The democrats were willing to concede the people's party their congressmen in the five districts now represented by alliance men, and the people's party would give the democrats the candidates in the First and Second districts. Gov ernor Glick stated that there would compromise on the electoral and state tickets which would be satisfactory to both parties.

POOR OPINION OF ASPHALT. What the Denver Special Committee Says

About Paving Materials. Chairman Birkhauser of the Board of Pubic Works has just received a printed report of the special committee on public improvements sent out by the city of Denver last summer to investigate public improvements in all the leading cities of the country. They visited New York, Boston, Chicago, St. Louis, Philadelphia, Washington, Rochester, Buffalo, Detroit, Milwaukee, Brooklyn, Omaha and Kansas City.

The following partly expresses their opin ion of what they saw here: "The sheet asphalt placed by the Barber company in Omana is the worst asphalt paving your committee saw in any of the cities visited. The Barber company has given so little at tention to repairs and the streets are in such a deplorable condition that the council has ordered the city attorney to commence seedings to annul the contracts with the Barber company."

The committee concluded that granite block was the only paving for business sec-tions or streets subject to heavy traffic. It

DON'T LIKE AMERICANS In Omaha Man Tells of His Experience

During the Chilian Trouble. Mr. J. G. Williams, formerly a citizen of ebraska, but a resident of Peru during the five years last past, is visiting friends in Omaha. He is engaged in horse raising in Peru and has made something of a study of the resources, the politics and the social conditions of the people down there. Mr. Williams feels very indignant over the action of the United States navy in the Chilian affair. Speaking of the matter he said : "Citizens of the United States who are now residing in Central and South American countries are nearly all ashamed to say that countries are nearly all ashamed to say that they are Americaus. Captain Schlev of the Baltimore had an opportunity to have isnpired the South and Centarl American people with respect for the United States and its people but he failed to improve it. He should have demanded the release of the men who were arrested within half an hour or turned his arrested within half an hour or turned his guns upon Valparaiso and shelled it until the Chillan authorities came to time. That' what an English captain would have done under similar circumstances, and the Chilians know it.

"In all the Central and South American countries the people respect the English and the English flag because they know that the English navy will protect its people in any port under the sun. On the other hand the Spanish Americans have little or no respect for Americans, because Americans have vory little protection from their government.

"I was arrested once in Mexico and thrown in jail because I attempted to cross the border into another province without a passport. When I was put in jail the guard asked me what protection I claimed. I said America. He laughed in my face and said: 'Do you see that dog there? He claims American protection, too,' and then he gave the dog a kick. I told him he couldn't kick me and he tried it. I knocked him down and got thirty days in jail for it. I am sorry to say it, but it is a fact that the United States is looked upon with general contempt by nearly all the people in Spanish-American countries, while England is respected and Englishmen are in great favor down there. JUST A LITTLE HELP.

That is all Which is Required at This Time

of the Year-Do You Know What to Do?

We hear a great deal, just now, about Spring

nedicines. It is known that people feel run

down after the labors and sieze of winter, and it is assumed they need a spring medicine

This is not true. Spring medicines are not needed; nature will throw off the rheams in

the blood which have accumulated during the winter, if she has only a little help. Nature is

able to clean her own house, and take care of

her own household, with a little assistance,

and a little gentle stimulant is all the Spring

medicine anyone requires. "Rut," you may say, "what do you mean by stimutant, and

what do I require?" We answer, something

absolutely pure, powerful, and which has been

proved to abundantly answer the purpose

Convestionably, whiskey, if of the right kind,

is the proper thing to use, but unfortunately,

there are few good whishles in the market, and only one which is absolutely pure, and

possesses medicinal qualities. That whiskey

is Duffy's Pure Mait. It has been upon the

market for years. It has the unqualified en-

market for years. It has the unqualified en-dorsement of physicians and chemists, and it is the only whiskey which can be recom-mended. It is true certain unserupulous druggists and greers seek to sell other and inferior goods, claiming they are equal to Duffy's, but they possess little purity and no medicinal power whatever, whereas Duffy's is specially designed as a medicinal whiskey. It would be well to bear these facts in mind when considering the subject of Spring medicines, and how to best put the system in shape for the requirements of the season.

SAYS WE HAVE NO RIGHTS.

Opinion of a Montreal Paper on the Bering Sea Controversy. MONTHEAL, March 15 .- The Montreal Ga-

ette, the official organ of the dominion government, in an inspired article says: The early portion of Senator Sherman's remarks on the solution of the Bering sea question is all that could be desired. The tone of friendliness (which we are glad to acknowledge is no new thing with him) in which he speaks of the relations that ought to prevail between the United States and the motherland does honor to his patriotism. But the senator soon swerves from the line of good will and impartiality and takes things for granted in an astonishing way when he talks of pre-venting 'poaching' on rights that were pur-chased from Russia and which the United States have openly asserted and enjoyed 100 years. We are at a loss to know what this neans. It is only twenty-five years since the bargain was concluded by Secretary Seward ; it is only eight years since what i meant by the word 'poaching' was taken any notice of by the United States authorities, and as for purchased rights, those so called rights while unpurchased were disavowed such by successive Washington adminis
