

FOUR WEEKS OF HIGH LIFE

Trumpeter Dixon's Days Are Numbered and Not Very Numerous.

DIM HOPE OF EXECUTIVE INTERFERENCE

Federal Court Officers do Not Look with Favor on a Commutation - All Rests with President Harrison's Clemency.

Unless President Harrison extends executive clemency, Omaha is booked for another legal execution four weeks from next Friday.

According to the sentence imposed in the federal court two months ago by Judge Dundy, Clinton E. Dixon will on the 23d of April expire on the gallows the cold-blooded murderer of Corporal John R. Carter at Fort Niobrara, September 30, 1891.

The condemned man's attorney has been unable to procure an interview, but the general sentiment among the court attaches and those familiar with the history of the case is that nothing will be done to prevent United States Marshal Slaughter from carrying the sentence into effect.

That the matter is receiving attention at Washington was evidenced yesterday by the receipt of a letter by United States District Attorney Baker, who prosecuted the case, from the attorney general, asking for an expression from him as to the expediency of extending executive clemency in the case and the opinion of Judge Dundy as well.

Mr. Baker attached to the letter a copy of a letter, but when asked what his reply would be he was seized with an attack of temporary mental aberration, and he was obliged to retire and the patient showed symptoms of a serious relapse every time an attempt was made to recur to that subject.

Little Hope Here.

Unless the prosecuting attorney's opinions have lately undergone a change, however, it is almost certain that his reply to the attorney general's letter will not brighten the condemned man's chances for commutation. Mr. Baker has repeatedly expressed himself, ever since the application for executive clemency was made, to the effect that the sentence imposed should be allowed to stand.

He has declared that if the law punishing malicious murder with death were to be enforced this was a case where it could certainly be carried into effect.

He has stated that he was not an ardent advocate of capital punishment, but he has never, because he considered it not severe, but because it was a serious obstacle in the way of convicting murderers and was the cause of many of the crimes committed by their victims. He has asserted upon more than one occasion that never before in the trial of a case, either civil or criminal, did he allow the defendant such leniency as he has shown in the trial of Dixon.

It is known that he refused to sign a petition for commutation of sentence, reiterating at the time his firm belief that the verdict was just and that nothing should be done to interfere with the carrying out of the death sentence.

It is, therefore, quite safe to predict that in one more going over the case, all the evidence of which is now in the hands of the attorney general, the district attorney will again declare against executive interference.

Did Not Sign the Petition. It has been ascertained that the statement that Judge Dundy had signed the petition in behalf of Dixon was without foundation, and the same is true as to several of the jurors. Judge Dundy has been outspoken regarding the case and at no time has he regarded a commutation of the sentence with favor.

What the president will do is, of course, as yet only a matter of conjecture, but the indications at this end of the matter do not look particularly promising for Dixon.

The murderer is still confined in the county jail and it is there that he will meet his death in case the sentence is carried out. In this case the neat stockade and gallows will probably be again called into requisition.

ANOTHER BEET SUGAR PLAN

An Omaha Firm Proposes the Establishment of a Mammoth Industry.

EMPLOYMENT FOR THREE HUNDRED MEN

Farrell & Co. Will, on Certain Conditions, Put in a Beet Sugar and Glucose Factory in East Omaha This Season.

It is likely that East Omaha will have an immense industry in the shape of a combined glucose and sugar beet factory.

Farrell & Co., jobbers and manufacturers of syrups, molasses and vinegars, through Daniel Farrell Jr., made, a week ago, a proposition to the East Omaha Land company to the effect that Farrell & Co. would establish such an industry on certain conditions.

Since beet sugar has attracted so much attention in Nebraska this year, and as it seems to be a difficult task to interest farmers in its culture, even to supply the demands of the two factories at Grand Island and Norfolk, and the firm knowing that East Omaha has been yesterday the scene of a similar proposition for the establishment of the factory was made to the land company.

Mr. Farrell was seen yesterday in regard to the project. He said that the land company had been asked to donate the ground and erect thereon a building to the value of \$10,000. If the land company would do this the company would put in a plant that would cost \$300,000 and employ three hundred men.

The factory, if established, will be for the manufacture of refined sugar or glucose. The plant for the combination will cost, he says, but little more than it would for either industry alone. Mr. Farrell further stated that the enterprise would give employment to at least 250 or 300 persons.

As yet the land company's board of directors have not had time to take action upon the proposition, but it is thought they will as soon as possible, as Farrell & Co. have already offered to commence work at once as they agree to have the factory in running order before snow flies next winter.

Mr. Farrell says each man living in East Omaha can lease four acres of ground from the land company and can till the soil in the early morning hours, but when it is time to plant the factory in which he may be employed and can cultivate the best after he gets through his daily toil each evening.

As yet the land company's board of directors have not had time to take action upon the proposition, but it is thought they will as soon as possible, as Farrell & Co. have already offered to commence work at once as they agree to have the factory in running order before snow flies next winter.

On four acres twenty tons of beets could be raised and the company agrees to pay \$5 a ton for the product, whether the market price reaches one-half that amount or not.

"This would be a great industry to build up East Omaha and Omaha as well," said Mr. Farrell. "If we cannot get enough beets raised to run our factory continuously making sugar, we will put in the rest of the time manufacturing glucose. Our company has also another scheme to build the factory now located at St. Joseph. We are considering this, but will take no action until we see what we can do in East Omaha."

The doctors are very much displeased over a competitor who is gradually winning their best practice; we mean Dr. Bull's Cough Syrup.

To Manufacturers—Accidents are constantly occurring from the use of machinery, and the loss of time and suffering. Keep Salvation Oil handy. Price 25 cts.

Omaha compressed yeast strictly pure.

C. D. Woodworth & Co., successors to Welty & Guy, 1316 Farnham street, manufacturers and dealers in harness, saddles, etc.

NOT RUSHING TOWARD ALASKA

The report that Captain Lavender had been ordered to depart at once for Alaska seems to have been erroneous.

HE CAME IN FROM DAKOTA

He came in Monday from Dakota and will leave tonight for San Francisco to look after some business for the Treasury department.

He would return a few days to Omaha, as the business he has on hand will require but a very short time to dispatch.

There would be no use in my going to Alaska now, as the report that I am not a man-of-war and, furthermore, there are no seals on the Seal Islands at this time of the year. I shall probably not start for Alaska until about the first of May."

A Kansas Man's Experience with Coughs and Colds. Colds and coughs have been so prevalent during the past few months that the experience of Albert Favorite of Arkansas City, Kan., cannot be regarded as an unusual one.

He contracted a cold early last spring that settled on his lungs and had hardly recovered when he was caught another at his home in the summer and left me with a hacking cough which I thought I never would get rid of.

I used Chamberlain's Cough Remedy for fourteen years ago with much success and concluded to try it again. When I had got through with one bottle my cough had left me and I have not had it since.

I have recommended it to others and all speak well of it. 50 cent bottles for sale by druggists.

You are invited. Visit the Essor Institute, South Omaha, and investigate the cure for liquor, opium and tobacco.

HALF FARE EXCURSION To the Hot Springs of Arkansas Via the Western Railroad.

On April 7 and 8 the Wabash will sell round trip tickets at above rate, good returning until May 10.

LITTLE BOYS

boys from four to fourteen years old, whose clothes are getting "frayed" and who are "afraid" that they won't have any new ones on account of mamma's Easter bonnet or "Dads" new spring overcoat costing so much money—are requested to call their parents' attention to the fact that we are going to sell during the present week Knee Pant Suits—made of handsome all wool brown plaid cassimere, for two dollars—and very fine Havana brown diagonal Knee Pant Suits for three-fifty—just your size.

BIG BOYS

boys from thirteen to nineteen years old—who have arrived at that time of life when they want their clothes to look as near like a man's as possible in cut—in style—in pattern—can get fits (in suits, of course) during this week in very fine all wool diagonals for five dollars and seventy-five cents. These suits are in three pieces, coat, vest and long pants, and are "right in line."

LITTLE MEN

boys in years but men in experience, particularly the ones who have to get out and hustle to earn their own living, and who have to make every dollar count for all there is in it, will have an exceptional opportunity to make a dollar do the work of a dollar fifty this week, by taking advantage of our sale of young men's suits, ages 13 to 19, strictly all wool, handsome patterns, at four dollars a suit (exactly two dollars under value).

BIG MEN

little men, short men, tall men, stout men, slim men, strong men, weak men, "square" men, "flats," "rounders," and in fact every man, is hereby cautioned against buying a spring overcoat without "Nebraska Clothing Co." on the hanger inside the collar. To do so means a loss of from three to eight dollars. "Nebraska's" spring overcoats are \$5, \$6.75, \$7.50, \$9, \$10.50, \$11.50, \$14.50, \$18.
