Distributed to Residents.

The official catalogue of the Manufacturers

and Consumers association is out and the

work of distributing it in Omana will be

commenced today. A half dozen or more

ladies will be employed by the association

and each assigned to a certain district in the

city. They will call at each house and leave

a copy of the catalogue and at the same time

request the lady of the house to sign her

name to the roll of general membership in the association. There is no expense at-

tached to the general membership and the

braska made goods, prices and quality being

It is proposed to keep these rolls of general membership on file at the office of the asso-

memoership on the at the onice of the asso-ciation where they can be seen by parties de-siring to enter into some line of manufactur-ing in the state. It has been suggested that the signatures of a large number of people agreeing to use goods of Nobraska manufacture would be a greater inducement

to a manufacturer looking for a location than any ordinary bonus of land or money.

The object of the catalogue is set forth on

When consumers were requested to give the preference to goods of Nebraska manufacture the first question asked was, "How are we to know what goods are manufactured in Nebraska?" The object of this book is to answer this question by supplying the consumer with a classified list of Nebraska goods.

Then comes a prief history of the associa-

tion together with the articles of organiza-tion. This is followed by a list of the mem-

bers of the association. Opposite each name is the number of the page on which is given

the full line of goods manufactured by the

individual or firm.

The book ends with a complete list of all

the goods made by members of the associa-tion arranged in alphabetical order. With

Special Weather Bulletin.

It is announced that a cyclone is to strike

this city on the evening of Friday, March 4,

and that the center of the storm will be most

perceptibly felt at or near the Grand opera

house, while the entire city will be more or

less affected. Fortunately, the predicted

tornado is not one of the disastrous kind, but

on the contrary, it is of the most wholesome

sort, as the storm purifies the atmosphere, clears away any style of "blues" and enlivens

all human nature-especially persons on the

nterior of the opera house, between the lours of 7:30 and 10 o'clock on that evening.

This same cyclone has struck many other cities throughout the country during the

present season, and is generally spoken of as

the "Bill Nye and Burbank cyclone" and torrent of wit and humor. The nearer you wish to be to the point of attack, the sooner

you should reserve your seats, now on sale for the third annual Press club benefit, which

BOIES WANTS FIRST PLACE

Representative Perkins Thinks Iowa's Governor a Presidential Candidate.

HIS POSITION ON THE SILVER QUESTION

Profiting by Cleveland's Experiences with the Issue He Will Remain Silent on the Subject, Thus Hoping to Catch All Elements.

WASHINGTON BUREAU OF THE BEE, 513 FOURTEENTH STREET, WASHINGTON, D. C., Feb. 24.

Representative George D. Persins of the Bloux City district is quite positive in his mind that Governor Boies of Iowa is trying to move the very foundations of the earth to advance his chances for a place on the presidential ticket this year. He says that at the outset of the boom Governor Boies confined his aspirations to the vice presidential posttion upon the democratic ticket, but after the Iowa democratic platform announced in the most positive terms in favor of the free coinage of silver, and the great west and south commenced to cut Cleveland on account of his anti-free silver attitude the governor began to believe that the presidential nomination lay in his pathway.

Representative Perkins had an article in the Washington Post the other day upon the subject of the possibility of Iowa occupying a place apon the democratic national ticket this year, in which he calls attention to the fact that the lowa governor has grown so diplomatic of late that although the democratic platform of his state is very pointedly in favor of free silver, the governor straddles the question completely. Mr. Perkins says among other things that Governor Boies has "very frequently attempted to maintain a discreet silence on the silver question and bent all the strength of his intellect to the whisky question, which he insisted ought not to be hampered by tarty affiliations." He says that the last Iowa campaign was fought on the one question of retention or dismissal of the state wide pro-hibitory liquor law; that all other questions were relegated to the rear. He points out the fact, and gives it emphasis, that nothing of free sliver was beard in the campaign, and that no one knows the fact cetter than Governor Boies, and therefore the wiley governor underestimates the party in the state in declaring in favor of free coinage. Mr. Perkins gives the republican record of Mr. Boies, which shows that he has not been within the ranks of the democratic party sufficiently long to pose as a democratic ora-cle, and observes that Governor Boies in his official papers has repeatedly recognized the fact that republicans assisted in his elec-tion, simply because he stood for the repeal of the prohibitory liquor law, and has more than once deprecated any attempt to turn such a victory to partisan advantage. At the same time Mr. Perkins regards Mr. Boies as a very decided candidate for the democratic presidential nomination. despite the fact that Boies' silence upon and evasion of the silver question shows himself to be out of joint with his own party in the Mr. Perkins thinks that should Gov-

this year he would be, so far as his own state is concerned, placed in a very embar-rassing position, since the party in Iowa would force free silver to the front as an issue, and its local candidate upon the national ticket would be constantly dodging Statehood Bills Will Come Soon.

ernor Boies be given a place on the ticket this year he would be, so far as his own

Delegate Smith, who represents Arizona in the house, said today that the hearings which have been given the four territories, all of which want statehood, had been practically completed by the house and senate committees on territories, and since the house was expected to take the initiative steps there would very soon be some of the statehood bills reported from the house committee. Each of the territories stands upon its indi vidual merits. There will be no such thing as an omnibus bill as there was when the Da-kotas and Montana and Washington came into the union. New Mexico will propably be reported first by the house committee, then Atizona and probably a provisional government for Utah which is advocated by the liberals of that territory.

It is doubtful if a favorable report will be made upon the bill giving statehood to Okla-homa. The democrats on the committee take the position that the population of Okla-homa is too new to enable anyone to deter-mine whether it is permanent, and that it would not be proper to take that country into statehood within two years after it was settled by white citizens and made a terri tory. Oklahoma is a republican territory that tells the secret of the opposition to Oklahoma in the house committee. It is the opinion of Delegate Smith and members of the senate committee on territories, all of whom are best informed on the subject, that the house will pass bills giving statehood to New Mexico and Arizona and possibly a pro-visional government for Utah. The senate committee will report the Arizona bill back amended so as to include Oklahoma, and in that form it will be sent to the senate and finally become a law, and there statehood agitation will end so far as this territory is

Secretary Noble May Succeed Reid. The report that Secretary Noble was shout to leave the cabinet in order to succeed Whitelaw Reid as United States minister to Great Britain, which was current here today, is the renewal of a report which is undoubtedly based upon the preferences of Secretary Noble himself and which is be-lieved by many who ought to know to be not discordant with the unexpressed desire of the president. There is, however, no basis

for the rumor in any accomplished fact or contemplated negotiation. It is generally accepted in Washington that Minister Reid has made every preparation to resign his commission and to return home this summer in time to take an active part in the next presidential campaigh.

The State department has, after its usual

The State department has, after its usual fastion of denying everything, officially denied that Mr. Reid will resign. That, however, has nothing to do with the undoubted fact that Secretary Noble is tired of his division and that he would have resigned the cures of the Interior department last summer had it not been that the president requested him at that time to continue in office. Outhwaite's Army Measure Doomed.

Army officers who are agitating their souls over the passing of the Outhwaite bill making all promotions in the army de-pendant upon length of service may rest more easily. The bill, which is now in the more easily. The bill, which is now in the senate committee on military affairs, will never leave it in its present form. It is probable that it will be brought up amended to apply only to first lieutenant. Such a bill has been already reported by Senator Proctor and is on the senate files. The Outhwaite measure would disorganize all relative ranks in the army and promote a large number of higher rank officers, over the heads of ber of higher rank officers over the heads of superiors who have wen their promotion by hard service and gallantry. The senate committee does not propose to see old war time officers overshadowed by men who did not receive promotion after the war simply because they were not considered to deserve it. The bill is considered too sweeping by army officers here and if enacted into a law they say it would certainly cause more in-justice than it would correct.

Farm Animals in Nebraska.

The last bulletin issued from the Agricultural department shows the following on the subject of farm animals to Nebraska: Herses and mules remain about the same Horses and mules remain about the same as to numbers as on January 1, 1891. Milch rows have increased in number and value during the past year. Great improvement tisbeing given this class of stock by the inroduction of high-grade Jerseys, Guernseys, Alderneys, Holstein, Swiss and Red Polls. Oxen are seldom used now, the fast stepping borse naving taken their place; therefore the number of oxen have decreased. Other cattle have also decreased. Prices are low, and as feed is plentiful feeders are not disposed to rush their stock on the market. The posed to rush their stock on the market. The tendency now is to feed for early maturity, and some of the best results are obtained at

Pyears old.
The total number of sheep for permanent use is about the same as that of one year ago.
Breeding sheep for either wool or mutton has not gratified expectations, and honce that industry has rather fallen off than increased. Bringing sheep to Nebraska for feeding, however, is largely on the increase. Many thousands are brought in and fed annually.

In laws horse have increased in number. In lows horses have increased in number during the past year. All inferior and com-

mon grades are extremely low, but the best bring fair prices. Milch cows have for sev-eral years past been considered unprofitable, but the dairy interest is growing. The use of separators and paying by the chemical test has a stimulating effect on the industry. The apparent prospect of better prices has maintained the number of beef cattle. The sheep industry is steadily growing. Nearly every county reports an increase. The num-ber killed by dogs is also increasing. The number of hogs is somewhat reduced as com-

pared with last year. Miscellaneous

It is certain that Senator Paddock will have a hard right with his pure food bill. Yesterday's debate indicates that the south-ern congressmen propose to struggle vigorously against its enactment on the ground that it will prevent the present extensive use of cotton seed oil as an adulterant. The two hours running debate between Scnator Paddock and Scnators Bate and Coke yesterday was a vigorous and interesting one in which the Nebraska senator more than held his own and showed his familiarity with the subject. The pure food bill will be the special order until disposed of, and Senator Paddock, who feels that it will be, worth nillions of dollars to the west, is confident

that it will secure passage.

CHEROKEE STRIP LANDS.

Commissioner Carter Tells How They May Be Entered Upon.

WASHINGTON, D. C., Feb. 24 .- | Special to THE BEE. |-Senator Paddock and other members of the Nebraska delegation are receiving daily letters from their constituents inquiring about the Cherokee strip in Okiahoma. It appears that a large number of Bee readers are in one way and another deeply interested in this body of land, and for their especial information the following letter, bearing directly upon the subject, is given in full:

"DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE, WASHINGTON, D. C., Feb. 19.—Hon, A. S. Paddock, United States senate: Herewith returning the letter of Mr. John Rosicky, dated at Omaha the 9th inst, with accompanying paper, which you referred to me by endorsement dated the 15th inst., in reference to the manner in which the lands in what is known as the Cherokee strip in Oklahoma Territory will be disposed of, I have the honor to state that the act of May 2, 1890, 26 statutes, 31, provided in a general way for disposing of the lands in the said strip, on their being relinquished by the Indians, according to the provisions of the homestead laws, except the provision for commutation of homesteads contained in sec-tion 2301, revised statutes, which it was provided should not apply.

"It is understood that an agreement has been entered into by the United States with the Inpians by which said lands will be relinquished by them and be opened to occu-pancy by white settlers. This agreement, it is understood, will be submitted to congress and if ratified thereby will be made the foundation of legislative proceedings for determining more particularly and exactly upon what terms the lands will be disposed of to settlers.

"In answer to the three questions pro-pounded by Mr. Rosicky in his enclosed letter, I submit the following statement, viz: "First. The agreement with the Indians above referred to has not yet been officially promulgated. I understand, however, that it provides for a few Indian allotments within the Cherokee strip, —it is stated that seventy allotments are provided for of eighty acres each,—the remainder of the to be opened to settlement.

Second. There is no existing law which provides for commutation of the homestead entries to be allowed by which title may be procured after a period of residence and cul-tivation less than the usual period of five years. But as such commutation has been provided for in other cases of the kind, it is probable that congress will do so in this case. By parity of reasoning it is to be an-ticipated that commutation will be allowed after twelve or fourteen months from date of entry. If so, it is probable that only one price will be required which will be fixed from a consideration of the amount to be paid the Indians. The purchase will be allowed at a certain date should the settler so desire, or if he should prefer it, a longer time will be allowed in which the perfect the settler so time will be allowed in which to pay for the and, he remaining thereon as a resident in the meanwhile.
"Third. Under the general provisions of

the homestead laws, which are applied to these lands under said act of May 2, 1890, a claim to the land may be initiated as soon as they are opened to settlement in one or the other of the two ways; (1), the party desir-ing the land may go upon the tract desired in person and make actual settlement thereon; or (2), he may go to the district land office and make entry there.
"When the first course is pursued the set

tler must make entry or put his claim on record at the district land office within three months from the date of settlement. When the second course is pursued the entryman must go upon the land and establish his actual residence thereon within six months from date of his making entry at the district land office. In either case the party's right to the land on being perfected would relate back to the date of the initiation of the right, whether by actual settlement on the and or by entry at the district land office. In case of two parties initiating a claim on the same day by either method, the one who is first in time is

first in right, and in deciding such a case 'a difference of hours' between the parties in doing the first act upon which the right depends would be considered. Settlement on the land give a homestead party a right thereto which will not be defeated by the subsequent entry of the land at the district office by another party who is not an actual settler. On the other hand, an entry at the district land office by an intending settler will gives a right which caunot be defeated by a settlement subsequent in time to such entry, provided the entryman himself be-comes an actual resident on the land within the time allowed therefor from the date of his formal entry.

"It is considered inevitable that there shall be disputes as to the facts on which priority of rights depends, and even that there shall be simultaneous applications for acquiring such rights, but the established principles of the homestead laws will probably be adhered to by congress in providing for the disposal of these lands; and conflict-ing claims be decided as usual according to the law and facts appearing therein. Very respectfully, THOMAS H. CARTER,

Western Pensions. WASHINGTON, D. C., Feb. 24. - | Special Telegram to Taz Bes. |-The following list of pensions granted is reported by THE BEE and

THROWN BODILY OUT OF A DIVE

After Remaining at the Police Station All Night the Victim is Discovered to Be in a Dangerous Condition-Odds and Ends.

LINCOLN, Neb., Feb. 24.- [Special Telegram to THE BEE.] -August Carlson, a young man about 25 living in the southwestern por tion of the city, is lying in a cell at police station a very short distance from death's door. About 1 o'clock last night Carlson, who had been drinking rather heavily, got into a difficulty with Frank M. Frazier, who passes as the husband and bouncer of the Dora Frazier house at 732 L street. Carlson and several friends had been in the Frazier dive and incurred the displeasure of C. S. Raymond and Mike McCann, two hackmen, who, when the row between the Swede and Frazier began, helped out the divekeeper The witnesses say that McCann did not do any singging, but Raymond got in several blows with a chair while Frazier used two beer bottles with effect.

Carlson's head was cut in three places, and

after to lost consciousness he was thrown out of the dive. His friends picked him up and hunted around for a doctor, finally landing at the police station with him. Several physicians were summoned, but his condition was not thought to be serious until this consultation. The man has lain in a stupor since I o'clock this morning, and is very weak from loss of blood. The doctors, how-ever, expect to pull him through all right. The three assailants were arrested early this morning, but the case was continued until 4 o'clock, when it was called, but the injured man was still unable to appear, and the trial was postponed until tomorrow morning at 9 o'clock. Carisoniwas taken to better quarters.

Sued for Libel. Judge Tibbetts this morning began the Basis S. Littlefield against the Call Publishing company. Littlefield alloges in his petition that the Call on August 25, 1890, published a communication in which it was set forth that Littlefield was pretending to run a paper under the auspices of the Lincoin Central Trades and Labor union, but without any authority from that body; that as a matter of fact he was in the pay of the railroads and the business men's association, which was endeavoring to defeat the prohibitory amendment, and that he was expelled from the Knights of Labor after a due trial. The Call alloges in its reply that it denies the facts were false and untrue, and that its publication did not bring plaintiff into the ubiic scandal, disgrace and disrepute he claims; that they published the communica-tion handed in by one F. L. Leighton, in whom they had full confidence as to truth whom they had full confidence as to truth and veracity; that the publication was made in good faith and without matice.

The case was originally set for hearing before Judge Hail, but the plaintiff filed an

affidavit in which he set forth that he could not get a fair and impartial trial before Judge Hall because of his personal bias and prejudice. The morning session was conumed in empanneling a jury.

Supreme Court. Morrissey vs Broomel and McCormick vs Omaha, argued and submitted. Work vs Brown, submitted on metion. Court ad-journed to Tuesday, March 1, at 9 o'clock a. m., when the causes from the Seventh district, comprising Saline, Filimore, Thayer, Nuckolls and Clay counties will be called The following decisions were handed down First National bank vs Security Nationa

bank of Sioux City, error from Douglas county, reversed and remanded; Angio American company vs Evans, error from Douglas county; affirmed; Coie vs O'Brien, error from Dawson county, reversed and re-manded; opinion by Mr. Justice Norval; Stone vs Neely, error from Buffalo county, petitioned dismissed; Elliott vs. state, error rom Chevenne, reversed and remanded; Michelson vs Hyde, appeal from Wasning-ton county, affirmed; Mace vs Heath, appeal as county, aftirn Will Inspect by Districts.

Oil Inspector Heimrod has divided the state into ive districts for the purpose of systematizing the work in his department. The first district will include Douglas, Sarpy and Cass counties and will be in charge of Deputies White and Forbes. The second district embraces Lancaster, Seward and Saline counties with Deputy Kittle in charge. The third district is composed of Otoe and the southwestern counties under the supervision of Deputy Devinney. The fourth district is made up of Platte and other northeastern counties, while the fifth embraces all the western and northwestern conties. Inspector Davis will have control of the latter two districts.

IN EMBRYO.

Idea for the Public Library Which Architects Must Develop.

The public library authorities have prepared a rough sketch which they call "Information for Architects," which embodies their "idea" of what the new building shall be. This idea the architects will be asked to be. This ifea the architects will be asked to elaborate, and only the accopted plan will be paid for. The sketch contemplates drawings on a scale of one-eighth inch to the foot, without color, of a brick building 130x65 feet and three stories high, complete as to plumbing, heating, ventilation, etc., and to cost about \$80,000.

The basement is to provide space for storage of books, etc., and heating space.

The first floor has a vestibule 30x30 feet, in which are the stairway and elevator, and entered from Harney street. Opening into the vestibule on each side are the two library rooms to contain the book cases, and in the rear of the vestibule is the office.

The second floor is precisely the same as

FOUND AT LAST

After Years of Unsuccessful Search for a

Cure, Martin Anderson Gets Relief from the Chinese Doctor-A Voluntary Testi

To whom It May Concern:
This is to certify that I have been a constant sufferer for many years with catarrh, asthma and bronchial affections.

tions of the throat, and tried all the

patent medicines and remedies I ever

heard of, but with no success. I treated

with doctors in various parts of the

country, but none of them could do me

any good further than giving me short temporary relief. I suffered night and day, and continued to grow worse not-

withstanding all the medicine I had

taken. I had almost given up my case as hopeless when I was informed by a friend of Dr. C. Gee Wo, the Chinese

doctor, and advised to go and see him in the hope of getting relief at least, if not a permanent cure for my trouble. I was

slow in making up my mind to make such a radical change in my treatment, as I knew a trial with the Chinese doc-

tor would bring me, but I finally con-

cluded to give him a trial, so I called at

his office with that intention. I round

the doctor a clever, entertaining gentle-

man, thoroughly posted on my condi-

tion, and it took only a very short time

to convince me that he was the party I was so long in search of. He told me my case was curable, and that he could

care me, and prepared me a special

treatment to suit my condition, and in

two weeks I was so much better that I

had the fullest confidence in the doctor's

ability and committed my case to his

treatment. I continued to grow batter

rapidly and am now entirely well. I

owe my cure to Dr. C. Gee Wo, and am

not ashamed to admit it. I advise all

who want relief from their troubles to

call on Dr. C. Gee Wo, and they will be

cured. For all particulars apply or write to MARTIN L. ANDERSON,

IR. C. GEE WO,
