David Nehr of Beatrice Before the Supreme Court.

ANXIOUS TO AVOID IMPRISONMENT

After Being Indicted, Tried, Found Guilty and Sentenced to the County Jail. He Determines to Test the Question.

LINCOLN, Neb., Aug. 19. - Special to THE BEE. |-The supreme court has been called upon to decide whether or not it is a criminal offense under the laws of Nebraska for a man to "feloniously" kill a dog. A case which has already attained some celebrity in Gage county reached the clerk of the court this morning. Early in the month of January of the present year David Nehr shot and killed a dog belonging to John Dobbs in Beatrice. For this he was indicted, tried, found guilty and sentenced to pay a fine of \$2 and costs and to serve a sentence of five days in the county jail at hard labor. Nehr's attorneys moved for a new trial of the case before the district court, but their motion was denied. They now bring the case to the supreme court. In their betition filed today they silege among other things that the verdiet, judgment and sentence are contrary to and unsupported by law or sufficient facts to constitute a crime.

A case involving an important point of law was filed in the supreme court today. It comes from Adams county and is entitled Rose Kirkwood against the Exchange Na-tional bank. The plaintiff had deposited \$2,000 in the bank referred to, taking a cer-tificate of deposit. She went to Deuver and there lost the certificate. The bank was duly notified of the loss, and after a time a eashier of the bank retused to pay the money unless Miss Kirkwood gave an indemnifying bond to insure the bank against possible loss. She was unable to furnish such a bond and commenced suit in the district court for the money. The court ordered the bank to pay the money to the clerk of the court, by him to be paid to the plaintiff whenever she would furnish an indemnifying bond. As was to be expected, "Tuxedo" has been changed in many of its details. Some things have been omitted and many little touches have been added here and there. The play is a combination of farce, variety and minstrelsy. It is mostly nonsense, with streaks of music through it, and it is put on by elever actors. It makes no preferations to clever actors. It makes no pretensions to art. It is purely an entertainment, and succeeds admirably in filling an evening with laughter and relaxation. It is one of the cleanest and most original performances of its kind, and George Thatcher's players put it through with annu and smoothness. it through with snap and smoothness. DUN'S REVIEW OF THE WEEK

Cheering Outlook for the Fall Trade-Business Distinctly Improving.

MONEY ABUNDANT, COLLECTIONS GOOD

Business so Far Not Sectously Affected by the Three Great Strikes-Omaha Dealers Enjoying a Splendid Trade-Clearing House Statements.

NEW YORK, Aug. 19.-R, G. Dun & Co's. Weekly Review of Trade says: Late advices from the west promise rather better crops of wheat and corn, and cotton prospects are a little better, though neither yield will approach that of last year. With abundant supplies brought over the outlook is so good that pusiness distinctly improves and the prospect for fall trade is everywhere considered better. The great strikes in New York, Pennsylvania and Tennessee, which call into service troops in three great states, appear to have scarcely an appreciable effect upon business as yet, and although the interruption of traffic is threatened on many important railroads, stocks are generally steady or strong, closing but a small fraction lower than a week ago. More gold has gone abroad, but money is abundant and easy and collections in almost all quarters are more

attsfactory than usual.
Wheat has been weaker and declined 34 cents, with western receipts exceeding 5,200,000 bushels in four days, while Atlantic exports were 1,500,000 bushels and sales here only 6,000,000 bushels. Reports of harvest-ing in spring wheat regions are more encouraging. Corn has advanced 1 cent on sales of only 3,000,000 bushels here, mainly because of possible interruption of traffic, for western reports are definitely more promis-ing, especially as to Kansas and Illinois. Oats have declined only a quarter, but lare is a shade stronger. Oil is \$\frac{1}{4}\$ cents lower and coffee \$\frac{1}{4}\$ cents higher, with some activity.

Condition of the Cotton Market.

In cotton a further decline of a sixteenth has occurred, and sales have been 508,000 bales, the actual movement at this season being insignificant, while crop prospects. with the heavy stocks on hand, tend to de press prices. Last week the quantity which has come into sight for the crop year rose above 9,000,000 bales and the stocks of Amer ican abroad are over 2,300,000 bales. Speculation in tit has made little change

and buyers of copper are so slow that il secents is quoted, while lead is a shade lower. Iron mills at Pittsburg will soon resume. but at present shipments of coke are the smallest for some time and business in win dow glass is not active. At Cincinnati trade is quiet, but prospects fine and withdrawals of whisky are unusually

heavy. Fair activity is seen at Cleveland with a heavy trade and rolled fron products very

active and firm.
General trade at Chicago is better than in any year and collections better also Receipts of barley for the week fall below last year's, of dressed beef a third and of corr a fifth, but increase appears in cured meats cheese and lard, a third in cattle and wool and one-half in hogs, hides and flour. At Milwaukee collections are slow, farmers being busy, but they are slightly in excess of last year.

St. Paul reports a slight increase in busi ness and the harvest resulting in a goo At Minneapolis the trade is good; the cro about average and the lumber business is large, with an advance of 5 cents in prices. Business at St. Louis is generally satis factor and at Kansas City good with large receipts of cattle, hogs and wheat.

WHAT BRADSTREETS SAYS.

Disturbances Attracting Attention | in New York Markets. YORK, Aug. 19.-Bradstreets says of he New York stock market: Labor disturbances assumed for a time a commanding position in the speculative share market of the present week. The troubles at Buffalo, involving the interruption of traffic upon the trunk lines at that important center and a threatened stoppage of business of great corporations, naturally tended to create hesitation and uncertainty in speculative interests. These influences were more or less effective during the entire week, so far as the railway

share list is concerned.

Crop news was on the whole favorable but the granger roads shared with the trunk fines in their speculative uncertainty and the whole interest of the market centered in the industrial group. In the latter connection it need only be said that the bullish manipulators continued to show their activity and skill with little interruption. Sugar age, load and their companions
age, load and their companions

led stock completely fulfilling
prediction that it would cross
Successful as the movement has been it continues to create a feeling that this must necessarily result in a reaction, even if it does not turn out that the insiders have unloaded upon the street during the advance. Notwithstanding such apprehensions the close of the week finds the market under the influence of the improvement in industrial shares to an extent which nullifies the influ

ence of other unfavorable factors in the gen al speculative situation It may be said that Wall street has discovered the policy of bearish operations based upon labor disturbances. Disquieting as the latter are, their effects are less severe than might be expected and though a section of the room traders were ready to turn the Buffalo disturbances and the call for military assistance to their own advantage, their success, save in a brief interval on Wednesday last, was but slight. The fact that the decline of silver was apparently arrested early in the week and that a firmer feeting manifested in the market was not without influence. The exaggerated apprehension, in regard to the stability of American finances which have taken possession of a certain section of the foreign financial world failed to affect the

course of events on this side of the ocean.

This was particularly observable on Thursday, when what appeared to be unfounded reports of the failure of a London bank doing business in the east sufficed to enew the depress on in silver.

Railway companies which report net earnings to Bradstreets, including the more important in all portions of the country, an important in all portions of the country, announce net earnings in June of 4 per cent more than in June, 1891. like portion of 1891. For five months the gun over last year was only 4 per cent.
Exports of wheat (including flour as wheat) as reported to Bradstreets from

domestic ports, both coasts this week, equal 3.750,000 bushels against 4,148,000 bushels last week, and 3,978,000 bushels week before last. The advance in prices of wheat is largely due to interrupted transportation via Buffalo. patcher at Fremont.

UP IN A BALLOON.

Prof. Belden Will Give a Free Show o Sunday. There are but few people in Omaha who have ever witnessed the ascension of a genuine balloon. This is principally owing to the fact that men who desire to risk their lives up in a balloon, sailing 'roung the stars, are

not numerous. There is one man, however who is perfectly willing to take his life in his hands and start on a trip toward the up known regions reaching up into space. That man is Prof. Belden, the noted navigator of the air. He is in the city and has completed arrangements to give the people a free show n Sunday afternoon at 4 o'clock.

The place from which the voyage to the clouds will start is at Twenty-fourth street

and the Belt Line tracks, reached by both the Sherman avenue and the Twenty-fourth street motor lines. The balloon which Prof. Belden uses is a monster, standing sixty feet high, and is the one in which he has made nearly 100 trips to the clouds during the past five years. He proposes to go up 4,000 feet, if the weather is favorable, and then aided by a small para-chute, will drop to the earth. The pera chute is much like a large sun shade. Prof. Belden jumps from the basket of his balloon, with acthing but this parachute to prevent him from being dashed to the earth, the scene is intensely exciting. For 100 feet he shoots downward with the velocity of a bullet. Suddenly the folds of the para-chute gather the air and spread out. Then the journey to earth becomes more slow, until finally he lands as gently as a bird. To make the trip requires considerable courage, as a break or a refusal of the parachute to

Just Escaped With His Life. Bellevue, Neb., Aug. 19 .- [Special to THE BEE. |-Johnce Bosteter, an employe of Ed Snakelow's steam threshing outfit, barely escaped being crushed to death at De Wight Young's place, four miles west of here. Bosteter was hauling water for the engine and tank full when he noticed that a bolt which work in finding homes for the orphan couples the front trucks to the tank was children of the county.

working out. He crawled under the tank to fix it when the horses stepped forward, let-ting the tank, which when filled weighs about 4,000 pounds, fall onto Bosteter. Fortupatery he was so far forward that it did no fall squarety on his body and only his left foot was caught under the corner of the tank and badly mashed and his back was somewhat bruised. If he had been back under the truck four inches further he

would have been instantly killed. WILL NOT ACCEPT THE PLANT.

Mayor Phillips of Beatrice Will Protect the City's Interests.

BEATRICE, Neb., Aug. 19 .- | Special Telegram to fun Ben. |- Mayor Phillips today served official notice on Messrs. Godfrey & Meals and their bondsmen, M. D. Long, Charles Wrede, W. D. Matthews and John S. Walker, that in view of the fact that they had given notice to the city that they did not intend to complete the water works plant and furnish the water as required by the contract and that certain materials had already been taken from the plant by the contractors, without authority, the city of Beatrice would immediately take possession of the plant for the purpose of protecting the same from loss or damage, and that the city emphatically refuses to accept the said plant under the terms of the contract for the reason that the terms have not been compiled with.

The principals and their to men are also notified that will be held responsible for failure to ply with the contract and that a suit will at once be brought to recover the damages of casioned the city by the failure of the con tractors and bondsmen to comply with the terms of the contract.

The parties are, however, given notice that before the city begins such action the con tractors and bondsmen will be given reason able time to complete the water plant and furnish the supply of water provided for.

## \* Indigestion, Dyspepsia

Symptoms. - Distress or oppression after eating, acid eruptions, belching up of gas or acid, loss of appetite and strength, nausea, headache, palpitation, sallow complexion, depressed spirits, hideous dreams, and a multitude of other miseries too well known to the average American.

To us science has never given a remedy for this distressing disorder, but Nature has given to the untutored Indian a never-failing remedy. It is undeniable that Nature provides for every want of man and beast; and, through the noble Kickapoo tribe of Indians, she has given us a vegetable compound of herbs, roots, barks, and flowers, called
