SHOULD FORM A STOCK COMPANY Financial Advantages of the Plan Commend to the Business Men in General -How Local Affairs May Be Largely Benefited.

"I am giad to learn that the people of this city are beginning to agitate the question of patronizing their home industries," said a prominent man yesterday who is heavily interested in both Omaha and Council Bluffs real estate. "One thing we need is to secure the location of manufacturing enterprises bere, and the main question we are all interested in is how to keep up the interest of the citizens in some organization similar in purpose to the one effected in the Masonic temple last Thursday evening. I have a

scheme which I think would fill the bill better than anything yet proposed, and I would like to lay it before the public through the columns of THE BEE.

"My plan would be to form a stock company and incorporate it under the state laws with just as large a capital stock as could possibly be secured. Then when any manufacturing enterprise is heard of that wants to relocate, appoint a committee to confer with its managers and lay before them a proposition something like this: Instead of offering them a bonus, agree to take a certain amount of stock in the enterprise in the name of the eitizens' organization, with the understanding that the stock may be bought out by the manufacturers at any time at its par value, together with 6 per cent interest, and that while the association holds the stock it is to eccive its share of the profits like any other tockholder.

"This plan, I think, would meet with the "This plan, I think, would meet with the approval of any straightforward concern, and we wouldn't want to pay money to get any other kind located in the city. At the same time it would give the members of the association something in return for the money that they might expend in the way of build-ing up the city's interests, which is the only successful way of keeping them interested in the association. Patriotism is all very well so far as it goes, but after the first flush of enthusiasm has passed men who look at

enthusiasm has passed men who look at things in a business like way want to see some direct results from their efforts." This plan has been adopted by the Union Loan and Improvement company, of which John W. Paul is a member, and will be tried some ameriment in building up the vecent

as an experiment in building up the vacant territory in the northwestern part of the city.

ever, would seem to indicate that the case will not be allowed to drop where it is. Bowen stoutly denies that he took any-thing that did not belong to him. "I ob-tained a position some weeks ago," he said to a reporter last evening, "to canvass through western Iowa for purchasers of farm lands in Nebraska. On Saturday last I received \$25 in advance for my coming week's ex-penses. I paid \$10 of this on last week, as I had been sick with the grip a week and had

run behind. The remaining \$15 I gave to Mrs. Pollard to keep for me. On Monday or Tuesday I received \$10 of this and started out canvassing, as I had agreed to do. I had no other money and received no other money from Mrs. Pollard or any other person. I canvassed early and late until today noon, when I was arrested on the charge of embez-

zlement. The troublo between myself and Mrs. Pollard was that she wanted me to use that remaining \$15 for the purpose of going immediately to New York. This I refused to do, and continued to canvass as I had agreed with my employer to do." Mrs. Poliard was very indignant when she iearned that Bowen had been brought in from Neola and iodg d in the jall, where he would have to remain until morning. She claimed to have given orders simply that

word be sent her as soon as he was located, so that she might look him up and find out what he intended to do. BOSTON STORE.

IT IS LEAP YEAR.

And the Girls Show the Boys What is the Proper Caper.

A merrier scene is seldom witnessed than that at the Royal Arcanum parlors last Wednesday evening, when the young ladies, to the number of about forty, entertained their gentlemen friends at a leap year party. Unceasing worry had occupied the minds of the members of, the committee which had been appointed to look after the preliminaries, but when the work of decorating had been completed and the hall had been transformed into a bower of palms and ferns, all the sleepless nights were forgotten, and each one devoted himself or herself, as the case might have been, to having a good time. The crowd was of just the right size to make daucing pleasant, and from the timo the orchestra struck its first note until the last note of the "good night" waltz had died away galety reigned supremo. At midnight refreshments were served, and it was 2 o'clock before the company dispersed and the carriages were summoned in which the ladies

Although the city pays to have the electric lights run all night, the city is left in abso-lute darkness an hour before daylight, caus-ing many complaints among those who have occasion to be out at that hour. It is also noticeable that the electric lights are started up in the afternoon an hour before dark. I seems that whoever keeps time for the lighters sets his watch by eastern time. It seems nonsensical to be having the lamps burning in daylight and shut off in darkness, and those who have to stumble through the streets at early morn are howling to have a
