inclined to bestow honor in expecting deeds worthy of such noble ancestry. But when, as too often occurs, such persons allow the fact of honorable birth to keep them from genuine usefulness, they deserve the con-demnation of honest endeavors. The senti-ment that men of noble families should be lowed licenses denied to others is injurious o society and a hindrauce to bonest effort. Edward M. Field, a thief, is no less a thief because of the eminent family from which he comes. Being the son of England's nobie queen does not lessen the guilt of the prince of Wales. He is still a gambler and a liber-tine of the basest sort. The beggar in the street might well refuse, as alms, the char-acters of such men. No fortune of birth is sufficient excuse for the ab-sence of moral character; it but serves to increase the measure of responsibility, for where much is given much is re-quired. In some circles on this side of the a, when a stranger is introduced, the first inquiry is not as to his character or worth, but "who was his grandfather?" The majority of American women have independ ence and good sense, and yet the number who are ready to sacrifice everything to marry some foreign noddy, without brain, character or worth, solely because he is a count or lord, is shamefully large. There are too many of those like the ancient Jews; they are so wall satisfied with their descent Abraham that they do not think it tual to be born again. Their pride of essential to be born again. birth compels them into fatal error. Char-acter and soul life must be sought. Ye must be born again.

Man May Know Too Little.

Again, there is the aristocracy of learning; those who have no honor for the children of better men; who care little for character and spirituality. Introduced into this comthe inquiry is made, "What does he pany, not understand me to disparage in the least the value of learning; on the other hand with burning words I would emphasize both its desirability and its importance. Mv ought here is that a serious error is con mitted when all care is given to the mind and none to the heart and life. It is true that a man may know all about the rocks and that his heart may be as hard as the oldest of them; he may be able to measure all distances and yet his heart be farther from God than the most distant heaven! body is from the sun; he may understand all philosophy and all science and know little of salvation and care even less. Like the philosophers of Athens, there are those today who have leisure for nothing else but to tell and to hear some new thing. This is the worship that supplants the worship that makes the symmetrical man. To such the preaching of the cross is foolishness.

command is plain-repent, believe, be bap-Paul asked of Mr. Dombey: 'Papa, what is money?' And the embarrassed man replied: 'It is an pounds and shillings and pence.' 'But what can it do?' persisted the little ouestioner. 'It can do-why, anything.' And that is quite true. Money can do anything, good or bad. I suppose you would be equally puzzied if you were asked to answer the question, 'What is churitr' and when pressed you might say. 'It can do anything.' This is measurably correct. It can do a great deal of good, and it can accomplish a

vest amount of harm. I wish Mr. Cush K. could have been of the origin of Masonry, cutshie of the com-monly received traditions of the order, we shall find a natural cause for its appearance. "First, In the failure of the church of Christ to carry out the ideas of brotherhood with melast winter when his generous gift enabled me to relieve suffering and satisfy hunger and restore the afflicted to health and fraternity proclaimed by Jesus Christ, its founder Second. Some have mentioned persecutions of all the thinkers and reform-"Were there up other reasons these alone to me a very wealthy man of the city, who is generally considered rather close and hard would be sufficient to account for the growth and spread of this order. We might express the cause of the origin and growth of Masoury fisted. But he may be the man, for often those who do their alms in secret are regarded by the world as niggardly. "The Mason stands at the portais of the

gent charity. Three elements enter into a right exercise "Three elements enter into a right exercise of this grace. They are compassion, unos-tentation and appreciation. The first has been sung of in all ages of the church and illustrated in such characters as St. Cathar-ine, St. Hubert, St. Gregory, Elizabeth Fry, Florence Nightingale and a bost of others. The second element, unostentation, is very great iodgo of the universe as an humble learner. He approaches the great secrets of God in the attitude that Jesus humself de scribes as the only one possible-that of a little child. His constant prayer on bender knee is for more light, and the true Mason is he who never resting satisfied with what he has already received, presses with unwearied Important. In the text the Saviour snys that we should be so modest about our gifts that tion, which terminate only in the presence of our left hand shall not know what our right band is doing. The calendars of the saints contain many names of persons in whom this it partakes of the spirit of Jesus Christ, and if the church of Christ would take a tesson trait is noticeable. The third element I have called appreciation. I mean by that a wise understandidg of human nature, a true view ting between the soul of mar. and his God, useless confessions of faith, and bewildering of need and an anxious care that only the actually suffering shall be relieved. Dr. Goldsmith was a line example of this. Being sent for to prescribe for some patient, he found that the poor man was sick simply because of his poverty and discouragement, and he sent to him ten guineas, telling him it would not have to lament today such a widespread defection of thinking men from its ranks. "Now what relation does Masonry hold to the church of Christ! Precisely the same to take "one of these pills as often as occarelation to the church of Christ, i. e., the universal body of all believers, that the sion arose." Of course the man was soon well.

A few days ago Billy possessed himself of the idea that he who works for a livelihood is a full grown blooming idiot. Work was too hard and money too scarce. How to get around this was a vexing question. But after much and earnest cogitation he conceived an idea that has already ruined thous ands of men and sent hundreds of them to the penitentiary. He had read of how "green goods" men had made fortunes and made places for themselves in state prisons. But with all this staring him in the face h thought he would try it. As yet he is not in the penitentiary. He grinds out money, but still tends bar.

It is as large as a cigar bex, and all it consists of is its upright sides between which are two cylinder rollers, look ing like they were made of some sort of black composition. On one side a black sheet of paper the size of a bank note is placed between the rollers, and in full view the crank to the right is turned, and on the other side from between the rollers out comes a crisp new \$1 bank note, all printed and dried.

Before getting to the bar he saw what was going on. He was astounded. He never before saw men so boldly making ey in a bar room before Tom, Dick and Harry.

"Stop right there," commanded the deputy, with a good deal of governmental au-thority, "If you print another one of those things I'll arrest you." "Go out and jump under the ice

river," replied the manufacturer of the green goods. The deputy seized one of the bills, scrutin-

ized it and didn't know whether to say it was counterfeit or not. He thought the bill looked all right, but the signature of W.S. Roscerans, register of the treasury, and E. H. Nebeker, treasurer of the department of the series of 1896, were not all right. He had never heard of such a signature as Rosecrans. Finally he came to the conclusion that the "counterfort" was so clever that he wanted a bale of them himself, and did not make the arrest, after being informed that no attempt had been made to pass them. The increase of this idea is truly Many are after the dollar because it gives them the key that opens the door dmitting to this rank. The dollar before the eye eclipses all that is really desirable in culture and life. Between mind and money, learning and wealth, the proportion of those who choose the latter is increasingly great. The ranks in society that open and give glad welcome to the man of stocks and bonds is dangerously large. Into too many homes the ssport is gold. Let him who will come, be unlearned, uncultured, dissipated only be rich he is welcome to our fireside and to the company of our daughters. Too little account is taken of the methods employed in the amassment of these fortunes. There is much contentment in the know such a one has the edge that account. bank It is not desired my purpose to undervalue the power and usefulness of rich mon; I only wish to emphasize the truth that a man's life consisteth not in the abundance of things that he possesseth. The power to honestly amass wealth like the ability to write poetry or to be a musician is a gift of genius possessed in a larger degree by some than by others. There is no intrinsic evil in riches, no inherent blessing in poverty. Rich or poor, high or low, our chances of bappiness here and of heaven are ex ctly equal. FIFTH WARD KICKERS

Reorganization of the Club-Proceedings of Its Last Meeting.

The Fifth Ward Taxpayers club has been reorganized with J. Kyner as president, J. Redman vice president and Robert O. Backus secretary. The club is hown as the "kickers." and at

a meeting held Saturday night at Erflinger's hall a resolution was adopted recommending that \$25,000 of the \$50,000 sewer fund be used on the North Omaha lowiands. It was also decided to ask the interested railroads to assist in paying for the work. A sewer com-mittee composed of Q. J. Smiley, J. Redman and D. Kennison, was appointed to take charge of the matter.

The club by resolutions denounced and condemned the proposed action of the Board of Trade in contemplating the sale of the Board of Trade building to an eastern invest-ment company. The club claimed that the scheme was ill-advised and hostile to the best interests of the city; that such a project, if consummated, would result disastrously and depress the value of property in the city; that all good citizens should be called upon to arrest and prevent the consummation of the
