BOARD OF HEALTH BULLETIN

City Physician Semera Gives Some Advice Concerning the Cholera Plague.

KEEP YOUR PREMISES CLEAN ALWAYS

Low to Avoid Infection-Dr. Bache of the Army Offers Some Pertinent Suggestions-An Omaha Boy Stricken at Hamburg.

While Dr. A. B. Somers of the Board of Health has no idea that the cholera will reach Omaha, he believes that to be forewarned is to be forearmed, and consequently

has issued the following health bulletin and rules for the prevention of the dread disease: First-Don't get frightened.

Third—Care for the stomach. It has been demonstrated that a healthy stomach will destroy the germs of cholers, so that should they be taken into it they cannot do harm; bence, should we be particularly careful about our food and drink upon the approach

Fourth-As soon as the papers announce

the process as the papers and the papers and the papers we should boil all the water we use.

These precautions are simple and easy of application, yet if fathfully adhered to will prove most efficacious. The dangers from choiera in Omaha are comparatively remote, but there are real dangers at our very thresholds, namely, from typhoid fever, diphtheria and kindred diseases, and our ap-peal is to the good people of this community to co-operate with the Board of Health in warding off these ever present foes. With a climate unsurpassed, an abundant supply of water, which, when properly settled, is as good as the best, with superior natural ad-vantages for drainage, Omaha should be the healthiest city under the sun. Unfortu-nately the Board of Health is not and cannot be, under the existing circumstances, the power fer good it ought to be. The ex-penses of this department are constantly larger than the appropriation, and yet the force is barely large enough to keep the machinery running and altogether too small to do active, aggressive work. An increase of 25 per cent in expense would double the efficiency of the department. It is under these circumstances that we appeal to the citizens for aid in cleaning up the city.

Don't, then, think an adjoining lot, though covered with weeds, a safe place to deposit

garbage.

Don't think the alleys and the streets made Don't think a garbage barrel a safe thing

to have about the premises; every accumula-tion of filth, under favoring conditions of heat and moisture, may become a propagat-ing bed of the germs of infectious and contagious disease.

Don't make it necessary for the Itealth department to send an inspector and threaten you with the penalties of the police court to accomplish so simple an end as the cleanli ness of your premises, including the adjacent ally, while men pass your premises almost daily seeking the opportunity.

This work can be effectively done only at

public expense, but a little more interest on the part of individuals would help matters very much.

Don't use well water when city water can

be obtained nor privy vaults or cosspools when sewer connections can be made. Don't oppose the Board of Health in its efforts to help you, but do see to it at once

that your house, cellar, outbuildings and surroundings are dry. By the simple observance of these rules of cleanliness, isolation and disinfection, three-fourths of the infectious and contagious dis-

eases are preventable.

Consider the saving of expense; of hours of anxious watching, and of bereavement from the loss of loved ones that is easily within

TAKE PRECAUTIONARY MEASURES. Dr. Bache of the Army Gives Some Excell-

ent Advice on the Topic. "THE BEE cannot do a better thing," said Dr. Bache, medical officer for the Department of the Platte, "than to stir up the authorities upon the matter of taking precautionary steps in a sanitary way to prevent the appearance of Asiatic cholera in this country. I think the greatest danger lies in the possibility of the areadful disease reaching this country through Canada. The Canadian ports seem to be poorly equipped for the exercise of proper quarantining, and it may be an easy matter for a few emigrants carrying the germs of Asiatic cholera with them to slip into this country by way of Canada. "We naturally think that because Omaha

is so far from the eastern seaccast that there is practically no danger here. That is a great mistake. If the disease comes to this great mistake. If the disease comes to this country at all it might appear in Omaha or St. Louis or Chicago, even before it broke out in New York or any of the eastern seaport cities. With our rapid means of transportation the disease might be carried clear across the continent and dropped off at some interior point by the emigrant coming from the the continent and dropped off at some in-terior point by the emigrant coming from the cholora stricken regions of Russia or Ger-many. There are over 2,000 emigrants now on their way from Hamburg to this country. They may scatter to all parts of the country after they have been permitted to land. There is a very grave responsibility resting There is a very grave responsibility resting upon the health officers in charge of all our ports just now, and extraordinary efforts should be put forth at all points along the Canadian line to have every bit of baggage and clothing and all the people coming from those foreign countries where choicra is now raging thoroughly quarantined before being admitted. I do not think that there is danger of the Asiatic choicra becoming an eniger of the Asiatic cholera becoming an epi-demic in this country this fall. It is too late in the season for that. Cold weather does not kill out the disease or the microbes that create such havoc but it checks the progress of the malady. I am afraid, however, that it will gain a slight foothold in this country and break out next spring. If it does it will not only be the cause of an alarming mortality but will ruin the progress of the World's fair. It must be kept out of this country or we shall see a terrible state of affairs."

"What is the surest means of preventing the contagion from gaining a foothold?"

"The strictest possible quarantining of goes not kill out the disease or the microbes

the contagion from gaining a foothold?"
"The strictest possible quarantining of every vessel, every person and every article, especially of clothing or any substance in which the germs might be carried that comes from foreign ports, that is the first and all important step to be taken. Then cleanliness is the next essential. All garbage and filth of every discription should be removed from the city. Low places where stagnant water is liable to stand should be filled up and the alleys should be kept clean. People should be careful about their eating and drinking. Nothing but the most wholesome food should enter the mouth and no impure water or impure beverage of any sort should food should enter the mouth and no impure water or impure beverage of any sort should be used. Asiatic cholera feeds on filth. Well-tq-do people who keep themselves clean and are careful about what they eat and drink have little to fear from it, but it plays have among the poorfy fed and improperly clothed people who live in filth and squalor. There are certain nationalities and classes of people is all our great cities that would be almost wiped out if cholera should strike us." wiped out if cholera should strike us."
"The health officers of Omaha should see
to it that this city is placed in a position

least liable to encourage the propagation of the disease. A good, all round cleaning up will do the city good at any rate and it would place us on the safe side."

THE CITY'S HEALTH.

An Indignant Citizen Has a Word to Say About the Garbage Nuisance. OMANA, Aug. 26,-To the Editor of THE Baz: I noticed that in a brief editorial in your valuable raper you recently called attention to the fact that if choicra had reached Hamburg it had come too near this country for our comfort and the question of garbage and cleaning the city will soon assume supreme importance. I quite agree with you in this, but the difficulty seems to be to find anyone who will take sufficient interest in the matter to see that the city is

Of course it is unreasonable to expect that the gentlemen who hold positions entitled "health inspectors," which positions were

kept in a state of healthy cleanliness.

given to them for faithful nobtical service, can neglect their own private affairs to look after the city, as some people unjustly seem to think they should do, and I know one of the gentlemen in question has his time fully occupied in horsetrading and such like profitable occupations, and he cannot be expected to fool away his time in looking after the saultary condition of the city.

anitary condition of the city.

At present I will only call your attention to one case and that is a barn situated at 532 South Twenty-ninth avenue, which is kept in a most filthy condition, and if cholera does

reach this city will be a fruitful cause for the propagation of this fearful scourge. Some ministerial gentlemen from outside of this city were for the last few days visiting in the neighborhood and the stenen from that barn almost overcame them, and per-fumes had to be resorted to to prevent faint

AN OMAHA BOY STRICKEN.

Judge Neville's Son a Victim of the Cholera In Germany.
A son of Judge James Nevilie is lying dangerously ill with the cholera at Hamburg, Germany.

This was the word received yesterday morn ing by George Fox, who bascharge of Judge Neville's property in Omaha. He received a cablegram from Hamburg from young Neville, who stated that he was one of the cholera victims and was very ill but did not

anticipate serious results.

Young Neville has been in Hamburg for several years completing his studies preparatory to entering upon the practice of medicine. It is not known how he became exposed to the scourge but it is thought that he was anticipate serious results. one of the incuical students who volunteered to work in the cholera districts.

A Remable Man.

M. J. Griner, a justice of the peace at Print, Mich., says one bottle of Chamberlam's Cohe, Choiera and Diarrhœa Remedy saved his life. He had been down with bloody flux for three weeks when he commenced using this medicine. It soon cured him and he believes saved his life. He also says it saved the lives of three railroad men in that vicinity. 'Squire Griner is a reliable and conscientious man, and whatever he says can be depended upon.

In Railroad Circles.

A report comes from Chicago that Jay Gould has become interested in a new sleeping car and proposes being independent of both the Wagner and the Pullman companies. The story goes so far as to say that Le has made his first move in the new scheme by putting a number of the cars on the Union Pacific.

At headquarters this statement is laughed

at as an amusing but baseless attempt at a sensation. Ascalon commandery of St. Louis used several of the cars in question in its journey to and from the Knights Templar conclave at Denver, and it nappened to travel over the Union Pacific. The latter railroad was not concerned in the new sleep-ers beyond hauling, and this passing incident

is used to give color to the story.

The new sleeper was patented by a man named Krehbiel, and it is being manufactured at St. Charles, Mo. 1t is so contrived that during the day it resembles a parlor car with seats that turn upon pivots. By touching a number of buttons the seats are transformed into berths, the tops of the high backs making the uppers. The partitions between the berths are of cloth, and the aisle is at the side of the car. General Freight Agent Crosby of the

Young Christians.

The closing session of the fourth annual convention of the Young People's Presby terian society of the Missouri valley was held Thursday evening.

After the usual devotional exercises W. M. Curry of Nortonville, Kan., delivered an address on co-operation which was well received. Then came the opening of the ques-tion box. As the questions were read any one of the delegates who desired to was permitted to offer an answer. As all of the bits of paper in the box referred to the work undertaken by the society the members consid ered that the discussion was a benefit, as many new ideas were expressed. It was decided not to hold any more general confer ences, so hereafter the different presbyteries will hold their own conference. The delegates from abroad left yestdrday

GREAT ACTIVITY IN MOST LINES OF TRADE

Their Hands Fall and Orders for Two Weeks Ahead-A Bright Outlook--Clearing Rouse Statements.

apprehension. Moderate exports and better crop reports lead to lower prices. Wheat receipts in the west in four days of this week have been 3,295,593 bushels, while Atlantic exports have been only 1,174,680 bushels, and the price has declined almost 2 cents to 80% cents for August. The certainty that foreign crops, however, in doubt as yet, will at all events be much better than those of last year, helps

price is unchanged at 6314 cents, and oats are a shade stronger at 39 cents. Affected by the Cholera,

boot and shoe shops, very busy with encouraging orders from the west and better southern collections. Dry goods are active and textiles are worked to near their full ca-pacity, the clothing demand for woolens surprising the producers, and taxing them to the utmost. Trading in oil is more encouraging, but in chemicals steady with slow collections, and in paints and liquors quiet. At Pittsburg raw iron is slightly weake though some of the works have not yet finished repairs, and the window glass work will not all be in operation until the end o

Trade at Cleveland is good with better de mand for money.

At Cincinnati the hardware trade is 10 per cent better than a year ago, and in paper and paper bags much better, with general trade

and in all equal to last year's. Collections

and 33 in cured mests and 66 per cent in flour, compared with last year, but some de-crease in other articles.

Needed rains have greatly helped crops in

ree are all busy.

Omaha Receives Large Orders. At Omaha orders for dry goods and gro-

At St. Paul business is brisk, with good crop reports, and at Minneapolis the lumber trade is especially strong and the flour out-put 202,000 barrels, against 185,000 last year.

All manufacturers are now doing well. All manufacturers are now doing well.

Nearly all the iron mills have resumed work since the settlement of wages at Pittsburg and in Ohio with good demands for the material product, but the production apparently noreases more, as pig iron is weak at Pitts-burg. There is some demand for finished products and general activity. Copper and in are steady and lead has a firmer look The injunction in New Jersey against the Reading coal combine, as unlawful came on the same day with another advance in price and since the leases were made prices have advanced about \$1 per ton on the average.

The woolen manufacture is crowded with work and sales of heavy weights for the season are thought to have been never exceeded. More life is seen in cottons, with decided improvement in South American demands, and print cioths are strong with sales of some works covering April's production. Hosiery is quiet but very active and the carpet trade good with prices on the whole as low as ever. Sales of wool at the chief mar-

competition from new works is sharp. The business failures occurring throughout

Appears Encouraging.

Cotton and Woolen Manufacturers flave

NEW YORK, Aug. 26. -R. G. Dun & Co's. Weekly Review of Trade says: In all aspects the business situations appear more favorable than a week ago. There has been general, though moderate improvement in distribution; manufacturers are more fully employed, several great labor controversies have ended and crop reports are somewhat more satisfactory. A little more gold has gone abroad-and imports of merchandise are still enormous, for three weeks at New York 48% per cent larger than for the same weeks last year, while in exports from New York the increase for the three weeks is only about 41/4 per cent, but the shipments last year were phenomenal, and it is encouraging that they are not diminished: excess of imports over exports continues later in the season than usual, but

Accounts of cholera in Russia have caused heavy unloading of pork, which has failed \$1 per barrel, and hogs are 25 cents and lard a fraction lower, while oil has also declined a fraction. Cotton is further depressed to 714 cents by the great accumulation of unsold stocks and better reports of the coming crop but while in other speculative markets have been small for the week, those of cotton
