THE BALLOT is now even more popular than the ballot.

EMIN PASHA is dead. Now, we presume, we shall have another "stuffed prophet."

THIS weather is, of course, merely the result of the Manitoba waves coming via Minneapolis.

MAJOR MCKINLEY'S speech was one of the greatest ever delivered by a chairman of any political convention.

THE United Press and Mr. Blaine are having a dispute over the authenticity of an alleged Blaine interview. In this case we side with Blaine.

IT is a good movement contemplated by the city council to do away with the names of streets in outlying districts and designate them by numerals corresponding to those in the city proper.

IT COSTS something to have a wreck. The Santa Fe has suits for \$57,000 as a consequence of their May wreck in Missouri.

IOWA is going to be a famous fruit growing state. In Mills county, just across the river, there is a fruit farm of 700 acres.

FOUR-FIFTHS of the men who are now devoting their entire time to talk against the Nebraska Central proposition are paid for the work.

JUDGING by the indications at the Coliseum yesterday all of the exhibitors will be prepared for the opening of the state exposition on the 11th instant.

THE New York Tribune very truthfully says that "the republican party cannot afford to censure fidelity to its own principles."

THE better classes of Port Jervis and almost the whole northern press and people vigorously condemn the recent lynching in that town.

FOURTEEN hundred men are employed in the railroad shops in this city. No less than 10,000 persons are dependent upon the railroads for a livelihood.

A PROMINENT Chicago speculator says that the passage of the Hatch anti-trust bill will advance the price of grain from 10 to 20 cents a bushel by stopping excessive short selling.

A CORRESPONDENT complains that the street car conductors are insolent and inattentive. An effective remedy for this might easily be found.

CLEVELAND'S ZEALOUS FRIENDS.

The New York supporters of Mr. Cleveland are said not to have abated any of their activity since the May convention.

It is always expedient, however, not to put too much faith in estimates of this kind, and it is not particularly to the advantage of such a statement that it comes from Mr. Dickinson.

It is always to be borne in mind, however, that the aspect of the situation before the meeting of a political convention may be very materially changed after the delegates get together.

REMEMBER THE FLOOD SUFFERERS. There is every reason to believe that the unfortunate people who suffered by the flood of burning oil at Oil City, Pa., will be promptly taken care of.

THE fraud upon the public involved in the congressional "loaves and fishes" is remarkably illustrated in a pamphlet of sixty-four pages that comes free through the mails.

PROPOSED GERMAN CONSULATE. The movement to secure the establishment of a German consulate in Omaha is amply justified by the fact that this is the natural center of a great and rapidly growing German population.

ILLLEGAL IMMIGRATION. A bill has been reported in both branches of congress to facilitate the enforcement of the present immigration and contract labor laws.

THE purpose of the proposed bill is to secure certain changes in the methods of administering the existing laws of exclusion, the most important of which requires the steamship companies to prepare on the other side of the ocean descriptive lists of the immigrants for the use of the inspectors on this side.

There appears to be no reason to doubt that these changes would work satisfactorily. Senator Chandler, chairman of the senate committee on immigration, who has given this whole subject the importance of which is very great, most careful investigation and study is doubtless to be credited with formulating the proposed legislation.

ONE of the most prominent figures in the history of the Union Pacific railroad, Sidney Dillon, is dead.

THE doors of the Vanderbilts' new marble palace at New York are made of solid bronze and cost \$50,000. It would have been useless to wall the palace up solidly and live on the outside.

IT is stated that the height of the human body is generally ten times the length of the face; the face is as long as the hand; the arm is four times the length of the face; the sole is one-sixth the length of the body; and six times the thickness of the hand equals the thickness of the body.

There are scarcely any salmon left in the New England streams, and there are but two or three rivers in Maine where any may still be found.

Ducks fly at a speed of ninety miles an hour and with a stiff breeze they have been known to attain a rate of velocity of two and one-half miles a minute.

THE New York Press club is a thrifty and enterprising institution, and as a monument to its usefulness and enterprise is about to build a twelvemonthly building to cost with the ground fully \$500,000.

parting from foreign countries, who are not entitled to admission into this country. As a matter of fact the steamship companies are already exercising greater care than ever before in this matter, and there has been less complaint during the past year than for many years before regarding the coming into the country of immigrants of the forbidden classes.

Immigration thus far in the present year has been heavy, and it is to be expected that it will continue to be. The greater prosperity of the United States as compared with any of the countries of Europe is the chief incentive to this enlarged emigration, but next year the departure from European countries of the criminal classes, in expectation of a rich harvest in the new world, and hence it is important and necessary that the greatest precautions be taken to keep the lawless class out. The proposed legislation is intended to do this and congress ought to enact it at the present session.

MAKING PROGRESS. The campaign in behalf of the Nebraska Central project is progressing most favorably.

UNANIMOUS. Holman is wiser in his methods of the democratic majority in congress. So are the people.

THE LOCALS OUT OF SIGHT. How true and uninteresting are the accounts of things in local politics just at present. The big fish is on exhibition.

A POSSIBLE EVENT. The eight-tailed comet will be around again in 5,000 years, and may take a hand in celebrating the election of the next democratic president.

MODELS OF IDLENESS. Young men who aspire to a journalistic career must learn to formulate their thoughts in the fewest words possible. Study the recent correspondence of ex-Secretary Blaine and President Harrison.

WILLING TO RUN THE RISK. The report that the national capital is in such wretched sanitary condition that it is unfit for human habitation has not lighted a single congressional boom thus far.

INFORMAL JERSEY JUSTICE. The New York papers join very heartily in condemning the Port Jervis lynching, but in demanding that the law be promptly enforced.

CONGRESSIONAL FRAUD. The fraud upon the public involved in the congressional "loaves and fishes" is remarkably illustrated in a pamphlet of sixty-four pages that comes free through the mails.

BALTIMORE, Md., June 9.—Cardinal Ledowski, cardinal prefect of the propaganda, has addressed a most important letter to the bishops of the United States concerning the election of bishops in this country.

THE cardinal animates on the wonderful growth and prosperity of the Catholic church in this country and praises the hierarchy for their energy and zeal.

WHILE the apostolic see, says the letter, "has the interest of the church alone in view as appointing the bishops for the Christian world, it is more especially influenced by this consideration in naming the bishops for the United States, and in particular for the various dioceses."
