City Connoil Looks Over the Route of the Proposed Paul Railway.

SOME STREETS THAT WILL BE TAKEN

Description of the Thoroughfares Over Which Right of Way is Asked-Opinions of the Councilmen-

Another Meeting Promised. The city council and several newspaper men met at the city building yesterday afternoon and took a drive in carriages to the part

of the city where the Union Land and Improvement company proposes to lay its new railway track. John W. Paul, one of the members of the company, furnished the carriages, and accompanied the party to point out the proposed route, in order that the council might act intelligently when it comes to consider the ordinance for the right of way which is now pending.

From Thirtcenth avenue, where the new oad is to connect with the Wabash road, to Eighth, where it will meet the Union Pacific, Mr. Paul asks for a right of way over most of the streets and alleys in Fleming & Davis' addition, but he does not propose to lay tracks on the streets excepting so much as may be necessary to connect with the other roads. In that distance-five blocks-he will obtain connections with the Union Pacific,

Northwestern, Rock Island, Burington, Milwaukee and Wabash. At Eighth avenue the line will strike Eighteenth street, and according to present plans will occupy that street as far north as avenue G. The property owners on this street raised a howl a few weeks ago when they learned that the granting of the right of way on the street was talked of, and the council took particular pains to notice how many houses there were. So far as could be seen, there were not more than half a dozen houses. A number of the people who own property on the street have agreed not to

The council viewed all the land as far north as the river. They then re-turned to the city building, but it was too late to take any action. The matter is still in the hands of the judiciary committee, who will draw up a new ordinance containing some provisions which the aldermen have proposed, and the amended ordinance will me up for consideration at the next meeting, which will probably be September 5.

Another meeting of the committee of the whole will be held next Wednesday morning at 8 o'clock, when the council will examine a number of things which it was the intention to look after yesterday, but which had to be skipped on account of lack of time.

FOUGHT TO THE DEATH. Fifteen Hundred Men Kuled in a Venezeula

Battle. New Yonk, Aug. 26.-The steamer Cara-

cas, which left La Guayra, Venezuela, August 20, arrived here today and brought information of considerable fighting in that country between the government forces and the revolutionist forces. The Venezuelan consul here received news that General Crospo, chief of the revolutionists, was in retreat. The last bulletin showed him to be at San Juan de Los Moros, and the govern-ment soldiers were pressing him closely. Many of his followers were deserting him and his army was made up of cowboys prin-

cipally. As reported in the telegraphic dispatches, a severe engagement took place just before the steamship sailed, at Cudad, Bolivia details of which are now at hand. The bat tie occurred outside of the town when eral Caleras caused a charge to be made en the enemy. The revolutionists stood their ground firmly and suffered considerable loss. They next met the government troop with machettes and fought with great fury The soldiers of Caieras were repulsed of

this charge and fell back, carrying their wounded. After a short rest the troops were reformed and a ain attacked the revels. The fighting became general. Caleras rode at the head of his men and urged them on. He was cut off from the main body of his little army and with half a dozen of his men found bimself surrounded by a large number of the enemy all eager to kill him. He fought for his life as stubbornly as he could, but he was finally knocked off his horse and killed. The government forces rallied and forced the rebels to retreat.

The consul's advices from the government at Caracas contain the news of an important and bloody fight that took place August 0, near Villa de Cura, in which 1,500 men are said to have been killed or wounded. General Vallonilla had concentrated 2,000 men some distance from him. General Mendosa is considered the bravest and ablest of Venezuelan generals. He planned to lead the revolutionists under Vailonilla into an am bush and destroy them. He sent a force of 800 men from his army noder command o General Zolaoga to march where the rebels were, His instructions to Zolaoga were to approach the enemy and apparently offer them battle. When they should commence to fight, the government troops were not to live in return, but were to slowly retreat and draw the enemy on unti the main army appeared, when a general on slaught would be made and the revolutionary army destroyed. Zolnoga drew near to the force of the revolutionists and was attacked. Their fire told with great effect and the government general fell dead. A evening calamity sheet makes the startling announcement that 'a mbeting was called in the Third ward Thursday evening for the purpose of organizing a Harrison club and that a change of heart was experienced by those present and a people's party club formed instead. It is not generally known, but it is nevertheless

A fact that a large majority of people, suffer from catarri in one or another of its many phases. These involve all those portions of the body that can be affected by an inflammation of the muccula and the affected by an inflammation of the muccula membrane. The head, the eye, the nose, the cal the throat, the lungs and stomach, and ill the vital parts of the body become involved under the malignant influence of the disease, and the most pain-ful, dangerous and fatal results attend its growth Catarrh is greatly prevalent in this climate Why is should be so is not fully explained, but that it is so the general suffering from this disease fully attests. One result of this is the education of physicians to treat catarrh as a specialty. The average physici n knows intle or nothing of the disease and treats it by the ridest and most caus tic methods, torturing, butning and applying acids to the affected parts and subjecting the patient to methods that are truly primitive.

The catarrhal specialist, however, applies pal-liative methods. He cures by mild and painless treatment. No specialists in the country have ac quired a greater reputation than Drs. ### Postponed the Meeting.

The rally which was to have been given this evening at Pivonka's hall by the Young Men's Republican club has been postponed until Thursday evening at Knights of Pythias hall. This postponement is made necessary because of a misunderstanding in regard to securing Pivonka's hall, it having been engaged for another purpose without the knowledge of the committee.

The club has leased the Knights of Pythias hall for each Thursday night from now until after the November election and will hold weekly meetings, unless the South Omaha Republican club concludes to take the hall for two meetings each month.
