# THE CONDITION OF TRADE.

Bank Deposits as Well as Clearings Show an Increase.

COLLECTIONS REPORTED AS FAIR.

The Local Jobbers Report a Very Satisfactory Trade in Most All Lines of Business During the Past Week.

The financial conditions prevailing in Omaha are certainly improving. Bankers report an increase in deposits and money comparatively easy. Banks that were not long ago inclined to restrict their loans, now claim to be meeting all the demands of worthy borrowers.

The clearings for the week, amounting to \$5,170,189, show more activity in business circies. As compared with last year there is an increase of 42.1 per cent in the clearings. At the same time some complaints are still beard of dull times in the retail trade. As a tule, however, January is never a good month for the retail trade. Following so close upon the holidays, during which time people are supposed to have expended their savings, it is only natural that trade in a re-

of January.

With the coming of spring and the revival of industries that ile dormant in the winter time, and the consequent employment of idie labor, the retail trade of Omaha must show I material improvement. With the revival of the retail trade of Omaha will disappear the last vestige of the recent duli period in

tail way should be dull during a good share

Nebraska. The smaller towns of the state report trade in excellent condition and the feeling among business men generally was never better. The farmers disposed of a sufficient amount of their products while the market was high so meet their immediate wants, and they can now wait for the market to advance. That they are doing this is proven by the small

amount of grain being delivered by the smal smount of grain being delivered by the farmers at the present time.

The jobbing trade of Omaha is in excellent shape and January bids fair to be a good month this year. In fact many firms are already claiming that they are having the best January trade in the history of their business.

Hardware jobbers report that the excessome diminution in the volume of trade as it kept buyers at home and retail dealers could do little business. For the same reason collections were not quite so prompt as they were a little earlier in the month. In spite of the unfavorable weather, however, the volume of trade for the month so far makes a very good showing. No material change in prices has been made during the past

In the grocery line granulated sugar advanced lie per hundred on Friday, other grades remaining unchanged. In cannel goods corn, tomatoes and string beans are higher. There has been some advance in meats and lard. The coffee market remains unchanged and no particular change is anticipated for the present. Goods of all kirds in the grocery line have been moving freely and the volume of trade is very satisfactory. In New York the Bul-letin remarks that the market for bulk lots of groceries, as a whole, continues to be spoken of with much respect. In some cases operators admit a little disappointment over the quantity of trade secured since the first of the year, but seem to be able to explain the deficit upon reasonable grounds, the very miserable weather for a long time pre-vailing playing an important part, but now, with a prospect of a cold spell, there is a re-newal of hope that demand will breaden out once more. Generally goods continue cheap, in some cases could hardly be replaced at the ruling rates, and that alone induces a fairly confident carrying; but there is a strong belief that all branches of dependent custom are so scantily supplied as make absence from the market only a temporary matter, and while investments may be small they will have to be frequently repeated, so far as staple groceries are concerned. Fancy goods are to a considerable extent out of season, and show the greatest irregularity: yet the variations are of a minor character. and unlikely to cause any serious di turbance.

jobning houses is very fair for the season and entirely satisfactory. The dry goods jobbers are looking for a very heavy trade in the near stocks. Omaha's dry goods market is broad-ening out and buyers will find plenty of goods which to make their selections. At eastern points it is noted that an extremely variable temperature and weather conditions have been unfavorable to the retail demand for spring fabrics. Whenever this class of dealers are interrupted in advance purchases, the jobbing trade sympathizes to a corre-sponding degree. From the southern tier of states, and the cotton belt in particular, the demand has shown no expansion whatever; hence the conservative policy that has in fluenced moderate transactions by merchants from other sections. It must not be understood, however, that no business has been done, as the volume of sales completed has been very large, though they have resulted chiefly from forwardings on prior engage ments. The major portion of the purchases for spring were effected some time ago, of which, however, a large percentage is yet to be made and forwarded. Much business has to be done yet, but with the execution of contracts supplying many wants, the actual movemen of goods has been largely in excess of what has been apparent. While for spring wants considerable has to be effected, in other classes of goods all efforts are being used to the placing of engagements for next autumn and winter; hence the reflection of the mar-ket is in no respect an index of the business in motion, and particularly since such large quantities of goods are shipped direct from the mills to markets of purchase.

The movement of dry goods from Omaha

The local produce markets have not been particularly active during the past week. While the supply has not been large, the demand has not been as active as might have been expected. The retail trade appears to be strongly inclined to buy in small lots. The leading articles handled by commission as butter, eggs and poultry, have commanded good prices the greater part of the week and the fluctuations in values hav

not been great.

In the way of fruit, California Riverside oranges are in fair supply and will become more plenty as the season advances. The present quotation is \$2,50, as against \$3.00 for Florida brights. At the opening of the season Colifornia was holding her stock very high, but she is now getting her ideas down somewhat and present quotations are regarded as very reasonable for this time of garded as very reasonable for this time of year. Florida oranges are becoming less plenty. It is a noticeable fact that an unusually large quantity of russet oranges have been thrown on the market from Florida this year. A few tangerines are arriving from Florida and California. It is said that the supply of apples in Omaha has been materially reduced but there are still plenty in the country Chicago. there are still plenty in the country. Chicago is said to be carrying very large stocks of Iowa apples. It may seem a little strange at first thought but it is a fact nevertheless that New York apples have been sold in Omaha for less money than Iowa apples. At the same time Iowa stock has commanded a premium in New York, where there ap-pears to be an active demand for some va-

ricties of western apples. Oysters are 25 cents per gallen higher in Baltimore than they were two or three weeks sgo. The trade in this line has been fair, taking the season all through, and a good season all through, and a good many ovsters have gone into consumption

through Omana houses. The Omaha grain market has been fairly active during the past week and the transactions in the aggregate have been quite large. On Saturday there was no regular session of the board, an adjournment being taken from Friday until Monday.

## QUALLA LIVE STOCK MARKET.

Receipts for the week foot up 13.7% cattle, 40.064 hogs and 3.4% sheep against 3.280 cattle, 62.064 hogs, 2.485 sheep last week and 12.500 cattle, 41.165 hogs and 2.572 sheep the corresponding week of January, 1801.

While there has been a failing off in receipts this week compared with last, prices have not only not been maintained but have declined considerably. On Monday and Tuesiay the extremely cold weather had the effect of reducing the supply and an advance of 15c to 25c was noted on all useful grades, both beef steers and butcher stock. During the latter part of the week receipts both here and at other market centers were heavy and prices broke badly.

the week closing with values 2c to 40c lower than Tuesday, the high day of the week, and Ire to 25c lower than last Saturday. With the hoz market it has been different. There has been a strong shipping demand, which, with light receipts daring the early part of the wrek, caused a sharp advance. As receipts became more liberal there was a strong effort made, by prokers especially, to break the market. The fresh meat and shipping demand, however, was too stron; and the week closes with prices about 5c higher than a week azo. The sheep market has been featureless and prices are substantially the same as a week ago.

o. For a Satur lay receipts of cattle were only For a Saturday receipts of cattle were only fair. 1.00, head less than last Saturday, and the general quality of the offerency was rather indifferent. As usual on Saturday there was no radical change in prices. The demand was only moderate and inpeared to be capable of absorbing the supply without too much of a strain. Buyers refused to advance prices and sources were generally inclined to accept steady prices as about the best they could do under the circumstances. Trade was rather slow on teel steers and prices, were not more than steady even on the test, while it took a nechanic to get ste dy prices on common or interior stock. The cathe kept selling, however, and but little desirable racks remained unsord at the close.

interior stock. The cathic kept selling, however, and but little desirable riock remained unsoid at the classe.

Butcher stock was not in very liberal supply although there was quite a good deal of stale stuff in the yards. The demand was fair especially for desirable grades and prices ruled stronger on such. The ordinary run of cows sold pretty much the same as Frilay. While trading was not brisk the movement was moderately free and a fair and reasonably early clearance was offected. Good to choice cows and helfers sold from \$1.25 to \$2.55, fair to good stuff from \$1.90 to \$1.75. Bulls, oxen and stags were weak at from \$1.00 to \$2.00, chives stendy at from \$1.00 to \$3.00.

Stockers and fee lers were in fair supply but poor demand. Business was slow with trading largely at from \$2.25 to \$2.95. Representative sales:

COLORADO CATTLE, Hogs—The week closed with a good run of hogs, but there has been a decrease this week compared with last week of about 1,000 head. Offerings in general this week have been somewhat lighter and commoner than last week, but the quality is still very fair.

Business opened rather slow, with prices weak. Shipping orders were not overly liberal and fresh meat donlers were not taking their usual number. Packers were bearish as a matter of course, but when provisions opened stronger and reports arrived quoting Chicago from 5c to 10c higher, with only 17,000 on saic, there was a change in the situation and mackers as well as others started in bidding a niekel higher than Friday's general market. Trade was brisk at the advance and the pens were practically cleared by 11 o'c ock. difeeders. the pens were practically cleared by the ock. Good heavy hogs soid at from \$4.10 to \$4.25, common heavy and mixed packers at from \$4.05 to \$4.10, light and light mixed loads from \$4.05 to \$4.10, light and light mixed loads from \$4.05 to \$4.15, against \$4.05 to \$4.10 Friday, and \$3.85 to \$4.05 to \$4.15 hast Saturday. The average of prices paid was \$4.104, against \$4.074 Friday and \$3.00 last Saturday. The general market is about 20c higher than a week ago. Representative sales.

and all are welcome."

# THE SPECULATIVE MARKETS.

Wheat Was Higher Yesterday and Closed With an Advance.

BULLISH ITEMS AFFECTED TRADING.

Reported Recall of Minister Egan from Chill Was Onite a Feature-Early Private Cables Were Higher-Stocks and Bonds,

CHICAGO, Ill., Jan. 23.-Wheat was blober today. The opening was 4c up and 4c was gained. There was a recession to yesterday's closing price at one time, but the market strengthened again and closed with an advance of Se. There were a number of more or less builish items of news to affect the early triding. The chief one was the published statement that the German Reichstag had voted to reduce the duty on wheat until April 1. This was subsequently denied by a German exporting house in New York and assisted in the subsequent depression of prices. The report that Minister Egan had been called from Chili was also a builtsh feature. Bradstreet's reported the week's clearances from both coasts at 4,520,000 bu, and the available supply at 18,000,000 bu, more than at this time last year. Local statisticians figured that the visible supply would show a decrease that the visible supply would show a decrease of 1,000,000 bu. Some of the early private cables were higher and reported a better feeling abroad, and domestic markets nearly all showed an upward tendency at the start. The offerings of wheat were moderate and with good buying by many strong and influential operators, shorts soon became nervous and covered very freely. Pardridge was the central figure and his buying and selling was very influential in fixing values. As has been the case for several days his dealings were in the nature of a big scalp, as he bought only on breaks and sold on the buiges. He was a free buyer on the curb and his purchases had much to do with the builish opening. Then he turned an aggressive seller and assisted in beating the value down. When his object had been gained he turned again and covered at a substantial profit. May opened at 925c, sold at 925c, sagged off slowly to 915c, re-overed to 92c, went off again to 915c during the last hour, but on a report that 100,000 bu, had been taken for export through Balt more at about May prices, better late continental cables and good buying by early short sellers, with Pardridge in the lead, there was a raily to 925c, a break on closing cables took the price to 915c again, but the market again firmed up on covering by shorts, who feared to let their trades stand over on account of the strained Chilian situation, and the close was firm at 924c. of 1,000,000 bu. Some of the early private cables account of the strained Chillan situation, and the close was firm at 12½c.

Corn was fairly active and firm, due partly to a reaction after the break of the past two days and partly to the heavy exports, which agreezated 2,981,000 bu for the week. The close shows an advance of ½c compared with yesterday, though at one time an advance of ½c was shown.

Outs were dull and easy and closed a shade lower.

Hog products were firm and higher: the re-

Hog products were firm and higher; the re-

Higg products were firm and higher; the receipts of hogs at the yards were less than expected and prices were from 5c to 10c higher; this gave products a strong send off. There were several recessions and railles and the market closed with an advance of 12½c in pork, from 5c to 7½c in lard and 5c in ribs.

Estimated receipts for Monday: Wheat, 125 cars; corn. 345 cars; oats, 320 cars; hogs, 37,000 head.

Minneapolis Wheat Market.

Minneapolis Wheat Market.

Minneapolis, M nm. Jan 22.—There was no edge to wheat lod. y. It was exceedingly duli and trading was limited to a few small deals. May wheat opened at 88c, an advance of 5c over last night's close and declined at once to a range from 87%c and 87%c and held within this to the close, with May at 87%c bid, and January at 84%c. The cash market was in about the osual active condition, and offerings were cleared up early. No. 1 northern sold between from 85c to 86%c. Receipts of wheat here were 215 cars. 36 at Duluth and Superior. January closing, 81%c; May opened 88c; highest, 88c; lowest 81%c, closing 87%c. On track: No. 1 hard, 87c; No. 1 northern, 86c; No. 2 northern May, 82c to 81c.

Traders' Talk.

CHICAGO. Iil. Jan. 23.—Kennett, Hopkins & Co. to S. A. McWhorter: Cables were lower, and there was no apparent reason for the early strength except the fact that room traders were generally short and wanted to cover, and there was little wheat for sale. Clearances today were rather light, but for the week, both boast \$4,000 bushels larger than the previous week. Receipts at eastern primary markets continued to fail off, and for the week are about 450,000 bushels less than the previous week. This would show a decrease in the next visible supply of from 1.750,000 to 2,000,000 bushels, but transfers from public to private cievators, and vice versa, may prevent a statement of actual conditions. One thing, however, is certain, name, what farmers cannot or will not deliver freely at these low prices and the supply will probably shrink some from now on. A round lot of 109,000 bushels hard spring wheat was marketed here today for export via Baltimora at 1912c. Country deliver freely at these low prices and the supply will probably shrink some from now on. A round iot of 100,000 bushels hard spring wheat was marketed here today for export via Baltimora at 21%. Country miliers are paying May prices at home and buying in this market when unable to supply themselves nearer by. The domestic situation undoubtedly favors higher prices and foreign statisticians are increasing materially their estimates of the amount required from America in the next six months We exported in the last six months 120,04,000 bu, and it is thought as months 120,04,000 bu, and it is thought as months 120,04,000 bu, in the past six months will supply none the coning six months and it is believed other countries will fall short of the amount singped by them in the first six months of the past vear. It will perhaps take a little time to convince the speculative public of these changing conditions but we are inclined to think that the market will soon show much strength. Nearly 4,000,000 bushels of corn were exported from the four Atlantic ports for the week just closed, or nearly 7,00,000 bushels more than in the preceding week. Receipts at the principal primary markets fell short of the previous week's receipts about 100,000 bushels. This would indicate a considerable decrease in the visible supply. At the Jecline the export demand has shown increased activity. The warm weather will interfere with grading. This and the reduced orices will doubtless cause shippers to hold their grain. With decreasing receipts and increasing exports a further decline in values is improbable. Both foreign and donestic markets are now on a good, healthy consumptive basis and conditions seem to us decidedly favorable to holders. The export of oats increased 450,000 bushels over the previous week, but the market is dead. The decreasing supply of hogs and the necessing exports of provisions, which have been very large the ing supply of hogs and the increasing exports of provisions, which have been very large the provisions, which are giving speculators more confidence and restricting the excessive efferings of the bears. It looks like a bull market in provisions and we advise

purchases on all reactions. New York Money Market, New York, Jan. 23.—Money on Call.—Easy with no loans; closed offered at 2 per cent. Prime Mercantile Paper—46515 per cent.

## STOCKS AND BONDS.

New Youk. Jan. 22.—The stock market today presented no features of special interest and the most that can be said was that in spite of persistent attacks by the local bearish element, prices were well held and few changes of importance are seen. The most striking development of the day was the coa tinged heavy gains shown by the bans statement. \$8.0 0.000 in cash and \$11.000,000 in deposits, and it is without question that the banks are now in a stronger posi-tion than in any of the previous years at the same season, excepting possibly 1885. opening of the market was irregular at slight changes from last night's figures but the bears attacked the list immediately, paying special attention to Northern Pacific preferred, hough Omaha reversed its movement of yesterday and dropped back 1 per cent. On the other hand a few material advances were made in some of the specialties. Distillers rising rapidly and Manhatten gaining I per cent. The pressure was abated after the first half hour but the offerings continued large and there were no full rallies until the publication of the bank statement, when the operations assumed large proportions and most of the list were brought up beyond the opening. In this movement New England, Omatia and the industrials were specially prominent, but in rallroad stocks the late deadings showed a reactionary tendency. The market finally closed active and firm generally at insignificant changes for the flay. Distillers is up 2 per cent: but no other marked changes occurred. There was absolutely no feature in railroad bonds and on a business of \$1.14,00 no change of importance took place, the whole list being held at the same level. Atchison incomes, \$1.14,00 s. Southwest Brists and Union Pacific news were active, but failed to a ore any gains. ing rapidly and Manhatten gaining I gains.
Government bonds have been dull and steady. State bonds have been dull and firm.

Robbed of its Contents.

Safe in Treitschke's Saloon Blown and

Very Smooth Piece of Work Neatly Exccuted by the Thieves-Neither Block Watchman Nor Policeman Knew

Anything About the Affair.

SECURED DIAMONDS, CASH AND BONDS.

Burgiars made a comfortable haul between 4 and 5 o'clock yesterday morning at Julius Troitschke's saloon at Thirteenth and Howard streets. They forced a side window with a crowbar, and after unlocking all the doors from the inside tackled the safe

A hote was drilled in the safe door about six inches below and an inch to the left of the knob, and then a charge of blasting powder inserted that tore the door from its hinges and hurled it fully ten feet, smashing some of the wood work of the bar. The robbers secured \$76 in money, and about \$800 worth of diamonds, \$440 worth of foreign bonds, and so far as is yet known, about \$5,000 worth of personal notes, although there may have been even more than that amount. The latter, however, had not been endorsed and

payment on them has been stopped.

The bonds are negotiable, and the baul of The bonds are negotiable, and the haul of the burglars will not them something like \$1,300. A new watch chain and several gold studs and other pieces of jewelry are included in the list of missing articles. The noise of the explosion was heard by several parties living in the neighborhood, but they did not realize what it was. Nothing was heard by either the policeman on the beat or the block watchman. "I don't pay any more block watchman," said Mr. Treitschke, "I have been paying since 1883, ever since I have been located here, but I will draw the line right here. here, but I will draw the line right here. Nobedy knew anything about it, until the bartender came in shortly after 5 o'clock to open up. Everything was gone then, with the exception of the drill that they used on the safe. That is all the detectives have to

The residence of C. W. Rawitzer, northeast corner of Tenth and Oak streets, was entered by two burglars about 2:30 o'clock vesterday morning. They were evidently frightened away before they had completed their intended operations, but they took with them an overcoat and a pair of beaver gloves, valued at about \$50.

La Grippe.

very tame market opened today, accombanied by two developments, announced as particularly favorable. One of these was the correspondence between the president of the Missouri Facilie and the president of the Western Traffic association. The bank statement was the second point of possible encouragement. But neither of these contributions to good feeling had any perceptible effect. In some quarters the early market was weak—conspicuously, as usual, in Louisville and Northern Pacific preferred—but ralities came easily and the majority of the list moved little in either direction. So dull were the standard stocks that the attention of the board was chiefly concentrated on a single industrial specialty, which has become notorious for its quick gambling opportunities.

The accumulation of idle money in New York city is fast becoming phenomenal enough to puzzle the most ingenious theorist. Nevertheless the changes in the several recorded items of today's bank statement illustrate the fact which is at the bottom of the whole phenomenon. With all this superabundance of money, outstanding loans and discounts have actually expanded only \$1,363,403. Here is a very unusual record. Its only explanation is that the interior banks find their opportunities for the profitable use of money so limited that they are crowding their deposits in New York, so thas the New York banks are now finding themselves almost swamped with funds. If outside business were to revive, or even speculation on the Stock exchange, a fair share of this could be employed; as it is, most of the money lies wholly idle. This is a curlous sequel to the prodictions of a light money market which were current among not a few wiseacres scarcely six months ago.

[Convictorial 1860 to James Gordon Renorth.] No healthy person need fear any dangerous consequences from an attack of la grippe if properly treated. It is much the same as severe cold and requires precisely the same treatment. Remain quietly at home and take Chamberlain's Cough Remedy as directed for a severe cold and a prompt and complete recovery is sure to follow. This remedy also counteracts any tendency of la grippe to re sult in pneumonia. Among the many thousands who have used it during the epidemics of the past two years we have yet to learn of a single case that has not recovered or that has resulted in pneumonia, 25 and 50 cent bottles for sale by druggists.

Dr. Callimore, oculist to Mo. Pac. Ry

### WILL REST ONE WEEK.

Courts Finally Wind Up the Business of the September Term. The September term of the district court gave one spasmodic flare yesterday and then died.

Business has been very quiet in the courts

London Stock Market.

[Copprighted 1892 by James Gordon Bennett.1]

London, Ian 21.-[New York Heraid Cable-Special to The Bee.]- Business was quiet on the Stock exchange today, owing to the limited attendance of members. The market concrally exhibited an irregular tendency, Funds, however, were firm. Consols adjanced ½ per cent. Home rallways were not much dealt in Caledonian is materially lower. Changes in others are only fractional, though mostly a ainst holders. Americans, though not particularly active fluctuated to some extent and closed fairly strong. There was a rise of ½ per cent in Chicago, Milwaukee, Wabash preference, but the changes in the others were not important. Canadian lines were rejected but closed firm, especially Grand Trunk issues. Mevicans scarcely moved all day and close without change. Money was very little wanted. With the increased supply of floating capital, owing to the repayment of treasury bits, short loans were easily obtained at ½ per cent. In the discount market there were very few bills brought forward; of those, two or three months' were quoted at ½ to 1½ per cent.

London, Jan. 23.-The following were the for several days and only one or two judges have done any official work. Yesterday morning, however, Judges Doane, Irvino and Ferguson held court and transacted a small amount of business, after which the September term was at an end and the court will take a vacation until Pebruary 1. Judge Ferguson made a ruling in the famous Davis case, in which the husband, Doug Davis, sought an order of the court to LONDON, Jan. 23 .- The following were the

restrain his divorced wife from visiting their children. The court directed that the children be given into the custody of their graud mother, who should have charge of their training and education, and that the mother be allowed to visit the children at stated Judge Irvine decided the case against Nels O. Brown, who was charged with contempt of court in disposing of certain goods and chattels which were subject to a judgment

KANSAS CITE. Mo., Jan. 23.—Clearings today \$1,261,061. Henry F. Cady against Mrs. May A. Upton, and others, holding that a mechanic's hen on the property of the defendant for constructng a building was valid. Judge Irvine issued a restraining order against the mayor and city council at the in-stance of W. F. Gurley, to restrain them

from passing an ordinance repealing an ordinance passed by the last council, creating a paving district, which included Izard street from Eighteenth to Twenty-third street. The petition alleged that a majority of the property owners on that street had selected red Colorado sandstone as the paving material to be used and would notify the council to that effect within the thirty days allowed by law. The plaintiff charged that the proposed repeal was a scheme to defraud the property owners of their right to select the material to be used for grading. Similar restraining orders were issued by Judge Irvine at the instance of T. C. Bruner in the cases of Twenty third street and Michigan street, upon the same representations, the paying material in both cases being

tions, the paving material in both cases being red Colorado standstone.

John T. Cathers, attorney for the Real Estate Owners association, endeavored to argue a motion before Judge Doane asking to be allowed to erase three words from the restraining order against the city to prevent the payment of claims of judges and clerks of election. Judge Doane stated that he would hear no materials Donne stated that he would hear no motions, as this was the last day of the term, and he had too much on hand.

Mr. Cathers stated afterwards that the council took the stand that the restraining order prevented them from allowing any claims the restraining order prevented them from allowing any claims arising out of the election and refused to act on any such claims. Mr. Cathers said that the object of his motion was to crase the words by means of which the order might be construed to apply to any claims, irstead of to the claims of judges and clerks alone, which was the intent of his application for

Judge Doaue was engaged the greater part of the day in hearing further arguments in the care of the Omaha National bank against Strang. Spoopendyke Tells His Wife Something.

Yes, I see, you have got a terrible looking face—all pimples and blotches. Now, Mrs. Spoopendyke, if you'de let those everlasting, dorgasted powders and cosmetics alone, and use Hailer's Sarsaparilla and Burdock compound you'de look like something. Seef
