STANDING OF THE SCHOLARS

Result of the Examination in the Eighth Grade of the Public Schools.

PUPILS WHO HAVE WON THE HONORS

Hard Questions Which the Scholars Had to Answer—Successful Candidates for Promotion—A Good Showing—Per-Centage of the Lucky Ones.

Did I pass? is the question that interests several hundred pupils of the eighth grade in the Omaha schools just at present.

These eighth grade pupils want to be freshmen in the High school next year and the problem of passing a satisfactory examination is therefore a very important one to them.

Between 300 and 400 pupils took the examination for admission, and out of the number 317 are entitled to admission. There are several others who may be admitted by taking a special examination in one or two studies, provided, of course, that they pass a satisfactory examination upon the second trial.

The following questions in physical geography, history, grammar, and arithmetic formed the Parnassus which the candidates had to surmount in such a manner as to entitle them to a rating of 75 per cent in order to be admitted.

Physical Geography.

1. (a) What is a river? What produces it? (b) What is the cause of inundations such as we have been having in this country this spring?

2. What are the tides?—explain how they are caused.

3. What are isothermal lines? In what does the isothermal line for Omaha vary from the parallel of latitude for Omaha?

4. What is dew, and explain its formation? Explain the difference between a fog and a cloud.

5. Name and locate five noted volcanoes. State the causes of earthquakes.

6. Mention the causes which affect climate.

7. Explain the direction and cause of land and sea breezes.

8. What is the cause of winds? What are the trade winds?

9. Explain the formation of coal.

10. Why are lakes that have no outlet salt? Why is Alaska warmer than the eastern part of British and North America?

Arithmetic.

1. Reduce in its simplest form:

$$\frac{\frac{2}{3}\times\frac{3}{4}(\times 2\frac{1}{2})}{2\frac{1}{2}\div 2\cdot 5} \div \frac{7\cdot 0\times 5\cdot 7}{1\cdot 5\cdot 12\times\frac{3}{5}}$$

2. A cellar is 26 feet long, 18 feet wide and 9 feet deep; how much additional will it cost at 15 cents a cubic yard to enlarge this cellar until it is 28 feet long, 21 feet wide and 12 feet deep?

3. A man sold a horse for $240 and thereby lost 25 per cent; if he had sold it for $340 would he have gained or lost, and what per cent?

4. A manufacturer sent his broker $25,000 to invest in cotton; after deducting his commission of 2½ per cent, how many pounds of cotton, at 5 cents a pound, did the broker purchase?

5. A man loaned $800 for 2 years and 6 months, and received $90 interest; what was the rate per cent.

6. What is the face of a note whose proceeds, when discounted at 8 per cent for 60 days, equal $2405.84?

7. If 12 men mow 64 acres of grass in 8 days of 8 hours each, in how many days, of 10 hours each, can 15 men mow 90 acres? Solve by analysis.

8. —A room is 20 feet long, 16 feet wide, and 12 feet high; what is the distance from one of the lower corners to the upper opposite corner?

9. Two men contribute $7,200 to a business, one three-fifths as much as the other; if their profits are 33⅓ per cent of their capital, how much ought each receive?

10. On how many acres could a horse feed if he were tied to a stake by a line 100 yards long?

History.

1. Write the preamble to the constitution of the United States.

2. (a) Who was Robert Morris? Alexander Hamilton? John C. Calhoun? Benjamin Franklin? John C. Fremont? (b) Name four generals who served in the army of the United States and who afterwards became presidents.

3. What do you understand by the Monroe doctrine? Fugitive slave law? Missouri compromise? Alabama claims? John Brown's raid?

4. Show the territorial growth of our country since the war of the revolution, stating what and when various sections became a part of the United States.

5. (a) Name two battles of the revolution fought before the declaration of independence was made. (b) What city was the first capital of the United States? (c) Name the original thirteen states. (d) Which was first settled? Which last?

This is to testify that I have tested the medical properties of Dr. J. B. Moore's Tree of Life remedy to my entire satisfaction, and can most heartily recommend it to the suffering and afflicted everywhere, to be all claimed for it in the above statement. Last spring I was suffering from loss of appetite, constipation, etc., originating from kidney and liver trouble, and I had not used one bottle of this great life remedy until I was greatly relieved. My wife, also, being at a very critical stage in life, was suffering much at times, and by the use of this remedy has been saved from much suffering and possibly from premature death. Our youngest son's health for several years has been very delicate. He contracted some lung trouble by taking cold with measles, which produced great nervous debility and occasional bleeding of the lungs; he has used some four bottles of Tree of Life, and feels and looks as though new life had been given him. If you are ill ted, try it.

A Lady Advises Ladies

A Few Secrets from Her Own Experience Which Can Be Profitably Adopted by Others.

I know a charming lady who knows more beautiful and attractive women than any other lady in this city in conversation, re-cently, she said: "I often feel very sorry when I see so many beautiful women so delicate, and suffering so much, and I have often asked myself what the reason is? I think ladies do not exercise the proper care. They do not eat nourishing food, they are careless of their feet, their necks, their chests. In this way they open the door for diseases, and those thousands of troubles which so often afflict womankind, but, worse than all, they allow their life and strength to run down to a low ebb. How many women we see constantly in this condition. They need help, they need something to depend upon, something that will assist them, some friend in need. I know this largely from my own experience, for I was once in the same condition myself. I thought the matter over carefully, and decided what I would do. I knew I needed a gentle, constant stimulant, something that would give me my vital forces, keep my blood throbbing and act as a tonic. I decided to try Duffy's Pure Malt Whisky, and its effect has been simply wonderful. I do not know what pains, sickness or weakness are, and I am satisfied ladies generally could be in the same happy condition by a proper use of the same means."

This lady's remarks are entitled to the greatest consideration, for they are an indication of what hundreds of ladies have found to be a necessity. It should be borne in mind, however, that it is only pure whisky which should ever be used, and that Duffy's Pure Malt is the only one which receives the endorsement of scientists and the recommendations of physicians. Do not allow any druggist or grocer to induce you to take any other.

SUMMER'S TUFF ON SUMMER STUFF.

You can divide that up in sections to suit. You can say it fast or slow. You can say it all in one sentence, or you can say it on the installment plan—a little at a time; it comes out in the same way every time you say it—Summer's "tuff" on summer stuff. Man gets up in the morning—and arrays himself in all his glory, like Solomon of old—(but in a more modern costume of course). He puts on a clean shirt, immaculate collar and cuffs and his best summer suit and sallies forth looking as slick as the famous "posey" of Solomon's time. One of "old Sol's" rays strikes him, and raises cain with his raiment. A good thing for a sensible man like you to do, is to come right down town and see us; not that we'll give you a "cool reception"—far from it; but that we'll show you good things for a man in your business to wear. Take our elevator—or rather don't take it, we might want to use it again; but ride up to second floor in our elevator and see the hundreds of elegant coats and vests for summer. You'll see fine fancy striped brilliantine coats and vests at two fifty; you'll see fine changeable brilliantine and all wool flannel coats and vests, worth four fifty, marked two dollars and ninety cents; at three fifty you'll be shown coats and vests in fine serges and Drap d'Etes, that our neighbors think good enough to get six dollars for; you'll see the finest imported bedford cords and English serges made into coats and vests, and marked five and a quarter; you'll find the same goods being sold in Omaha for eight and nine dollars. These goods come in every shade and color from sombre black to the lightest smoke. After you buy your coat and vest (because buy you will)—go down stairs to the shirt department—look at the magnificent line of fine summer shirts. See the beautiful colorings, the handsome patterns, the excellent workmanship. See the goods at a dollar—at one fifteen—at one forty—at one seventy-five—at one ninety—at two twenty-five. Compare them in your mind with goods you've seen at from one fifty to four dollars. Have your shirts wrapped up with your coat and vest and go down and see the shoe man. He's selling "low" shoes this week. Oxfords, one fifteen—one thirty-five—two twenty-five; Southern ties, one thirty-five—one sixty-five—two fifty—two seventy-five. You'll find your low shoes cooler when you change at home.

of yours. You have worked hard for it, haven't you? It wasn't worth a dollar an acre when you settled on it, and now you wouldn't take fifty. How long do you expect to live on that place? Would you be surprised if some railroad land agent or claim jumper should come along some day and tell you to move on? Unless you have a patent on record you are not safe—perhaps not then. Why don't you ask **The Bee Bureau of Claims** to look into your title and get you a patent that will stick?
