## PULSE OF WESTERN PROGRESS

The Furlington Road Pushing Rapidly Toward the Eig Horn Mountains.

FERTILITY AND GRANDEUR OF THE COUNTRY

The Story of a City's Prosperity-Mineral Developments and Material Progress in All Directions-Summary of Northwest News.

Reports from the center of activity on the Burlington Railroad extension in central Wyoming indicate that the surveyors have determined upon the most feasible route to and beyond the southern boundary of Yellowstone National park. The construction corps -an army of from three to four thousand men-is advancing rapidly on Buffalo, and has already struck the route traversed by General Crook in his famous Big Horn and Yellowstone expedition of 1876. According to the Ruffalo Rulletin the favered route of the three surveyed runs is from Buffalo to the plateau opposite Fort Mc-Kinney, keeping to the right of the divide between Clear and French creeks. It will pass through Moshier canyon, emerging on Clear creck near the junction of the north and middle fork; thence up and acress the north fork to the bigh ground south of Clear creek near the head of several branches of the Crazy Weman; thence across the main range by the Ten Sleep lakes and Broken Back, down No Wood to the Big Horn, up and across Gray Bull mountain, through the Wood river mining country and Iwo Ocean pass to the southern end of Yelowstone park.

What memories the route outlined will awaken in the minds of thousands of survivers of the expedition against the hostile Sioux which moved out of old Fort Fetter-man at noon on the 29th of May, 1876. Many of the rank and file never returned. Others have since peacefully joined the great ma-jority. But there remains a large number who may ere long traverse the route in palace cars and view the scenes made memorable by hardships endured and by thrilling adventure and desperate battles fought with a wilv and merciless foe.

No adequate description of the country has been published in recent years; no writer could do it justice without actually traversing the region. Hon, John F. Finerty of Chicago, who accompanied the Crook expedition as correspondent of the Chicago Times, presents an artistic pen-picture of the country in his charming book, "War the country in his charming book, "War Path and Bivouac," He was one of a party composed of General Crook, Colonel Mills, Major Burt, Lieutenants Bourke, Schuvier, Carpenter, Lemley and half a dozen corres-pondents, who left the command on a huntfing and exploring expedition in the Big Horn mountains. "I'wo hours' ride," he gsnys, "brought us to the plateau of the western slope, and we found a rich table land, carpeted thick with grass, begemmed with countless flowers and watered with innumerable streams. pine forests covered most of the ground, but there were numerous natural parks had out by the hand of nature with a grace and beauty seldon seen in the artificial works of landscape gardeners. From the plateau we could see three or four snowy ranges, the breezes from which rendered the July atmos-phero cool and bracing as the early May zenh-yrs of less elevated latitudes." The party followed an Indian trail that led them into the very roughest part of the Big Horn mountains, After camping in a lovely dell on the main branch of Goose creek, the party pushed toward the snowy range. "As we ascended higher we noticed several immense layers of quartz, some of which gave indications of gold, but not in quantities sufficient to justify a rush of people in that direction with the expectation of growing rich in a day or a week.

A gentleman in our party who had

traveled much in Europe, particularly in Switzerland, said that the canyon through which we moved reminded him in almost every feature of the Gothard pass. Below us were the dark, green woods and golden streams, above us and around us were the eternal snows and the tremendous rocks, from which and through which burst and thundered a thousand cascades, forming the headquarters of the splendid rivers that fertilize the slopes of that mountain region throughout its entire extent. Picturesque lakes, none of them completely frozen over and all of immense depth, so far as we could judge, met the eye at almost every half-mile, so that there was no difficulty in recognizing the inexhaustible reservoirs that fed the countless torrents which swell the volume of the Big Horn and Tonque rivers."

Ascending the famous Cloud peak the party viewed the immense mountain ranges

party viewed the immense mountain ranges of Idaho, Utah and Montana. Descending the west slope they "struck into one of the loveliest canyons that can be imagined, indented by a glorious stream and garnished by groves of cedar through all its extent." Six miles further west they penetrated an-other canyon and ascended a lofty mountain peak, "the crest being a bare rock which rose everal hundred feet above the forest of miper." "We had actually crossed the range and stood upon the westernmost outpost of the Big Horn mountains. Below us to the west lay the tremendous valley of the Wind river and Big Hora, bounded by a wall mountains half covered with snow, while two other ranges of similar character rese beyond it. We observed the great river winding around the northwest, where it meets the Yellowstone, while the Grav Bull and countiess other streams running from enst towest, were distinctly visible. \* \* The western slope of the mountain and the mouths of the canyon were natural gardens, studded with evergreen groves and beautified by parks, in which the grass appeared to be several feet high, looking rich as green The watercourses rau from every nock and the noise of the rusning waters could be heard in the sublime solitude—the only sound that broke the awful stillness of

that beautiful desert.
"The lakes studding the valley looked like pieces of the blue sky which had fallen from the neavens, as if to contrast their ethereal beauty with the lovely earth beneath. My enthusiasm was aroused, and looking down the slope and along the canyon I said to Colonel Mills: 'Bring on your Italy.' The Colonel laughed, but acknowledged that even in his extensive experience he had never looked upon anything so picturesque.

"There is no richer tract of country in America," says this coservant and disinterested author, "and scarcely sny more beautiful than the portion skirting these mountains and contained in the valleys. The summer is short, it is true; the winters are long and rather cold, but an industrious population would soon conquer the difficulties produced by these circumstances. Hundreds of thou-sands of cattle could be raised there, grain could be grown in abundance; with powerful streams in such profusion manufactories would soon spring up and prosperity would

be unlimited.' Mr. Finerty's prediction has come true. Countless flocks of sheep and herds of cattle have been and are being fattened on the luxuriant verdure of the region. Thriving towns dot the valleys. Manufactories keep pace with the needs of the settlements. Artificial moisture is gradually transforming it into an agricultural garden spot. The discovery of the precious metals in paying quantities, although the surface has scarcely been scratched, is now attracting prospectors and capitalists. The construction and opera-tion of the projected railroad to and through the Big Horn mountains will undoubtedly accelerate development and settlement of a section of Wyoming possessing attractions for the industrious and thrifty unequaled anywhere in the west.

Assessment rolls are not the best index to community values, but they outline the general condition. The roll of Silver Bow county. Montana, shows a total valuation of \$20,959,407. The total assessment value of real estate and other improvements in Butte 1s \$12, 831,054. There are 271 miles of telegraph lines valued at \$4.440; 206 miles of telephone wire, valued at \$7,416; 108 miles of irrigating ditches and flumes, valued at \$100,250; \$12,645,294 worth of property under mortgage; \$2,671,275 in bank deposits subject to taxation, ratiroad property valued at \$37,

400, and mining property \$556,850.

The heaviest taxuayer in the county is the famous Davis estate, which is assessed at \$1,244,710, of which \$155,000 is in notes, \$939,000 in cash and \$121,520 in real estate and mining property. A. J. Davis, jr., is as-

sessed for \$577,295, representing 950 shares of stock in the First National bank.

The largest individual taxpayer is W. A. Clars of Butte, who is assessed for \$511,205 on his personal list. It represents \$328,915 in money, \$45,655 in personal property, \$22,500 in notes, nine head of horses valued at \$19,000 and seven head at \$575, the remainder being

on other personal and real property.

Among the mining properties, the Butte & Boston company is assessed for the largest amount, the sum being \$289,135. Ninety-four individuals and companies own property assessed from \$20,000 up, eighteen exceed \$100,000 and one exceeds \$1,000,000.

A Lost Mine Found. It is announced at Boise City, Idaho, that one of the rich "lost mines" has been rediscovered in Lemlie county. Late in the fall of 1864 F. B. Sharkey, Bill Smith and O. E. Mulkey, all of Salmon City, were up on a hunting trip to Fish lake. One day, while starting a deer, one of the men accidentally starting a deer, one of the men accidentally discovered a marvelously rich deposit of decomposed gold quartz. So completely disintegrated had the quartz formation become that the gold could be washed out, and within a week the three men had secured fifty ounces of the precious metal. Their supplies running short and winfar coming rapidly on the men concealed. ter coming rapidly on, the men concealed the opening they had made and returned to Salmon City. Early in the following spring they purchased an expensive outfit and started out to work their bonanza. To their dismay they could not find the ledge. The storms of the winter had obliterated every landmark, and a month's hunt resulted fruitlessly. Last week William Burrows and P. Ameuson ran across the ledge, which they at ence located. They will work the claim, having already refused several templing offers. A Boise expert says the men have one of the richest and most mexbaustible gold mines in the world.

A Wyoming Find.

Something of a stampedo has been created in Laramie by reports of rich silver discoveries on East Fork creek, fifty miles distant, John Herman, the discover of the lend, and who has been a miner for thirty years in Colorado, California, Oregon, Utah Territory and Montana, states this is the richest and biggest lead he ever saw anywhere upon the surface.
The Chicago lead is sixty-five feet wide of

The Calcago lead is sixty-bye feet wide of free gold and silver running together, with two side leads running parallel with it. These side leads are from twenty-five to fifty feet wide and carrying the same ore as the main lead. These side leads are separated from the Chicago by a strata of blue gneiss. Between the Chicago lead and the East Fork is a space of about 200 feet, which is com-

posed principally of granite, porphyry and blue gnelss.

The East Fork lead is said to be at least 100 feet wide and carries the same gold ore as the Chicago. Herman, the discoverer, says that the East Fork is a better prospect than Leadville ever had to commence with.

Satt Lake's Courthouse, The combination city and county building, the corner-stone of which was laid in Salt Lake City last week, is in keeping with the broad liberality and enterprise of the midmountain metropolis. The length of it is 272 feet, in width 140, and in height four stories and a basement. The height of the tower from its base is 250 feet, its base being forty feet square. In height the basement is fourteen feet, the first floor seventeen, the second floor eighteen, the third floor sixteen and the fourth floor twelve feet. tract price is \$377,987. All complete, includ-ing surroundings, will cost about \$500,000. The city will occupy the north end and the county the south end, each one half of the

The building will have two elevators and numerous vaults, and will be semi-freproof.
The boiler and engine house will be erected on a lot distant about 200 feet and will be connected with this building by means of a tunnel into which all steam and water pines necessary for heat, etc., will be placed. This will avoid the danger of casualty by fire and steam so common to public buildings.

Race War in Idaho, A most determined movement against the Japanese has been inaugurated in southern Idaho. The people of three towns have arisen enmasse and compelled the Orientals to depart under penalty of the whipping post or the rope. At Nampa, only eighteen miles from Boise, the citizens were preparing to expel the Japanese, numbering about 100. where three smallpox cases were found in a hut. This discovery caused a wild stampede, but they were subsequently escorted out of town. Like treatment was visited upon the Japs in Caldwell and Mountain Home,

The Japanese have within the past three months completely demoralized laboring interests in this section of Idaho. They are penniless and cannot speak English, and have without doubt been brought into the United States in direct violation of the pauper immigration law Some of them came here from San Francisco and others from the Puget sound ports. They are controlled by stage drivers who hire them out to the highest bidder, who collects their wages and pays their poll taxes, when any are paid.

The Great Northern. Chief Engineer Miller of the Great Northern road boasts that the new line now advancing to Puget sound is the finest constructed on the continent. "It has the lightest grades and the least curvilure of any transcontinental line," said Mr. Miller in speaking of the new extension. "We could have put trains on the line to Spokane as early as July 1, and made as good time as the Northern Pacific trains, but we decided to wait until August 1. From St. Paul to 185 miles of the summit of the mountains the maximum grade is but 31 feet to the mile, and for the rest of the distance it is only 52 feet. We have 310 miles in the Missouri dis-trict where the maximum grade does not exceed 21 feet to the mile. The extension has been turned over to us in excellent condition, and when we get our trains running I expect we will make very fast time."

A Monster Tunnel. A monster tunnel under Mount Kelso and Gray's Peak in Cirar Creek county, Colo., is rapidly advancing. It is to be 25,000 feet, or nearly five miles, in length. About onethird of the tunneling has been done, and the company in charge of it promises to push the work with great energy. Contracts have been made for electric plants to be used at both ends of the tunnel, and with this in-valuable aid it is expected that the tunnel will be ready for ratiroad tracks in less than three years. With the completion of this great engineering feat the transcontinental route will be shortened by 235 miles. That Denver's commercial interests will be enornously benefited needs no demonstration. Moreover, the tunnel, it is believed, will cut through a number of rich gold and silver producing veins. The proprietary company has already begun to take out ore, a carload of which recently assayed at \$55 in gold, silver and lead to the ton.

A Rush for Land.

Last week a tract of land in San Benita county, California, embracing 750,000 acres, was thrown open to settlement under tho homestead law. There was a tremendous rush for the land and nearly all of it was filed upon in two days. This land was form-erly a part of the railroad grant to the Southern Pacific, but became forfeited by failure of the company to construct a line from Tres Pinos into the San Joaquin and Salinas val-

Nebruska. \*

The camp meeting of the State Holiness ssociation is in session at Bennett. Over \$3,000 has been subscribed for the German Orphans Home at Fremont.

The Association of Native Ohioans in Nobraska will picnic at Milford, August 23,

James Brook of Atkinson sold \$400 worth of strawberries from half an acre of ground. The mayor of Tekamah has ordered all persons of a questionable character to leave Will Carter a resident of Elwood died in

the south, where he had gone in the hope of benefiting his health. The Schuyler Quill is six years old. It formerly was an independent paper but now it's an independent organ.

The Needmore flouring mill in Furnas county has been undermined by the rain and the banding is sure to collapse. The election in Saunders county to vote bonds to build a courthouse resulted in the overwhelming defeat of the bonds.

There is one less democratic daily in the state. The Columbus Daily Telegram ceased to exist Sunday. Editor Davis, who is also

deputy oil inspector, hasn't the time to at-tend to both jobs, and he evidently thinks he can do more good inspecting oil then he can writing editorials.

l'ienty of cool showers And some weather hot, Make Nebraska's prairies The world's garden spot.

The St. Paul Republican is one year old, and the party in Howard county, ever increasing in number, is giving the paper good

A gusher was struck last week on A. F. Tannehill's farm, six miles south of Norfolk, at a depth of 125 feet.

Misfortness never come singly. Just after
a York county man had almost been atung
to death by bees he ran over a polecat with
a mowing machine and cut the odoriferous animal in two.

Allie Hay, a farmer living at Watash, was crippled for life by a runaway team with which he was bauling hay. When the team ran the wagon struck the corner of the bouse, tearing away a portion of the siding and statistically all the side of the si and scattering the plastering all over the in side of the house. The wagon was demolished, and numerous trees were stripped of their branches as though a cyclone had struck them. Mr. Hay's ankle bone was splintered and the bone of his heel driven up into the ankle.

Wyoming.

the Ruggles brothers "there was absolutely no violence and the victims were treated with the utmost consideration." It is pre-Ten tiger lairs have been licensed in Rock Springs. sumable that the gentlemanly outlaws fairly wriggled with pleasure when they were The Jack Creek placers are attracting veteran miners in large numbers. Reports of rich mineral finds come thick

and fast from various points in the state. The Casper Derrick reports that the Salt Creek oil company has begun shipping oil from its well. A big lead of galena ore was tapped at

Eadsville, a short distance from Casper. The veta is two feet wide. Stockton Smith of Laramie, while pros-pecting on the Medicine Bow, discovered a rich lead of silver-bearing rock.

The Rock Springs Coal company is making extensive improvements in its mines preparatory to meeting increased demands for coal, The sale of Ora Haley's Wyoming and Abbott ranches with 1,200 head of stock is about concluded. Omaha and Lincoln parties are the purchasers and the price is said to be \$200,000. Omaha and Lincoln property form a portion of the consideration.

The great divide beyond Laramie is such a storehouse of mineral electricity that it is suicidal to cross it during a thunder storm. It is said that the lightning there during a storm is extremely vivid and deadly to man and beast. Recent events confirm it. Two weeks ago Dave Donavan, an ex-railroad en-gineer, and his team were killed by lightning in this locality. Last week W. F. Kennedy, a ranchman residing north of Rawlins, re-turning from Nebraska with two fine thoroughbred horses, was caught in a storm on the divide. A lightning boit killed both ani-mals and severely stunned Kennedy.

South Dakota The campaign is wide open in the state. The democratic state convention has been called to meet at Chamberlain, September 1. Black Hills republicans are pleased be-cause they furnished a large share of the

A company with capital stock of \$1,000,000 has been organized to build a railroad from Yankton to Madison.

Deadwood is about to pass the hat to raise \$5,000, its quota of the fund necessary to make a state exhibit at the World's fair. The Western Portland Cement company of Yankton has received and will fill an order for 7,500 barrels of cement from the city of Butte, Mont.

One of the calamity taxpayers of Custer county contributes the munificent sum of \$4.50 to the public treasury, \$2 of which is a tax on two dogs. No wonder he howls. The total real estate and personal assessment of Minnehaha county is \$9,843,973. Of this sum \$3,764,263 is farm lands. \$4,372,190

town lots and \$1,707,520 personal property. Fred Hames, chief constructing engineer of the Elkhorn, made the eyes of Deadwooders buige out recently by exhibiting specimens of ore assaying \$46,000 to the ton. He declined to give the location of the find, which is said to be within fifteen miles of

The mineral paint mine at Two Bit gulch was sold to A. D. Alden of St. Louis for \$25,000. The Deadwood Pioneer says the work of taking out mineral paint will commence at once, and a factory will be built, whether in Deadwood or Omaba has not yet been determined.

Montana. Butte decided to invest \$50,000 in a public ibrary building.

The national encampment of the Sons of Veterans opens in Helena August 7. A Butte jury is wrestling with the question whether faith healers are better cometery promoters than regular doctors. At last accounts the jury was ready to throw up its collective hands.

The Philipsburg Mail reports that Peter and John Sherr, Chris Larson and Charles Codell have struck from twelve to fifteen inches of rich gold quartz on an extension to the Royal gold mine, in Boulder district.

Mining is dull in Montana, but the cattle nen, sheep men and ranchers are anticipating good times this fall, and unless prices are materially depressed in the next three months their anticipations will be realized. Governor Toole promptly checked pursuit of Cour d'Alene miners into Montana by re-fusing permission to troops to cross the state line. He expressed a willingness to honor regular requisition papers made by the civil authorities of Idaho.

Butte City is not generally thought of as a too decorous and puritante place, yet it has interdicted the appearance of girls in tights or short dresses upon the stage. The order was probably caused by too much attention being paid to the fairies at the footlights and not enough on the chippies who hustle beer. It was money, not morals.

The wool which centers at Great Falls has never been so late coming in for shipment as this year. This has led some to conclude that the amount shipped from that point would be comparatively small. Not so, It is now coming with a rush, both by team and over the Great Falls & Canada railroad. This road expects to handle 500,000 pounds during the season. The total receipts at the wool warehouse up to date are about 1,500,-000 pounds.

The Star mine at Hailey netted \$10,000 last

The Rene Gazette says a land-looked salmon was caught in the Truckee river near the Reduction works by a party of fishermen which weighed 7% pounds, was 26% inches long and 16% inches in circumference.

North of Virginia City, Nev., four or five miles is a deposit of infusorial earth which is probably the finest and purest in the whole world. It is owned by the Electric Silicon company of New York, who put it up into small packages and sell it as a polishing

The claim that Indians are lightning-proof Seems to be well four ded. A squaw on the Cour d' Alene reservation was struck by lightning and stripped of her scant robes and shoes. She borrowed a blanket and went about her duties as if nothing had

The Consolidated California & Virginia is yielding the usual 980 tons of ore a week, the average of which is \$27.06 according to pattery samples. Ore is being taken out or all the lovels from the 1500 down to the 1800 —which is some 200 feet below the level of the Suiro tunnel. The mine is still paying e fair profit—\$20,397.32 for June.

A project is on foot to raise a fund for the widow of the late George W. Cassidy, who was editor of the Eureka Standard. She was left tenniless. The scheme is being engineered by the White Pico News, and

I am seventy-seven years old, and have had my age renewed at least twenty years by the use of Swift's Specific. My foot and leg to my knee was a running sore for two years, and physicians said it could not be cured. After taking fifteen small bottles S. S. S. there is not a sore on my limbs, and I have a new lease on ife. Years old life. You ought to let all sufferers know of your wonderful remedy. IRA F. STILES, Palmer, Kansas City.
