

ONLY FOR A FEW DAYS MORE

It is Generally Conceded That Congress Will Soon Adjourn.

DEBATES ON THE TARIFF IN THE SENATE

Mr. Aldrich Recounts the Benefits of Protection—Mr. Vest Talks for the Democratic Policy of Free Trade—Washington News.

WASHINGTON, D. C., July 26.—The stream toward final adjournment is flowing rapidly, and the plot of the legislative craft, Holman, predicts that the port of final adjournment will be reached within a few days. Today the general deficiency bill passed the house, and but one of the appropriation bills remains to be acted upon. This is the sundry civil appropriation bill and it remains to be seen whether its keel (\$5,000,000) will be stranded on the bar of congressional absenteeism or whether it will be carried by fair winds to the white house.

General Deficiency Bill.

The house resumed the consideration of the general deficiency bill. Yesterday it refused to lay upon the table the bill which would increase the salary of the speaker of the house from \$15,000 to \$18,000 a year, and also to reconsider the vote, whereupon Mr. Woodcock of Michigan moved a recess until 9 o'clock tomorrow, which motion was supplemented by one from Mr. Whiting of Michigan fixing the hour at 10 o'clock. Both motions for a recess were voted down—a test vote to see whether there was a quorum present resulting, 75 yeas, 1 nay, and 100 noes. The previous question was ordered and Mr. Holman's motion, instructing the conference committee to proceed, was agreed to and a further recess was ordered—Savies, Dingley and Holman being appointed conferees.

INTERNAL REVENUE.

Report of the Commissioner—Some Interesting Statistics.

WASHINGTON, D. C., July 26.—Mr. John W. Mason, commissioner of internal revenue, has made a preliminary report of the operations of that service for the fiscal year, ended June 30, 1892. The total collections from all sources of internal revenue for the fiscal year just ended were \$123,357,543. For the fiscal year, ended June 30, 1891, \$146,635,015, an increase of \$23,277,472.

DEADLY WORK OF SEWER GAS

Largest Created in St. Louis by the Explosion of a Quantity of It.

FEARFUL EVIDENCE OF ITS AWFUL FORCE

Whole Streets Torn Up and Buildings Badly Wrecked—Two Known to Have Been Killed and Many Wounded—Scorching the Ruins.

St. Louis, Mo., July 25.—Furious at restraint, held back by the high water in the river and forced on by the flood of sewage and water thrown upon the recent Waters-Pierce oil fire, the gas generated by the escaping steam, heated by the intense summer sun, exploded about 5 o'clock, wrecking fully one-half of the great Mill creek sewer, the largest of the drainage system, and causing a known loss of two lives, injuring two others with possibly other fatalities to be revealed by the search of the wreckage. The first explosion occurred immediately under the wholesale liquor house of Carl E. Puchs, 1014 South Fourth street, which stood directly over the sewer, and was followed an instant later by an upheaval 100 feet farther east, across Third street, the latter completely wrecking the Iron Mountain railroad station yards and extending nearly 1,000 feet to the very edge of the river.

Great Force of the Explosion.

At Puchs' liquor house the gas lifted up the basement and first floors of the building and escaped to the street in a dense, black, bottom of the silty stream, leaving the second and third floors badly shaken but still in position. Scarcely had the explosion occurred than the police and ambulance departments were summoned to the scene and the work of rescue began. The first body to be taken from the wreckage of the Puchs building, lying on the bottom of the sewer, was that of Albert Mueller, barkeeper, who was dead and badly mangled by the explosion. Search for Puchs, who was known to be in the store, was then pursued, but so far no trace of his remains has been found. It is, however, considered certain that he is either in the wreckage at that point or has floated down and lodged against the debris falling into the sewer at the place of the second upheaval.

THE WOUNDED.

The wounded so far known, are: Mrs. J. Timpo, who was injured by flying debris; her little son, who was killed; Charles Hump, who was standing in the front part of the wrecked building, and was with the dead; a woman named Mrs. M. M. M., who was at that point very near because of its junction with Broadway. None of the injured suffered seriously.

THE DEATHS.

The force of the explosion is shown by the fact that manhole caps, weighing 500 pounds each, were blown off the entire length of the sewer, and in some places the caps were blown off the street and two blocks far on tributary sewers. At present practically 1,000 feet of sewer is an open trench, smelling to heaven with its noxious fumes and gases. The yards of the Iron Mountain road are so thoroughly torn up that it is impossible to get a horse or cart until the sewer can be rebuilt. And this, as the structure is large enough to drive two four-horse teams abreast in it, is a work of no small magnitude. The pecuniary loss cannot now be estimated.

THE FOLLOWS.

The following people were also injured by the explosion: Richard F. Earnest, injured by flying debris; an unknown man, whose body was blown off by being thrown violently in the air and falling on the pavement. Firemen Richard and Finnegan, overcome by gas; will recover.

HOT WATER NOTES.

Many Prostrations and Deaths from the excessive heat, July 26.—The thermometer registered 95° today, the highest point reached here this season. Nearly all the foundries and shops have suspended and several cases of sunstroke were reported from the rural districts yesterday. Threatening clouds have had to stop work and farmers have had to delay their work on account of excessive heat. Many horses in this locality were overcome and died.

WASHINGTON NOTES.

WASHINGTON, D. C., July 26.—The secretary of state has been advised by a dispatch from Minister Shannon of the renunciation by Salvador of the treaty of amity, commerce and consular privileges concluded between the United States and Salvador December 16, 1870. The treaty will, however, continue in force until May 31, 1893.

SOUTH AMERICAN NEWS.

SENIOR ROSA'S REMAINS TO BE REMOVED TO HIS NATIVE LAND. Valparaiso, Chile (via Galveston, Tex.), July 25.—[By Mexican Cable to the New York Herald—Special to The Herald.]—Orders have been sent the captain of the cruiser Plato to bring the body of Senior Rosa to this country for burial. Senior Rosa was a patriot and a hero of the independence of Chile against Spain. He died in Argentina and will be brought to Chile to be buried in his native land. His remains were taken to the Argentine minister to Uruguay who protested against the presence of Uruguayan troops in the Argentine territory. He has gone into that Brazilian state upon the pretext of pursuing the bandits who went into Uruguay and attacked a number of houses and killed several people. It is a matter of their real purpose is to aid the Rio Grande revolutionists who intend to proclaim the independence of the province and then seek annexation with Uruguay.
