THE HURD-The finest refrigerator in Omaha this season. Made only in hard wood, has the finest system of circulation you ever saw, and filled with mineral wood. Mineral woo is a fibrous substance, converted to a fibrous condition. It is made by converting Scoria and certain rock while in a melted con-dition, to a fibrous state. It partakes of the nature of gloss, and in appearance consists of a mass of very fine fibres interlacing each other in every direction, thus forming an innumerable number of air cells. One of the most important qualities of Mineral Wool is its unequalled power to resist the transmission of heat and cold. This can readilp be accounted for in the fact that Mineral Wool in confinement holds greater proportion of air than any other material.

Cotton webb hose, warranted to stand 300 pounds pressure, 10c a foot.

### Furniture.

# \$2.75. \$2.75.
