Result of the Examination in the Eighth Grade of the Public Schools.

PUPILS WHO HAVE WON THE HONORS

Hard Questions Which the Scholars Had to Answer--Successful Candidates for Promotion--A Good Showing--Percentage of the Lucky Ones.

Did I pass is the question that interests several hundred pupils of the eighth grade in the Omaha schools just at present. These eighth grade pupils want to be freshmen in the High school next year and the problem of passing a satisfactory examination is therefore a very important one to them.

Between 300 and 400 pupils took the examination for admission, and out of the number 317 are entitled to admission. There are several others who may be admitted by taking a special examination in one or two studies, provided, of course, that they pass a satisfactory examination upon the second trial.

The following questions in physical geography, history, grammar, and arithmetic formed the test persons which the candidates had to surmount in such a manner as to entitle them to a rating of 75 per cent in order to be admitted.

Physical Geography. 1. (a) What is a river? What produces it? (b) What is the cause of foundations such as we have been having in this country this spring?

2. What are the tides--explain how they are caused. 3. What are isothermal lines? In what does the isothermal line vary from Omaha?

4. What is dew, and explain its formation? Explain the difference between a fog and a cloud. 5. Name and locate five noted volcanoes. State the causes of earthquakes.

3. A man sold a horse for \$340 and for \$340 he would have gained or lost, and what per cent? 4. A manufacturer sent his broker \$25,000 to invest in cotton; after deducting his commission of 2 1/2 per cent, how many pounds of cotton, at 5 cents a pound, did the broker purchase?
