FANCY FIGURES ON FIXTURES

Charge That Omaha Paid Dearly for City Hall Vault Equipment.

ONE FIRM THAT COULD NOT GET A BID

Mr. Hoffman Says He Was Snubbed by Omaha Officials and That this City Got the Worst of the Bargain,

When the grand jury adjourned for a vaca tion it was understood that the alleged irregularities in the award of the contract for vault fixtures in the new city hall would be taken up for investigation. Prospects now are that nothing will be done in the case, as the man making the charges is too busy to come to Omaha to hold a seauce with th grand jury.

H. J. Hoffman of Chicago, secretary of the Hoffman-Keefe File company, made the charge to the city council that the Fenton Metallic Manufacturing company and the Office Specialty Manufacturing company were in collusion, and that Omaha paid very dearly for her \$7,000 contract on city half

want first trees.

"How do I know there was a pool!" said candid Mr. Hoffman, when asked to give the Chicago representitive of The Bee his authority on this point. "Why, I was in a pool with 'em myself under a \$1,500 forfeit at Grand Rapids."

So far as my motives in writing to the Omaha city council are concerned, continued he, I do not pretend that they were philanthropic. I am a business man and I acted from purely business motives. I un derstood that the contract had not been fin ally let to the Fenton company, as I had at first supposed, and that if we could show how the city had been swindled we might get some show. I find that I was mistaken, however and now have no special interest in the mat ter. I have been asked to submit the evi dence of my charges to the grand jury, am too busy to take a trip to Omaha and as there is nothing to compensate me for the time and expense, I hardly see how I could be expected to do so. If the contract were still open it would become a purely business transaction, and of course we should present our case as fully as possi ble. As it is, I am willing to assist an inves-tigation all I can, and will give the grand jury and the general public what we have through the columns of The Bee.

Could Not Get Information.

"In the first place there is, it seems to me strong evidence to any practical man that things were not right in the way in which we were treated. I learned through one of our journals that bids were to be called for at Omaha, and wrote at once to the mayor ask ing for information on the subject, and in closing circulars to show the reliability o our firm. After waiting a reasonable length of time and receiving no reply I wrote to the city clerk with the same result. I sen a half dozen letters to various city officials but failed to get a reply from any of them. Finally we learned, entirely by accident, when the award was to be made. This in-formation came through an Omaha furniture

"We at once sent our agent to Omaha. He arrived the day before the letting of the con tract and learned that no bids would be con-sidered unless accompanied by a certified check for \$500. He wired us and we mailed such a check at once. The Merchants Ex-change bank of Milwaukee, on which it was drawn, at our request, telegraphed the chairman of the committee making the award that such a check had been drawn. This, it seems to me, should have been sufficient, if the matter had been entirely fair and regular, to have entitled us to a hearing. that our check was not in hand at the time

Paid More Than Schedule Price.

'Now as to the price paid by Omaha, the fact that she paid 10 per cent more than the schedule price and twice as much as has been charged elsewhere by the Fenton company for the same work, both before and since the letting of the Omaha contract, is easily proven and is a very simple problem in arithmetic which any Omaha citizen can

'An examination of the bids made by the An examination of the bies made by the same company for vaults in the court houses of Whitely county, Indiana, Clark county, Wisconsin, Livingston county, Michigan, and Kane county, Illinois, will show that they furnished the same goods at from 50 to 60 per cent less than Omaha agreed to pay, and this, too, in spite of the fact that the Omaha contract is much larger than any of those named. A still greater difference will be found between the Omaha figures and those named in vault contracts for county build ings at Appleton, Wis., and Hampton, Ia., made since the letting of the con-tract at Omaha. So that the Fenton company can hardly claim, as it did at Grand Rapids, where one of its contracts was rescinded on a similar showing, that the pattern and therefore worth more."

You've No Idea.

How nicely Hood's Sarsaparilla hits the needs of people who feel "all tired out," or "run down," from any cause, it seems to oil up the whole mechanism of the body so that all moves smoothly and work becomes positive delight. Be sure to get Hood's.

Hood's Pills act especially upon the liver rousing it from torpidity to its natural duties cure constipation and assists digestion.

THE CITY SHOULD GO SLOW.

City Engineer Rosewater Discusses th Proposed New Conduit Scheme. City Engineer Rosewater is of the opinion that the ordinance granting the new Thomson-Houston Electric Light company to lay pipes and construct conduits in streets and alleys should be the subject of the most care fut consideration. It is, he says, a most immost important privilege and there are a great many provisos and reservations which should be incorporated. The ordinance, in order to be considered intelligently, should be in the first place referred to the engineer-ing department. He would also be very careful that the bill should be drawn by the city and in the interests of the city and not

by the company.

Again, he is not decided as to the advisa-Again, he is not decided as to the advisa-bility of the city giving to any corporation the privilege proposed. Every one knows that the tendency all over the country is toward municipal ownership of gas, electric lighting, water works and all similar public improvements. With this in view the good policy of allegating the privilege of conimprovements. With this in view the good policy of alienating the privilege of constructing conduits is open to question. Mr. Rosewater, however, has not seen the ordinance and is not in a position to speak on its

merits or demerits. A Kansas Man's Experience with Coughs

Colds and coughs have been so prevalent during the past few months that the experi-ence of Albert Favorite of Arkansas City, readers. Here it is in his own words: "I contracted a cold early last spring that settled on my lungs and had hardly recovered from it when I caught another that hung on all summer and left me with a hacking cough which I thought I never would get rid of. I had used Chamberlain's cough remedy some fourteen years ago with much success and concluded to try it again. When I had got through with one bettle my cough had left me and I have not suffered with a cough or cold since. I have recommended it to others and all speak well of it." 50 cent bottles for sale by druggists. sale by druggists.

Visited Courtland Beach. A number of the members of the city council formed a delegation that visited Courtland Beach yesterday. The object of the visit was to learn more regarding the proposed

summer resort.

Mayor Bemis, in speaking of the action of the council in adopting the concurrent resolution authorizing the appropriation of \$1.500 to be used in the construction of the Ames avenue bridge, leading to the beach, said that he had not yet made up his mind as to whether or not he would approve the resolution. approve the resolution.

Mrs. E. M. Henry, Norfolk, Va., says: "Finding much relief from headaches in the use of Bradycrotine, I am desirous of introducing it in our new hospital."

GRAND OPENING-SPRING 1892. Our Three-Story Building Overcrowded With Bargains

We are now ready to show you our spring stock. We have a pleasant surprise in store for you. We are going to sell goods this spring cheaper than anybody. You naturally ask, why? We pay the least rent of any clothing house in town. It is true we are overcrowded for room and things are not as comfortable for us as they might be. We are compelled to carry the bulk of our immense stock on the second and third floors; it makes our rent cheaper, and therefore enables us to sell you at such small margin. Our next reason is, we give no credit, and consequently don't lose a cent on bad debts. Last, but not the least reason is, we pay for every dollar's worth of goods as soon as they reach our

This spring we have taken advantage of several Al houses that were a trifle short for cash on account of slow collections, and they jumped at our cash offers that we made for some of their choicest spring productions. These goods are put on sale today. We name vou a few of them:

Choice of 100 different styles of men's suits. Amongst them you will find plain gray solid cassimere suits worth up to \$12.00; our opening price is \$6.75.

Choice of 75 different styles of men's suits. Amongst them you will find black corkscrew worsted worth up to \$18.00; our opening price, \$9.50.

SPECIAL! SPECIAL! SPECIALI Russell & Gorman, 724 Broadway, New York, had 500 pair of pants of two styles. We cleaned them out. These pants are made of good durable material and are warranted not to rip. No better working pants were ever offered for sale in this city. They would be cheap at \$2.25. Our opening price is \$1.39, and a pair of suspenders goes with them free. Crush hats in all shapes and colors worth 75c, our opening price 45c.

Pure fur stiff hats worth \$2.00, our opening price 99c.

Teck scarfs worth 35c, our opening price 15c.

Silk web suspenders with drawers catches worth 50c, our opening price 19c. Jersey knit overshirts worth \$1.00, our opening price 50c. White merino undershirts or drawers,

our opening price 38c.

Fast colored black hose worth 25c. our opening price two pair for 25c. Socks worth 15c, our opening price three for 25c.

Keep both of your eyes on our show windows this season; it will pay you PEOPLE'S CLOTHING HOUSE,

1303 Douglas st. P. S.-Take any of the above advertised articles home and if not satisfactory they can be returned the next day (providing they are unsoiled) and money will be refunded.

New Postoffice Notes. Speaking about the resolution passed by the executive committee of the Manufacturers and Consumers association relative to the iron work on the new postoffice building, Mr. Beindorff, the superintendent, said : "The Manufacturers and Consumers assothat the columns known as the Phoenix col-

umns were a patented arrangement. That particular kind of a column was first introduced by the Phoenix mills of Philadelphia, but it can be made now by any mill having the capacity to make such a column without paying any royalty to the Phoenix mills. I agree with the passers of the resolution introduced in the Manufacturers association in one particular. That is with reference to letting bids for castiron instead of steel columns, I believe that castiron columns are just as good where they are made of sufficient altogether in Chicago because they get mor strength for the weight. In a ight, high building the steel column presents that advantage, but in this building the question of weight will not cut so much of a hgure. If castiron columns were used the Omaha foundries could compete, but it will be impossible for the Omaha foundries to compete in the bidding for the furnishing

of steel columns.' Referring to the preliminary work on the foundation Mr. Belndorff said that Mr. King would begin work within a week if the veather continued favorable.

This is to testify that I have tested the medical properties of Dr. J. B. Moore's Tree of Life remedy to my entire satisfaction, and can most heartly recommend it to the suffering and afflicted everywhere, to be all claimed for it in the above statement. Last spring I was suffering from loss of appetite, constination, etc., originating from kidney and liver trouble, and I had not used one bottle of this great life remedy until I was greatly relieved. My wife, also, being at a very critical stage in life, was suffering much at times, and by the use of this remedy has been saved from much suffering and possibly from pressure. sibly from premature death. Our youngest son's health for several years has been very delicate. He contracted some lung trouble by taking fold with mensles, which produced great nervous debility and occasional bleeding of the lungs; he has used some four bot-ties of Tree of Life, and feels and looks as though new life had been given him. If you

are afflicted, try it.

AFFAIRS AT SOUTH OMAHA

Immense Improvements to Be Made in the Various Packing Plants.

SCOPE OF THE CONTEMPLATED CHANGES

It Will Place Omaha Near the Top As Packing Center-Details of the Plans-News Notes and Personals.

During the past month each of the four great packing houses located here have been bard at work upon the plans for the extensive improvements of the coming season. That they have unbounded confidence in the future of South Omana is evinced by the magnitude of the improvements contem plated. The additional investment will reach nearly \$1,000,000 and the capacity of the plants will be nearly doubled. The extensions will necessitate the employment of about 2,000 additional men exclusive of the large number who will be employed in the construction of the new buildings and the putting in of a vast amount of additional machinery. The new buildings will all be built of the best material and supplied with the

most improved equipments,

To decide upon the details of so extensive an undertaking has required considerable time and an immense amount of work. The approval of the plans for the contemplated improvements of the George H. Hammond company has been delayed from the fact that the highest officials of the company are in Europe and communication was necessarily slow.

A favorable decision has at last been reached, however, and The Brz is able to give a complete and detailed review of the improvements decided upon by all the packers except the Omaha Packing company, whose plans are still in embryo.

It is the intention of the Hammond company to entirely supercede the wooden build a new double brick structure. The exact ground area of the new building has not been exactly determined, but it will be a much larger and more substantial structure.

than the present one. It will be four stories high, and the cattle and hog killing departments will be included under one groot, but constructed separately. The beef depart-ment will be equipped with all modern ap-pliances. The killing will be done on the fourth fleor. The estimated cost of the building and machinery is \$200,000 and when completed the capacity of the plant will be 1,000 cattle, 3,000 nogs and 1,000 sheep a day. An additional force of 400 men will be required. The piledrivers will begin work on the foundations in a few days and the beef house will be finished and in operatio by August 1.
The improvements at the Cudahy Packing

company's plant will cost about \$250,000 and comprise six large new buildings; which will comprise six large new bulkings which which cover an area of three and one-half acres. The largest building will be the beef house, 90x225 feet and five stories high. This will be erected immediately west of the present beef house, and will extend to Thirty-third street, across Thirty-third street and north of pepsin works an immense warehouse will be built. This will be two stories high with a ground area of 165x27s feet. It will be used as a hide cellar and cooperage and for the storage of canned goods.

A new butterine factory 60x100 feet and

three stories high will be erected immed-iately west of the present butterine factory. The new building will have a capacity 150,000 pounds of the product per week. The old butterine factory will be added to the leomargerine department. A two-story tin shop 125x150 feet will be

built west of Phirty-third street and north of the present tiu shop. The additional build-ing will make the daily product 75,000 packages, which is about double the present capacity.

The fertilizer department will be increased

by a new building 50x100 feet. The old tin shop will be added to the canning department, which will give the latter a capacity of 150,000 to 200,000 pounds a day. A new repair shop 75x150 feet will be located immediately east of the old hog house. To allow this the loading chutes of the stock yards company will be removed and the tracks which traverse the site of the contemplated milding will be moved north of the old re-

The additional power required by these improvements will be supplied by eight new boilers of 100 horse power each, and an additional 159 ton ice machine will be put in.
The total capacity of the plant when the projected improvements are completed will be 3,500 hogs per day in summer and 5,000 in winter, 1,200 cattle, 500 sheep and 200 caives. The number of men employed will increased from about 1,800 to 2,500. W has already been begun on these improve ments, which will make the Cudahy plant one of the largest and most complete in the

United States The additions to the plant of Swift & Co will increase their capacity about 25 per cent. Work is already under way and it is expected that some of the new denagrments will be in use some time in May. The prin cipal new building will be six stories high, with an area of 64x193 feet. It will be creeted along the unloading chutes running between the old and new houses and be divided into three compartments. The southern end will be used for cold storage, the lard, sausage and cooperage departments and for general storage. The next will be occupied by the smoked meat department, and the smoke houses will occupy the third. A boiler and engine room 80x176 feet will

occupy the site of the old ice house. A large addition will also be erected south of the be used as shipping coolers for hogs, sheep and caives. The capacity of the plant as im proved will be 9,000 cattle, 21,000 hogs and

main building and facing the east track 5,000 sheep per week.

and Douglas Sts. Omaha, Neb. . . Pound Notice.

Taken up and inpounded in the city of Omaha on the 1st day of March, 1852, one year-ling heifer calf, spotted, part Jersey, which will be, if not redeemed before sale, sold at Gublic auction to the highest bidder for cash, on the lith day of March, 1872, at 11 o'clock in the forenoon. IL-PULASEI, Foundmaster.

OBAHA, March P, 1892. N3datM

of the spring season is always a welcome time in a large clothing establishment, such asours, to every Individual connected with it, from the heads of the house to the youngest salesman employed in it; from the man who buys the goods to the man who tells you about them in the papers. After long months of hardlin thick, heavy goods in dark and sombre colors, to turn to the handsome shades and colors of spring, is like turning from a dead stump in g pasture to a fragrant bed of pansies in full bloom. This spring it's a little "more so" than usual. Such a radical change in styles has not been known in years before. Particularly is this true in

The shades and colors have never opened up as handsomely as this spring's productions. New shades of brown and blue and gray; toney tans; handsome modes, and nobby mixtures in countless blends. New styles in pin-head checks and "eighth inch effects." New plaids and stripes. No man can tell, and no man can imagine when he is told how handsome the new things are without a look.

Our entire new line of Spring Suits for men will be ready to inspect any day this week. Homespuns, Cheviots, Wales, Corkscrew, Diagonals, Worsteds, Cassimeres, Meltons. Serges, in Cutaways or Sacks, bound or plain. -Drop in-bring your pocketbook--not much money--you'll have a new spring suit to wear next Sunday.
