Interest in the Eiseman Failure Very Suddenly Revived.

ASSIGNEE MACCONNELL IN CONTEMPT

Judge Deemer Anxious to Know Why He Ignored Recent Instructions-It Was Merely an Oversight and of No Importance.

Interest in the Eiseman failure was revived yesterday afternoon by the fact that Assignce S. P. MacConnell had been cited to appear before Judge Deemer forthwith and show cause why he should not be punished for contempt in disregarding the order of the court to make a report and show the status of the broken firm. The attachment was sworn out inte Tuesday evening but service was not secored upon Mr. MacConnell until about 4 o'clock yesterday afternoon. The action was taken upon the request of the Chicago Toy and Fancy Goods company, one of the Eiseman creditors who has grown weary of the long and voiceless delay, and was taken through the local legal representa-tives, Sims & Saunders. There were some rumers of a rather sensational character flying around that seemed to have no place for an origin, and were to the effect that the assignce's report would be rather leteresting

Assignee MacConnell was considerably surprised and still more chagrined when the notice reached him, and he repaired to the court and the attorneys for the complainant and satisfied them by an agreement to file the report asked for on Saturday afternoon. Seen by a Bre reporter yesterday after-noon, Mr. MacConnell said: "Yes, I guess I'm in contempt of court, but I don't believe lought to be punished very badly. It was due to an awkward oversight that ought to be easily excused, and yet does not deserve an excuse. About three weeks ugo I was served with a notice from the court ordering me to make a report as assignee. In fact I was served with two notices. I simply glanced at them and sent them up stairs to Mr. Baldwin, who has been the attorney in the case from the start. But Mr. Baldwin had just gone out of town and did not return for several days. The day he did return I left, but forget to call his attention to the notices. As a consequence they were buried and I utterly forgot all about the matter until it was forcibly called to my attention this afternoon, and I immediately called Mr. Buldwin's attention to it. I have been ready to make a report at any time, and don't want to be in contempt of the district court or any other court. The report next Saturday will simply show the amount of money that was realized by the sale of the goods here and in the store at Missouri Valley and the necessary expenditures. It will contain nothing sensational and nothing any interest to the public. The t that every dollar of the money 1 everything else was attached 1 garnished immediately after the validity of the assignment was attacked rendered it really unnecessary for me to make a report. There was little else but that cold fact to report. There are about seventy-two of these cases, and if we could have suc-ceeded in getting one of them to trial and decided all would have been settled up be-

ore this. That is all there is to the matter that is of the least possible interest.".

There has been a good deal of work done the case within the last few weeks by the rms interested in breaking the assignment, and when the matter gets into court, which will not be before next September, it will attract considerable attention.

I have just received a new line of laster pattern hats and bonnets. Mrs. M. Pfeiffer.

Getting Ready to Build. There was one pleasant feature of the utterly vile day yesterday, and that was the presence in the city of a number of head officials of the Northwestern Railway comf pany from Chicago, who came out in a speciacar to complete the financial arrangements for beginning work on the new depot on Broadway, The party comprised Chiel Engineer J. F. Blunt, Advisory Engineer Johnson, W. D. Hodge, engineer of the Iowa division and Division Superintendent Mark Hopkins of Boone. They spent a greater part of the day in viewing the grounds and taking measurements in order to complete the specifications. The contract for the work has been let to C. W. Grindle of Chicago, who has built all the depots of the tructure will be about 115 feet long and fifty feet wide, of pressed brieg and cut stone. It will be located about where the little baggage room now stands. The plans call for the complete remodeling of the yards. The main track will run on the east side of the depot. The present freight house will be moved back and enlarged to more than twice its present size, and when completed will be one of the largest in the state, large enough to permit the unloading of a whole train load of freight at one time. The depot structure according to the contract will cost \$35,000. The change n the yards will take away a number of the the tie yards will take away a number of the tracks and permit the depot to be surrounded by attractive grounds. The yards will be moved further north and there will be but little switching in the vicinity of Broadway. During the winter and fall over 200 cars of gravel had been unloaded and spread over the site for the new yards, \$11,000 has been expended in new bridges with three more yet to build, making a total expenditure in this city, after the completion of the work now under contract, of nearly \$100,000.

If the weather permits work on the new epot will be commenced within a week, and by the time cold weather comes again Council Biuffs will have the fluest passenger and freight station on the road outside of Chicago.

Planning to Break Jail. Among the tonsorial provisions for the care of the prisoners to the county jail is a pair of clippers, the use of which is permitted at times inside the cell room. The clipping machine was handed through to the pris oners the other day that they might do a little barbering, but when it was called for again there was a strange display of ignor-

ance as to its whereabouts. Each prisoner denied that he knew anything about it, and the sheriff and his deputies, having their suspicions aroused, made a most thorough search and investigation. The climping machine was found under the big cylinder, but the spring had been taken out and the machine otherwise demoralized. It was further discovered that the prisoner had attempted to convert the steel spring o the clipper into a saw for cutting the bars of the jail. In this attempt they had been folled. An investigation led to the selection of two of the more guilty ones in the plot, and they were put on bread and water diet.

Caught a Burglar. When W. T. Cole returned to his residence on Bluff street, near Woodbury place, last evening, he received indubitable evidence that somebody had been calling in the absence of the family. Things inside were in a chaotic condition, and an investigation of the cause brought the house owner into personal contact with a real bargiar. Cole had picked up a heavy coal shovel as he entered the house, and with this weapon he intimidated the thief and led him into the street, where an alarm was turned in, which brought the patrol wagon and Chief Scanlan and Captain Cousins. The fellow was taken to the station and locked up. He is little pore than a boy and is unknown to the police. He gave the name of John Moore. FOUND AT LAST

After Years of Unsuccessful Search for Cure, Martin And rana Gets Relief from the Chinese Doctor - 1 Voluntary Test

OMAHA, Neb., Jan. 18, 1812.

To whom It May Concern: This is to certify that I have been a constant sufferer for many years with catarch, asthma and beonehial affections of the throat, and tried all the patent medicines and remedies I ever leard of, but with no success. I treated with doctors in various parts of the country, but none of them could do me any good further than giving me shor temporary rollel. I suffered night an day, and continued to grow worse not withstanding all the medicine I had taken. I had almost given up my case as hopeless when I was informed by a friend of Dr. C. Gee Wo, the Chinese doctor, and advised to go and see him in the hope of getting relief at least, if not a permanent cure for my trouble. I was slow in making up my mind to make such a radical change in my treatment, as I knew a trial with the Chinese doctor would bring me, but I finally conluded to give him a trial, so I called at his office with that intention. I found the doctor a clever, entertaining gentieman, thoroughly posted on my condition, and it took only a very short time to convince me that he was the party I was so long in search of. He told me my case was curable, and that he could cure me, and prepared me a special treatment to suit my condition, and in two weeks I was so much better that I had the fullest confidence in the doctor's ability and committed my case to his treatment. I continued to grew batter rapidly and am now entirely well. 1 owe my cure to D. C Gee We, and am not ashamed to admit it. I advise all who want relief from their troubles to mill on Dr. C. Gee Wo, and they will be cured. For all particulars apply or o Martin L. Andruson, 3121 Cuming St., Cmaha, Nob. write to
